## Letter to Contract Holders

December 31, 2019

The decade of the 2010's ended on a high note for investors, as nearly every asset class delivered strong returns in 2019. This represented a notable turnaround from late 2018, when many analysts and pundits saw a looming recession coming for the U.S. Not only did a feared recession fail to materialize, but the U.S. officially registered its longest economic expansion on record and a new bull market for stocks emerged. Bonds also had a standout year, boosted by lower interest rates and solid corporate cash flows.

Looking at U.S. equities, large capitalization stocks, as represented by the S&P 500<sup>®</sup> Index<sup>1</sup>, were the top performers, while the S&P MidCap 400<sup>®</sup> and S&P SmallCap 600<sup>®</sup> Indices also posted strong returns amid optimism about the resilience of the U.S. economy. While global economic growth slowed, international stocks nearly matched U.S. equity returns. Emerging market equities trailed developed economies somewhat, but still showed strength in rebounding from a difficult 2018.

Also helping to drive performance for the period was a wave of central bank monetary easing. The U.S. Federal Reserve (the "Fed") had raised interest rates four times in 2018 and signaled further tightening even as growth began to slow. In January 2019, however, the Fed changed course and indicated a more accommodative stance. Three interest rate cuts followed throughout 2019, which encouraged investors and boosted markets. Other central banks around the globe followed the Fed's lead and either cut rates or strengthened monetary stimulus programs, supporting equities worldwide.

The bond market, as represented by various Bloomberg Barclays<sup>®</sup> Indices, also benefited from lower interest rates, with most bond classes up substantially for the year. This simultaneous bull market for both stocks and bonds is somewhat unusual, as bond returns ordinarily have a slightly negative correlation with equity returns. Sustained low inflation and the Fed's decision to respond to the early signs of economic weakness with lower interest rates both contributed to this reversal of the usual pattern.

Among bonds, high quality corporate bonds had the highest returns, followed closely by high yield corporate bonds. As interest rates fell, investors hungry for yield moved towards corporate bonds, compressing the spread, or difference in yield, between corporate bonds and U.S. Treasuries. U.S. Treasuries and mortgage-backed securities also continued to deliver solid returns and risk reduction for equity investors.

The U.S. dollar strengthened for much of the year due to comparatively high interest rates, but declined with the Fed's rate cuts, ending the year nearly flat against most major currencies. While yields on bonds in the U.S. decreased, they remained competitive in comparison to much of the developed world, particularly Europe and Japan.

U.S. economic growth slowed somewhat in 2019, but the economy impressed investors with its resilience and durability. While GDP growth of 2.4% through the third quarter wasn't high by historical standards, it defied the pessimistic forecasts of late 2018, when many investors were concerned about slowing global growth and a possible recession. Instead, the U.S. economy expanded for its 126th consecutive month as of December 2019, marking the longest period of sustained economic growth in the nation's history.

The economic expansion continued to lift the labor market, where unemployment hit a 50-year low of 3.5% in 2019. Wages also increased, albeit at a moderate pace, as inflation remained tame. Despite a slight uptick in December 2019, inflation remained below the Fed's inflation target of 2% for most of the year. Persistently low inflation allowed the Fed to extend the business cycle with lower interest rates.

Despite the strong performance of most asset classes, there were a number of concerning developments. The environment for global trade deteriorated in 2019, partially due to the trade dispute between the U.S. and China. While the two countries reached a "phase one" deal at the end of 2019, a number of disagreements remained, and global trade growth stalled. In addition, Middle East tensions flared up, raising tensions between the U.S. and Iran. Although global growth remained positive, economic activity continued to slow in China, a country that has been an engine of growth for the world economy.

For investors looking ahead to the new decade, it's worth recalling where we were 10 years ago. The 2000s saw very modest equity and bond returns, one of the worst decades on record, and recovery from the financial crisis had only just begun. Some pundits at the time were predicting a period of secular stagnation and persistently low GDP growth and investment returns. Instead, we saw uninterrupted growth and perhaps the most impressive bull market in modern history, with remarkable returns for both bonds and equities.

This is a valuable reminder that as much as we may analyze markets, the future is difficult to predict. Investors who backed away from markets in 2009 missed out on substantial returns. The best way to be positioned for whatever the next decade might bring is with a properly diversified portfolio. As with all financial decisions, we recommend consulting with a financial professional to explore the right mix of securities for your portfolio. We encourage you to work closely with your financial professional to navigate the financial markets so that you will be prepared for the years and decades to come.

# Expense Examples (unaudited)

## EXAMPLE

As a shareholder of each Portfolio, you incur two types of costs: (1) transaction costs and (2) ongoing costs, including management fees and other Portfolio expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Portfolios and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period (July 1, 2019 to December 31, 2019).

## ACTUAL EXPENSES

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

## HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The second line of the table below for each Portfolio provides information about hypothetical account values and hypothetical expenses based on each Portfolio's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Portfolio's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in a Portfolio and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs or separate account charges. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs or separate account charges were included, your costs would have been higher.

	Beginning Account Value July 1, 2019	Ending Account Value December 31, 2019	Expenses Paid During Period July 1, 2019 to December 31, 2019*	Annualized Expense Ratio

\* Expenses are equal to the Portfolio's annualized expense ratio, multiplied by the average account value over the period, multiplied by 184/365 (to reflect the one-half year period). Expenses are based on the direct expenses of the Portfolio and do not include the effect of the underlying Portfolios' expenses which are disclosed in the Fee and Expense table and described more fully in a footnote to that table in the Prospectus.

# Growth Stock Portfolio (unaudited)

---

**Objective:**

Long-term growth of capital. Current income is a secondary objective.

**Portfolio Strategy:**

Invest in the equity securities of medium and large capitalization companies exhibiting the potential for earnings growth or share price appreciation.

**Net Assets:**

\$1.1 billion

## PORTFOLIO OVERVIEW

Mason Street Advisors, LLC (“Mason Street Advisors”), the investment adviser for the Growth Stock Portfolio (the “Portfolio”), has engaged T. Rowe Price Associates, Inc. (“T. Rowe Price”) to act as sub-adviser for the Portfolio. T. Rowe Price was appointed sub-adviser to the Portfolio effective November 14, 2019. Prior to that time, the Portfolio was sub-advised by Mellon Investments Corporation (“Mellon”). The Portfolio invests in “blue chip” growth companies, which are companies that are well established in their industries and have the potential for above-average earnings growth. The Portfolio looks for companies with leading market positions, seasoned management, and strong financial fundamentals. The Portfolio’s investment approach reflects the belief that solid company fundamentals (with an emphasis on the potential for strong growth in earnings per share or operating cash flow) combined with a positive outlook for a company’s industry will ultimately reward investors with strong investment performance. The Portfolio may look for companies with good prospects for dividend growth.

## MARKET OVERVIEW

U.S. stocks surged in 2019, with several major indices hitting all-time highs in the second half of the year. The U.S. Federal Reserve’s decision to keep rates steady in the first half of the year and then reduce them three times starting in July was a major driver of market performance. Trade discussions between the U.S. and China also drove market sentiment throughout the year. Speculation arose numerous times during the year that the two countries were “close” to reaching an agreement, although occasional tensions seemed to reduce its likelihood. A preliminary “phase one” trade deal was finally agreed upon in December, supporting investor enthusiasm into the end of the year. As part of the agreement, the U.S. would plan to lower or cancel the scheduled tariff rate on various Chinese goods. The agreement would also require “structural reforms and other changes to China’s economic and trade regime in the areas of intellectual property, technology transfer, agriculture, financial services and currency and foreign exchange”.

The Russell 1000® Growth Index posted positive returns during the twelve-month period ended December 31, 2019. As measured by various Russell U.S. indices, large-cap shares outperformed their smaller peers. Growth stocks soundly outperformed value across all market capitalizations.

## PORTFOLIO RESULTS

The Portfolio returned 29.68% for the twelve months ended December 31, 2019. By comparison, the Portfolio’s benchmark, the Russell 1000® Growth Index (the “Index”), returned 36.39%. (The Index is unmanaged, cannot be invested in directly and does not incur expenses.) According to Lipper® Analytical Services, Inc., an independent mutual fund ranking agency, the average return in 2019 of the Large Cap Growth Funds peer group was 33.19%.

As noted above, prior to November 14, 2019, the Portfolio was managed by Mellon. With respect to the period prior to November 14, 2019, the Portfolio’s underperformance was largely attributable to stock selection in the Communication Services sector. Pinterest fell on negative sentiment from slowing advertising demand. Twitter declined due to transitory technical issues, while key metrics such as “daily active users” showed improvement. The Portfolio’s lack of exposure to Facebook, Inc. detracted from relative results as the company reported better-than-expected earnings. Stock selection in the Health Care sector also weighed on relative performance this year. Varian Medical Systems, Inc. moved lower on concerns around margin leverage and slowing Asia Pacific ex-China orders. Align Technology, Inc. declined as investors responded negatively to disappointing China growth numbers.

The following performance attribution comments relate to the period November 14, 2019 through December 31, 2019, during which time T. Rowe Price acted as the Portfolio’s sub-adviser.

Stock selection in the Consumer Discretionary sector contributed to strong relative results during the period, led by Alibaba Group Holding. Shares of the company traded higher as continued user growth, particularly in lower-tier cities, fueled better-than-expected topline results in its core e-commerce business. Shares received an additional boost following strong demand for its Hong Kong IPO, with proceeds expected to be deployed strategically to fund cloud and entertainment

# Growth Stock Portfolio (unaudited)

initiatives, as well as fend off domestic e-commerce competitors. The Communication Services sector also aided relative returns, mainly due to stock picks, such as Tencent Holdings.

## PORTFOLIO MANAGER OUTLOOK

The following forward-looking comments are the opinion of T. Rowe Price, the Portfolio's sub-adviser.

T. Rowe Price managers believe that the long duration of the current bull market is not a particular concern. Rather than dying of old age, bull markets often succumb to one of four ills: an economic downturn, regulatory or policy uncertainty, Federal Reserve policy errors, or valuation excess. On balance, current signals suggest slightly positive returns for the market in 2020, with a highly accommodative Federal Reserve likely to offset significant volatility caused by the regulatory and political environment. Nevertheless, the possibility of extreme outcomes in either a negative or positive direction appears higher than in recent years.

**Relative Performance**

— Growth Stock Portfolio  
— Russell 1000® Growth Index

**Average Annual Total Returns  
For Periods Ended December 31, 2019**

	1 Year	5 Years	10 Years
Growth Stock Portfolio	29.68%	12.13%	12.64%
Russell 1000® Growth Index	36.39%	14.63%	15.22%
Lipper® Variable Insurance Products (VIP) Large Cap Growth Funds Average	33.19%	13.73%	14.18%

fees. Please refer to the Benchmark Definitions section of this report for information about the indices cited in the above chart and graph.

The Portfolio may invest a relatively high percentage of its assets in a particular sector. The Portfolio will have greater exposure to the risks associated with that sector and its performance will be tied more closely to the performance of the sector.

# Focused Appreciation Portfolio (unaudited)

---

**Objective:**

Long-term growth of capital.

**Portfolio Strategy:**

Invest in equity securities selected for their growth potential.

**Net Assets:**

\$1.0 billion

## PORTFOLIO OVERVIEW

Mason Street Advisors, LLC (“Mason Street Advisors”), the investment adviser for the Focused Appreciation Portfolio (the “Portfolio”), has engaged Loomis, Sayles & Company, L.P. (“Loomis Sayles”) to act as sub-adviser for the Portfolio. The Portfolio invests primarily in the equity securities of companies selected for their growth potential. The Portfolio focuses on equity securities of large capitalization companies but may invest in companies of any size. The Portfolio employs a growth style of equity management that emphasizes companies with sustainable competitive advantages, long-term structural growth drivers, profitable cash flow returns, and management teams focused on creating long-term value for shareholders. The Portfolio invests primarily in a core group of 30-40 securities, but may exceed this range.

## MARKET OVERVIEW

U.S. equity market returns were very strong during the reporting period as asset prices rebounded from depressed valuations following market turmoil in late 2018. Growth strategies continued to outperform value strategies, consistent with the three- and five-year trends. Large- and small-cap stocks performed roughly in line with each other.

## PORTFOLIO RESULTS

The Portfolio returned 31.97% for the twelve months ended December 31, 2019. By comparison, the Portfolio’s benchmark, the Russell 1000® Growth Index (the “Index”), returned 36.39%. (The Index is unmanaged, cannot be invested in directly and does not incur expenses.) According to Lipper® Analytical Services, Inc., an independent mutual fund ranking agency, the average return in 2019 of the Large Cap Growth Funds peer group was 33.19%.

Main drivers of the Portfolio’s underperformance included stock selection in the Information Technology and Industrials sectors as well as positioning in the Information Technology, Consumer Staples and Energy sectors. From an individual security perspective, the decision to not own Apple Inc. was significant in holding back relative returns.

On the positive side, Facebook, Inc., Alibaba Group Holding Ltd. and Visa, Inc. were among the top contributors to the Portfolio’s relative returns. Stock selection in the Consumer Discretionary and Communication Services sectors as well as positioning in the Industrials sector also contributed to relative performance.

During the period, the portfolio manager took advantage of price weakness to take positions in NVIDIA Corporation and Roche Holding AG, and add to several of the high quality growth companies in the Portfolio, including Monster Beverage Corporation, Novartis AG, Regeneron Pharmaceuticals, Inc. and Schlumberger, Ltd. The purchases were funded by reducing positions in Alcon, Inc., American Express Company, Danone SA, FactSet Research Systems, Inc., Procter & Gamble Company, Qualcomm Incorporated, Starbucks Corporation and Varian Medical Systems, Inc. A position in United Parcel Service, Inc. was exited as it approached the portfolio manager’s estimate of intrinsic value.

## PORTFOLIO MANAGER OUTLOOK

The following forward-looking comments are the opinion of Loomis Sayles, the Portfolio’s sub-adviser.

We believe that markets are efficient in the long run. In the near term, however, we believe that innate behavioral biases, such as herding, overconfidence and loss aversion influence investment decisions and create asset pricing anomalies. These pricing inefficiencies converge toward intrinsic value over time. Market efficiency is therefore dynamic, existing along a continuum between fully efficient and inefficient pricing. Therefore, we attempt to determine intrinsic value and exploit the long-term difference between this value and the market’s current perception. We look to invest in those few high quality businesses with sustainable competitive advantages and profitable growth when they trade significantly below intrinsic value.

Our investment process is characterized by bottom-up fundamental research and a long-term investment time horizon. All aspects of our quality-growth-valuation investment thesis must be present simultaneously for us to make an investment. Often our research is completed well in advance of the opportunity to invest. We are patient investors and maintain coverage of high quality businesses in order to take advantage of meaningful price dislocations when they occur. The nature of the process leads to lower turnover based on stock selection. Relative to the Russell 1000® Growth Index, we are

# Focused Appreciation Portfolio (unaudited)

currently overweight in the Consumer Staples, Consumer Discretionary, Health Care, Energy, Financials and Communication Services sectors. We are underweight in the Information Technology and Industrials sectors. We hold no positions in the Real Estate or Materials sectors.

## Relative Performance

— Focused Appreciation Portfolio  
 - - Russell 1000® Growth Index

## Average Annual Total Returns For Periods Ended December 31, 2019

	1 Year	5 Years	10 Years
Focused Appreciation Portfolio	31.97%	15.69%	13.69%
Russell 1000® Growth Index	36.39%	14.63%	15.22%
Lipper® Variable Insurance Products (VIP) Large Cap Growth Funds Average	33.19%	13.73%	14.18%

*The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance information visit [www.northwesternmutual.com](http://www.northwesternmutual.com).*

*This chart assumes an initial investment of \$10,000 made on 12/31/09. Returns shown reflect fee waivers, deductions for management and other portfolio expenses, and reinvestment of all dividends. In the absence of fee waivers, total return would be reduced. Returns exclude deductions for separate account sale loads and account fees. Please refer to the Benchmark Definitions section of this report for information about the indices cited in the above chart and graph.*

*As a non-diversified portfolio, the Portfolio may hold fewer securities because of its focused investment strategy. Holding fewer securities increases the risk that the value of the Portfolio could go down because of the poor performance of a single investment.*

*The Portfolio may invest a relatively high percentage of its assets in a particular sector. The Portfolio will have greater exposure to the risks associated with that sector and its performance will be tied more closely to the performance of the sector.*

# Large Cap Core Stock Portfolio (unaudited)

---

**Objective:**

Long-term growth of capital and income.

**Portfolio Strategy:**

Invest primarily in common stocks of large capitalization U.S. companies.

**Net Assets:**

\$633 million

## PORTFOLIO OVERVIEW

Mason Street Advisors, LLC (“Mason Street Advisors”), the investment adviser for the Large Cap Core Stock Portfolio (the “Portfolio”), has engaged Wellington Management Company LLP (“Wellington”) to act as sub-adviser for the Portfolio. The Portfolio allocates its assets across a variety of industries, selecting companies in each industry based on the research of a team of global industry analysts. The Portfolio typically seeks to maintain representation in each major industry represented by broad-based, large cap U.S. equity indices. The Portfolio utilizes a “bottom-up” approach, which is the use of fundamental analysis to identify specific securities for purchase or sale. Fundamental analysis of a company involves the assessment of a variety of factors, including the company’s business environment, management quality, balance sheet, income statement, anticipated earnings, revenues and dividends, and other related measures or indicators of valuation and growth potential. The Portfolio’s sector exposures generally conform with the sector weights present in the Portfolio’s benchmark index.

## MARKET OVERVIEW

U.S. equities, as measured by the S&P 500® Index, posted positive results for the twelve months ended December 31, 2019. U.S. equities rose as the U.S. economy remained resilient despite elevated geopolitical uncertainties and slowing global growth. U.S.-China trade relations were volatile in the absence of meaningful compromises on key structural issues. The U.S. Federal Reserve (the “Fed”) lowered its benchmark interest rate in July and September by a combined 0.50% to sustain economic expansion and mitigate the risks of slowing growth and trade frictions. U.S. equities surged in the fourth quarter of 2019 as stocks benefited from waning recession fears, accommodative Fed policies, including another 0.25% rate cut in October, and improved U.S.-China trade sentiment in December.

Returns during the period varied by market capitalization. Large cap stocks, as measured by the S&P® 500 Index, outperformed mid- and small-cap stocks, as measured by the S&P MidCap 400® Index and Russell 2000® Index.

## PORTFOLIO RESULTS

The Large Cap Core Stock Portfolio returned 31.19% for the twelve months ended December 31, 2019. By comparison, the S&P 500® Index (the “Index”) returned 31.49% for the year. (The Index is unmanaged, cannot be invested in directly and does not incur expenses.) According to Lipper® Analytical Services, Inc., an independent mutual fund ranking company, the average return in 2019 for the Large Cap Core Funds peer group was 28.86%.

The Portfolio’s relative performance during the period was helped by strong stock selection in the Information Technology and Industrials sectors, offset by weak stock selection in the Consumer Discretionary and Consumer Staples sectors.

Top individual relative detractors included Apple Inc., TD Ameritrade and Anthem Inc. The Portfolio’s underweight to Apple Inc. weighed on performance as the Information Technology giant’s shares rose after second quarter earnings results beat expectations. Relatively favorable iPhone results and strong services and wearables revenue supported Apple’s stock price. The Portfolio’s position in out-of-benchmark Financials company TD Ameritrade, an online brokerage company, also hindered relative results. Shares fell sharply in September after market leader Charles Schwab announced plans to eliminate commission charges for trading in U.S. stocks, ETFs and options. Shares later rebounded on news that Charles Schwab agreed to acquire TD Ameritrade for a premium. The Portfolio’s overweight to Anthem, a U.S.-based managed Health Care company, detracted from relative performance. Anthem shares declined as the company continued to face political headwinds.

Leading contributors to relative performance during the period included two stocks from the Information Technology sector, Advanced Micro Devices (“AMD”) and Global Payments Inc. The Portfolio’s overweight to semiconductor maker AMD was the largest contributor to relative performance. The company’s shares rose toward the end of the reporting period following Microsoft’s unveiling of several new Surface laptops using AMD central processing unit chips. Investors viewed this development favorably in terms of AMD’s competitive positioning against its rival, Intel. The Portfolio’s overweight to Global Payments, a company whose products help merchants accept multiple kinds of payments to improve efficiency, also bolstered relative results. The company reported a series of positive quarterly earnings results and announced their acquisition of Total System Services. Not holding Johnson & Johnson, a developer of medical devices,

# Large Cap Core Stock Portfolio (unaudited)

pharmaceuticals and consumer packaged goods, was also a strong contributor to relative performance. Concerns about lawsuits regarding its talc-based baby powder and its alleged role in the opioid crisis weighed on the company's stock.

## PORTFOLIO MANAGER OUTLOOK

The following forward-looking comments are the opinion of Wellington, the Portfolio's sub-adviser.

We believe that the U.S. manufacturing economy is being pulled in opposite directions by easier financial conditions on the one hand and the uncertainty about the trade dispute with China on the other. Ultimately, we think President Donald Trump will likely choose the economy (his greatest strength in the polls) over being tough on China as a result of political considerations. Meanwhile, consumers continue to enjoy solid job gains and a strong housing market. Therefore, we expect uncertainty to diminish and for the economy to maintain its solid, if unspectacular, growth.

For 2020, our U.S. macroeconomic team is encouraged by improving leading economic indicators, receding tail risks and the fact that markets are no longer pricing in much central bank support. We continue to hold a moderately bullish view on U.S. equities.

# Large Cap Blend Portfolio (unaudited)

---

**Objective:**

Long-term growth of capital and income.

**Portfolio Strategy:**

Invest primarily in equity securities of U.S. large capitalization companies listed or traded on U.S. securities exchanges.

**Net Assets:**

\$175 million

## PORTFOLIO OVERVIEW

Mason Street Advisors, LLC (“Mason Street Advisors”), the investment adviser for the Large Cap Blend Portfolio (the “Portfolio”), has engaged Fiduciary Management, Inc. (“FMI”) to act as sub-adviser for the Portfolio. Normally, the Portfolio invests in equity securities of large capitalization companies listed or traded on U.S. securities exchanges. In selecting investments, greater consideration is given to potential appreciation and future dividends than to current income. The Portfolio uses fundamental analysis to look for stocks of good businesses that are selling at value prices. The Portfolio employs a focused investment strategy, typically investing in a core group of 20-30 large capitalization common stocks and American Depositary Receipts.

## MARKET OVERVIEW

The U.S. equity market, as measured by the S&P 500<sup>®</sup> Index, produced a robust gain of more than 31% this year, despite slowing worldwide growth along with weak industrial production and investment. Furthermore, U.S. earnings growth declined for three straight quarters. In 2019, central bankers responded to the increasingly fragile and uncertain outlook as they have historically, by easing monetary policy. Equity valuations were elevated by historical standards, suggesting that investors believed that extremely low interest rates would persist in the long term.

Corporate pretax profits as measured by the Bureau of Economic Analysis were down 13% from five years ago. However, lower tax rates and large multinational companies’ ability to reduce their tax burdens helped to drive S&P 500<sup>®</sup> Index profits up 31% during this time. On a pretax basis, S&P 500<sup>®</sup> Index earnings have grown modestly over the past five years, yet the Index has risen by 75% since the end of 2014.

## PORTFOLIO RESULTS

The Portfolio returned 23.97% for the twelve months ended December 31, 2019. By comparison, the Portfolio’s benchmark, the S&P 500<sup>®</sup> Index (the “Index”) returned 31.49%. (The Index is unmanaged, cannot be invested in directly and does not incur expenses.) According to Lipper<sup>®</sup> Analytical Services, Inc., an independent mutual fund ranking agency, the average return in 2019 of the Large Cap Core Funds peer group was 28.86%.

Most stocks gained for the reporting period but high-multiple growth stocks generally posted the strongest advances. Given this market dynamic, the Portfolio’s valuation-sensitive investment approach led to underperformance relative to the broad market. For example, Apple Inc. (which the Portfolio does not own) gained 29% in the fourth quarter of 2019 and 89% for the full year.

The Portfolio’s significant underweight exposure in the Information Technology sector hurt relative performance. Not owning Apple Inc. was a leading detractor. Other detractors included HD Supply Holdings Inc. and Berkshire Hathaway, Inc. Positive contributors for the year included Masco Corporation, Accenture PLC, Dollar General Stores and Cerner Corporation.

## PORTFOLIO MANAGER OUTLOOK

The following forward-looking comments are the opinion of FMI, the Portfolio’s sub-adviser.

We believe that stock markets that depend on multiple expansion to deliver performance are dangerous. Fundamentals should drive stock performance over time; everything else is speculation. People are fixated on tropes such as, “interest rates and inflation will never be a problem” and “investors should own the most popular growth stocks and we are in a new valuation era.” There are no new eras in finance and investing. Excesses always evaporate.

We view the current environment as the exception, not the rule. For example, while markets regard easy money as a bullish signal, we view it as a sign of desperation. In the long run, we expect to see a reversion to the mean, not only for interest rates and asset valuations, but also for value versus growth. We are currently finding the most value in cyclical businesses that have lagged in such a strong market. As the valuation spread between what is working and what is left behind continues to widen, we expect a higher level of Portfolio activity.

# Large Cap Blend Portfolio (unaudited)

We do not follow the herd and are working diligently to prepare for the inevitable change that comes to all markets.

## Relative Performance

# Index 500 Stock Portfolio (unaudited)

---

**Objective:**

Investment results that approximate the performance of the S&P 500® Index.

**Portfolio Strategy:**

Invest in stocks that make up the S&P 500® Index, holding each stock in approximately the same proportion as its weighting in the Index.

**Net Assets:**

\$3.9 billion

## PORTFOLIO OVERVIEW

Mason Street Advisors is the investment adviser for the Index 500 Stock Portfolio (the “Portfolio”). The Portfolio seeks investment results that approximate the performance of the S&P 500® Index, which is composed of the stocks of primarily large capitalization companies that represent a broad spectrum of the U.S. economy and a substantial part of the U.S. stock market’s total capitalization. The Portfolio attempts to achieve its objective by investing all, or substantially all, of its assets in the stocks that make up the S&P 500® Index, holding each stock in approximately the same proportion as its weighting in the Index. This is known as a full replication strategy. The Portfolio may also invest in S&P 500® Index stock futures and, to a lesser extent, purchase (long) total return equity swap agreements to help achieve full replication.

## MARKET OVERVIEW

U.S. equity markets gained sharply during the reporting period, accelerating to record highs by the end of 2019. The markets’ strong performance was driven in part by solid domestic economic growth amid rising wages, historically low unemployment and strong consumer spending. Diminishing concerns about the state of the global economy and trade landscape also bolstered equities, as progress was made on trade agreements between the U.S. and China and between the U.S. and its North American trade partners. Equity markets got a substantial boost from a more accommodative interest rate policy, as the U.S. Federal Reserve cut interest rates three times during the second half of 2019, the first decrease in more than a decade.

In this environment, large-cap stocks, as represented by the S&P 500® Index, posted a return of 31.49%, outperforming the S&P SmallCap 600® and the S&P MidCap 400® Indices, which returned 22.78% and 26.20%, respectively. Meanwhile, the broader bond market, as represented by the Bloomberg Barclays® U.S. Aggregate Index, returned 8.72%, while the Bloomberg Barclays® U.S. Corporate High Yield Index advanced 14.32%.

## PORTFOLIO RESULTS

The Index 500 Stock Portfolio delivered a total return of 31.18% for the twelve months ended December 31, 2019, slightly trailing the S&P 500® Index (the “Index”), which returned 31.49%. (The Index is unmanaged, cannot be invested in directly and does not incur expenses.) Portfolio performance slightly lagged the Index due to transaction costs, administrative expenses, cash flow effects and costs associated with the use of stock index futures contracts. According to Lipper® Analytical Services, Inc., an independent mutual fund ranking agency, the average return in 2019 of the S&P 500 Index Funds peer group was 31.10%.

All of the Portfolio’s sectors advanced for the reporting period. The Information Technology sector was the leading driver of the Portfolio’s return, posting its largest annual gain in over a decade. The sector’s companies, many of which depend heavily on sales to China, benefited from an improving outlook for easing trade tensions between the U.S. and China at the end of the 2019. The communications equipment and software industries advanced on robust sales growth driven by rising demand for wearable technology, as well as internet services such as streaming entertainment, subscription software and services and cloud computing. Semiconductor companies were helped by increasing demand due to the expansion of new technologies such as 5G telecommunications networks and higher microchip sales used for gaming and data centers.

The Financials sector also bolstered the Portfolio, led by banks, which profited early in the reporting period from a supportive interest rate environment before the Fed’s interest rate cuts during the second half of 2019. Consumer finance companies were also an area of strength, driven by increasing demand for credit services and rising electronic payments amid technological advances in digital finance, especially blockchain.

Communication Services stocks advanced on rising online advertising revenues and increasing demand for cloud computing. The sector also benefited from continued social media user growth and diminishing investor concerns about regulatory intervention.

Solid consumer spending amid historically low unemployment and rising wages drove the Consumer Discretionary sector’s gains, while Health Care stocks were helped by strong sales of medical equipment and medicines, supported by rising

# Index 500 Stock Portfolio (unaudited)

research funding. The Industrials sector's contribution to the Portfolio's return was led by aerospace and defense stocks, which benefited from higher government expenditures on defense contracts.

## Relative Performance

— Index 500 Stock Portfolio  
 - - S&P 500® Index

### Average Annual Total Returns For Periods Ended December 31, 2019

	1 Year	5 Years	10 Years
Index 500 Stock Portfolio	31.18%	11.45%	13.32%
S&P 500® Index	31.49%	11.69%	13.55%
Lipper® Variable Insurance Products (VIP) S&P 500 Index Objective Funds Average	31.10%	11.23%	13.15%

*The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance information visit [www.northwesternmutual.com](http://www.northwesternmutual.com).*

*This chart assumes an initial investment of \$10,000 made on 12/31/09. Returns shown reflect fee waivers, deductions for management and other portfolio expenses, and reinvestment of all dividends. In the absence of fee waivers, total return would be reduced. Returns exclude deductions for separate account sale loads and account fees. Please refer to the Benchmark Definitions section of this report for information about the indices cited in the above chart and graph.*

144A Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold as transactions exempt from registration, normally to qualified institutional buyers. At December 31, 2019 the value of these securities (in thousands) was \$22,371 representing 0.6% of the net assets.

# 7-Day yield as of 12/31/2019.

β Cash or securities with an aggregate value of \$2,995 (in thousands) has been pledged as collateral for futures, swap contracts outstanding, short sales, when issued securities or written options on 12/31/2019.

@ At December 31, 2019, the aggregate cost of investments, including derivatives, for federal tax purposes (in thousands) was \$1,642,141 and the net unrealized appreciation of investments based on that cost was \$2,222,388 which is comprised of \$2,291,308 aggregate gross unrealized appreciation and \$68,920 aggregate gross unrealized depreciation.

The following is a summary of the inputs used in valuing the Portfolio's assets and liabilities at December 31, 2019. See Note 3 for additional information on portfolio valuation.

Description	Valuation Inputs		
	Level 1 - Quoted Prices	Level 2 - Other Significant Observable Inputs	Level 3 - Significant Unobservable Inputs
	<i>(Amounts in thousands)</i>		
Assets:			
Common Stocks	\$ 3,817,992	\$ —	\$ —
Short-Term Investments			
Money Market Funds	14,135	—	—
All Others	—	32,053	—
Other Financial Instruments <sup>^</sup>			
Futures	348	—	—
Total Assets:	\$ 3,832,475	\$ 32,053	\$ —

<sup>^</sup> Other financial instruments are derivative instruments such as futures and forwards, which are valued at the unrealized appreciation (depreciation) on the instrument, and securities sold short, reverse repurchase agreements, written options and swaps contracts, which are valued at market value.

# Large Company Value Portfolio (unaudited)

---

**Objective:**

Long-term growth of capital. Current income is a secondary objective.

**Portfolio Strategy:**

Invest primarily in equity securities of larger companies considered to be undervalued.

**Net Assets:**

\$206 million

## PORTFOLIO OVERVIEW

Mason Street Advisors, LLC (“Mason Street Advisors”), the investment adviser for the Large Company Value Portfolio (the “Portfolio”), has engaged American Century Investment Management, Inc. (“American Century”) to act as sub-adviser for the Portfolio. The Portfolio looks for stocks of companies that it believes are undervalued at the time of purchase. The Portfolio attempts to purchase the stocks of these undervalued companies and hold each stock until it has returned to favor in the market and the price has increased to, or is higher than, a level the Portfolio believes more accurately reflects the fair value of the company. Companies may be undervalued due to market declines, poor economic conditions, actual or anticipated bad news regarding the issuer or its industry, or because they have been overlooked by the market.

## MARKET OVERVIEW

Resilient U.S. economic growth and positive earnings fueled strong stock market performance during 2019 despite periods of volatility sparked by trade tensions and global economic uncertainty. The U.S. Federal Reserve (the “Fed”) cut interest rates three times during the second half of 2019 in response to global economic risks, but central bank policymakers signaled a pause in interest rate reductions in the fourth quarter on improving economic data. Stocks advanced at the end of the year as news of a potential trade deal between the U.S. and China reduced trade-related uncertainty. All the sector returns within the Russell 1000® Value Index posted positive returns, led by Information Technology. The Energy sector turned in the weakest results.

According to the Russell family of U.S. indices, large- and mid-cap stocks outperformed small-cap stocks. Growth stocks outperformed value stocks by a significant margin for the year.

## PORTFOLIO RESULTS

The Portfolio returned 27.66% for the twelve months ended December 31, 2019. By comparison, the Portfolio’s benchmark, the Russell 1000® Value Index (the “Index”), returned 26.54%. (The Index is unmanaged, cannot be invested in directly and does not include administrative expenses.) According to Lipper® Analytical Services, Inc., an independent mutual fund ranking agency, the average return in 2019 of the Large Cap Value Funds peer group was 26.47%.

Stock selection in the Energy sector contributed to the Portfolio’s outperformance. Key relative contributors included Anadarko Petroleum, a global exploration and production company whose stock rose after Chevron agreed to acquire the company at a premium. The stock appreciated further after Occidental Petroleum made two higher acquisition offers. The portfolio managers exited the position on stock price appreciation. The Portfolio’s lack of exposure to ExxonMobil was also beneficial as that company continued to struggle with execution.

Health Care was another area of relative strength. Performance drivers included medical device maker Zimmer Biomet Holdings, which gained on solid financial results. The company also reported positive updates on its early ROSA robot placements and improvements in supply constraints related to Food and Drug Administration (“FDA”) approvals. The portfolio managers’ analysis points to upside potential from 2019 product launches, final remediation of issues raised by the FDA and the potential to recapture market share in 2020.

Applied Materials was a leading contributor in the Information Technology sector. Although the macro environment remained uncertain, this semiconductor equipment company outperformed after reporting solid financial results. The portfolio managers believe the company remains well positioned, supported by greenfield investments and market share gains from its new tool offerings.

On the other hand, the Portfolio’s lack of exposure to several stocks in the Communication Services sector, including AT&T, weighed on returns. The stock of the communications giant outperformed when Elliott Management, an activist shareholder firm, took a position in the company. Elliott encouraged AT&T to sell non-core assets and accelerate cost cutting and expense reduction.

While the Portfolio’s Energy holdings contributed to performance, exposure to TOTAL, a large integrated energy company, weighed on relative results. The company’s stock price declined as lower oil and gas prices reduced potential generation

# Large Company Value Portfolio (unaudited)

of free cash flow and return on invested capital. Consequently, TOTAL's management lowered its near-term free cash flow guidance.

Not owning Citigroup, a multinational investment banking and financial services corporation, also weighed on performance. The company's second-quarter results exceeded expectations due to lower expenses and credit provisions. The Portfolio's position in The Bank of New York Mellon ("BNY Mellon"), a global financial firm, was another key detractor. BNY Mellon underperformed after reporting worse-than-expected quarterly results and guidance, due in part to lower interest rates.

## PORTFOLIO MANAGER OUTLOOK

The following forward-looking comments are the opinion of American Century, the Portfolio's sub-adviser.

The Portfolio seeks to invest in companies for which we believe the valuation does not reflect the quality and normal earnings power of the company. Our process is based on individual security selection; however, some broad themes have emerged.

We finished the year with a notable overweight position in the Health Care sector. According to our analysis, the Portfolio's Health Care holdings offer compelling valuations and risk/reward profiles, particularly in the pharmaceuticals and healthcare equipment and supplies industries.

On the other hand, we have found limited opportunities in Communication Services, leading to an underweight position in the sector. Our analysis shows that many stocks in the sector have volatile business models and significant leverage.

**Relative Performance**

— Large Company Value Portfolio  
 - - Russell 1000® Value Index

most recent month-end performance information visit [www.northwesternmutual.com](http://www.northwesternmutual.com).

*This chart assumes an initial investment of \$10,000 made on 12/31/09. Returns shown reflect fee waivers, deductions for management and other portfolio expenses, and reinvestment of all dividends. In the absence of fee waivers, total return would be reduced. Returns exclude deductions for separate account sale loads and account fees. Please refer to the Benchmark Definitions section of this report for information about the indices cited in the above chart and graph.*

*The Portfolio may invest in derivative instruments for cash management purposes or to hedge foreign currency exposure. Use of these instruments may involve certain costs and imposes certain risks such as liquidity risk, market risk, credit risk, management risk and the risk of mispricing or improper valuation. Certain derivatives involve leverage, which could magnify losses, and portfolios investing in derivatives could lose more than the principal amount invested in those instruments.*

*The Portfolio may invest a relatively high percentage of its assets in a particular sector. The Portfolio will have greater exposure to the risks associated with that sector and its performance will be tied more closely to the performance of the sector.*

Total Liabilities:	<u>\$ —</u>	<u>\$ (56)</u>	<u>\$ —</u>

<sup>^</sup> Other financial instruments are derivative instruments such as futures and forwards, which are valued at the unrealized appreciation (depreciation) on the instrument, and securities sold short, reverse repurchase agreements, written options and swaps contracts, which are valued at market value.

# Domestic Equity Portfolio (unaudited)

---

**Objective:**

Long-term growth of capital and income.

**Portfolio Strategy:**

Invest primarily in equity securities of U.S. issuers that are selling at attractive prices relative to their intrinsic value.

**Net Assets:**

\$921 million

## PORTFOLIO OVERVIEW

Mason Street Advisors, LLC (“Mason Street Advisors”), the investment adviser for the Domestic Equity Portfolio (the “Portfolio”), has engaged Delaware Investments Fund Advisers, a series of Macquarie Investment Management Business Trust (“Delaware”), to act as sub-adviser for the Portfolio. The Portfolio primarily invests in common stocks of large capitalization companies, but may also invest in mid-capitalization companies, that are believed to have long-term capital appreciation potential. Typically, the Portfolio seeks securities that are believed to be undervalued in relation to their intrinsic value, as indicated by multiple factors, including the earnings and cash flow potential or the asset valuation of the respective issuers. The Portfolio invests in a core group of 30-40 securities.

## MARKET OVERVIEW

Rebounding from the stock market correction that occurred in late 2018, the broad market S&P 500® Index posted a return of 31.49%, reaching an all-time high in December 2019. Notably, there was little earnings growth to support the year’s robust gains, as aggregate earnings for the S&P 500® Index were lower than the prior year’s in each of the first three quarters and are expected to be down again in the fourth quarter. Following the U.S. Federal Reserve’s (the “Fed”) December 2018 interest rate increase, the Fed pivoted toward a more accommodative stance in early 2019, enacting three interest rate cuts of 0.25% during the second half of the year and sparking the 2019 stock market rally.

## PORTFOLIO RESULTS

The Portfolio returned 20.77% for the twelve months ended December 31, 2019. By comparison, the Portfolio’s benchmark, the Russell 1000® Value Index (the “Index”), returned 26.54%. (The Index is unmanaged, cannot be invested in directly and does not incur expenses.) According to Lipper® Analytical Services, Inc., an independent mutual fund ranking agency, the average return in 2019 of the Large Cap Value Funds peer group was 26.47%.

The Portfolio’s underperformance was driven primarily by stock selection, although sector allocation also held back returns. Investments in the Energy and Materials sectors hindered relative returns the most. In Energy, exploration and production company Occidental Petroleum Corporation was the largest detractor. The company’s shares declined following its acquisition of Anadarko Petroleum Corporation on investor frustration with the negotiated price and financing terms. The Portfolio management team believes the deal could create an attractive long-term investment if Occidental follows through with its asset sales and deleveraging plan. In the Materials sector, diversified chemicals manufacturer DuPont de Nemours, Inc., was a major detractor. The company’s shares were down in response to shareholder impatience with the pace of divestitures of certain businesses, challenges posed by international trade tensions and investor concern about potential liability related to the chemical PFOA, often used as a non-stick cookware coating. Elsewhere, pharmaceutical maker Pfizer Inc. was a notable Health Care sector detractor, after announcing that its off-patent drug business would be combined with drug maker Mylan N.V. to form a new company. The price of the combination was lower than expected and management provided conservative guidance for the remaining Pfizer business.

In contrast, investments in the Industrials and Consumer Staples sectors were leading contributors to relative performance. In Industrials, the Portfolio benefited from a position in defense contractor Raytheon Company, which agreed to a “merger of equals” with United Technologies Corporation, potentially creating a larger, more diversified competitor in the aerospace and defense industry. In the Consumer Staples sector, global snack and beverage maker Mondelez International, Inc. was a strong contributor to relative returns. The company has been executing well and generating solid organic sales growth. AT&T Inc. was a notable Communications Services sector contributor. The company’s wireless business has been improving and the integration of Time Warner appears to be on track. AT&T raised its full-year free cash flow guidance and has been reducing its debt.

## PORTFOLIO MANAGER OUTLOOK

The following forward-looking comments are the opinion of Delaware, the Portfolio’s sub-adviser.

Last year’s large market gains were driven by expanding valuation multiples. The price/earnings ratio for the S&P 500® Index, based on next fiscal year’s earnings, rose from 15.7 to 20.0 in 2019. We think elevated valuation levels could lead to lower equity market returns in the coming years. Another concern is that global debt is near record levels in both absolute

# Domestic Equity Portfolio (unaudited)

terms and as a percentage of global gross domestic product. High debt has the potential to crowd out future investment and slow economic growth. Given our muted expectations for the economy and U.S. stock market, we think a defensive tilt is appropriate for the Portfolio. This means lower cyclicality, generally, and an emphasis on higher-quality companies that offer good long-term value. An exception with respect to lower cyclicality is our position in the Energy sector, where we believe investors have been overly punitive and are mispricing these holdings.

# Equity Income Portfolio (unaudited)

---

**Objective:**

Long-term growth of capital and income.

**Portfolio Strategy:**

Invest in common stocks with a focus on larger capitalization stocks with a strong track record of paying dividends, or that are believed to be undervalued.

**Net Assets:**

\$814 million

## PORTFOLIO OVERVIEW

Mason Street Advisors, LLC (“Mason Street Advisors”), the investment adviser for the Equity Income Portfolio (the “Portfolio”), has engaged T. Rowe Price Associates, Inc. (“T. Rowe Price”) to act as sub-adviser for the Portfolio. Normally, the Portfolio invests in common stocks, with an emphasis on larger capitalization stocks with a strong track record of paying dividends or that are believed to be undervalued. The Portfolio’s yield, which reflects the level of dividends paid by the Portfolio, is expected to normally exceed the yield of the Russell 1000® Value Index. The Portfolio will typically employ a value approach in selecting investments. The Portfolio’s in-house research team seeks to identify companies that appear to be undervalued as measured by price to earnings ratio, dividend yield and enterprise value to sales, among other metrics and may be temporarily out of favor, but have good prospects for capital appreciation and dividend growth.

## MARKET OVERVIEW

U.S. stocks surged in 2019, with several major indices hitting all-time highs in the second half of the year. The U.S. Federal Reserve’s decision to keep interest rates steady in the first half of the year and then reduce rates three times starting in July was a major driver of market performance. Trade discussions between the U.S. and China also drove market sentiment throughout the year. Speculation arose numerous times during the year that the two countries were “close” to reaching an agreement, although occasional tensions seemed to reduce its likelihood. A preliminary “phase one” trade deal was finally agreed upon in December, supporting investor enthusiasm into the end of the year. As part of the agreement, the U.S. would lower or cancel the scheduled tariff rate on various Chinese goods. The agreement would also require “structural reforms and other changes to China’s economic and trade regime in the areas of intellectual property, technology transfer, agriculture, financial services and currency and foreign exchange”. Large cap shares outperformed their smaller peers, as measured by various Russell U.S. indices, and growth stocks soundly outperformed value across all market capitalizations.

## PORTFOLIO RESULTS

The Portfolio returned 26.61% for the twelve months ended December 31, 2019. By comparison, the Portfolio’s benchmark, the Russell 1000® Value Index (the “Index”), returned 26.54%. (The Index is unmanaged, cannot be invested in directly and does not incur expenses.) According to Lipper® Analytical Services, Inc., an independent mutual fund ranking agency, the average return in 2019 of the Equity Income Funds peer group was 24.47%.

The Portfolio performed in line with its benchmark during the reporting period, with strong gains driven by security selection. Stock selection in the Consumer Staples sector was the leading contributor to relative results. Shares of Tyson Foods benefited from the ongoing effects of an outbreak of African swine fever, which caused global protein prices to rise. The reopening of the Chinese market to U.S. poultry sales later in the year supported the company’s stock price.

The Information Technology sector also contributed to relative returns, due to strong stock selection. Shares of Qualcomm advanced after the chip manufacturer reached a multibillion-dollar settlement with Apple in the second quarter. Stronger-than-expected revenues, driven by robust microchip shipments, also supported the company’s stock price.

On the downside, stock selection in the Communication Services sector was the largest detractor from relative results. Shares of Telefonica underperformed during the year, resulting from structural foreign exchange risk pertaining to Argentina and Great Britain and less-than-favorable performance of the broader Spanish telecommunications sector due to an increasingly competitive landscape.

Stock selection in the Materials sector also weighed on relative returns. Shares of DuPont de Nemours traded lower as a result of falling commodity chemical input prices, slowing demand in end markets and the announced merger of DuPont’s Nutrition & Biosciences segment with IFF.

## PORTFOLIO MANAGER OUTLOOK

The following forward-looking comments are the opinion of T. Rowe Price, the Portfolio’s sub-adviser.

# Equity Income Portfolio (unaudited)

We believe the current balance of risks in the marketplace suggests caution is warranted. While a strong consumer and more accommodative monetary policy provide support for economic growth, we believe regulatory and political risks will be elevated in 2020. Given neutral valuations, we expect positive but muted returns for the equity market in 2020 coupled with the potential for more extreme outcomes. Attractive investment opportunities are more difficult to find as a result of recent increases in share prices. Despite this challenging environment, we have identified attractively-valued investment opportunities through bottom-up, fundamental analysis and we continue to maintain a disciplined, longer-term approach while also taking advantage of volatility to selectively add shares of high-quality companies.

# Mid Cap Growth Stock Portfolio (unaudited)

---

**Objective:**

Long-term growth of capital.

**Portfolio Strategy:**

Invest primarily in common stocks of mid cap domestic companies selected on the basis of their potential for capital appreciation.

**Net Assets:**

\$1.2 billion

## PORTFOLIO OVERVIEW

Mason Street Advisors, LLC (“Mason Street Advisors”), the investment adviser for the Mid Cap Growth Stock Portfolio (the “Portfolio”), has engaged Wellington Management Company LLP (“Wellington”) to act as sub-adviser for the Portfolio. The Portfolio invests primarily in common stocks of mid cap companies selected on the basis of their potential for capital appreciation. The Portfolio focuses on companies that are determined to be of high quality. The key characteristics of high quality companies include a leadership position within an industry, a strong balance sheet, a high return on equity, and/or a strong management team. The Portfolio seeks to reduce overall risk by diversifying across sectors, industry groups and companies. The Portfolio’s sector exposure relative to its benchmark is driven by an investment process which relies on fundamental company analysis and individual stock selection. The Portfolio invests primarily in U.S. common stocks. The Portfolio may also invest up to 20% of net assets in American Depositary Receipts and other securities of foreign issuers, including non-U.S. dollar denominated securities.

## MARKET OVERVIEW

U.S. equities, as measured by the S&P 500<sup>®</sup> Index, posted positive results during the twelve-month period ended December 31, 2019. During the period, U.S. equities rose as the U.S. economy remained resilient despite elevated geopolitical uncertainties and slowing global growth. U.S.-China trade relations were volatile in the absence of meaningful compromises on key structural issues. The U.S. Federal Reserve (the “Fed”) lowered its benchmark interest rate in July and September by a combined 0.50% to sustain economic expansion and mitigate the risks of slowing growth and trade frictions. U.S. equities surged in the fourth quarter of 2019 as stocks benefited from waning recession fears, accommodative Fed policies, including another 0.25% rate cut in October, and improved U.S.-China trade sentiment in December.

Returns during the period varied by market capitalization. Small and mid cap stocks, as measured by the Russell 2000<sup>®</sup> Index and S&P MidCap 400<sup>®</sup> Index, underperformed large cap stocks, as measured by the S&P 500<sup>®</sup> Index.

## PORTFOLIO RESULTS

The Portfolio returned 33.01% for the twelve months ended December 31, 2019. By comparison, the Portfolio’s benchmark, the Russell Midcap<sup>®</sup> Growth Index (the “Index”), returned 35.47%. (The Index is unmanaged, cannot be invested in directly, and does not incur expenses.) According to Lipper<sup>®</sup> Analytical Services Inc., an independent mutual fund ranking agency, the average return in 2019 of the Mid Cap Growth Funds peer group was 35.17%.

Stock selection in the Information Technology, Financials and Communication Services sectors drove underperformance during the reporting period. In contrast, stock selection in the Health Care, Consumer Discretionary and Materials sectors contributed to returns and partially offset the detraction. Sector allocation, a residual of the Portfolio’s bottom up stock selection process, also weighed on results, mainly due to the Portfolio’s overweight in the Utilities and Health Care sectors.

Top individual detractors from relative returns included Information Technology company Teradata Corp., UGI Corp. in the Utilities sector and Communication Services holding TripAdvisor. Teradata Corp. stock declined throughout the year as the company faced revenue headwinds resulting from a faster-than-expected shift to subscription-based transaction options. Later in the year, shares were driven lower after the company cut its full-year adjusted earnings outlook and announced that its Chief Executive Officer was leaving. U.S.-based natural gas and electric power distributor UGI declined on disappointing financial results for fiscal 2019. Shares of TripAdvisor struggled after the company missed revenue and earnings expectations in the first and second quarter, respectively. Negative market sentiment about the company’s hotels and auction businesses further pressured the stock and the Portfolio’s investment team eliminated it from the Portfolio.

Leading individual contributors to relative performance included Communication Services holding Roku Inc., Fair Isaac Corp. in the Information Technology sector and Seattle Genetics, a Health Care company. Roku Inc., a manufacturer of streaming media players, rose following solid quarterly results, which served to reinforce the company’s strong position in the fast-growing video streaming market. Fair Isaac Corp., a provider of analytics, software and data management products, performed well after reporting robust fourth quarter revenue and earnings as well as solid cash flow generation. Seattle Genetics Inc., a biotechnology developer of monoclonal antibody-based therapies for cancer treatment, rose due

# Mid Cap Growth Stock Portfolio (unaudited)

to second quarter sales growth of the company's blood cancer drug. Shares continued to climb on positive trial results for a combination of one of its drugs with Merck's immunotherapy Keytruda as a first-line treatment for bladder cancer. The portfolio management team continues to hold positions in all three stocks.

## PORTFOLIO MANAGER OUTLOOK

The following forward-looking comments are the opinion of Wellington, the Portfolio's sub-adviser.

Based on our bottom-up, company specific research and stock selection process, as of the end of the period, the Portfolio had overweight positions in the Financials, Health Care and Utilities sectors. The Portfolio was underweight in the Information Technology, Consumer Discretionary and Consumer Staples sectors.

We believe the Fed's dovish policy stance has enhanced confidence that the U.S. economy can continue to grow at a steady – if decelerating – pace. Equity investors are now less concerned about interest rates and are more focused on trade policies and the potential for conflict in the Middle East. We have a balanced view on the U.S economy and believe volatility in equity markets will continue to be driven by geopolitical risks. Our focus remains on creating a diversified portfolio of blue chip, market leading, U.S. mid-cap companies that score well in our F/V/E (fundamentals/valuation/expectations) process.

Although we anticipate slower growth in 2020 than we saw in 2019, the Portfolio is well balanced for this environment.

# Index 400 Stock Portfolio (unaudited)

---

**Objective:**

Investment results that approximate the performance of the S&P MidCap 400® Index.

**Portfolio Strategy:**

Invest in stocks that make up the S&P MidCap 400® Index, holding each stock in approximately the same proportion as its weighting in the Index.

**Net Assets:**

\$993 million

## PORTFOLIO OVERVIEW

Mason Street Advisors is the investment adviser for the Index 400 Stock Portfolio (the “Portfolio”). The Portfolio seeks investment results that approximate the performance of the S&P MidCap 400® Index, which is composed of the stocks of companies whose capitalizations generally are smaller than those of companies that comprise the S&P 500® Index. The S&P MidCap 400® Index does not include the stocks of the very large companies that account for most of the weighting in the S&P 500® Index. The Portfolio attempts to achieve its objective by investing all, or substantially all, of its assets in the stocks that make up the S&P MidCap 400® Index, holding each stock in approximately the same proportion as its weighting in the Index. This is known as a full replication strategy. The Portfolio may also invest in S&P MidCap 400® Index stock futures and, to a lesser extent, purchase (long) total return equity swap agreements to help achieve full replication.

## MARKET OVERVIEW

U.S. equity markets gained sharply during the reporting period, accelerating to record highs by the end of 2019. The markets’ strong performance was driven in part by solid domestic economic growth amid rising wages, historically low unemployment and strong consumer spending. Diminishing concerns about the state of the global economy and trade landscape also bolstered equities, as progress was made on trade agreements between the U.S. and China and between the U.S. and its North American trade partners. Equity markets got a substantial boost from a more accommodative interest rate policy, as the U.S. Federal Reserve cut interest rates three times during the second half of 2019, the first decrease in more than a decade.

In this environment, large-cap stocks, as represented by the S&P 500® Index, posted a return of 31.49%, outperforming the S&P SmallCap 600® and the S&P MidCap 400® Indices, which returned 22.78% and 26.20%, respectively. Meanwhile, the broader bond market, as represented by the Bloomberg Barclays® U.S. Aggregate Index, returned 8.72%, while the Bloomberg Barclays® U.S. Corporate High Yield Index advanced 14.32%.

## PORTFOLIO RESULTS

The Index 400 Stock Portfolio delivered a total return of 25.88% for the twelve months ended December 31, 2019, trailing the S&P MidCap 400® Index (the “Index”), which returned 26.20%. (The Index is unmanaged, cannot be invested in directly, and does not incur expenses.) Portfolio performance slightly lagged the Index due to transaction costs, administrative expenses, cash flow effects and costs associated with the use of stock index futures contracts. According to Lipper® Analytical Services, Inc., an independent mutual fund ranking agency, the average return in 2019 of the S&P Midcap 400 Index Funds peer group was 25.47%.

Ten of the Portfolio’s eleven sectors posted positive returns for the year, with medium-sized companies benefiting from an expanding economy buoyed by strong consumer spending. The largest contribution to the Portfolio came from the Information Technology sector. Semiconductors and semiconductor equipment suppliers delivered some of the biggest gains due to strong chip demand for emerging technologies, while IT services and, in particular, software as a service companies continued to benefit from increased demand for their cost-effective subscription models.

The Industrials sector performed well, as improved investor sentiment, due in part to easing trade tensions between the U.S. and China, benefited manufacturing stocks. The rise of global online shopping and demand for efficient delivery systems also rewarded companies providing global logistics and transportation. Healthy markets have additionally encouraged capital expenditure in the sector as companies look to improve operations through machine-learning technology. Market conditions also spurred an uptick in merger activity in the Financials sector, as midsized banks took advantage of cheap borrowing costs in order to join forces to compete against larger financial institutions.

Tax cuts and a strong jobs market contributed to consumer spending, which benefited the Consumer Discretionary sector. The amount of money consumers spent on food-away-from-home continued to increase, and restaurant and bar sales outpaced total retail sales. Integration of technology into delivery and ordering further spurred company growth by catering to fast-moving, younger consumers.

# Index 400 Stock Portfolio (unaudited)

Energy was the only sector with a loss for the reporting period, driven in large part by volatile energy prices. Companies in this sector were also negatively impacted by China's new tariffs, as exports of U.S. commodities decreased during the year.

## Relative Performance

— Index 400 Stock Portfolio  
— S&P MidCap 400® Index

## Average Annual Total Returns For Periods Ended December 31, 2019

	1 Year	5 Years	10 Years
Index 400 Stock Portfolio	25.88%	8.75%	12.44%
S&P MidCap 400® Index	26.20%	9.02%	12.72%
Lipper® Variable Insurance Products (VIP) S&P Midcap 400 Index Funds	25.47%	8.28%	11.99%

*The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance information visit [www.northwesternmutual.com](http://www.northwesternmutual.com).*

*This chart assumes an initial investment of \$10,000 made on 12/31/09. Returns shown reflect fee waivers, deductions for management and other portfolio expenses, and reinvestment of all dividends. In the absence of fee waivers, total return would be reduced. Returns exclude deductions for separate account sale loads and account fees. Please refer to the Benchmark Definitions section of this report for information about the indices cited in the above chart and graph.*

*“Standard & Poor’s®”, “S&P®”, “S&P MidCap 400 Index” and “Standard & Poor’s MidCap 400 Index” are trademarks of The McGraw-Hill Companies, Inc. and have been licensed for use by Northwestern Mutual Life Insurance Company. The Portfolio is not sponsored, endorsed, sold or promoted by Standard & Poor’s, and Standard & Poor’s makes no representation regarding the advisability of investing in the Portfolio.*

*Investing in medium-sized companies involves a greater degree of risk than investing in large company stocks.*

*The Portfolio may invest in derivative instruments such as futures and, to a lesser extent, swap agreements to help achieve full replication. Use of these instruments may involve certain costs and imposes certain risks such as liquidity risk, market risk, credit risk, management risk and the risk of mispricing or improper valuation. Certain derivatives involve leverage, which could magnify losses, and portfolios investing in derivatives could lose more than the principal amount invested in those instruments.*

144A Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold as transactions exempt from registration, normally to qualified institutional buyers. At December 31, 2019 the value of these securities (in thousands) was \$13,481 representing 1.4% of the net assets.

# 7-Day yield as of 12/31/2019.

β Cash or securities with an aggregate value of \$1,997 (in thousands) has been pledged as collateral for futures, swap contracts outstanding, short sales, when issued securities or written options on 12/31/2019.

@ At December 31, 2019, the aggregate cost of investments, including derivatives, for federal tax purposes (in thousands) was \$753,226 and the net unrealized appreciation of investments based on that cost was \$237,729 which is comprised of \$293,084 aggregate gross unrealized appreciation and \$55,355 aggregate gross unrealized depreciation.

The following is a summary of the inputs used in valuing the Portfolio's assets and liabilities at December 31, 2019. See Note 3 for additional information on portfolio valuation.

Description	Valuation Inputs		
	Level 1 - Quoted Prices	Level 2 - Other Significant Observable Inputs	Level 3 - Significant Unobservable Inputs
	<i>(Amounts in thousands)</i>		
Assets:			
Common Stocks	\$ 971,149	\$ —	\$ —
Short-Term Investments			
Money Market Funds	2,673	—	—
All Others	—	16,977	—
Other Financial Instruments <sup>^</sup>			
Futures	156	—	—
Total Assets:	\$ 973,978	\$ 16,977	\$ —

<sup>^</sup> Other financial instruments are derivative instruments such as futures and forwards, which are valued at the unrealized appreciation (depreciation) on the instrument, and securities sold short, reverse repurchase agreements, written options and swaps contracts, which are valued at market value.

# Mid Cap Value Portfolio (unaudited)

---

**Objective:**

Long-term capital growth. Current income is a secondary objective.

**Portfolio Strategy:**

Invest primarily in equity securities of mid-sized companies that are determined to be undervalued.

**Net Assets:**

\$592 million

## PORTFOLIO OVERVIEW

Mason Street Advisors, LLC (“Mason Street Advisors”), the investment adviser for the Mid Cap Value Portfolio (the “Portfolio”), has engaged American Century Investment Management, Inc. (“American Century”) to act as sub-adviser for the Portfolio. The Portfolio invests primarily in a diversified portfolio of equity securities of mid-sized companies that are determined to be undervalued at the time of purchase. In selecting securities, the Portfolio attempts to identify companies whose long-term earnings, cash flows and/or assets are not reflected in the current market price of their securities and hold each security until it has returned to favor in the market and the price has increased to or is higher than a level believed to more accurately reflect the fair value of the company.

## MARKET OVERVIEW

Resilient U.S. economic growth and positive earnings fueled strong stock market performance during 2019, despite periods of volatility sparked by trade tensions and global economic uncertainty. The U.S. Federal Reserve (the “Fed”) cut interest rates three times during the second half of 2019 in response to global economic risks, but central bank policymakers signaled a pause in interest rate reductions in the fourth quarter on improving economic data. Stocks advanced at the end of the year as news of a potential trade deal between the U.S. and China reduced trade-related uncertainty. Mid cap stocks as measured by the Russell family of U.S. indices outperformed small cap equities but underperformed large cap stocks. Value stocks underperformed growth for the period. All sectors of the Russell MidCap® Value Index had positive returns, led by Information Technology. Energy was the weakest performing sector.

## PORTFOLIO RESULTS

The Portfolio returned 29.21% for the twelve months ended December 31, 2019. By comparison, the Portfolio’s benchmark, the Russell Midcap® Value Index (the “Index”), returned 27.06%. (The Index is unmanaged, cannot be invested in directly and does not incur expenses.) According to Lipper® Analytical Services, Inc., an independent mutual fund ranking agency, the average return in 2019 of the Mid Cap Value Funds peer group was 25.84%.

Outperformance relative to the Index was driven by stock selection, especially in the Health Care sector, where Zimmer Biomet Holdings was a top contributor. The medical device company reported better-than-expected revenues, margins and earnings. Stock selection among food products companies in the Consumer Staples sector also lifted relative performance.

Elsewhere in the Portfolio, semiconductor maker Applied Materials was a strong contributor. The company delivered solid financial results despite an uncertain global economic environment. While the portfolio managers trimmed the position following stock price appreciation, they continued to believe the company was well positioned, supported by greenfield investments and market share gains from its new tool offerings.

In contrast, stock selection in the Financials sector detracted from relative performance, due in part to an investment in ProAssurance. The stock of this property and casualty insurance company underperformed as investors moved away from the more defensive insurance industry and into banks and cyclical stocks. The portfolio managers added to the position as the stock’s valuation became more attractive. Elsewhere in the Portfolio, energy company EQT was a prominent detractor. Weak gas prices hurt the natural gas producer. The portfolio managers believed that if gas prices remained low, the company’s free cash flow would be significantly impaired, and as a result, they exited the position in EQT as they identified more attractive investment opportunities elsewhere.

## PORTFOLIO MANAGER OUTLOOK

The following forward-looking comments are the opinion of American Century, the Portfolio’s sub-adviser.

We seek to invest in companies where we believe valuations do not reflect the quality and normal earnings power of the company. Our investment process is based on individual security selection, but broad themes have emerged.

We have identified select opportunities in the Industrials sector as companies have underperformed due to concerns around tariffs, input cost pressure and operational execution. While the Portfolio is overweight in Industrials, we have avoided names that we believe are lower quality. We have positioned the Portfolio with a notable overweight to the Health

# Mid Cap Value Portfolio (unaudited)

Care sector, where we see attractive opportunities due to increased political rhetoric as well as company-specific issues. The vast majority of our Health Care holdings are in the health care providers and services and health care equipment and supplies industries. Our research indicates that Real Estate stocks remain expensive relative to their historical valuation and as compared to other areas of the equity market. Therefore, we hold a limited number of higher quality Real Estate stocks that offer compelling valuations. In addition, we maintain an underweight in Communication Services holdings as metrics show that valuations throughout the sector are unattractive.

**Relative Performance**

— Mid Cap Value Portfolio  
 — Russell MidCap® Value Index

*The Portfolio may invest in derivative instruments for cash management purposes or to hedge foreign currency exposure. Use of these instruments may involve certain costs and imposes certain risks such as liquidity risk, market risk, credit risk, management risk and the risk of mispricing or improper valuation. Certain derivatives involve leverage, which could magnify losses, and portfolios investing in derivatives could lose more than the principal amount invested in those instruments.*

*The Portfolio may invest a relatively high percentage of its assets in a particular sector. The Portfolio will have greater exposure to the risks associated with that sector and its performance will be tied more closely to the performance of the sector.*

**Average Annual Total Returns  
 For Periods Ended December 31, 2019**

	1 Year	5 Years	10 Years
Mid Cap Value Portfolio	29.21%	8.89%	12.45%
Russell MidCap® Value Index	27.06%	7.62%	12.41%
Lipper® Variable Insurance Products (VIP) Mid Cap Value Funds Average	25.84%	6.76%	10.95%

*The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance information visit [www.northwesternmutual.com](http://www.northwesternmutual.com).*

*This chart assumes an initial investment of \$10,000 made on 12/31/09. Returns shown reflect fee waivers, deductions for management and other portfolio expenses, and reinvestment of all dividends. In the absence of fee waivers, total return would be reduced. Returns exclude deductions for separate account sale loads and account fees. Please refer to the Benchmark Definitions section of this report for information about the indices cited in the above chart and graph.*

*Investing in medium-sized companies involves a greater degree of risk than investing in large company stocks. The value of securities acquired in an IPO may rise or fall more rapidly than investments in more established issuers.*

<sup>@</sup> At December 31, 2019, the aggregate cost of investments, including derivatives, for federal tax purposes (in thousands) was \$519,051 and the net unrealized appreciation of investments based on that cost was \$70,084 which is comprised of \$83,186 aggregate gross unrealized appreciation and \$13,102 aggregate gross unrealized depreciation.

π Amount is less than one thousand.

# Mid Cap Value Portfolio

The following is a summary of the inputs used in valuing the Portfolio's assets and liabilities at December 31, 2019. See Note 3 for additional information on portfolio valuation.

Description	Valuation Inputs		
	Level 1 - Quoted Prices	Level 2 - Other Significant Observable Inputs	Level 3 - Significant Unobservable Inputs
	<i>(Amounts in thousands)</i>		
Assets:			
Common Stocks			
Health Care	\$ 62,770	\$ 4,020	\$ —
Materials	21,076	6,241	—
All Others	465,640	—	—
Investment Companies	18,319	—	—
Short-Term Investments	11,278	—	—
Other Financial Instruments <sup>^</sup>			
Forward Currency Contracts	—	115	—
Total Assets:	\$ 579,083	\$ 10,376	\$ —
Liabilities:			
Other Financial Instruments <sup>^</sup>			
Forward Currency Contracts	—	(324)	—
Total Liabilities:	\$ —	\$ (324)	\$ —

<sup>^</sup> Other financial instruments are derivative instruments such as futures and forwards, which are valued at the unrealized appreciation (depreciation) on the instrument, and securities sold short, reverse repurchase agreements, written options and swaps contracts, which are valued at market value.

# Small Cap Growth Stock Portfolio (unaudited)

---

**Objective:**

Long-term growth of capital.

**Portfolio Strategy:**

Invest primarily in common stocks of small capitalization companies.

**Net Assets:**

\$672 million

## PORTFOLIO OVERVIEW

Mason Street Advisors, LLC (“Mason Street Advisors”), the investment adviser for the Small Cap Growth Stock Portfolio (the “Portfolio”), has engaged Wellington Management Company LLP (“Wellington”) to act as sub-adviser for the Portfolio. Normally, the Portfolio invests in common stocks of small capitalization companies. The Portfolio’s investment process is derived from the observation that the quality and persistence of a company’s business is often not reflected in its current stock price. Central to the investment process is intense, fundamental research focused on uncovering companies with improving quality metrics, business momentum and attractive relative valuations.

## MARKET OVERVIEW

U.S. equities, as measured by the S&P 500® Index, posted positive results during the twelve-month period ended December 31, 2019. During the period, U.S. equities rose with the U.S. economy remaining resilient despite elevated geopolitical uncertainties and slowing global growth. Trade relations between the U.S. and China were volatile in the absence of meaningful compromises on key structural issues. The U.S. Federal Reserve (the “Fed”) lowered its benchmark interest rate in July and September by a combined 0.50% to sustain economic expansion and mitigate the risks of slowing growth and trade frictions. U.S. equities surged in the fourth quarter of 2019 as stocks benefited from waning recession fears, accommodative Fed policies, including another 0.25% rate cut in October, and improved U.S.-China trade sentiment in December.

Returns during the period varied by market cap. Small and mid cap stocks, as measured by the Russell 2000® Index and S&P MidCap 400® Index, underperformed large cap stocks, as measured by the S&P 500® Index.

## PORTFOLIO RESULTS

The Portfolio returned 35.69% for the twelve months ended December 31, 2019. By comparison, the Portfolio’s benchmark, the Russell 2000® Growth Index (the “Index”) returned 28.48%. (The Index is unmanaged, cannot be invested in directly and does not incur expenses.) According to Lipper® Analytical Services, Inc., an independent mutual fund ranking agency, the average return in 2019 of the Small Cap Growth Funds peer group was 29.85%.

Stock selection in the Consumer Discretionary, Industrials and Information Technology sectors drove outperformance. However, security selection in the Communication Services and Real Estate sectors partially offset this contribution to relative returns. Sector allocation, a residual of the Portfolio’s bottom up stock selection process, and particularly exposure to cash during a period of equity market strength, weighed on returns. Underweight exposure in Communication Services and overweight positioning in Information Technology contributed to outperformance.

Top individual contributors to relative performance included the Portfolio’s overweight positions in Kodiak Sciences and Insulet in the Health Care sector, as well as TopBuild in the Consumer Discretionary sector. Shares of Kodiak Sciences, a U.S.-based biopharmaceutical company, surged towards the end of the period after the company announced a public offering of six million shares of common stock. Shares of Insulet, a U.S.-based medical device company, rose on stronger-than-expected third quarter results which beat consensus estimates. The portfolio manager eliminated the position in Insulet from the Portfolio during the period. Topbuild, a U.S.-based installer and distributor of insulation products, rose on strong earnings and an increased revenue forecast.

Top detractors from relative performance included the Portfolio’s overweight positions in Merit Medical Systems in the Health Care sector and 2U in the Information Technology sector. Shares of Merit Medical Systems, a U.S.-based manufacturer of products used in diagnostic and interventional cardiology and radiology procedures, declined during the period primarily due to disappointing second quarter results. The portfolio manager eliminated the position from the Portfolio. Shares of 2U, a U.S.-based online educational services company, were driven lower during the period on expectations of sharply higher losses. The portfolio manager eliminated the position from the Portfolio. Not owning Arrowhead Pharmaceuticals in the Health Care sector also detracted from relative performance as the U.S.-based pharmaceuticals company performed well during the period.

# Small Cap Growth Stock Portfolio (unaudited)

## PORTFOLIO MANAGER OUTLOOK

The following forward-looking comments are the opinion of Wellington, the Portfolio's sub-adviser.

We believe that many of the constructive fundamental drivers of U.S. economic growth present in 2019 will persist in 2020. Fed action is likely to be more gradual, as inflation is currently at targeted levels. Reduced Fed action could result in less volatility for the U.S. dollar. Trade negotiations between the U.S. and China will remain vitally important to markets. The outcome of the U.S. election could warrant future action in the Portfolio, and given the wide range of possible outcomes, we will continue to monitor political developments.

### Relative Performance

— Small Cap Growth Stock Portfolio  
 — Russell 2000® Growth Index

### Average Annual Total Returns For Periods Ended December 31, 2019

	1 Year	5 Years	10 Years
Small Cap Growth Stock Portfolio	35.69%	10.41%	12.71%
Russell 2000® Growth Index	28.48%	9.34%	13.01%
Lipper® Variable Insurance Products (VIP) Small Cap Growth Funds Average	29.85%	10.02%	13.07%

*The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance information visit [www.northwesternmutual.com](http://www.northwesternmutual.com).*

*This chart assumes an initial investment of \$10,000 made on 12/31/09. Returns shown reflect fee waivers, deductions for management and other portfolio expenses, and reinvestment of all dividends. In the absence of fee waivers, total return would be reduced. Returns exclude deductions for separate account sale loads and account fees. Please refer to the Benchmark Definitions section of this report for information about the indices cited in the above chart and graph.*

*Stocks of smaller companies, such as those held in this Portfolio, are more likely to realize more substantial growth as well as suffer more significant losses than larger or more established issuers. Investments in such companies can be both more volatile and more speculative. Investing in small company stocks involves a greater degree of risk than investing in medium or large company stocks.*

*The Portfolio may invest in exchange-traded funds ("ETFs") for cash management purposes. Investing in ETFs may expose the Portfolio to greater risk of loss and price fluctuation than investing directly in an equity security. The market prices of ETFs may trade at a premium or discount to their net asset value and may be subject to trading halts by the applicable exchange, which may negatively impact the Portfolio.*

*The Portfolio may invest a relatively high percentage of its assets in a particular sector. The Portfolio will have greater exposure to the risks associated with that sector and its performance will be tied more closely to the performance of the sector.*

**Objective:**

Investment results that approximate the performance of the S&P SmallCap 600® Index.

**Portfolio Strategy:**

Invest in stocks that make up the S&P SmallCap 600® Index, holding each stock in approximately the same proportion as its weighting in the Index.

**Net Assets:**

\$290 million

## PORTFOLIO OVERVIEW

Mason Street Advisors is the investment adviser for the Index 600 Stock Portfolio (the “Portfolio”). The Portfolio seeks investment results that approximate the performance of the S&P SmallCap 600® Index. The Portfolio attempts to achieve its objective by investing all, or substantially all, of its assets in stocks that make up the S&P SmallCap 600® Index, holding each stock in approximately the same proportion as its weighting in the Index. This is known as a full replication strategy. The Portfolio may also purchase (long) total return equity swap agreements and invest in exchange traded funds and, to a lesser extent, futures contracts, for cash management purposes and to help achieve full replication.

## MARKET OVERVIEW

U.S. equity markets gained sharply during the reporting period, accelerating to record highs by the end of 2019. The markets’ strong performance was driven in part by solid domestic economic growth amid rising wages, historically low unemployment and strong consumer spending. Diminishing concerns about the state of the global economy and trade landscape also bolstered equities, as progress was made on trade agreements between the U.S. and China and between the U.S. and its North American trade partners. Equity markets got a substantial boost from a more accommodative interest rate policy, as the U.S. Federal Reserve cut interest rates three times during the second half of 2019, the first decrease in more than a decade.

In this environment, large-cap stocks, as represented by the S&P 500® Index, posted a return of 31.49%, outperforming the S&P SmallCap 600® and the S&P MidCap 400® Indices, which returned 22.78% and 26.20%, respectively. Meanwhile, the broader bond market, as represented by the Bloomberg Barclays® U.S. Aggregate Index, returned 8.72%, while the Bloomberg Barclays® U.S. Corporate High Yield Index advanced 14.32%.

## PORTFOLIO RESULTS

The Index 600 Stock Portfolio returned 22.44% for the twelve months ending December 31, 2019, trailing the S&P 600® Index, which increased by 22.78%. Portfolio performance lagged the Index due to transaction costs, administrative expenses, cash flow effects and costs associated with stock index futures contracts. (The Index is unmanaged, cannot be invested in directly, and does not incur expenses.) According to Lipper® Analytical Services, Inc., an independent mutual fund ranking agency, the average return in 2019 of the Small Cap Core Funds peer group was 23.79%. However, the Small Cap Core Funds peer group is not strictly comparable to the Portfolio because many of the funds in the group are actively managed.

Ten of the Portfolio’s eleven sectors advanced amid an uncertain global economic environment, although U.S. economic growth remained steady. The Industrials sector was the leading contributor to the Portfolio’s return, particularly the machinery industry. Machinery stocks benefited from demand growth for transportation technologies, such as those used by aviation companies, as well as from higher sales of equipment to control water safety and efficiency. An improving outlook for the easing of trade tensions between the U.S. and China, which generally bolstered equities, also supported the sector’s gains.

The Information Technology sector, which depends heavily on sales to China, was also a key contributor that benefited from favorable trade developments. Semiconductor and semiconductor equipment stocks advanced on increased demand for smart-energy technology amid rising adoption of electric cars and other environmentally-friendly energy products. The expansion of new technologies, such as 5G telecommunications networks, also bolstered the industry’s gains.

The Financials sector was another notable Portfolio contributor. Banks’ profit growth was supported by several years of rising interest rates, before the Fed’s interest rate cuts during the second half of 2019. Smaller regional banks also advanced amid industry merger and acquisition activity, which reached its highest level in 20 years. Consumer Discretionary stocks contributed meaningfully, benefiting from strong consumer spending amid historically low unemployment and rising wages.

# Index 600 Stock Portfolio (unaudited)

In contrast, Energy, the only sector to post negative returns, detracted modestly from the Portfolio's return amid volatile prices of both oil and natural gas as global production continued to increase, leading to oversupply concerns.

## Relative Performance

— Index 600 Stock Portfolio  
 - - S&P SmallCap 600® Index

Average Annual Total Returns  
 For Periods Ended December 31, 2019

	1 Year	5 Years	10 Years
Index 600 Stock Portfolio	22.44%	9.21%	12.97%
S&P SmallCap 600® Index	22.78%	9.55%	13.34%
Lipper® Variable Insurance Products (VIP) Small Cap Core Funds Average	23.79%	7.13%	11.13%

*The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance information visit [www.northwesternmutual.com](http://www.northwesternmutual.com).*

*This chart assumes an initial investment of \$10,000 made on 12/31/09. Returns shown reflect fee waivers, deductions for management and other portfolio expenses, and reinvestment of all dividends. In the absence of fee waivers, total return would be reduced. Returns exclude deductions for separate account sale loads and account fees. Please refer to the Benchmark Definitions section of this report for information about the indices cited in the above chart and graph.*

*"Standard & Poor's®", "S&P®", "S&P SmallCap 600" and "Standard & Poor's SmallCap 600" are trademarks of The McGraw-Hill Companies, Inc. and have been licensed for use by Northwestern Mutual Life Insurance Company. The Portfolio is not sponsored, endorsed, sold or promoted by Standard & Poor's, and Standard & Poor's makes no representation regarding the advisability of investing in the Portfolio.*

*Stocks of smaller companies, such as those held in this Portfolio, are more likely to realize more substantial growth as well as suffer more significant losses than larger or more established issuers. Investments in such companies can be both more volatile and more speculative. Investing in small company stocks involves a greater degree of risk than investing in medium or large company stocks.*

*The Portfolio may invest in exchange-traded funds and derivative instruments such as swap agreements and, to a lesser extent, futures contracts, for cash management purposes and to help achieve full replication. Use of these instruments may involve certain costs and imposes certain risks such as liquidity risk, market risk, credit risk, management risk and the risk of mispricing or improper valuation. Certain derivatives involve leverage, which could magnify losses, and portfolios investing in derivatives could lose more than the principal amount invested in those instruments.*

---

**Objective:**

Long-term growth of capital.

**Portfolio Strategy:**

Invest primarily in common stocks of small-sized companies believed to be undervalued.

**Net Assets:**

\$606 million

## PORTFOLIO OVERVIEW

Mason Street Advisors, LLC (“Mason Street Advisors”), the investment adviser for the Small Cap Value Portfolio (“the Portfolio”), has engaged T. Rowe Price Associates, Inc. (“T. Rowe Price”) to act as sub-adviser for the Portfolio. Normally, the Portfolio invests in common stocks of companies with market capitalizations that do not exceed the maximum market capitalization of any security in the Russell 2000® Index at the time of purchase. Reflecting a value approach to investing, the Portfolio will seek the stocks of companies whose current stock prices do not appear to adequately reflect their underlying value as measured by assets, earnings, cash flow or business franchises.

## MARKET OVERVIEW

U.S. stocks surged in 2019, with several major indices hitting all-time highs in the second half of the year. The U.S. Federal Reserve’s decision to keep interest rates steady in the first half of the year and then reduce rates three times starting in July was a major driver of market performance. Trade discussions between the U.S. and China also drove market sentiment throughout the year. Speculation arose numerous times during the year that the two countries were “close” to reaching an agreement, although occasional tensions seemed to reduce its likelihood. A preliminary “phase one” trade deal was finally agreed upon in December, supporting investor enthusiasm into the end of the year. As part of the agreement, the U.S. would lower or cancel the scheduled tariff rate on various Chinese goods. The agreement would also require “structural reforms and other changes to China’s economic and trade regime in the areas of intellectual property, technology transfer, agriculture, financial services and currency and foreign exchange”. Large cap shares outperformed their smaller peers, as measured by various Russell U.S. indices, and growth stocks soundly outperformed value across all market capitalizations.

## PORTFOLIO RESULTS

The Portfolio returned 25.89% for the twelve months ended December 31, 2019. By comparison, the Portfolio’s benchmark, the Russell 2000® Value Index (the “Index”), returned 22.39%. (The Index is unmanaged, cannot be invested in directly and does not incur expenses.) According to Lipper® Analytical Services, Inc., an independent mutual fund ranking agency, the average return in 2019 of the Small Cap Value Funds peer group was 22.89%.

The Portfolio’s outperformance relative to the Index was primarily due to favorable stock selection. The Industrials sector was the leading contributor to relative results, driven by strong stock selection, such as Triumph Group, a global supplier of aerospace components and systems. The company is a rollup of several acquisitions, whose customers include aircraft manufactures and airlines. Large commercial aircraft account for just over half of sales, with business jets, regional jets, and military programs making up the balance of revenues. The portfolio manager believed the company’s turnaround efforts were gaining traction, as key divestitures and a new cost-savings plan marked progress in the transition from growth to execution.

Stock selection and an underweight allocation to the Energy sector also supported relative results, led by holdings in International Seaways and WPX Energy. The Communication Services sector boosted relative performance due to stock selection, driven by Cable One. Shares of the company rose on solid quarterly results and positive investor sentiment about the recent acquisitions of Clearwave Communications and Fidelity Communications, which are expected to generate significant synergies.

Conversely, the Information Technology sector weighed on relative performance, due to weak stock selection, in particular Littelfuse.

Stock selection in the Financials sector also hurt relative performance. Shares of Green Dot, the leading provider of general-purpose reloadable cards in the U.S., declined following a 20% cut to forward guidance in order to fund a marketing campaign for a new direct bank. Despite uncertainty regarding the outcome of the company’s entrance into this new business segment, the portfolio manager remained confident in Green Dot’s core business and believed that, with solid execution, it could become a substantially larger platform over time, growing with key digital partners including Apple Pay and Intuit.

## PORTFOLIO MANAGER OUTLOOK

The following forward-looking comments are the opinion of T. Rowe Price, the Portfolio's sub-adviser.

For much of the past year, the trade war and a general focus on macroeconomic events, rather than company fundamentals, have been at work. In recent months, however, investors have proven more discriminatory by rewarding stocks that beat earnings and revenue expectations, while punishing those that missed. Despite this current respite from macroeconomic-driven sentiment, we expect volatility levels may wax and wane in the months and year ahead, and we will continue to take advantage of price dislocations where we find them. Our focus remains on long-term performance, and we believe a contrarian approach will ultimately best serve the interests of our shareholders.

### Relative Performance

— Small Cap Value Portfolio  
 - - - Russell 2000® Value Index

### Average Annual Total Returns For Periods Ended December 31, 2019

	1 Year	5 Years	10 Years
Small Cap Value Portfolio	25.89%	8.96%	10.99%
Russell 2000® Value Index	22.39%	6.99%	10.56%
Lipper® Variable Insurance Products (VIP) Small Cap Value Funds Average	22.89%	6.25%	10.13%

*The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance information visit [www.northwesternmutual.com](http://www.northwesternmutual.com).*

*This chart assumes an initial investment of \$10,000 made on 12/31/09. Returns shown reflect fee waivers, deductions for management and other portfolio expenses, and reinvestment of all dividends. In the absence of fee waivers, total return would be reduced. Returns exclude deductions for separate account sale loads and account fees. Please refer to the Benchmark Definitions section of this report for information about the indices cited in the above chart and graph.*

*Stocks of smaller companies, such as those held in this Portfolio, are more likely to realize more substantial growth as well as suffer more significant losses than larger or more established issuers. Investments in such companies can be both more volatile and more speculative. Investing in small company stocks involves a greater degree of risk than investing in medium or large company stocks.*

*The Portfolio may invest a portion of its assets in other investment companies, including open-end and closed-end funds, exchange-traded funds ("ETFs"), and business development companies ("BDCs"), and will bear its pro rata portion of such expenses. The market prices of ETFs, closed-end funds and BDCs may trade at a premium or discount to their net asset values and may be subject to trading halts by the applicable exchange, which may negatively impact the Portfolio. BDCs in particular may be less liquid and more adversely affected by poor economic or market conditions.*

*The Portfolio may invest a relatively high percentage of its assets in a particular sector. The Portfolio will have greater exposure to the risks associated with that sector and its performance will be tied more closely to the performance of the sector.*

# International Growth Portfolio (unaudited)

---

**Objective:**

Long-term growth of capital.

**Portfolio Strategy:**

Invest in securities of issuers from countries outside the U.S. that have above average growth potential.

**Net Assets:**

\$816 million

## PORTFOLIO OVERVIEW

Mason Street Advisors, LLC (“Mason Street Advisors”), the investment adviser for the International Growth Portfolio (the “Portfolio”), has engaged FIAM LLC (“FIAM”) to act as sub-adviser for the Portfolio. FIAM is an indirect, wholly-owned subsidiary of FMR LLC (along with its affiliates, “Fidelity Investments”). Normally, the Portfolio will invest in the securities of issuers from countries outside the United States. The Portfolio invests in companies it believes operate in a market environment, or with a competitive advantage, that make it difficult for competition to disrupt current and future profitability, in combination with growth drivers that may offer above-average growth potential measured by factors such as earnings or revenue. In buying and selling securities for the Portfolio, the portfolio manager relies on fundamental analysis, which involves a “bottom-up” assessment of a company’s potential for success in light of factors such as its financial condition, earnings outlook, strategy, management, industry position and economic and market conditions.

## MARKET OVERVIEW

Favorable policy developments, including continued monetary easing by the U.S. Federal Reserve and a de-escalation of the trade conflict between the U.S. and China, provided fuel to power global stock markets to a strong finish in 2019. Overall, the global economic cycle could still be characterized as a mature expansion with hints of improvement in some areas, including nascent signs of stability in global trade, manufacturing and industrial activity, which had previously been declining.

## PORTFOLIO RESULTS

The Portfolio returned 34.80% for the twelve months ended December 31, 2019. By comparison, the Portfolio’s benchmark, the MSCI EAFE® Growth Index (the “Index”), returned 28.43%. (The Index is unmanaged, cannot be invested in directly and does not incur expenses.) According to Lipper® Analytical Services, Inc., an independent mutual fund ranking agency, the average return in 2019 of the International Large-Cap Growth Funds peer group was 26.60%.

From a geographic standpoint, results were broadly positive, with positioning in the U.S. and Europe driving outperformance for the reporting period. Out-of-benchmark exposure in Canada was the only slight detractor.

On a sector basis, security selection and a substantial overweight position in the Information Technology sector contributed the most to the Portfolio’s relative returns. Stock selection and an underweight allocation to the Consumer Staples sector combined to produce the second largest contributor to returns. Stock selection in the Materials, Financials, Communication Services and Health Care sectors also benefited results.

Among Information Technology stocks, the Portfolio’s substantial overweight exposure in Netherlands-based semiconductor equipment company ASML Holding positioned it as the biggest contributor to returns. The company’s next-generation lithography technology continued to be a crucial component for leading-edge chip design, especially at Taiwan Semiconductor Manufacturing, another leading driver of the Portfolio’s relative gains during the reporting period.

A sizeable position in MasterCard was the second-largest contributor to relative returns. The other half of the duopoly in global payment processing, Visa, was also among the Portfolio’s top ten contributors.

In Financials, a position in market index and data provider MSCI and bond rating agency Moody’s helped the Portfolio. MSCI continued to benefit from investor migration to index funds and environmental, social and governance strategies that made use of the company’s well-respected framework. Moody’s benefited from strong debt issuance volumes in the U.S. and Europe.

On the negative side, stock selection in the Consumer Discretionary, Energy and Industrials sectors detracted from the Portfolio’s gains. An underweight position in luxury goods company LVMH Moët Hennessy Louis Vuitton (“LVMH”) was the largest detractor. The Portfolio added the LVMH position midyear, missing some of its rally. A modest overweight position in Austria-based industrial conglomerate Andritz was the Portfolio’s second largest detractor. Andritz was hurt by weakness in global automobile demand and competition from Chinese manufacturers. The weakness in auto demand also weighed on

# International Growth Portfolio (unaudited)

Japan-based component supplier Denso, a modest out-of-benchmark position and the third-largest detractor from relative performance during the period.

## PORTFOLIO MANAGER OUTLOOK

The following forward-looking comments are the opinion of FIAM, the Portfolio's sub-adviser.

We target companies with multi-year structural growth prospects, high barriers to entry and attractive valuations based on our earnings forecasts. We typically find these franchise businesses at cheap-to-reasonable prices in one of three ways. First, we target structurally attractive growth themes. Second, we try to capitalize on cyclically out-of-favor companies with pricing power when the market becomes excessively focused on near-term cyclical concerns and investors lose sight of the cross-cycle earnings power. Third, we attempt to capitalize on market dislocations driven by macro-economic shocks.

Over the past couple of years, we have become more pessimistic about Consumer Staples companies, as the rise of e-commerce has diminished the value of their distribution networks, allowing upstart online brands to challenge the pricing power and brand supremacy of many benchmark constituents.

We remain optimistic about the long-term attractiveness of online payment technology, leading-edge lithography equipment and blood plasma technologies.

**Relative Performance**

---

**Objective:**

Capital appreciation.

**Portfolio Strategy:**

Invest primarily in foreign equity securities, including emerging markets.

**Net Assets:**

\$785 million

## PORTFOLIO OVERVIEW

Mason Street Advisors, LLC (“Mason Street Advisors”), the investment adviser for the Research International Core Portfolio (the “Portfolio”), has engaged Massachusetts Financial Services Company (“MFS”) to act as sub-adviser for the Portfolio. The Portfolio normally invests in foreign equity securities, including emerging market equity securities. In conjunction with a team of investment research analysts, sector leaders select investments for the Portfolio. An active, “bottom up” investment approach is used to buy and sell investments for the Portfolio. The Portfolio is generally managed to be sector neutral to the MSCI EAFE® Index. The Portfolio may invest in the stocks of companies it believes to have above average earnings growth potential compared to other companies (growth companies), in the stocks of companies it believes are undervalued compared to their perceived worth (value companies), or in a combination of growth and value companies. The Portfolio also may invest in companies of any size.

## MARKET OVERVIEW

Fading fears of a near-term global recession, the announcement of a partial trade deal between the U.S. and China, and improved transparency related to Brexit lifted markets late in the reporting period. Changes in market sentiment surrounding these events led to intermittent volatility throughout the year. The global economy slowed, led by weakness in China and Europe, although deceleration diminished late in the period amid signs of stabilization in the manufacturing sector.

Deteriorating global growth and declining inflationary pressures prompted the U.S. Federal Reserve (the “Fed”) to adopt a more dovish posture beginning in early 2019. The Fed enacted its first interest rate cut in over a decade at the end of July followed by additional cuts in September and October, leading to a sharp decline in long-term interest rates in the second half of the year. As a result, portions of the U.S. Treasury yield curve (a graphical representation of bond yields at different maturities) inverted. Amid improving risk sentiment in the fourth quarter of 2019 and indications of a bottoming of growth and potential upturn in activity, the Fed indicated in October that further rate cuts were unlikely barring a worsening economic outlook.

Global central banks also became more dovish. The European Central Bank (“ECB”) unveiled a package of easing measures, including further cuts to the overnight rates, pushing them more deeply negative. The ECB also restarted its bond-buying program and increased the term of inexpensive loans to banks from two years to three. Several other central banks, including India’s and Australia’s, similarly cut rates several times in recent months. China, which cut interest rates only marginally, has been more cautious in increasing liquidity as it continues to deleverage its economy.

## PORTFOLIO RESULTS

The Portfolio returned 28.25% for the twelve months ended December 31, 2019. By comparison, the Portfolio’s benchmark, the MSCI® All Country World (ex-U.S.) Index (the “Index”), returned 22.13%. (The Index is unmanaged, cannot be invested in directly and does not incur expenses.) According to Lipper® Analytical Services, Inc., an independent mutual fund ranking company, the average return in 2019 of the International Multi-Cap Core Funds peer group was 20.89%.

Stock selection in the Materials sector contributed to relative performance. The Portfolio’s position in non-benchmark German industrial gas supplier Linde as well as its overweight positions in Australian mining operator Rio Tinto and Swiss specialty chemical company Sika aided relative returns.

Security selection and, to a lesser extent, an underweight position in both the Financials and Communication Services sectors, also benefited relative returns. Within the Financials sector, holding shares of the Canadian financial markets clearing and data services firm TMX Group and risk management and human capital consulting services provider Aon, neither of which is in the benchmark, lifted relative performance. Although stock selection and an underweight position in the Communication Services sector aided relative results, no individual stocks in this sector were among the Portfolio’s top relative contributors.

There were no notable sectors that detracted from relative returns during the reporting period. However, individual stocks that weakened relative returns included overweight positions in Japanese parcel delivery services company Yamato, the

# Research International Core Portfolio (unaudited)

Irish financial services provider AIB Group, Japanese financial firm AEON Financial Service Company, Japanese automotive lighting systems manufacturer Koito Manufacturing, electricity provider CLP from Hong Kong and Swiss investment management and banking firm UBS. Not holding shares of the Chinese online and mobile commerce company Alibaba Group and Dutch lithography systems manufacturer ASML, and holding shares of the United Kingdom's non-benchmark insurance company Hiscox, also dampened relative results.

The Portfolio's currency exposure, resulting primarily from differences between the Portfolio's and the Index's exposures to securities denominated in foreign currencies, detracted from relative performance. The Portfolio's investment team's decisions are driven by its assessment of the fundamentals of each opportunity, which frequently produces a different currency exposure than that of the Index.

## PORTFOLIO MANAGER OUTLOOK

The following forward-looking comments are the opinion of MFS®, the Portfolio's sub-adviser.

Regardless of changing economic and market conditions, we will continue to adhere to our investment process, building a portfolio of fundamentally sound companies. The Portfolio is a sector-neutral portfolio that emphasizes bottom-up fundamental research. Because of this approach, the Portfolio's sector weightings vary only modestly from those of the broader foreign market. Instead, we attempt to outperform the Index by holding what we believe to be the most attractive opportunities among growth and value companies within each sector of the market without regard to market capitalization.

*higher than the performance data quoted. For the most recent month-end performance information visit [www.northwesternmutual.com](http://www.northwesternmutual.com).*

*This chart assumes an initial investment of \$10,000 made on 12/31/09. Returns shown reflect fee waivers, deductions for management and other portfolio expenses, and reinvestment of all dividends. In the absence of fee waivers, total return would be reduced. Returns exclude deductions for separate account sale loads and account fees. Please refer to the Benchmark Definitions section of this report for information about the indices cited in the above chart and graph.*

*Investors should be aware of the risks of investments in foreign securities, particularly investments in securities of companies in developing nations.*

*The Portfolio may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. The Portfolio's performance may be more volatile than that of a more geographically diversified fund, and may be tied more closely to the performance of a single country or region.*

*The Portfolio may invest a relatively high percentage of its assets in a particular sector. The Portfolio will have greater exposure to the risks associated with that sector and its performance will be tied more closely to the performance of that sector.*

**Objective:**

Long-term growth of capital. Any income realized will be incidental.

**Portfolio Strategy:**

Invests primarily in equity securities of issuers outside of the U.S. with favorable long-term potential relative to current market values.

**Net Assets:**

\$1.8 billion

## PORTFOLIO OVERVIEW

Mason Street Advisors, LLC (“Mason Street Advisors”), the investment adviser for the International Equity Portfolio (“the Portfolio”), has engaged Templeton Investment Counsel, LLC (“Templeton”) to act as sub-adviser for the Portfolio. The Portfolio may purchase securities in any foreign country, including those with developed markets and emerging markets. The Portfolio’s investments in equity securities may include small, medium and large capitalization issues that are believed to be undervalued. The Portfolio’s strategy reflects a “bottom up”, value oriented and long-term investment philosophy. In choosing equity investments, the Portfolio will focus on the market price of a company’s securities in relation to the company’s long-term earnings (typically 5 years), asset value and cash flow potential. A company’s historical value measures, including price/earnings ratio, profit margins and liquidation value, will also be considered.

## MARKET OVERVIEW

Global developed and emerging market stocks, as measured by the MSCI® All Country World Index, posted strong returns during the reporting period. Although the rate of global economic growth in 2019 slowed from 2018 levels, interest rate cuts from many central banks and the easing of trade tensions near the end of the reporting period contributed to the generally positive environment for equities worldwide. Global stocks advanced in every major region, reflecting investor optimism and slowing but resilient economic growth.

## PORTFOLIO RESULTS

The Portfolio returned 12.60% for the twelve months ended December 31, 2019. By comparison, the Portfolio’s benchmark, the MSCI® All Country World (ex-US) Index (the “Index”), returned 22.13%. (The Index is unmanaged, cannot be invested in directly and does not incur expenses.) According to Lipper® Analytical Services, Inc., an independent mutual fund rating agency, the average return in 2019 of the International Multi-Cap Value Funds peer group was 16.98%.

In 2019, value stocks posted their worst annual performance relative to growth since the peak of the technology, media and telecommunications bubble two decades ago. Value’s underperformance pressured the Portfolio’s results, and despite double-digit absolute gains, the Portfolio underperformed its benchmark for the reporting period.

The Communication Services sector was the leading detractor from relative performance, driven by both stock selection and overweight positioning. Key detraction stemmed from Chinese telecommunication holdings China Telecom Corp. Ltd. and China Mobile Limited. The stock prices of both companies suffered amid concerns about elevated 5G capital expenditures. Nevertheless, the portfolio manager maintained confidence in these stocks based on their reasonable valuations, attractive dividend yields and solid competitive positions.

Security selection in the Health Care sector and stock selection and an overweight position in the Energy sector also hindered relative results. In Health Care, Israeli generic drugmaker Teva Pharmaceutical Industries declined amid legal and regulatory setbacks that impaired the balance of risks, leading the portfolio manager to exit the stock prior to the end of the reporting period. In the Energy sector, Canadian exploration and production firm Husky Energy Inc. declined on volatile oil prices. The portfolio manager believed Husky Energy offered compelling value with a solid balance sheet, a healthy dividend yield and the ability to generate strong free cash flow over the next five years, despite relatively low oil prices.

Turning to contributors, stock selection in the Materials sector boosted relative results. Shares of Canadian miner Wheaton Precious Metals Corp. rallied as the price of gold broke out of a six-year trading range. The portfolio manager maintained a modest precious metals allocation as a portfolio hedge and diversifier based on the outlook that gold prices are likely to move higher given record-high debt levels, historically low interest rates, escalating geopolitical turmoil and renewed central bank buying. Stock selection in the Financials sector, notably in banks, also buoyed relative returns. French lender BNP Paribas benefited from solid results at its fixed income unit and from more benign European economic conditions.

From a regional standpoint, stock selection in Asia weighed on returns, driven by underperformance in China and Japan despite relative strength in South Korea. Stock selection in Europe also hindered results, as relative weakness in Germany and the U.K. more than offset outperformance in France and the Netherlands.

# International Equity Portfolio (unaudited)

## PORTFOLIO MANAGER OUTLOOK

The following forward-looking comments are the opinion of Templeton, the Portfolio's sub-adviser.

Despite the early and extreme headwinds faced by value stocks, we were encouraged as extended positioning reversed toward the end of 2019. A historic value rally in September led to a more nuanced fourth quarter characterized by the erosion of prevailing factor trends, and the Portfolio began to outperform the Index during the final third of the reporting period. The decisive contribution of stock selection during the latter part of the year helped affirm our conviction that any breakdown in established market leadership could create alpha opportunities for fundamental stockpickers. In our view, where we are going will be different from where we have been. Falling interest rates and abundant liquidity have bid up bond proxies and growth stocks for much of the past decade, which seems unsustainable in the long run. We believe markets are grappling with many divergent themes, which could create opportunities for active stock selection and portfolio management.

**Relative Performance**

— International Equity Portfolio  
 - - MSCI® All Country World (ex-US) Index (Gross)

Average Annual Total Returns  
 For Periods Ended December 31, 2019

	1 Year	5 Years	10 Years
International Equity Portfolio	12.60%	3.23%	4.32%
MSCI® All Country World (ex-US) Index (Gross)	22.13%	6.01%	5.45%
MSCI EAFE® Index (Gross)	22.66%	6.18%	6.00%
Lipper® Variable Insurance Products (VIP) International Multi-Cap Value Funds Average	16.98%	3.89%	4.41%

*The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance information visit [www.northwesternmutual.com](http://www.northwesternmutual.com).*

*This chart assumes an initial investment of \$10,000 made on 12/31/09. Returns shown reflect fee waivers, deductions for management and other portfolio expenses, and reinvestment of all dividends. In the absence of fee waivers, total return would be reduced. Returns exclude*

*deductions for separate account sale loads and account fees. Please refer to the Benchmark Definitions section of this report for information about the indices cited in the above chart and graph.*

*Investors should be aware of the risks of investments in foreign securities, particularly investments in securities of companies in developing nations. These include the risks of currency fluctuation, of political and economic instability and of less well-developed government supervision and regulation of business and industry practices, as well as differences in accounting standards.*

*Investments in the securities of companies in developing nations impose risks different from, and greater than, risks of investing in developed countries.*

*The Portfolio may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. The Portfolio's performance may be more volatile than that of a more geographically diversified fund, and may be tied more closely to the performance of a single country or region.*

*The Portfolio may invest a relatively high percentage of its assets in a particular sector. The Portfolio will have greater exposure to the risks associated with that sector and its performance will be tied more closely to the performance of that sector.*

# Emerging Markets Equity Portfolio (unaudited)

---

**Objective:**

Capital Appreciation.

**Portfolio Strategy:**

Invest in equity securities of issuers that are tied economically to emerging market countries.

**Net Assets:**

\$834 million

## PORTFOLIO OVERVIEW

Mason Street Advisors, LLC (“Mason Street Advisors”), the investment adviser for the Emerging Markets Equity Portfolio (“the Portfolio”), has engaged Aberdeen Asset Managers Limited (“Aberdeen”) to act as sub-adviser for the Portfolio. The Portfolio normally invests in equity securities of issuers that are tied economically to emerging market countries. Emerging market countries include countries determined by the Portfolio’s portfolio managers to have emerging market economies, taking into account a number of factors, such as the country’s credit rating, its political and economic stability and the development of its financial and capital markets. The Portfolio may invest in companies of any size. The Portfolio employs a fundamental “bottom up” equity investment style, which is characterized by intensive, first-hand research and disciplined company evaluation. Investments are identified for their long-term, fundamental value.

## MARKET OVERVIEW

Emerging markets equities posted robust gains during 2019. The main themes that drove sentiment included the tumultuous nature of trade negotiations between the U.S. and China and the tide of monetary policy measures undertaken by major global central banks, led predominantly by the U.S. Federal Reserve (“the Fed”). Key elections in Argentina, Brazil, India, Indonesia, Mexico and Thailand also influenced markets.

Hopes of a quick resolution to the trade dispute between Washington and Beijing gave way to anxiety about an inevitable global economic slowdown, as relations between the worlds’ two largest economies soured. After the Fed’s abrupt turnaround toward a more dovish monetary tone in early 2019, the central bank lowered interest rates three times during the second half of the reporting period. The European Central Bank and Beijing also cut rates and pledged further stimulus. In India, the central bank lowered interest rates five times and the government announced additional corporate tax cuts aimed at boosting earnings and business confidence. It also initiated the sale of several state-owned enterprises to improve finances. Similarly, central banks in Brazil, Indonesia, Mexico, Russia and Turkey lowered interest rates in response to concerns about an increasingly uncertain outlook.

## PORTFOLIO RESULTS

The Portfolio returned 20.60% for the twelve months ended December 31, 2019. By comparison, the Portfolio’s benchmark, the MSCI® Emerging Markets Index (the “Index”) returned 18.88%. (This Index is unmanaged, cannot be invested in directly and does not incur expenses.) According to Lipper® Analytical Services, Inc., an independent mutual fund ranking agency, the average return in 2019 of the Emerging Markets Funds peer group was 21.86%.

The Portfolio’s holdings in China, Korea and Taiwan were key drivers of performance. Successful asset allocation in Brazil also contributed to results. Although slowing global economic growth and uncertainty surrounding trade weighed on mainland China’s market, several domestically-focused core holdings generated robust returns and were among the Portfolio’s top contributors. These included high-end liquor maker Kweichow Moutai and duty-free retailer China International Travel Services (CITS). Kweichow Moutai gained on a robust profit outlook for the second half of 2019 and benefited from the government’s efforts to boost consumption. CITS advanced amid sustained demand for domestic travel. Shanghai International Airport, which is relatively sheltered from the negative effects of trade tariffs, also added to returns as solid passenger traffic and higher duty-free spending lifted shares of the airport operator. Additionally, not owning internet giant Baidu boosted relative performance. Baidu’s shares retreated in tandem with the technology sell-off and the company downgraded its forecasts due to tightening regulations and intensifying competition. In contrast, the lack of exposure to e-commerce giant Alibaba Group weighed on returns, as the company reported impressive results and successfully listed in Hong Kong during the reporting period.

Korea-based Samsung Electronics and Taiwan-based Taiwan Semiconductor Manufacturing Company (TSMC) also bolstered performance as the stock prices of these companies rose on investor expectations that the memory cycle for semiconductors would likely recover.

Turning to detractors, Indian equities weighed on performance as weak economic data and rising political tensions dampened investor confidence. Key detractors included ITC, which declined on concerns about a tax increase for cigarettes,

# Emerging Markets Equity Portfolio (unaudited)

and UltraTech Cement. Indonesian conglomerate Astra International also detracted from the Portfolio's gains as muted performance from its key automotive and agribusiness segments weighed on the company's earnings.

## PORTFOLIO MANAGER OUTLOOK

The following forward-looking comments are the opinion of Aberdeen, the Portfolio's sub-adviser.

Fears of a global economic recession seem to have abated and we remain cautiously optimistic about the outlook for emerging market equities. We believe the accommodative stance taken by governments and central banks should support consumer and business confidence. However, key risks remain, including a possible collapse of trade negotiations between the U.S. and China given President Trump's support for the Hong Kong protests. Additionally, as tensions rise in the Middle East, ongoing geopolitical uncertainty will give investors reason to exercise caution.

Despite these risks, we remain confident that the dynamic and diverse set of emerging market economies offer a wealth of opportunities for investors. Ongoing political and economic reforms support the structural trends that will lead to growth in the asset class. Emerging markets equities remain attractive relative to both their historical average and as compared to developed market equities. The expanding and increasingly affluent middle classes in these emerging markets will propel demand for consumer and financial services, infrastructure and new technologies, and the Portfolio is well-positioned to benefit from these trends.

**Relative Performance**

— Emerging Markets Equity Portfolio  
 - - MSCI® Emerging Markets Index (Gross)

*This chart assumes an initial investment of \$10,000 made on 12/31/09. Returns shown reflect fee waivers, deductions for management and other portfolio expenses, and reinvestment of all dividends. In the absence of fee waivers, total return would be reduced. Returns exclude deductions for separate account sale loads and account fees. Please refer to the Benchmark Definitions section of this report for information about the indices cited in the above chart and graph.*

*Investors should be aware of the risks of investments in foreign securities, particularly investments in securities of companies in developing nations.*

*The Portfolio may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. The Portfolio's performance may be more volatile than that of a more geographically diversified fund, and may be tied more closely to the performance of a single country or region.*

*The Portfolio may invest a relatively high percentage of its assets in a particular sector. The Portfolio will have greater exposure to the risks associated with that sector and its performance will be tied more closely to the performance of that sector.*

# Government Money Market Portfolio (unaudited)

---

**Objective:**

Maximum current income to the extent consistent with liquidity and stability of capital.

**Portfolio Strategy:**

Invest in short-term fixed income obligations issued or guaranteed by the U.S. Government, its agencies or instrumentalities.

**Net Assets:**

\$447 million

## PORTFOLIO OVERVIEW

Mason Street Advisors, LLC (“Mason Street Advisors”), the investment adviser for the Government Money Market Portfolio (the “Portfolio”), has engaged BlackRock Advisors, LLC (“BlackRock”) to act as sub-adviser for the Portfolio. The Portfolio invests at least 99.5% of its total assets in cash, U.S. Treasury bills, notes and other obligations issued or guaranteed as to principal and interest by the U.S. Government, its agencies or instrumentalities and repurchase agreements secured by such obligations or cash. The Portfolio invests in a portfolio of securities maturing in 397 days or less (with certain exceptions) that will have a dollar-weighted average maturity of 60 days or less and a dollar-weighted average life of 120 days or less. The Portfolio seeks to maintain a net asset value of \$1.00 per share.

## MARKET OVERVIEW

Following the U.S. Federal Reserve's (the “Fed”) December 2018 interest rate increase, the Fed pivoted toward a more accommodative stance in early 2019, enacting three 0.25% rate cuts during the second half of the year, which reduced the Federal Funds target rate to a range of 1.50%-1.75%.

In September, the repurchase agreement (“repo”) market was volatile due to a contraction in excess reserves in the banking system, outsized deposit flows related to corporate tax payments, and the settlement of Treasury obligations. This volatility prompted the Fed to inject considerable liquidity into the financial system during the balance of 2019 through regular overnight and term repo operations. The Fed also began purchasing \$60 billion of Treasury bills per month to support the flow of funds and maintain control over short-term rates.

In July, Congress suspended the U.S. debt ceiling, which allowed the U.S. Treasury to issue additional debt. The Fed became active in short-term lending markets to improve liquidity during the reporting period, which may have contributed to a reduction in investable Treasury supply and lowered the relative value of short-term debt instruments.

## PORTFOLIO RESULTS

The Portfolio returned 1.94% for the twelve months ended December 31, 2019. By comparison, the Portfolio's benchmark, the Merrill Lynch® 3-Month Treasury Bill Index (the “Index”), returned 2.28%. (The Index is unmanaged, cannot be invested in directly and does not incur expenses.) According to Lipper® Analytical Services, Inc., an independent mutual fund ranking agency, the average return in 2019 of the U.S. Government Money Market Funds peer group was 1.64%.

The U.S. Treasury bill yield curve (a graphical representation of short-term yields at different maturities) was inverted for most of the year. The biggest driver of the inversion was a shift in Fed monetary policy, which eased during the course of the year. Additionally, seasonal changes to the supply of Treasury bills and positive cash flows into government money market funds contributed to lower yields. Against this backdrop, the Portfolio's investment team's strategy was to evaluate term investment decisions versus their own expectations of both the frequency and the degree of future rate cuts.

The Portfolio's yield remained competitive throughout the year. From a sector perspective, overweight exposure to U.S. Government Agency securities and an opportunistic allocation to floating rate notes contributed to the Portfolio's relative performance. Tri-party repurchase agreements also contributed to the relative value of the Portfolio, with a target allocation of 30% to 45% of the net asset value. The large allocations to overnight tri-party repurchase agreements contributed to the Portfolio's performance due to the liquidity benefits and competitive rates available in this asset class.

In terms of duration and yield curve management, the Portfolio's duration exposure moved longer during the first quarter of the year as the markets slowly started repricing the Fed's rate moves. While the market may have overpriced the scale of pending rate cuts throughout the year, the Portfolio's investment team expected that rates would continue to decline. Therefore, the Portfolio purchased select long-term maturities during the year to reflect this viewpoint. The Portfolio ended the year with a weighted-average maturity of 41 days and a weighted-average life of 94 days.

## PORTFOLIO MANAGER OUTLOOK

The following forward-looking comments are the opinion of BlackRock, the Portfolio's sub-adviser.

## Government Money Market Portfolio (unaudited)

---

At the end of December, the Fed's communications implied it was not contemplating significant policy changes and, as a consequence, futures contracts priced in the expectation of less than one rate cut in 2020. We are skeptical of the current market pricing and, barring significant adverse economic events, do not expect a further cut to the federal funds rate.

We expect that the publicly available Treasury bill supply will remain negative into the first few months of 2020 as the Fed continues to buy Treasury bills and coupons in 2020. We believe the Fed will continue to monitor conditions in the overnight repo market and provide liquidity to the banking system as needed to ensure adequate control of short-term interest rates.

*Not all obligations of the U.S. government, its agencies and instrumentalities are backed by the full faith and credit of the U.S. Treasury. Some obligations are backed only by the credit of the issuing agency or instrumentality, and in some cases there may be some risk of default by the issuer. Any guarantee by the U.S. government or its agencies or instrumentalities of a security held by the Portfolio does not apply to the market value of such security or to shares of the Portfolio itself.*

*If the other party to a repurchase agreement defaults on its obligation under the agreement, the Portfolio may suffer delays and incur costs or lose money in exercising its rights under the agreement. These risks may be heightened if the other party is located outside the U.S. If the seller fails to repurchase the security and the market value of the security declines, the Portfolio may lose money.*

*You could lose money investing in the Government Money Market Portfolio. Although the Portfolio seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the Portfolio is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Portfolio's sponsor has no legal obligation to provide financial support to the Portfolio, and you should not expect that the sponsor will provide financial support to the Portfolio at any time.*

# Short-Term Bond Portfolio (unaudited)

---

**Objective:**

Provide as high a level of current income as is consistent with prudent investment risk.

**Portfolio Strategy:**

Invest in a diversified portfolio of investment grade debt securities.

**Net Assets:**

\$335 million

## PORTFOLIO OVERVIEW

Mason Street Advisors, LLC (“Mason Street Advisors”), the investment adviser for the Short-Term Bond Portfolio (the “Portfolio”), has engaged T. Rowe Price Associates, Inc. (“T. Rowe Price”) to act as sub-adviser for the Portfolio. Normally, the Portfolio invests in a diversified portfolio of investment grade debt securities. The Portfolio may also invest up to 10% of net assets in non-investment grade, high yield/high risk bonds (so called “junk bonds”). Also, the Portfolio may invest up to 20% of net assets in foreign securities. Debt securities may be of any maturity, but under normal market conditions, the Portfolio’s average effective maturity will not exceed three years. The Portfolio primarily invests in corporate, government and mortgage- and asset-backed securities. The Portfolio uses both a “top-down” and “bottom-up” investment approach to construct the portfolio of investments. The top-down investment approach involves an evaluation of the overall macroeconomic environment and its potential impact on the level and direction of interest rates. The bottom-up investment approach focuses on fundamental research of individual issuers.

## MARKET OVERVIEW

U.S. bond returns were positive for the year, as Treasury yields decreased across all maturities and the U.S. Federal Reserve (the “Fed”) reduced interest rates three times, ending the year with a federal funds target rate range of between 1.50% and 1.75%. Shorter-term Treasury yields declined as the Fed pursued a looser monetary policy and provided liquidity to short-term lending markets in the final months of the year. Longer-term Treasury yields also fell sharply but finished the year above their August lows. U.S.-China trade tensions, negative interest rates in most non-U.S. developed markets and volatile geopolitical and economic developments kept demand for U.S. short-term debt strong. Among investment grade bonds, long-term Treasuries and corporate bonds had the highest returns. Mortgage-backed securities (“MBS”) advanced to a lesser extent, hindered by an increase in mortgage pre-payments and refinancing activity. Asset-backed securities (“ABS”) trailed and high yield bonds advanced strongly for the year as investors embraced riskier assets and searched for higher yields due to falling interest rates.

## PORTFOLIO RESULTS

The Portfolio returned 4.38% for the twelve months ended December 31, 2019. By comparison, the Portfolio’s benchmark, the Bloomberg Barclays® 1–3 Year U.S. Government/Credit Bond Index (the “Index”), returned 4.03%. (The Index is unmanaged, cannot be invested in directly and does not incur expenses.) According to Lipper® Analytical Services, Inc., an independent mutual fund ranking agency, the average return in 2019 of the Short Investment Grade Debt Funds peer group was 3.81%.

Sector allocation drove the Portfolio’s outperformance during the reporting period, while security selection and yield curve positioning detracted slightly.

Relative to the Index, the Portfolio continued to underweight U.S. Treasuries while aiming to add yield by overweighting non-Treasury sectors and taking out-of-benchmark positions in higher yielding securitized debt. This positioning benefited results, especially when risk sentiment was positive. Solid corporate earnings and economic growth supported investor sentiment for the majority of the year. Strong demand from investors looking for additional yield, along with positive credit fundamentals, pressured Treasuries and supported short maturity corporate bonds.

The Portfolio’s non-benchmark positions in MBS, commercial mortgage-backed securities and ABS, which benefited from still-solid consumer fundamentals and attractive relative-value opportunities, also boosted returns. Security selection among BBB corporate bonds detracted slightly, led by the Portfolio’s position in Ford Motor Credit and Deutsche Bank. Yield curve positioning also detracted as a result of the Portfolio’s underweight allocation to two-year maturity bonds, where rates declined the most, and overweight allocation to five-year maturity bonds. Treasury yields fell over the year in line with the Fed’s three rate cuts. The yield on the two-year Treasury note fell to 1.58% from 2.48%, while the yield on the ten-year fell to 1.92% from 2.69%.

## PORTFOLIO MANAGER OUTLOOK

The following forward-looking comments are the opinion of T. Rowe Price, the Portfolio’s sub-adviser.

## Short-Term Bond Portfolio (unaudited)

For a short-term bond portfolio, we believe yield plays a greater role than price appreciation in generating excess returns and limiting volatility. Because corporate bonds and securitized issues typically have greater yields than Treasuries, we believe that advantageous yield can be achieved by selectively overweighting these sectors in the Portfolio.

We also believe that the macroeconomic environment and corporate fundamentals continue to support riskier assets; however, uncertainty remains about the outlook for U.S. and global growth, and corporate debt levels remain historically high.

Acknowledging the ongoing challenges to the global economy, many global central banks have cut interest rates and taken other measures to loosen monetary policy. Those moves, combined with the banks' assurances of keeping rates low to support growth, have pushed global interest rates lower. While these changes have given more support to riskier assets, our outlook for the coming months remains somewhat guarded. Global risks remain and could quickly spark a sell-off in risky securities. Amid such uncertainty, we anticipate selectively adding to risk with holdings skewed toward shorter-maturity bonds as well as defensive securitized sectors. In such an environment, sector allocation, as well as credit selection, will be increasingly important.

**Relative Performance**

— Short-Term Bond Portfolio  
 - - - Bloomberg Barclays® 1-3 Year U.S. Government/ Credit Bond Index

*This chart assumes an initial investment of \$10,000 made on 12/31/09. Returns shown reflect fee waivers, deductions for management and other portfolio expenses, and reinvestment of all dividends. In the absence of fee waivers, total return would be reduced. Returns exclude deductions for separate account sale loads and account fees. Please refer to the Benchmark Definitions section of this report for information about the indices cited in the above chart and graph.*

*Return of principal is not guaranteed. Bond funds have the same risks that are associated with the underlying bonds owned by the Portfolio. When interest rates rise, bond prices fall. With a fixed income fund, when interest rates rise, the value of the fund's existing bonds drops, which could negatively affect overall fund performance. High yield bonds generally have greater price swings and higher default risks than investment grade bonds.*

*Investing in bonds issued by foreign corporations and governments carries additional risk, including foreign currency risk, and may increase the volatility of the Portfolio's performance.*

*The Portfolio may invest in derivative instruments to adjust the Portfolio's duration and yield curve exposure, to hedge foreign currency exposure or for any other permissible purpose keeping with its investment objective. Use of these instruments may involve certain costs and imposes certain risks such as liquidity risk, market risk, credit risk, management risk and the risk of mispricing or improper valuation. Certain derivatives involve leverage, which could magnify losses, and portfolios investing in derivatives could lose more than the principal amount invested in those instruments.*

*The U.S. federal funds rate has been subject to frequent adjustments over the course of the last several years. A significant rise in interest rates over a short period of time*

	Average Annual Total Returns For Periods Ended December 31, 2019		
	1 Year	5 Years	10 Years
Short-Term Bond Portfolio	4.38%	1.88%	1.66%
Bloomberg Barclays® 1-3 Year U.S. Government/Credit Bond Index	4.03%	1.68%	1.54%
Lipper® Variable Insurance Products (VIP) Short Investment Grade Debt Funds Average	3.81%	1.64%	1.67%

*The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. # Select Bond Portfolio (unaudited)

---

**Objective:**

Provide as high a level of total return as is consistent with prudent investment risk. A secondary objective is to seek preservation of shareholders' capital.

**Portfolio Strategy:**

Invest in a diversified portfolio of investment grade debt securities with maturities exceeding one year.

**Net Assets:**

\$3.2 billion

## PORTFOLIO OVERVIEW

Mason Street Advisors, LLC ("Mason Street Advisors"), the investment adviser for the Select Bond Portfolio (the "Portfolio"), has engaged Wells Capital Management, Inc. ("Wells Capital") to act as sub-adviser for the Portfolio. Normally, the Portfolio invests in a diversified portfolio of investment grade debt securities with maturities exceeding one year. The Portfolio may also invest up to 10% of net assets in non-investment grade, high yield/high risk bonds (so called "junk bonds") and up to 20% of net assets in foreign securities. Debt securities may be of any maturity or duration, but under normal market conditions, the Portfolio attempts to maintain an overall dollar-weighted average effective duration (a measure of the sensitivity of the price of the Portfolio's fixed income securities to changes in interest rates) that is within 10% of the Bloomberg Barclays® U.S. Aggregate Index. The Portfolio uses a fundamental, relative value investment approach to construct the portfolio of investments. The Portfolio invests in debt securities that it believes offer competitive returns and are undervalued, offering additional income and/or price appreciation potential relative to other debt securities of similar credit quality and interest rate sensitivity. The Portfolio may engage in active and frequent trading of portfolio securities to achieve its investment objectives.

## MARKET OVERVIEW

After a tumultuous end to 2018, fixed income markets roared back early in 2019 with the U.S. Federal Reserve (the "Fed") and other central banks pivoting to an easing campaign. By year end, the Fed lowered its key interest rate three times by 25 basis points each time, which helped support economic growth, as evidenced by strong year end data on housing and auto sales. While Brexit and trade tensions between the U.S. and China were of concern from the start of the year, other geopolitical issues also grabbed attention later, such as the Hong Kong protests, the impeachment of President Donald Trump and tensions in the Middle East.

## PORTFOLIO RESULTS

The Portfolio returned 8.65% for the twelve months ended December 31, 2019. By comparison, the Portfolio's benchmark, the Bloomberg Barclays® U.S. Aggregate Index (the "Index"), returned 8.72%. (The Index is unmanaged, cannot be invested in directly and does not incur expenses.) According to Lipper® Analytical Services, Inc., an independent mutual fund ranking agency, the average return in 2019 of the Core Bond Funds peer group was 8.78%.

In credit, security selection was the primary contributor to performance. Sector allocation was also beneficial as the Portfolio held a small overweight to credit for most of the year while spreads tightened. Issuer positioning across most subsectors contributed to Portfolio returns, with Health Care, Utilities, Sovereigns and Communications leading performance. Examples in the Health Care sector included overweight positions in Becton Dickinson and Co., Celgene Corp. and Bristol-Myers Squibb Co. An underweight to Duke Energy Corp. and an overweight to Electricité de France SA in the Utilities sector were beneficial. Among Sovereigns, dynamic positioning in Indonesia and relative-value positioning in Communications holdings Charter Communications Operating LLC, Fox Corp. and Verizon Communications, Inc. also supported gains.

In agency mortgage-backed securities, a sector overweight and security selection in 30-year conventional and Ginnie Mae mortgages contributed to performance. Positioning in higher coupon mortgages was the largest contributor to performance, with robust security selection opportunities throughout the year. Collateralized mortgage obligations detracted slightly from performance.

In consumer asset-backed securities ("ABS"), security selection restrained performance during the year, with private credit and Federal Family Education Loan Program student loans accounting for the majority of the detraction. Sector overweights to ABS and commercial mortgage-backed securities, and positioning in rental car ABS, prime auto ABS, credit card ABS and AAA residential mortgage-backed securities contributed to performance.

## PORTFOLIO MANAGER OUTLOOK

The following forward-looking comments are the opinion of Wells Capital, the Portfolio's sub-adviser.

## Select Bond Portfolio (unaudited)

Valuations for riskier assets such as credit and equities rebounded strongly during 2019, and government bonds seemed to price in stable growth with low inflation in light of improved expectations for the economic outlook, anticipation of a stable monetary policy for the foreseeable future and the resolution of risky political situations, such as U.S.-China trade tensions and Brexit. A benign, low-volatility environment appears to be priced into many financial markets. As such, we believe that investors will carefully monitor economic data to determine if relatively high expectations for sustained valuation levels can be met going forward, and attention will quickly turn to political developments such as the 2020 presidential election. Wild cards such as increased tensions in the Middle East could further affect risk sentiment and financial markets. We will be monitoring recent weakness in the U.S. dollar to see if a new trend is in place, which could have implications for valuations of international assets and the shape of the yield curve.

We maintain a neutral duration (a measure of the Portfolio's relative sensitivity to interest rates) and continue to maintain an overweight position in ABS due to stable fundamentals in core sectors of the market. We maintain an overweight in Agency MBS on attractive risk-adjusted valuations compared with Treasurys and credit. We continue to be active in credit, focusing on security selection and relative-value trading where we see opportunities within a tempered overall target.

**Relative Performance**

— Select Bond Portfolio  
 - - - Bloomberg Barclays® U.S. Aggregate Index

Average Annual Total Returns  
 For Periods Ended December 31, 2019

	1 Year	5 Years	10 Years
Select Bond Portfolio	8.65%	3.08%	3.72%
Bloomberg Barclays® U.S. Aggregate Index	8.72%	3.05%	3.75%
Lipper® Variable Insurance Products (VIP) Core Bond Funds Average	8.78%	2.95%	3.80%

*The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance information visit [www.northwesternmutual.com](http://www.northwesternmutual.com).*

*This chart assumes an initial investment of \$10,000 made on 12/31/09. Returns shown reflect fee waivers, deductions for management and other portfolio expenses, and reinvestment of all dividends. In the absence of fee waivers, total return would be reduced. Returns exclude*

*deductions for separate account sale loads and account fees. Please refer to the Benchmark Definitions section of this report for information about the indices cited in the above chart and graph.*

*Return of principal is not guaranteed. Bond funds have the same risks that are associated with the underlying bonds owned by the Portfolio. When interest rates rise, bond prices fall. With a fixed income fund, when interest rates rise, the value of the fund's existing bonds drops, which could negatively affect overall fund performance. High yield bonds generally have greater price swings and higher default risks than investment grade bonds.*

*Investing in bonds issued by foreign corporations and governments carries additional risk, including foreign currency risk, and may increase the volatility of the Portfolio's performance.*

*The U.S. federal funds rate has been subject to frequent adjustments over the course of the last several years. A significant rise in interest rates over a short period of time could cause significant losses in the market value of the Portfolio's fixed income investments.*

*The Portfolio may engage in active and frequent trading of portfolio securities to achieve its investment objectives. Active and frequent trading may cause higher brokerage expenses and other transaction costs, which may adversely affect performance.*

# Long-Term U.S. Government Bond Portfolio (unaudited)

---

**Objective:**

Maximum total return, consistent with preservation of capital and prudent investment management.

**Portfolio Strategy:**

Invest in a diversified portfolio of fixed income securities that are issued or guaranteed by the U.S. Government, its agencies or government sponsored enterprises, and in derivatives designed to replicate such securities.

**Net Assets:**

\$123 million

## PORTFOLIO OVERVIEW

Mason Street Advisors, LLC (“Mason Street Advisors”), the investment adviser for the Long-Term U.S. Government Bond Portfolio (the “Portfolio”), has engaged Pacific Investment Management Company LLC (“PIMCO”) to act as sub-adviser for the Portfolio. The Portfolio primarily invests in a diversified portfolio of fixed income securities that are issued or guaranteed by the U.S. Government, its agencies or government sponsored enterprises (“U.S. Government Securities”), which may be represented by forwards or derivatives such as options, futures contracts or interest rate swap agreements. Assets not invested in U.S. Government Securities may be invested in other types of non-government related investment grade fixed income instruments, such as corporate debt securities of U.S. issuers and mortgage- and asset-backed securities, or in preferred stocks. The Portfolio will normally have minimum average portfolio duration (a measure of the sensitivity of the Portfolio’s fixed income portfolio securities to changes in interest rates) of eight years and, for point of reference, the dollar-weighted average maturity of the Portfolio, under normal circumstances, is expected to be more than ten years. The Portfolio’s investments in fixed income securities are limited to investment grade U.S. dollar denominated securities of U.S. issuers that are rated at least A by Moody’s or equivalently rated by S&P or Fitch, or, if unrated, determined by the Portfolio to be of comparable quality.

## MARKET OVERVIEW

The beginning of 2019 was characterized by decelerating growth momentum, which culminated in the U.S. Federal Reserve (the “Fed”) lowering its outlook for interest rate increases in 2019 to zero and signaling an end to its balance sheet reduction program. Against this backdrop of slowing global growth, the second quarter saw softened sentiment measures highlighting growing uncertainties about the economic outlook. Slowing growth momentum and global uncertainty continued through the third quarter, prompting global central banks to take further accommodative actions. Finally, in the fourth quarter, renewed optimism surrounding the “phase one” trade deal between the U.S. and China provided a boost to risk appetites. Despite mixed global economic data, trade discussions continued to support risk sentiment through the end of 2019 and capped a year of strong risk asset returns as U.S. equities closed at new highs, credit spreads tightened and the dollar weakened.

## PORTFOLIO RESULTS

The Portfolio returned 13.17% for the twelve months ended December 31, 2019. By comparison, the Portfolio’s benchmark, the Bloomberg Barclays® Long-Term U.S. Treasury Index (the “Index”), returned 14.83%. (This Index is unmanaged, cannot be invested in directly and does not incur expenses.) According to Morningstar® Inc., an independent mutual fund ranking agency, the average return in 2019 of the Long Government peer group was 14.28%.

U.S. interest rate positioning, particularly an underweight to U.S. duration, was the main detractor from the Portfolio’s relative performance during the reporting period as interest rates rallied. The Portfolio’s duration positioning was partially implemented through the use of futures, interest rate swaps and options.

Within spread sectors, security selection in agency mortgage-backed securities and an allocation to commercial mortgage-backed securities contributed to performance. Exposure to U.S. breakeven inflation – the difference between nominal and real interest rates – was a modest contributor as inflation expectations increased.

## PORTFOLIO MANAGER OUTLOOK

The following forward-looking comments are the opinion of PIMCO, the Portfolio’s sub-adviser.

While the baseline outlook for 2020 looks positive, we recognize that risk premia have been compressed by central bank action, leaving little cushion in the event of disruption. We see a range of political and geopolitical risks in addition to the potential for macro surprises, central bank exhaustion, and rising volatility.

In the U.S., we expect slower growth followed by an eventual rebound. While positive trade developments and easier Fed policy have reduced our near-term probability of recession, we continue to expect real U.S. GDP growth to slow to a

# Long-Term U.S. Government Bond Portfolio (unaudited)

range of 1.5%-2.0% in 2020, down from an estimated 2.3% pace in 2019. However, our full-year forecast masks a sharper growth deceleration in the near term as the lagged effects of weak global growth, heightened business uncertainty and slower corporate profit growth continue to weigh on business investment and hiring. Still, domestic and global government and central bank policy actions to ease financial conditions, lower interest rates and stimulate growth should ultimately counteract the slowdown, and we look for a modest U.S. reacceleration in the second half of 2020.

**Relative Performance**

— Long-Term U.S. Government Bond Portfolio  
 - - - Bloomberg Barclays® Long-Term U.S. Treasury Index

Average Annual Total Returns  
 For Periods Ended December 31, 2019

	1 Year	5 Years	10 Years
Long-Term U.S. Government Bond Portfolio	13.17%	3.64%	6.62%
Bloomberg Barclays® Long-Term U.S. Treasury Index	14.83%	4.13%	7.01%
Morningstar® US Insurance Fund Long Government Average	14.28%	3.50%	6.86%

*The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance information visit [www.northwesternmutual.com](http://www.northwesternmutual.com).*

*This chart assumes an initial investment of \$10,000 made on 12/31/09. Returns shown reflect fee waivers, deductions for management and other portfolio expenses, and reinvestment of all dividends. In the absence of fee waivers, total return would be reduced. Returns exclude deductions for separate account sale loads and account fees. Please refer to the Benchmark Definitions section of this report for information about the indices cited in the above chart and graph.*

*Return of principal is not guaranteed. Bond funds have the same risks that are associated with the underlying bonds owned by the Portfolio. When interest rates rise, bond*

*prices fall. With a fixed income fund, when interest rates rise, the value of the fund's existing bonds drops, which could negatively affect overall fund performance.*

*The Portfolio may invest in securities that are issued or guaranteed by the U.S. Government or its agencies, and in derivatives designed to replicate such securities. This guarantee provides for the timely repayment of the principal and interest as applicable under the terms of the instrument, if it is held to maturity, and does not apply to derivative securities held by the Portfolio. A guarantee by the U.S. Government or its agencies does not eliminate market risk.*

*The Portfolio may also use derivative instruments for hedging or other purposes as part of its investment strategy. Use of these instruments may involve certain costs and risks such as liquidity risk, interest rate risk, market risk, credit risk, management risk and the risk that the Portfolio could not close out a position when it would be most advantageous to do so. The potential leverage created by use of derivatives may cause the Portfolio to be more sensitive to interest rate movements and thus more volatile than other long-term U.S. Government bond funds that do not use derivatives. Portfolios investing in derivatives could lose more than the principal amount invested in those instruments.*

*The U.S. federal funds rate has been subject to frequent adjustments over the course of the last several years. A significant rise in interest rates over a short period of time could cause significant losses in the market value of the Portfolio's fixed income investments.*

Securities Sold Short	—	(5,369)	—
Total Liabilities:	<u>\$ (114)</u>	<u>\$ (31,014)</u>	<u>\$ —</u>

<sup>^</sup> Other financial instruments are derivative instruments such as futures and forwards, which are valued at the unrealized appreciation (depreciation) on the instrument, and securities sold short, reverse repurchase agreements, written options and swaps contracts, which are valued at market value.

# Inflation Protection Portfolio (unaudited)

---

**Objective:**

Total return using a strategy that seeks to protect against U.S. inflation.

**Portfolio Strategy:**

Invest substantially all assets in investment grade debt securities, with a majority in inflation-indexed debt securities.

**Net Assets:**

\$381 million

## PORTFOLIO OVERVIEW

Mason Street Advisors, LLC (“Mason Street Advisors”), the investment adviser for the Inflation Protection Portfolio (the “Portfolio”), has engaged American Century Investment Management, Inc. (“American Century”) to act as sub-adviser for the Portfolio. The Portfolio invests substantially all of its assets in investment grade debt securities. To help protect against U.S. inflation, under normal conditions, the Portfolio will invest over 50% of its net assets in inflation-indexed debt securities. These securities include inflation-indexed U.S. Treasury Securities (“TIPS”), inflation-indexed securities issued by U.S. government agencies and instrumentalities other than the U.S. Treasury, and inflation-indexed securities issued by domestic and foreign corporations and governments. The Portfolio also may invest in fixed income securities that are not inflation-indexed, including collateralized mortgage obligations, mortgage- and asset-backed securities, whether issued by the U.S. government, its agencies or instrumentalities, corporations or other non-governmental issuers, or foreign governments. Due to Internal Revenue Code provisions and regulations governing insurance product funds, no more than 55% of the Portfolio’s assets may be invested in securities issued by the same entity.

## MARKET OVERVIEW

A key policy pivot from the U.S. Federal Reserve (the “Fed”) early in the year set the stage for robust U.S. bond market performance in 2019. Throughout 2018, the Fed remained on a tightening course, raising interest rates amid a backdrop of generally improving U.S. economic growth and modestly rising inflation. In early 2019, as the escalating U.S.-China trade dispute threatened global economic growth, the Fed abruptly adopted a dovish tone. By July, mounting global economic risks and relatively muted inflation prompted the Fed to cut rates for the first time in ten years, followed by two additional rate cuts in September and October, which reduced the federal funds rate target to a range of between 1.50% and 1.75%.

Against this backdrop, U.S. Treasury yields declined. The benchmark ten-year Treasury note ended 2019 with a yield of 1.92%, compared to 2.69% a year earlier. The yield on the two-year Treasury note fell from 2.49% at the end of 2018 to 1.57% at the end of 2019. The falling yield/low inflation environment helped generate solid returns for Treasuries. From a broad sector perspective, TIPS outperformed nominal Treasuries, benefiting from the better relative performance of longer-duration securities and from rising breakeven rates later in the year. After ending 2018 at 1.71%, the 10-year breakeven rate fell as low as 1.50% in September and October before steadily climbing to 1.77% at the end of 2019.

Other U.S. bond market sectors also delivered robust returns for the year. Corporate bonds rallied, benefiting from the declining yield environment as well as solid corporate fundamentals and strong investor demand for yield. In addition, concerns about economic growth and trade tensions eased as the year progressed, supporting riskier bond market sectors.

## PORTFOLIO RESULTS

The Portfolio returned 9.02% for the twelve months ended December 31, 2019. By comparison, the Portfolio’s benchmark, the Bloomberg Barclays® U.S. TIPS Index (the “Index”), returned 8.43%. (The Index is unmanaged, cannot be invested in directly and does not incur expenses.) According to Lipper® Analytical Services, Inc., an independent mutual fund ranking company, the average return in 2019 of the Inflation Protected Bonds Funds peer group was 7.93%.

The Portfolio was nearly fully invested in TIPS as allowed by IRS portfolio diversification regulations for insurance products (53% versus the IRS maximum of 55%). The remainder was primarily invested in investment grade corporate and securitized securities and non-U.S.-dollar inflation-linked securities (hedged against currency risk). Strong performance from these allocations, particularly the positions in corporate credit and credit-sensitive mortgage securities, largely accounted for the Portfolio’s outperformance relative to the Index.

To achieve inflation exposure while adhering to the 55% TIPS limit, the Portfolio managers used inflation swaps to create an inflation overlay for the non-inflation-linked corporate and securitized holdings. This strategy positioned the Portfolio with an overweight to inflation-linked securities, aiding performance as breakeven rates increased in the final months of the year.

# Inflation Protection Portfolio (unaudited)

## PORTFOLIO MANAGER OUTLOOK

The following forward-looking comments are the opinion of American Century, the Portfolio's sub-adviser.

Although breakeven rates have been on the rise, they remain below historical averages, suggesting TIPS still offer value. We expect the Fed to increase its purchases of Treasuries and TIPS as it rebuilds its balance sheet. We believe attractive valuations, combined with growing demand for TIPS from the Fed, provide a favorable backdrop for these securities. We have positioned the Portfolio to reflect our expectation of modest global growth, range-bound Treasury yields, stable monetary policy and slightly higher inflation. We expect headline inflation to increase in early 2020 due to year-over-year base effects from rising oil prices. By mid-year, we think headline inflation could ease slightly and converge with core inflation at 2.0%.

**Relative Performance**

— Inflation Protection Portfolio  
 - - - Bloomberg Barclays® U.S. Treasury Inflation Protected Securities (TIPS) Index

Average Annual Total Returns  
 For Periods Ended December 31, 2019

	1 Year	5 Years	10 Years

*The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance information visit [www.northwesternmutual.com](http://www.northwesternmutual.com).*

*This chart assumes an initial investment of \$10,000 made on 12/31/09. Returns shown reflect fee waivers, deductions for management and other portfolio expenses, and reinvestment of all dividends. In the absence of fee waivers, total return would be reduced. Returns exclude*

*deductions for separate account sale loads and account fees. Please refer to the Benchmark Definitions section of this report for information about the indices cited in the above chart and graph.*

*Return of principal is not guaranteed. Bond funds have the same interest rate, inflation and credit risks that are associated with the underlying bonds owned by the Portfolio. When interest rates rise, bond prices fall. With a fixed income fund, when interest rates rise, the value of the fund's existing bonds drops, which could negatively affect overall fund performance.*

*The Portfolio may use derivative instruments for hedging purposes or as alternatives to direct investments. Use of these instruments may involve certain costs and risks such as liquidity risk, interest rate risk, market risk, credit risk, management risk and the risk of mispricing or improper valuation. Certain derivatives involve leverage, which could magnify losses, and portfolios investing in derivatives could lose more than the principal amount invested in those instruments.*

*The U.S. federal funds rate has been subject to frequent adjustments over the course of the last several years. A significant rise in interest rates over a short period of time could cause significant losses in the market value of the Portfolio's fixed income investments.*

*Investing in bonds issued by foreign corporations and governments carries additional risk, including foreign currency risk, and may increase the volatility of the Portfolio's performance.*

Forward Currency Contracts	—	(38)	—
Total Return Swaps	—	(4,525)	—
Total Liabilities:	\$ (11)	\$ (4,563)	\$ —

<sup>^</sup> Other financial instruments are derivative instruments such as futures and forwards, which are valued at the unrealized appreciation (depreciation) on the instrument, and securities sold short, reverse repurchase agreements, written options and swaps contracts, which are valued at market value.

# High Yield Bond Portfolio (unaudited)

---

**Objective:**

High current income and capital appreciation.

**Portfolio Strategy:**

Invest in non-investment grade debt securities.

**Net Assets:**

\$846 million

## PORTFOLIO OVERVIEW

Mason Street Advisors, LLC (“Mason Street Advisors”), the investment adviser for the High Yield Bond Portfolio (the “Portfolio”), has engaged Federated Investment Management Company (“Federated”) to act as sub-adviser for the Portfolio. Normally, the Portfolio invests in non-investment grade debt securities, which are generally securities rated below investment grade by major credit rating agencies, or if unrated, determined to be of comparable quality. The Portfolio may invest up to 30% of net assets in non-investment grade foreign securities. The securities in which the Portfolio primarily invests are considered speculative and are sometimes known as “junk bonds.” These securities tend to offer higher yields than higher rated securities of comparable maturities primarily because of the market’s greater uncertainty about the issuer’s ability to make all required interest and principal payments, and therefore about the returns that will in fact be realized by the Portfolio. The Portfolio invests in securities believed to have attractive investment characteristics and seeks to minimize default risk and other risks through careful security selection and diversification. The Portfolio’s security selection process consists of a credit-intensive, fundamental analysis of the issuer. The Portfolio does not limit the investments to securities of a particular maturity range and does not target an average effective maturity or duration.

## MARKET OVERVIEW

High yield bonds posted strong returns during 2019. In the high yield market, major industry sectors that substantially outperformed the overall Bloomberg Barclays® U.S. Corporate High Yield 2% Issuer Capped Index (“the Index”) during the reporting period included finance companies, banking, retail, home construction and consumer products. Industries that substantially underperformed the Index during the reporting period included oil field services, independent energy, leisure, pharmaceuticals and media/entertainment. From a credit quality perspective, the “BB”-rated sector led the way followed by the “B”-rated sector. The “CCC”-rated sector was the weakest returning sector, as credit-specific issues hindered returns. The market’s strong performance is evident in narrowing yield spreads (the difference between the yields on high yield bonds and U.S. Treasury securities), which diminished from 575 at the start of 2019 to 414 by the end of the reporting period.

## PORTFOLIO RESULTS

The Portfolio returned 14.97% for the twelve months ended December 31, 2019. By comparison, the Portfolio’s benchmark, the Bloomberg Barclays® U.S. Corporate High Yield 2% Issuer Capped Index, returned 14.32%. (The Index is unmanaged, cannot be invested in directly and does not incur expenses.) According to Lipper® Analytical Services, Inc., an independent mutual fund rating agency, the average return in 2019 of the High Yield Funds peer group was 12.96%.

During the reporting period, the most significant factors affecting the Portfolio's performance relative to the Index were industry allocation and security selection. From an industry allocation perspective, the Portfolio benefited from its overweight exposure to the strong-performing property and casualty industry and its underweight allocation to the weak-performing oil field services and independent energy industries. In contrast, underweight exposure to the strong-performing banking and home construction industries weighed on Portfolio results. Cash holdings also negatively affected performance given the strong absolute returns for the market.

Portfolio returns were also driven by strong security selection. This was especially true in the oil field services, independent energy, technology, metals and mining, automotive, building materials, packaging, chemicals, wireless telecommunications and cable and satellite industries. Leading Portfolio contributors included Bausch Health Companies, Hub International, Star Merger Sub, Navient and Rackspace. On the downside, security selection in the pharmaceutical, retail, healthcare, consumer products and midstream industries hindered relative returns. Key detractors included Mallinckrodt Pharmaceuticals, Team Health, Party City, Summit Midstream and Enterprise Merger.

## PORTFOLIO MANAGER OUTLOOK

The following forward-looking comments are the opinion of Federated, the Portfolio’s sub-adviser.

We believe that as 2020 begins, the high yield market is at a crossroads. On the one hand, strong performance in 2019 has pushed the relative value of the overall high yield bond market to near historic lows. However, the high yield bond market has split into two distinct groups. Bonds issued by businesses with more fundamental stability and higher credit ratings

# High Yield Bond Portfolio (unaudited)

have relatively high valuations (narrow yield premiums relative to U.S. Treasuries) due to the demand for reliable yields, while a larger-than-normal portion of the market is trading at distressed levels (premiums of 1000 basis points or 10% yield premiums relative to U.S. Treasuries). On the other hand, economic growth remains solid, led by consumer spending. Additionally, credit fundamentals, while showing some early signs of weakness, are still reasonable. We anticipate modest absolute returns for 2020, with relative returns driven by the performance of the economy, uncertainty around the November U.S. elections and whether already narrow credit spreads can tighten further.

## Relative Performance

— High Yield Bond Portfolio  
 - - - Bloomberg Barclays® U.S. Corporate High Yield 2% Issuer Capped Index

## Average Annual Total Returns For Periods Ended December 31, 2019

	1 Year	5 Years	10 Years
High Yield Bond Portfolio	14.97%	6.21%	7.04%
Bloomberg Barclays® U.S. Corporate High Yield 2% Issuer Capped Index	14.32%	6.14%	7.55%
Lipper® Variable Insurance Products (VIP) High Yield Funds Average	12.96%	5.12%	6.73%

*The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance information visit [www.northwesternmutual.com](http://www.northwesternmutual.com).*

*This chart assumes an initial investment of \$10,000 made on 12/31/09. Returns shown reflect fee waivers, deductions for management and other portfolio expenses, and reinvestment of all dividends. In the absence of fee waivers, total return would be reduced. Returns exclude deductions for separate account sale loads and account fees. Please refer to the Benchmark Definitions section of this report for information about the indices cited in the above chart and graph.*

*Return of principal is not guaranteed. When interest rates rise, bond prices fall. With a fixed income fund, when interest rates rise, the value of the fund's existing*

*bonds drops, which could negatively affect overall fund performance.*

*Investing in bonds issued by foreign corporations carries additional risk, including foreign currency risk, and may increase the volatility of the Portfolio's performance.*

*The U.S. federal funds rate has been subject to frequent adjustments over the course of the last several years. A significant rise in interest rates over a short period of time could cause significant losses in the market value of the Portfolio's fixed income investments.*

# Multi-Sector Bond Portfolio (unaudited)

---

**Objective:**

Maximum total return, consistent with prudent investment management.

**Portfolio Strategy:**

Invest in a diversified portfolio of fixed income instruments of varying maturities and quality, and in derivatives designed to replicate such securities.

**Net Assets:**

\$1.0 billion

## PORTFOLIO OVERVIEW

Mason Street Advisors, LLC (“Mason Street Advisors”), the investment adviser for the Multi-Sector Bond Portfolio (the “Portfolio”), has engaged Pacific Investment Management Company LLC (“PIMCO”) to act as sub-adviser for the Portfolio. Normally, the Portfolio invests in a diversified portfolio of fixed income instruments of varying maturities, which may be represented by forwards or derivatives such as options, futures contracts or swap agreements. The average portfolio duration (a measure of the sensitivity of the Portfolio’s fixed income portfolio securities to changes in interest rates) of the Portfolio normally varies from three to eight years, based on the Portfolio’s forecast for interest rates. The Portfolio may invest all of its assets in high yield securities subject to a maximum of 10% of its total assets in securities rated below B by Moody’s or equivalently rated by S&P or Fitch or, if unrated, determined to be of comparable quality (so called “junk bonds”). The Portfolio may invest, without limitation, in securities denominated in foreign currencies and U.S. dollar denominated securities of foreign issuers. In addition, the Portfolio may invest without limit in fixed income securities of issuers that are economically tied to emerging securities markets.

## MARKET OVERVIEW

The beginning of 2019 was characterized by decelerating growth momentum, which culminated in the U.S. Federal Reserve (the “Fed”) lowering its outlook for interest rate increases in 2019 to zero and signaling an end to its balance sheet reduction program. Against this backdrop of slowing global growth, the second quarter saw softened sentiment measures highlighting growing uncertainties about the economic outlook. Slowing growth momentum and global uncertainty continued through the third quarter, prompting global central banks to take further accommodative actions. Finally, in the fourth quarter, renewed optimism surrounding the “Phase One” trade deal between the U.S. and China provided a boost to risk appetites. Despite mixed global economic data, trade discussions continued to support risk sentiment through the end of 2019 and capped a year of strong risk asset returns as U.S. equities closed at new highs, credit spreads tightened and the dollar weakened.

## PORTFOLIO RESULTS

The Portfolio returned 14.04% for the twelve months ended December 31, 2019. By comparison, the Portfolio’s benchmark, the Bloomberg Barclays® Global Credit Hedged USD Index returned 12.08%. The Portfolio’s custom benchmark, comprised of 1/3 each: Bloomberg Barclays® Global Aggregate - Credit Component ex Emerging Markets, Hedged USD; BofA Merrill Lynch® Global High Yield BB-B Rated Constrained Developed Markets Index, Hedged USD; J.P. Morgan® EMBI Global (the “Equal Weighted Composite Index”), returned 13.68% (These Indices are unmanaged, cannot be invested in directly and do not incur expenses.) According to Lipper® Analytical Services, Inc., an independent mutual fund ranking agency, the average return in 2019 of the Multi-Sector Income Funds peer group was 9.85%.

Within corporate credit, an overweight to Financials and Media contributed to returns, as credit spreads broadly rallied alongside the positive risk-on sentiment during the year. Within Industrials, sector positioning in investment grade bonds, most notably overweight exposure to outperforming pipelines and telecom, added to performance. During the year, the Portfolio’s credit exposure was partially obtained through the use of credit default swaps. Additionally, tactical exposure to non-agency mortgage backed securities was positive.

The primary detractor during the reporting period was broad underweight exposure to emerging market external debt, as spreads rallied during the year supported by positive risk-on sentiment and a dovish Fed. Additionally, underweight exposure to developed market duration, particularly in Europe, detracted from performance as rates fell throughout the year with the European Central Bank delivering one rate cut and re-introducing quantitative easing in the third quarter.

## PORTFOLIO MANAGER OUTLOOK

The following forward-looking comments are the opinion of PIMCO, the Portfolio’s sub-adviser.

While the baseline outlook for 2020 looks positive, we recognize that risk premia have been compressed by central bank action, leaving little cushion in the event of disruption. We see a range of political and geopolitical risks in addition to the potential for macro surprises, central bank exhaustion and rising volatility. As well as a close focus on liquidity

# Multi-Sector Bond Portfolio (unaudited)

management, careful scaling of investment positions and caution on generic credit, we will look to have somewhat lower weight on top-down macro trades, to keep powder dry and potentially go on the offensive in a more difficult investment environment. Considering this outlook, we will seek to invest with a bias to higher quality positions, a very close focus on portfolio liquidity and a diversified approach to generating income. In the U.S., we expect slower growth followed by an eventual rebound. We continue to expect real U.S. GDP growth to slow to a range of 1.5%-2.0% in 2020, down from an estimated 2.3% pace in 2019.

## Relative Performance

- Multi-Sector Bond Portfolio
- Bloomberg Barclays® Global Credit Hedged USD Index
- 1/3 each: Bloomberg Barclays® Global Aggregate—Credit Component ex Emerging Markets, Hedged USD; BofA Merrill Lynch® Global High Yield BB-B Rated Constrained Developed Markets Index, Hedged USD; JP Morgan® EMBI Global

	Average Annual Total Returns For Periods Ended December 31, 2019		
	1 Year	5 Years	10 Years
Multi-Sector Bond Portfolio	14.04%	5.79%	6.28%
Bloomberg Barclays® Global Credit Hedged USD Index	12.08%	4.75%	5.52%
1/3 each: Bloomberg Barclays® Global Aggregate — Credit Component ex Emerging Markets, Hedged USD; BofA Merrill Lynch® Global High Yield BB-B Rated Constrained Developed Markets Index, Hedged USD; JP Morgan® EMBI Global	13.68%	5.52%	6.51%
Lipper® Variable Insurance Products (VIP) Multi-Sector Income Funds	9.85%	3.52%	4.73%

*The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance information visit [www.northwesternmutual.com](http://www.northwesternmutual.com).*

*This chart assumes an initial investment of \$10,000 made on 12/31/09. Returns shown reflect fee waivers, deductions for management and other portfolio expenses, and reinvestment of all dividends. In the absence of fee waivers, total return would be reduced. Returns exclude deductions for separate account sale loads and account fees. Please refer to the Benchmark Definitions section of this report for information about the indices cited in the above chart and graph.*

*Return of principal is not guaranteed. When interest rates rise, bond prices fall. With a fixed income fund, when interest rates rise, the value of the fund's existing bonds drops, which could negatively affect overall fund performance.*

*Investing in bonds issued by foreign corporations and governments carries additional risk, including foreign currency risk, and may increase the volatility of the Portfolio's performance.*

*The Portfolio may use derivative instruments for hedging purposes or as alternatives to direct investments. Use of these instruments may involve certain costs and risks such as liquidity risk, interest rate risk, market risk, credit risk, management risk and the risk of mispricing or improper valuation. Certain derivatives involve leverage, which could magnify losses, and portfolios investing in derivatives could lose more than the principal amount invested in those instruments.*

*The Portfolio may invest a portion of its assets in fixed- and floating-rate loans, including senior loans, through loan participations and assignments. Investing in loans may expose the Portfolio to additional risks, including credit risk, interest rate risk, liquidity risk, call risk, settlement risk, and risks associated with being a lender.*

*The Portfolio may also invest in municipal securities, which may be more sensitive to certain adverse conditions than other fixed income securities, may be or become illiquid, and may have yields which move differently and adversely compared to the yields of the overall debt securities markets.*

*The U.S. federal funds rate has been subject to frequent adjustments over the course of the last several years. A significant rise in interest rates over a short period of time*

## Multi-Sector Bond Portfolio (unaudited)

---

*could cause significant losses in the market value of the Portfolio's fixed income investments.*

*The Portfolio may engage in active and frequent trading of portfolio securities to achieve its investment objectives. Active and frequent trading may cause higher brokerage expenses and other transaction costs, which may adversely affect performance.*

---

**Objective:**

Realize as high a level of total return as is consistent with prudent investment risk, through income and capital appreciation.

**Portfolio Strategy:**

Invest in the stock, bond and money market sectors, attempting to capitalize on the variation in return potential produced by the interaction of changing financial markets and economic conditions.

**Net Assets:**

\$2.3 billion

## PORTFOLIO OVERVIEW

Mason Street Advisors, LLC is the investment adviser for the Balanced Portfolio (the “Portfolio”). The Portfolio is tactically and strategically managed to capitalize on changing financial markets and economic conditions following a flexible policy for allocating assets across the stock, bond and money market sectors. The Portfolio operates primarily as a “fund of funds” to gain the Portfolio’s equity and fixed income exposure by investing in one or more of the equity and international portfolios, and one or more of the fixed income portfolios of Northwestern Mutual Series Fund, Inc. (each an “Underlying Portfolio”). The adviser allocates the Portfolio’s assets among the Underlying Portfolios based on the adviser’s economic and market outlook and the investment objectives and strategies of the Underlying Portfolios. Under normal market conditions, the Portfolio will typically hold between 35-55% of assets in equity investments, 40-60% of assets in fixed income investments, and 0-20% of assets in cash equivalent investments.

## MARKET OVERVIEW

U.S. equity markets gained sharply during the reporting period, accelerating to record highs by the end of 2019. The markets’ strong performance was driven in part by solid domestic economic growth amid rising wages, historically low unemployment and strong consumer spending. Diminishing concerns about the state of the global economy and trade landscape also bolstered equities, as progress was made on trade agreements between the U.S. and China and between the U.S. and its North American trade partners. Equity markets got a substantial boost from a more accommodative interest rate policy, as the U.S. Federal Reserve cut interest rates three times during the second half of 2019, the first decrease in more than a decade.

In this environment, large cap stocks, as represented by the S&P 500<sup>®</sup> Index, posted a return of 31.49%, outperforming the S&P SmallCap 600<sup>®</sup> and the S&P MidCap 400<sup>®</sup> Indices, which returned 22.78% and 26.20%, respectively. Meanwhile, the broader bond market, as represented by the Bloomberg Barclays<sup>®</sup> U.S. Aggregate Index, returned 8.72%, while the Bloomberg Barclays<sup>®</sup> U.S. Corporate High Yield Index advanced 14.32%.

## PORTFOLIO RESULTS

The Portfolio returned 17.92% for the twelve months ended December 31, 2019, trailing the 31.49% return of the broad stock market, as measured by the S&P 500<sup>®</sup> Index, but outperforming the Bloomberg Barclays<sup>®</sup> U.S. Aggregate Index return of 8.72%. The Portfolio slightly underperformed the Balanced Portfolio Blended Composite Benchmark return of 18.51%. (The benchmark weights are detailed in the “Benchmark Definitions” section of this annual report.) (These Indices are unmanaged, cannot be invested in directly and do not incur expenses.) When compared to peers in 2019, the Portfolio outperformed its Morningstar<sup>®</sup> Inc. Allocation – 30% to 50% Equity peer group average return of 15.28% and its Lipper<sup>®</sup> Analytical Services, Inc. Mixed-Asset Target Allocation Moderate Funds peer group average return of 17.64%. Morningstar<sup>®</sup> Inc. and Lipper<sup>®</sup> Analytical Services, Inc. are independent mutual fund ranking agencies.

Security selection of the Underlying Portfolios detracted from the Portfolio’s performance relative to the blended benchmark, largely due to performance in the domestic large cap equity allocation, particularly the Growth Stock Portfolio, which gave back the prior year’s strong performance. However, several of the Underlying Portfolios outperformed their respective benchmarks, including most of the international equity Underlying Portfolios.

The Portfolio’s tactical asset allocation posture was beneficial with an overweight allocation to equities and underweight to fixed income investments, as stocks generally outperformed bonds during the reporting period. Within the bond allocation, an overweight to high yield bonds was beneficial during the first half of the year. However, the positive contribution of tactical asset allocation decisions was not enough to outweigh the negative effect of underperformance by many of the Underlying Portfolios.

The Portfolio began the year with an overweight allocation to U.S. equities and an underweight allocation to fixed income. Following the sharp market appreciation at the beginning of 2019 and an uncertain corporate earnings environment, the Portfolio began trimming its equity exposure at the end of the first quarter and into the second quarter, reaching an

# Balanced Portfolio (unaudited)

underweight position by the middle of the year. The Portfolio took the opportunity to raise its equity allocation during the third quarter, positioning the Portfolio with an overweight to equities, particularly in emerging markets, during the fourth quarter rally.

## PORTFOLIO MANAGER OUTLOOK

As the new decade begins, we anticipate modest nominal economic expansion of 4% in the U.S., which could lead to earnings growth momentum sufficient to sustain continued equity market advances in 2020. We think this level of growth will help support corporate revenues and may lead to earnings improvement of 5-10% in the coming year. While both equity and bond valuation levels are high by historical standards, they remain a function of the low interest rate and inflation environments. Therefore, our portfolio positioning reflects our positive outlook with an overweight to equities, particularly in the emerging markets. We believe that the outcome of the upcoming U.S. presidential election and uncertainty surrounding a resolution of trade tensions between the U.S. and China will remain key market risks. We will continue to position the Portfolio to take advantage of opportunities created by market volatility and dislocations as the year progresses.

*The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the*

*most recent month-end performance information visit [www.northwesternmutual.com](http://www.northwesternmutual.com).*

*This chart assumes an initial investment of \$10,000 made on 12/31/09. Returns shown reflect fee waivers, deductions for management and other portfolio expenses, and reinvestment of all dividends. In the absence of fee waivers, total return would be reduced. Returns exclude deductions for separate account sale loads and account fees. Please refer to the Benchmark Definitions section of this report for information about the indices cited in the above chart and graph.*

*Investors should be aware of the risks of investments in foreign securities, particularly investments in securities of companies in developing nations. Small cap stocks also may carry additional risk. Smaller issuers are more likely to realize more substantial growth as well as suffer more significant losses than larger or more established issuers. Bonds and other debt obligations are affected by changes in interest rates and the creditworthiness of their issuers. High yield bonds generally have higher default risks than investment grade bonds.*

*The Portfolio may obtain its exposure to domestic and foreign equity securities by investing in other Series Fund portfolios (Underlying Portfolios). Each of the Underlying Portfolios has its own investment risks, and the Portfolio is indirectly exposed to all the risks of the Underlying Portfolios in which it invests, including that risk that an Underlying Portfolio will not perform as expected. To the extent that the Portfolio invests a significant portion of its assets in a single Underlying Portfolio, it will be particularly sensitive to the risks associated with that Underlying Portfolio may have a significant effect on the Portfolio's net asset value. The Portfolio will bear a pro rata share of the Underlying Portfolio's expenses.*

*The Portfolio may use derivative instruments to gain exposure to certain markets, sectors or regions as alternatives to direct investments, to adjust the Portfolio*

## Balanced Portfolio (unaudited)

---

duration, to provide increased flexibility in asset allocation, to earn income and to otherwise seek to enhance returns or to hedge foreign currency exposure. Use of these instruments may involve certain costs and risks such as liquidity risk, interest rate risk, mispricing or improper valuation. Certain derivatives involve leverage, which could magnify losses, and portfolios investing in derivatives could lose more than the principal amount invested in those investments.

The U.S. federal funds rate has been subject to frequent adjustments over the course of the last several years. A significant rise in interest rates over a short period of time could cause significant losses in the market value of the Portfolio's fixed income investments.

**Objective:**

Realize as high a level of total return as is consistent with reasonable investment risk.

**Portfolio Strategy:**

Invest in the stock, bond and money market sectors, attempting to capitalize on the variation in return potential produced by the interaction of changing financial markets and economic conditions.

**Net Assets:**

\$288 million

## PORTFOLIO OVERVIEW

Mason Street Advisors, LLC is the investment adviser for the Asset Allocation Portfolio (the “Portfolio”). The Portfolio is tactically and strategically managed to capitalize on changing financial markets and economic conditions following a flexible policy for allocating assets across the stock, bond and money market sectors. The Portfolio operates primarily as a “fund of funds” to gain the Portfolio’s equity and fixed income exposure by investing in one or more of the equity and international portfolios, and one or more of the fixed income portfolios of Northwestern Mutual Series Fund, Inc. (each an “Underlying Portfolio”). The adviser allocates the Portfolio’s assets among the Underlying Portfolios based on the adviser’s economic and market outlook and the investment objectives and strategies of the Underlying Portfolios. Under normal market conditions, the Portfolio will typically hold between 55-75% of assets in equity investments, 25-45% of assets in fixed income investments, and 0-15% of assets in cash equivalent investments.

## MARKET OVERVIEW

U.S. equity markets gained sharply during the reporting period, accelerating to record highs by the end of 2019. The markets’ strong performance was driven in part by solid domestic economic growth amid rising wages, historically low unemployment and strong consumer spending. Diminishing concerns about the state of the global economy and trade landscape also bolstered equities, as progress was made on trade agreements between the U.S. and China and between the U.S. and its North American trade partners. Equity markets got a substantial boost from a more accommodative interest rate policy, as the U.S. Federal Reserve cut interest rates three times during the second half of 2019, the first decrease in more than a decade.

In this environment, large cap stocks, as represented by the S&P 500<sup>®</sup> Index, posted a return of 31.49%, outperforming the S&P SmallCap 600<sup>®</sup> and the S&P MidCap 400<sup>®</sup> Indices, which returned 22.78% and 26.20%, respectively. Meanwhile, the broader bond market, as represented by the Bloomberg Barclays<sup>®</sup> U.S. Aggregate Index, returned 8.72%, while the Bloomberg Barclays<sup>®</sup> U.S. Corporate High Yield Index advanced 14.32%.

## PORTFOLIO RESULTS

The Portfolio returned 21.08% for the twelve months ended December 31, 2019, trailing the 31.49% return of the broad stock market, as measured by the S&P 500<sup>®</sup> Index, but outperforming the Bloomberg Barclays<sup>®</sup> U.S. Aggregate Index return of 8.72%. The Portfolio slightly underperformed the Asset Allocation Portfolio Blended Composite Benchmark return of 21.73%. (The benchmark weights are detailed in the “Benchmark Definitions” section of this annual report.) (These Indices are unmanaged, cannot be invested in directly and do not incur expenses.) When compared to peers in 2019, the Portfolio outperformed its Morningstar<sup>®</sup> Inc. Allocation – 50% to 70% Equity peer group average return of 19.26% and its Lipper<sup>®</sup> Analytical Services, Inc. Mixed-Asset Target Allocation Growth Funds peer group average return of 20.06%. Morningstar<sup>®</sup> Inc. and Lipper<sup>®</sup> Analytical Services, Inc. are independent mutual fund ranking agencies.

Security selection of the Underlying Portfolios detracted from the Portfolio’s performance relative to the blended benchmark, largely due to performance in the domestic large cap equity allocation, particularly the Growth Stock Portfolio, which gave back the prior year’s strong performance. However, several of the Underlying Portfolios outperformed their respective benchmarks, including most of the international equity Underlying Portfolios.

The Portfolio’s tactical asset allocation posture was beneficial with an overweight allocation to equities and underweight to fixed income investments, as stocks generally outperformed bonds during the reporting period. Within the bond allocation, an overweight to high yield bonds was beneficial during the first half of the year. However, the positive contribution of tactical asset allocation decisions was not enough to outweigh the negative effect of underperformance by many of the Underlying Portfolios.

The Portfolio began the year with an overweight allocation to U.S. equities and an underweight allocation to fixed income. Following the sharp market appreciation at the beginning of 2019 and an uncertain corporate earnings environment, the Portfolio began trimming its equity exposure at the end of the first quarter and into the second quarter, reaching an

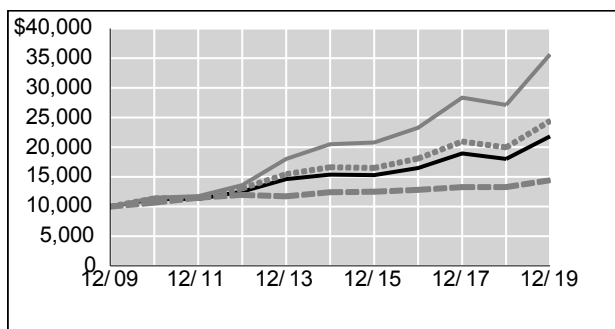

# Asset Allocation Portfolio (unaudited)

underweight position by the middle of the year. The Portfolio took the opportunity to raise its equity allocation during the third quarter, positioning the Portfolio with an overweight to equities, particularly in emerging markets, during the fourth quarter rally.

## PORTFOLIO MANAGER OUTLOOK

As the new decade begins, we anticipate modest nominal economic expansion of 4% in the U.S., which could lead to earnings growth momentum sufficient to sustain continued equity market advances in 2020. We think this level of growth will help support corporate revenues and may lead to earnings improvement of 5-10% in the coming year. While both equity and bond valuation levels are high by historical standards, they remain a function of the low interest rate and inflation environments. Therefore, our portfolio positioning reflects our positive outlook with an overweight to equities, particularly in the emerging markets. We believe that the outcome of the upcoming U.S. presidential election and uncertainty surrounding a resolution of trade tensions between the U.S. and China will remain key market risks. We will continue to position the Portfolio to take advantage of opportunities created by market volatility and dislocations as the year progresses.

*The performance data quoted represents past performance. Past performance is historical and does not guarantee future performance. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the*

*most recent month-end performance information visit [www.northwesternmutual.com](http://www.northwesternmutual.com).*

*This chart assumes an initial investment of \$10,000 made on 12/31/09. Returns shown reflect fee waivers, deductions for management and other portfolio expenses, and reinvestment of all dividends. In the absence of fee waivers, total return would be reduced. Returns exclude deductions for separate account sale loads and account fees. Please refer to the Benchmark Definitions section of this report for information about the indices cited in the above chart and graph.*

*Investors should be aware of the risks of investments in foreign securities, particularly investments in securities of companies in developing nations. Small cap stocks also may carry additional risk. Smaller issuers are more likely to realize more substantial growth as well as suffer more significant losses than larger or more established issuers. Bonds and other debt obligations are affected by changes in interest rates and the creditworthiness of their issuers. High yield bonds generally have higher default risks than investment grade bonds.*

*The Portfolio obtains its exposure to equity and fixed income securities by investing in other Series Fund portfolios (Underlying Portfolios). Each of the Underlying Portfolios has its own investment risks, and the Portfolio is indirectly exposed to all the risks of the Underlying Portfolios in which it invests, including that risk that an Underlying Portfolio will not perform as expected. To the extent that the Portfolio invests a significant portion of its assets in a single Underlying Portfolio, it will be particularly sensitive to the risks associated with that Underlying Portfolio may have a significant effect on the Portfolio's net asset value. The Portfolio will bear a pro rata share of the Underlying Portfolio's expenses.*

*The Portfolio may use derivative instruments to gain exposure to certain markets, sectors or regions as alternatives to direct investments, to adjust the Portfolio*

---

duration, to provide increased flexibility in asset allocation, to earn income and to otherwise seek to enhance returns or to hedge foreign currency exposure. Use of these instruments may involve certain costs and risks such as liquidity risk, interest rate risk, mispricing or improper valuation. Certain derivatives involve leverage, which could magnify losses, and portfolios investing in derivatives could lose more than the principal amount invested in those investments.

The U.S. federal funds rate has been subject to frequent adjustments over the course of the last several years. A significant rise in interest rates over a short period of time could cause significant losses in the market value of the Portfolio's fixed income investments.

## Benchmark Definitions (unaudited)

The following indices are used to illustrate investment market, sector or style performance or to serve as Portfolio performance comparisons. Unlike the Portfolios, the indices are not professionally managed and do not incur fees or expenses. It is not possible to invest directly in an index.

**1/3 each: Bloomberg Barclays® Global Aggregate — Credit Component ex Emerging Markets, Hedged USD; BofA Merrill Lynch® Global High Yield BB-B Rated Constrained Developed Markets Index, Hedged USD; JPMorgan® EMBI Global** — The Bloomberg Barclays Global Aggregate - Credit Component ex Emerging Markets, Hedged USD provides a broad-based measure of the global developed markets investment grade fixed income markets. The BofA Merrill Lynch Global High Yield BB-B Rated Constrained Developed Markets Index, Hedged USD tracks the performance of below investment grade bonds of corporate issuers domiciled in developed market countries rated BB1 through B3, based on an average of Moody's, S&P and Fitch. Qualifying bonds are capitalization weighted provided the total allocation to an individual issuer (defined by Bloomberg tickers) does not exceed 2%. Issuers that exceed the limit are reduced to 2% and the face value of each of their bonds is adjusted on a pro-rata basis. Similarly, the face value of bonds of all other issuers that fall below the 2% cap are increased on a pro-rata basis. The index is rebalanced on the last calendar day of the month. The JPMorgan EMBI Global tracks total returns for U.S. dollar-denominated debt instruments issued by emerging market sovereign and quasi-sovereign entities, Brady bonds, loans, Eurobonds and local market instruments. It is not possible to invest in an unmanaged index.

**Asset Allocation Portfolio Blended Composite Benchmark** — The Asset Allocation Portfolio Blended Composite Benchmark is an unmanaged, hypothetical combination of unmanaged indices that correspond to the Asset Allocation Portfolio's model allocation and consists of the Russell 1000® Index (33%), the Russell MidCap Index (11%), the Russell 2000® Index (5%), the MSCI EAFE® (Europe-Australasia-Far-East) Index (13%), the MSCI® Emerging Markets Index (3%), the Bloomberg Barclays® U.S. Aggregate Bond Index (24%), the Bloomberg Barclays® U.S. Corporate High Yield 2% Issuer Capped Bond Index (8%), and the BofA Merrill Lynch® US 3-Month Treasury Bill Index (3%).

**Balanced Portfolio Blended Composite Benchmark** — The Balanced Portfolio Blended Composite Benchmark is an unmanaged, hypothetical combination of unmanaged indices that correspond to the Balanced Portfolio's model allocation and consists of the Russell 1000® Index (26%), the Russell MidCap Index (9%), the Russell 2000® Index (3%), the MSCI EAFE® (Europe-Australasia-Far-East) Index (9%), the MSCI® Emerging Markets Index (2%), the Bloomberg Barclays® U.S. Aggregate Bond Index (41%), the Bloomberg Barclays® U.S. Corporate High Yield 2% Issuer Capped Bond Index (6%), and the BofA Merrill Lynch® US 3-Month Treasury Bill Index (4%).

**Bloomberg Barclays® 1-3 Year U.S. Government/Credit Bond Index** — The Bloomberg Barclays® 1-3 Year U.S. Government/Credit Bond Index is an unmanaged index of publicly issued medium and larger issues of U.S. Government, investment-grade corporate and investment-grade international dollar denominated bonds that have maturities of between one and three years.

**Bloomberg Barclays® U.S. Aggregate Bond Index** — The Bloomberg Barclays® U.S. Aggregate Index is an unmanaged index of publicly issued investment-grade fixed-rate debt securities including corporate, U.S. Treasury and government agency securities, mortgage pass-through and asset-backed securities with remaining maturities of at least one year regardless of call features.

**Bloomberg Barclays® U.S. Aggregate 1-3 Years Index** — The Bloomberg Barclays® U.S. Aggregate 1-3 Years Index is an unmanaged index of publicly issued investment-grade fixed-rate debt securities including corporate, U.S. Treasury and government agency securities, mortgage pass-through and asset-backed securities with remaining maturities of one to three years.

**Bloomberg Barclays® U.S. Corporate High Yield 2% Issuer Capped Bond Index** — The Bloomberg Barclays® U.S. Corporate High Yield 2% Issuer Capped Index is an unmanaged index of U.S. Dollar-denominated, non-convertible, fixed-rate, noninvestment-grade debt. Issuers are capped at 2% of the Index. Index holdings must have at least one year to final maturity, at least \$150 million par amount outstanding, and be publicly issued with a rating of Ba1 or lower.

## Benchmark Definitions (unaudited)

**Bloomberg Barclays® Global Credit Hedged USD Index** — The Bloomberg Barclays® Global Credit Hedged USD Index is an unmanaged index composed of investment-grade and high yield credit securities from the Multiverse represented in U.S. dollars on a hedged basis (Multiverse is the merger of two groups: the Global Aggregate and the Global High Yield).

**Bloomberg Barclays® Long-Term U.S. Treasury Index** — The Bloomberg Barclays® Long-Term U.S. Treasury Index is an unmanaged index comprised of fixed-income securities with various maturities greater than 10 years.

**Bloomberg Barclays® U.S. Treasury Inflation Protected Securities (TIPS) Index** — The Bloomberg Barclays® U.S. Treasury Inflation Protected Securities (TIPS) Index is an unmanaged index of inflation-protected public obligations of the U.S. Treasury. The index is market capitalization weighted and includes all publicly-issued U.S. Treasury Inflation-Protected Securities that have at least one year remaining to maturity and have \$250 million or more of outstanding face value.

**BofA Merrill Lynch® US 3-Month Treasury Bill Index** — The BofA Merrill Lynch® US 3-Month Treasury Bill Index is comprised of a single issue purchased at the beginning of the month and held for a full month. At the end of the month that issue is sold and rolled into a newly selected issue. The issue selected at each month-end rebalancing is the outstanding Treasury Bill that matures closest to, but not beyond, three months from the rebalancing date. To qualify for selection, an issue must have settled on or before the month-end rebalancing date.

**Lipper® Variable Insurance Products (VIP) Average** — Each Lipper® Variable Insurance Products (VIP) Average is calculated by Lipper® Analytical Services, Inc. and reflects the investment return of certain portfolios underlying variable life and annuity products. Source: Lipper®, Inc.

**Morningstar® Insurance Fund Category Averages** — Each Morningstar® category average is an equal-weighted category return. The calculation is simply the average of the returns at the end of the period for all the underlying variable insurance funds in a given category. Source: Morningstar®, Inc.

**Morningstar® US Insurance Fund Allocation – 30% to 50% Equity Average** — Funds in allocation categories seek to provide both income and capital appreciation by investing in multiple asset classes, including stocks, bonds, and cash. These portfolios are dominated by domestic holdings and have equity exposures between 30% and 50%. Source: Morningstar®, Inc.

**Morningstar® US Insurance Fund Allocation – 50% to 70% Equity Average** — Funds in allocation categories seek to provide both income and capital appreciation by investing in multiple asset classes, including stocks, bonds, and cash. These portfolios are dominated by domestic holdings and have equity exposures between 50% and 70%. Source: Morningstar®, Inc.

**MSCI® All Country World (ex-US) Index** — The MSCI® All Country World (ex-US) Index is an unmanaged, free float-adjusted market capitalization-weighted index that is designed to measure equity performance of companies in the developed and emerging markets, excluding the U.S.

**MSCI® All Country World (ex-US) Growth Index** — The MSCI® All Country World (ex-US) Growth Index is an unmanaged, free float-adjusted market capitalization-weighted index that is designed to measure equity performance of companies in the developed and emerging markets, excluding the U.S., with higher historical and forecasted growth characteristics.

**MSCI EAFE® (Europe-Australasia-Far-East) Index** — The MSCI EAFE® (“Europe-Australasia-Far East”) Index is an unmanaged, free float-adjusted, market capitalization-weighted index that is designed to measure equity performance of companies in the developed markets, excluding the U.S. & Canada.

**MSCI EAFE® (Europe-Australasia-Far-East) Growth Index** — The MSCI EAFE® (“Europe-Australasia-Far East”) Index is an unmanaged, free float-adjusted, market capitalization-weighted index that is designed to measure equity performance of companies in the developed markets, excluding the U.S. & Canada, with higher historical and forecasted growth characteristics.

**MSCI® Emerging Markets Index** — The MSCI® Emerging Markets Index is an unmanaged, free float-adjusted, market capitalization-weighted index that is designed to measure equity market performance in the global emerging markets.

## Benchmark Definitions (unaudited)

**Russell 1000<sup>®</sup> Index** — The Russell 1000<sup>®</sup> Index is an unmanaged, market capitalization-weighted, large cap index that measures the performance of the 1000 largest companies in the Russell 3000<sup>®</sup> Index.

**Russell 1000<sup>®</sup> Growth Index** — The Russell 1000<sup>®</sup> Growth Index is an unmanaged index that measures the performance of those companies in the Russell 1000<sup>®</sup> Index with higher price-to-book ratios and higher forecasted growth values.

**Russell 1000<sup>®</sup> Value Index** — The Russell 1000<sup>®</sup> Value Index is an unmanaged index that measures the performance of those companies in the Russell 1000<sup>®</sup> Index with lower price-to-book ratios and lower forecasted growth values.

**Russell 2000<sup>®</sup> Index** — The Russell 2000<sup>®</sup> Index is an unmanaged, market capitalization-weighted index that measures the performance of the 2000 companies in the Russell 3000<sup>®</sup> Index and represents approximately 10% of the total market capitalization of the Russell 3000<sup>®</sup> Index.

**Russell 2000<sup>®</sup> Growth Index** — The Russell 2000<sup>®</sup> Growth Index is an unmanaged index that measures the performance of those companies in the Russell 2000<sup>®</sup> Index with higher price-to-book ratios and higher forecasted growth values.

**Russell 2000<sup>®</sup> Value Index** — The Russell 2000<sup>®</sup> Value Index is an unmanaged index that measures the performance of those companies in the Russell 2000<sup>®</sup> Index with lower price-to-book ratios and lower forecasted growth values.

**Russell 3000<sup>®</sup> Index** — The Russell 3000<sup>®</sup> Index measures the performance of the 3000 largest U.S. companies representing approximately 98% of the investable U.S. equity market.

**Russell MidCap<sup>®</sup> Index** — The Russell MidCap<sup>®</sup> Index is an unmanaged index that measures the performance of the 800 smallest companies in the Russell 1000<sup>®</sup> Index, which represents approximately 25% of the total market capitalization of the Russell 1000<sup>®</sup> Index.

**Russell MidCap<sup>®</sup> Growth Index** — The Russell MidCap<sup>®</sup> Growth Index is an unmanaged index that measures the performance of the Russell MidCap<sup>®</sup> companies with higher price-to-book ratios and higher forecasted growth values.

**Russell MidCap<sup>®</sup> Value Index** — The Russell MidCap<sup>®</sup> Value Index is an unmanaged index that measures the performance of the Russell MidCap<sup>®</sup> companies with lower price-to-book and lower forecasted growth values.

**S&P 500<sup>®</sup> Index** — The S&P 500<sup>®</sup> Composite Stock Price Index is an unmanaged, capitalization-weighted index of 500 selected common stocks designed to measure the performance of the broad domestic economy.

**S&P MidCap 400<sup>®</sup> Index** — The S&P MidCap 400<sup>®</sup> Index is an unmanaged, capitalization-weighted index that measures the performance of the mid-range sector of the U.S. stock market.

**S&P SmallCap 600<sup>®</sup> Index** — The S&P SmallCap 600<sup>®</sup> Index is an unmanaged index of 600 selected common stocks of U.S.-based companies with small market capitalizations.

The Accompanying Notes are an Integral Part of the Financial Statements.

# Notes to Financial Statements

## NOTE 1. ORGANIZATION

Northwestern Mutual Series Fund, Inc. (the "Series Fund") is registered as an open-end management investment company under the Investment Company Act of 1940, as amended ("1940 Act"). The Series Fund is also considered an investment company following the accounting and reporting guidance in Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 946. The Series Fund consists of the Growth Stock Portfolio, Focused Appreciation Portfolio, Large Cap Core Stock Portfolio, Large Cap Blend Portfolio, Index 500 Stock Portfolio, Large Company Value Portfolio, Domestic Equity Portfolio, Equity Income Portfolio, Mid Cap Growth Stock Portfolio, Index 400 Stock Portfolio, Mid Cap Value Portfolio, Small Cap Growth Stock Portfolio, Index 600 Stock Portfolio, Small Cap Value Portfolio, International Growth Portfolio, Research International Core Portfolio, International Equity Portfolio, Emerging Markets Equity Portfolio, Government Money Market Portfolio, Short-Term Bond Portfolio, Select Bond Portfolio, Long-Term U.S. Government Bond Portfolio, Inflation Protection Portfolio, High Yield Bond Portfolio, Multi-Sector Bond Portfolio, Balanced Portfolio and Asset Allocation Portfolio (each, a "Portfolio" or collectively, the "Portfolios"). All of the outstanding shares of each Portfolio are held by an affiliate, The Northwestern Mutual Life Insurance Company ("Northwestern Mutual"), for its segregated asset accounts (either directly or indirectly through one or more underlying Portfolios operating as affiliated fund of funds). The Government Money Market Portfolio is a government money market fund under Rule 2a-7 of the 1940 Act.

## NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies consistently followed by the Series Fund in the preparation of its financial statements.

**A. Use of Estimates** — The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America ("U.S. GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

**B. Foreign Income and Capital Gains Taxes** — The Portfolios may be subject to income taxes imposed by certain countries in which they invest. Foreign withholding taxes on dividends and interest are netted against income and separately disclosed in the Statements of Operations.

Some of the Portfolios may be subject to capital gains taxes imposed by certain countries in which they invest. Any applicable foreign capital gains tax is accrued daily based upon net unrealized gains, and may be payable following the sale of any applicable investments.

**C. Federal Income Taxes** — The Portfolios' policy is to continue to comply with the requirements of the Internal Revenue Code that are applicable to regulated investment companies and to distribute all of their taxable income to their respective shareholders. The Portfolios also intend to distribute sufficient net investment income and net capital gains, if any, so that they will not be subject to excise tax, as applicable, on distributable income and gains.

In accordance with the authoritative guidance for uncertainty in income taxes, management of the Series Fund has reviewed all open tax years (2016 to 2019) for major jurisdictions and concluded there was no material impact to the Portfolios' net assets or results of operations. There is no material tax liability relating to uncertain income tax positions taken or expected to be taken in future tax returns. The Portfolios are also not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next 12 months.

**D. Distributions** — Dividends from net investment income and net realized capital gains are declared and paid each business day for the Government Money Market Portfolio and at least annually for the remaining Portfolios, when applicable.

**E. Other** — The Portfolios record security transactions on trade date. The basis for determining cost on sale of securities is identified cost. Interest income is recorded daily on the accrual basis and dividend income is recorded on the ex-dividend date or as soon as information from issuers is available. Where applicable, dividends are recorded net of foreign withholding tax. Discounts and premiums on securities purchased are amortized or accreted using the effective interest method. Expenses directly attributable to a Portfolio are incurred by the respective Portfolio. Expenses that are not directly attributable to one

# Notes to Financial Statements

or more Portfolios are allocated among applicable Portfolios on an equitable and consistent basis considering such things as the nature and type of expenses and the relative net assets of the Portfolios. The Portfolios consider highly liquid temporary cash investments purchased with an original maturity of less than three months to be cash equivalents. Cash equivalents are included in the short-term investments on the Schedule of Investments as well as in investments on the Statement of Assets and Liabilities. Temporary cash overdrafts are reported as a payable to custodian.

## F. New Accounting Pronouncements —

In March 2017, the FASB issued Accounting Standards Update No. 2017-08, “Receivables - Nonrefundable Fees and Other Costs (Subtopic 310-20), Premium Amortization on Purchased Callable Debt Securities” (“ASU 2017-08”). ASU 2017-08 amends the amortization period for certain purchased callable debt securities, held at a premium, shortening such period to the earliest call date. The amendments are effective for fiscal years and interim periods within those fiscal years, beginning after December 15, 2018. The ASU has been adopted, and the impacts are reflected in the 2019 financial statements.

In August 2018, the FASB issued Accounting Standards Update 2018-13, “Fair Value Measurement (Topic 820): Disclosure Framework—Changes to the Disclosure Requirements for Fair Value Measurement” (“ASU 2018-13”). The update introduces new fair value disclosure requirements, eliminates some prior fair value disclosure requirements, and modifies certain existing fair value disclosure requirements. ASU 2018-13 will be effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. Early adoption is permitted. In 2018, management early adopted certain aspects that allow removal of certain disclosure requirements. Management is currently assessing the potential impact of the remaining requirements to future financial statements.

## NOTE 3. SECURITY VALUATION

For purposes of calculating a net asset value, Portfolio securities and other assets are valued as of the close of trading on the New York Stock Exchange (“Exchange”) on each day during which the Exchange is open for trading.

The Fair Value Measurements and Disclosures Topic of the Financial Accounting Standards Codification defines fair value as the price that a fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. It establishes and requires disclosure of a fair value hierarchy, separately for each major category of asset and liability, which segregates fair value measurements into levels. A summary of the fair value hierarchy is described below:

- Level 1 — fair value is determined by unadjusted quoted prices in active markets for identical securities or derivatives
- Level 2 — fair value is determined by other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, and other data used in fair valuation)
- Level 3 — fair value is determined by significant unobservable inputs (including the Portfolios’ own assumptions in determining fair value)

The categorization of a value determined for a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to the Portfolios’ perceived risk of that instrument.

The following is a description of the valuation techniques and significant inputs used in determining the value of the Portfolios’ investments classified as Level 1 and Level 2 in the fair value hierarchy:

- Equity securities (common and preferred stock) for which market quotations are readily available are valued at the last sale or, when available, official closing price as reported by an independent pricing service on the primary market or exchange on which they are traded. In the event there were no sales during the day or closing prices are not available, securities are generally valued at the last quoted bid price. Equity securities traded only in the over-the-counter market and not on a securities exchange are valued at the last sale price or closing bid price, if no sales have occurred. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized as Level 1 of the fair value hierarchy. Additionally, for foreign securities, fair value procedures are used

## Notes to Financial Statements

if a significant event occurs between the close of the foreign market and the U.S. market close. The fair value price is reflected as Level 2 in the fair value hierarchy where applicable.

- Fixed income securities, including corporate, convertible and municipal bonds and notes, U.S. government agencies, U.S. treasury obligations, sovereign issues, bank loans, and non-U.S. bonds are generally valued on the basis of service provider prices that use broker dealer quotations or valuation estimates from internal pricing models. The service providers' internal models use inputs that are observable such as issuer details, interest rates, yield curves, call features, maturities, credit risks/spreads and default rates. Securities that use similar valuation techniques and inputs as described above are categorized as Level 2 in the fair value hierarchy.
- Fixed income securities purchased on a delayed delivery basis are marked to market daily until settlement at the forward settlement date and are categorized as Level 2 in the fair value hierarchy.
- Mortgage related and asset backed securities are generally issued as separate tranches, or classes, of securities within each deal. These securities are normally valued by pricing service providers that use broker dealer quotations or valuation estimates from their internal pricing models. The pricing models for these securities usually consider tranche level attributes, current market data, estimated cash flows and market-based yield spreads for each tranche, and incorporate deal collateral performance, as available. Mortgage related and asset backed securities that use similar valuation techniques and inputs as described above are categorized as Level 2 in the fair value hierarchy.
- Investments in open-end mutual funds (including other Portfolios) are valued at the mutual fund's closing net asset value per share and are categorized as Level 1 in the fair value hierarchy. Investments in privately held mutual funds are valued at the mutual fund's closing net asset value per share and are categorized as Level 2 in the fair value hierarchy.
- Money market investments, other than in the Government Money Market Portfolio, are generally valued by a pricing service. All securities in the Government Money Market Portfolio are valued using amortized cost, unless the current market value differs substantially from the amortized cost, at which time the securities are marked to market. Because the value is not obtained from a quoted price in an active market, such securities are reflected as Level 2 in the fair value hierarchy.
- Listed derivatives, such as futures or option contracts, which are actively traded on a national securities exchange, are stated at the last reported sale or settlement price on the day of valuation and are categorized as Level 1 in the fair value hierarchy.
- Centrally-cleared swaps and over-the-counter financial derivatives, such as foreign currency contracts, options contracts, or swap agreements derive their value from underlying asset prices, indices, reference rates, and other inputs or a combination of these factors. These derivatives are normally valued on the basis of quotes obtained from brokers and dealers or pricing services. Depending on the product and the terms of the transaction, the value of the derivatives can be estimated using a series of techniques, including simulation pricing models. The pricing models use inputs that are observed from actively quoted markets such as issuer details, indices, spreads, interest rates, curves, dividends and exchange rates. Financial derivatives that use similar valuation techniques and inputs as described above are categorized as Level 2 in the fair value hierarchy.

The following is a description of the valuation techniques and significant inputs used in determining the value the Portfolios' investments classified as Level 3 in the fair value hierarchy:

- Securities and other assets for which market quotes are not readily available are valued at fair market value as determined in good faith in accordance with procedures adopted by the Series Fund's Board of Directors ("Board"). Market quotes are considered not readily available in circumstances where there is an absence of current or reliable market-based data (e.g. trade information or broker quotes). The factors considered in reaching these values at December 31, 2019 included, but were not limited to, broker quotes, analysis of the likely outcome of pending litigation, liquidity, prepayment speed, duration and recoverability.

# Notes to Financial Statements

A table summarizing each Portfolio's investments under this hierarchy is included following each Portfolio's Schedule of Investments. Transfers between investment levels may occur as markets fluctuate and/or the availability of data used in investments' valuation changes. For fair valuations using significant unobservable inputs, U.S. GAAP requires a reconciliation of the beginning to ending balances for reported fair values that presents changes attributable to total realized and unrealized gains or losses, purchases and sales, and transfers in or out of the Level 3 category during the period. Additionally, U.S. GAAP requires quantitative information regarding the significant unobservable inputs used in the determination of fair value of assets categorized as Level 3 in the fair value hierarchy. In accordance with the requirements, a Level 3 reconciliation and details of significant unobservable inputs have been included in the notes to the Schedule of Investments for Portfolios that have a material amount of Level 3 investments. As of December 31, 2019, there were no Portfolios that owned a material amount of Level 3 securities.

The Series Fund has adopted policies and procedures which govern the pricing of Portfolio securities. The Board has delegated the day-to-day responsibility for pricing Portfolio securities and other investments to Mason Street Advisors, LLC ("MSA"), the Portfolios' investment adviser, Northwestern Mutual in its capacity as fund administrator, and State Street Bank and Trust Company in its capacity as fund accountant, subject to the oversight of a Pricing Committee appointed by the Board and comprised of representatives of MSA, Northwestern Mutual and Series Fund officers. The Pricing Committee is charged with the primary and day-to-day operational responsibility for executing the valuation process. The Pricing Committee has been delegated the authority to approve the override of any prices as permitted under the pricing policy and procedures approved by the Board and any variances from these pricing procedures when appropriate. All such actions are subject to further review and approval by the Board at its next regular meeting.

## NOTE 4. SECURITIES AND OTHER INVESTMENTS

**A. Delayed Delivery Transactions and When-Issued Securities** — Certain Portfolios may engage in securities transactions on a when-issued or delayed delivery basis. In these transactions, the securities' prices and yields are fixed on the date of the commitment, with payment and delivery scheduled for a future date. During this period, the securities are subject to market fluctuations. When delayed delivery purchases are outstanding, a Portfolio will earmark liquid assets on its records in amounts sufficient to meet the purchase price. A Portfolio may dispose of or renegotiate a delayed delivery transaction, which may result in a capital gain or loss.

**B. Repurchase Agreements** — Certain Portfolios may engage in repurchase transactions. Under the terms of a typical repurchase agreement, a Portfolio takes possession of an underlying debt obligation subject to an obligation of the seller to repurchase, and a Portfolio to resell, the obligation at an agreed upon price and time. The underlying securities for all repurchase agreements are held in safekeeping at the Portfolio's custodian or designated sub-custodians under tri-party repurchase agreements. The market value of the collateral must be equal to or exceed at all times the total amount of the repurchase obligations, including interest. Securities purchased under repurchase agreements are reflected as an asset on the Statements of Assets and Liabilities. Generally, in the event of counterparty default, a Portfolio has the right to use the collateral to offset losses incurred. If the counterparty should default, a Portfolio will seek to sell the securities which it holds as collateral. This could involve procedural costs or delays in addition to a loss on the securities if their value should fall below their repurchase price.

**C. Restricted Securities** — Certain Portfolios may invest in securities that are subject to legal or contractual restrictions on resale. These securities may be sold privately, but are required to be registered or exempted from registration before being sold to the public. Disposal of these securities may involve time-consuming negotiations and expense, and prompt sale at an acceptable price may be difficult.

**D. Foreign Currency Transactions** — Certain Portfolios may have securities and other assets and liabilities denominated in foreign currencies which are translated into U.S. dollar amounts on the date of valuation. Purchases and sales of securities and income items denominated in foreign currencies are translated into U.S. dollar amounts on the respective dates of such transactions. When the Portfolios purchase or sell a foreign security they may enter into a foreign currency exchange contract to minimize exchange rate risk from the trade date to the settlement date of such transaction. Such foreign currency exchange contracts are marked to market daily.

The Portfolios do not separately report the results of operations due to fluctuations in foreign exchange rates on investments

# Notes to Financial Statements

from the changes arising from changes in market prices of securities held. Such fluctuations are included with the net realized or unrealized gain or loss from investments.

Net realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade date and the settlement date on security transactions, and the differences between the amounts of income and foreign withholding taxes recorded on the Portfolios' books and the U.S. dollar equivalent of the amounts actually received or paid.

**E. Mortgage Backed and Asset Backed Securities** — Certain Portfolios may invest in mortgage backed securities, including collateralized mortgage obligations, and asset backed securities. Mortgage backed securities are interests in pools of residential or commercial mortgage loans and asset backed securities are interests in pools of other assets, including various types of loans and credit card receivables. These securities provide a monthly payment, consisting of both a principal and interest component. Interest payments may be based on either fixed rates or adjustable rates. Receipt of principal payment reduces the outstanding par amount of the security and may generate realized gains or losses. Yields on mortgage backed securities are affected by interest and prepayment rates, which, in turn, are influenced by a variety of economic, geographical, social and other factors. Maturities on mortgage backed securities represent stated maturity dates. Actual maturity dates may differ based on prepayment rates. Unlike mortgage backed securities issued or guaranteed by the U.S. government or one of its sponsored entities, mortgage backed securities and asset backed securities issued by private issuers do not have a government or government sponsored entity guarantee. These issuers may provide credit enhancements through external entities such as financial institutions or through the structuring of the transaction itself. There is no guarantee that credit enhancements, if any, will be sufficient to prevent losses.

**F. Inflation-Indexed Bonds** — Certain Portfolios may invest in inflation-indexed bonds. Inflation-indexed bonds are fixed income securities whose principal value is periodically adjusted to the rate of inflation. The interest rate on these bonds is generally fixed at issuance at a rate lower than typical bonds. Over the life of an inflation-indexed bond, interest will be paid based on a principal value, which is adjusted for inflation. Any increase in the principal amount of an inflation-indexed bond will be included as interest income in the applicable Portfolio's Statement of Operations even though investors do not receive their principal until maturity.

**G. Short Sales** — Certain Portfolios may enter into short sale transactions. A short sale is a transaction in which a Portfolio sells a security it does not own in anticipation of a decline in the market price of the security. Securities sold in short sale transactions and the interest payable on such securities, if any, are reflected as a liability on the Statements of Assets and Liabilities. A Portfolio is obligated to deliver the security at the market price at the time the short position is closed. The risk of loss on a short sale transaction is theoretically unlimited, because there is no limit to the cost of replacing the security sold short, whereas losses from purchase transactions cannot exceed the total amount invested.

**H. Financing Transactions** — Certain Portfolios may enter into financing transactions. In a financing transaction, the Portfolio transfers a security to a counterparty with a simultaneous agreement to repurchase the same security at an agreed upon price and future settlement date. For U.S. GAAP purposes, a financing transaction is accounted for as a secured borrowing and not as a purchase or sale. During the term of the borrowing, the Portfolio is entitled to the interest on the security. The difference between the sale price and repurchase price is included in net investment income with the cost of the secured borrowing transaction being recorded in interest expense over the term of the borrowing. The Portfolio will benefit from the transaction if the income earned on the investment purchased with the cash received in the financing transaction exceeds the interest expense incurred by the Portfolio. If the interest expense exceeds the income earned, the Portfolio's net investment income and dividends to shareholders may be adversely impacted. Financing transactions involve the risk that the market value of the securities that the Portfolio is required to repurchase may decline below the agreed upon repurchase price of those securities. For the year ended December 31, 2019, the Long-Term U.S. Government Bond Portfolio entered into financing transactions utilizing various U.S. Treasury bonds.

**I. Loan Participation and Assignments** — Certain Portfolios may invest in direct debt instruments which are interests in amounts owed to lenders or lending syndicates by corporate, governmental, or other borrowers. The Portfolios' investments in a loan may be in the form of either actual participation in loans or assignments of all or part of the loans from third parties. A loan is often administered by a bank or other financial institution that acts as an agent for all holders. The agent administers the terms of the loan which are specified in the loan agreement. The Portfolios may invest in multiple series or

# Notes to Financial Statements

tranches of a loan, each of which can have different terms and associated risks. The Portfolios generally do not have a right to enforce compliance with the terms of the loan agreement and as a result, the Portfolios may be subject to the credit risk of the borrower and lender that is selling the loan agreement. When the Portfolios purchase assignments from lenders they acquire direct rights against the borrower of the loan. The Portfolios may also enter into unfunded loan commitments, which are contractual obligations for future funding. Unfunded loan commitments can include lines of credit, which may require the Portfolios to grant additional cash to the borrower upon demand from the borrower. These unfunded loan commitments are in fact a future obligation in full, although a percentage of the loan amount may not be utilized by the borrower. When investing in a loan, the Portfolios have the right to receive principal, interest and any fees from the lender selling the loan agreement and only when the payments are received by the lender from the borrower. There may also be a commitment fee due to the Portfolios based on the unused portion of the line of credit of the floating rate loan. In certain cases, the Portfolios may be entitled to a penalty fee if there was a prepayment of a floating rate loan by the borrower. Fees that are earned or paid will be reflected as interest income or interest expense on the Statements of Operations. As of December 31, 2019, there were no unfunded loan commitments outstanding.

**J. Reverse Repurchase Agreements** — Certain Portfolios may enter into reverse repurchase agreements. In a reverse repurchase agreement, a Portfolio delivers a security in exchange for cash to a financial institution, the counterparty, with a simultaneous agreement to repurchase the same or substantially the same security at an agreed upon price and date. The Portfolio is entitled to receive principal and interest payments, if any, made on the security delivered to the counterparty during the term of the agreement. Cash received in exchange for securities delivered plus accrued interest payments to be made by the Portfolio to counterparties are reflected as a liability on the Statements of Assets and Liabilities. Interest payments made by a Portfolio to counterparties are recorded as a component of interest expense on the Statements of Operations. In periods of increased demand for the security, a Portfolio may receive a fee for use of the security by the counterparty, which may result in interest income to the Portfolio. When effecting reverse repurchase transactions, the Portfolio will hold securities of a dollar amount equal in value to the securities subject to the reverse repurchase agreement in a segregated account. As of December 31, 2019, there were reverse repurchase agreements held in the Long-Term U.S. Government Bond Portfolio.

## NOTE 5. DERIVATIVE INSTRUMENTS

The Portfolios may use derivative instruments for various purposes, including as a cash management strategy, to earn income and enhance returns, to increase or decrease exposure to a particular market, to manage or adjust the risk profile of the Portfolio, to hedge exposure to a foreign currency, or as an alternative to direct investments. Because the Portfolios are required to account for derivative instruments at fair value and recognize changes in fair value through the Statements of Operations, the Portfolios' derivatives do not qualify for hedge accounting treatment.

Certain Portfolios segregate cash to cover margin requirements for derivative positions. These amounts are denoted as "Cash Collateral for Derivative Positions" on the Statements of Assets and Liabilities.

**A. Futures Contracts** — Certain Portfolios invest in futures contracts as an alternative to investing in individual securities and could be exposed to market risk due to changes in the value of the underlying securities or due to an illiquid secondary market. Futures contracts are marked to market daily based upon quoted settlement prices. The Portfolios receive from or pay to brokers an amount of cash equal to the daily fluctuation in the value of the contracts. Such receipts or payments, known as the "variation margin," are recorded by the Portfolios as unrealized gains or losses. When a contract is closed, the Portfolios record a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

**B. Forward Foreign Currency Contracts** — The Portfolios may enter into forward foreign currency contracts to hedge against exchange rate risk arising from investments in securities denominated in foreign currencies or as part of an investment strategy. Contracts are valued at the contractual forward rate and are marked to market daily, with the change in market value recorded as an unrealized gain or loss. When the contracts are closed, a realized gain or loss is recorded. Risks may arise from changes in market value of the underlying instruments and from the possible inability of counterparties to meet the terms of their contracts.

## Notes to Financial Statements

**C. Options** — Certain Portfolios may write call and put options on futures, swaps, securities or currencies they own or in which they may invest. Writing put options tends to increase a Portfolio's exposure to the underlying instrument. Writing call options tends to decrease a Portfolio's exposure to the underlying instrument. The Portfolio receives a premium on the sale of a call option but gives up the opportunity to profit from any increase in the value of the security above the exercise price of the option. When a Portfolio writes a put option, it is exposed to a decline in the price of the underlying security. When a Portfolio writes a call or put option, an amount equal to the premium received is recorded as a liability and subsequently marked to market to reflect the current value of the option written. These liabilities are reflected as written options outstanding in the Statements of Assets and Liabilities. Payments received or made, if any, from writing options with premiums to be determined on a future date are reflected as such on the Statements of Assets and Liabilities. Premiums received from writing options which expire are treated as realized gains. Premiums received from writing options which are exercised or closed are added to the proceeds or offset against amounts paid on the underlying future, swap, security or currency transaction to determine the realized gain or loss. A Portfolio as a writer of an option has no control over whether the underlying future, swap, security or currency may be sold (called) or purchased (put) and as a result bears the market risk of an unfavorable change in the price of the future, swap, security or currency underlying the written option. There is a risk a Portfolio may not be able to enter into a closing transaction because of an illiquid market.

Certain Portfolios may also purchase call and put options on futures, swaps, securities or currencies they own or in which they may invest. Purchasing call options tends to increase a Portfolio's exposure to the underlying instrument. Purchasing put options tends to decrease a Portfolio's exposure to the underlying instrument. The Portfolio pays a premium on the purchase of a put option but receives the opportunity to profit from any increase in the value of the security above the exercise price of the option. When a Portfolio purchases a call option, it is exposed to a decline in the price of the underlying security. Premiums paid are reflected in the Statements of Assets and Liabilities as an investment and are subsequently marked to market to reflect the current value of the option. Premiums paid from purchasing options which expire are treated as realized losses. Premiums paid for purchasing options which are exercised or closed are added to the amount paid or offset against the proceeds on the underlying future, swap, security or currency transaction to determine realized gain or loss. The risk associated with a Portfolio purchasing call or put options is limited to the premium paid.

**D. Swap Agreements** — The Portfolios may enter into swap agreements on interest rate, total return and credit default to manage their exposure to interest rates, foreign currencies, investment style risk and credit risk or as an alternative to direct investing. In connection with these agreements, securities may be identified as collateral in accordance with the terms of the respective swap agreements. Swap agreements are privately negotiated in the over-the-counter market ("OTC swaps") and may be executed in a multilateral or other trade facility platform, such as a registered commodities exchange ("centrally cleared swaps").

Swaps are marked to market daily based upon quotations from market makers or values from third party vendors, which may include a registered commodities exchange, and the change in value, if any, is recorded as unrealized gain or loss in the Statements of Operations. Daily changes in the valuation of centrally cleared swaps, if any, are recorded as a receivable or payable for the change in value as appropriate ("variation margin") on the Statements of Assets and Liabilities. OTC swap payments received or made at the beginning of the measurement period of the swap are reflected on the Statements of Assets and Liabilities. Upfront payments are amortized to realized gain or loss. Upon termination of the swap, unamortized upfront payments are recorded as realized gain or loss in the Statements of Operations. A liquidation payment received or made at the termination of the swap is recorded as realized gain or loss in the Statements of Operations. Net periodic payments received by the Portfolios are included as part of realized gain (loss) on the Statements of Operations. Entering into these agreements involves, to varying degrees, elements of credit and market risk in excess of the amounts recognized on the Statements of Assets and Liabilities. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparty to the agreements may default on its obligation to perform and that there may be unfavorable changes in interest rates.

*Interest Rate Swaps* — Interest rate swap agreements involve the exchange by a Portfolio with another party to pay or receive a set of cash flows, e.g., an exchange of floating rate payments for fixed rate payments based on a notional amount of principal.

*Total Return Swaps* — Total return swap agreements involve commitments to pay or receive a financing rate in exchange for the total return of an underlying reference entity, both based on notional amounts. To the extent the total return of the

# Notes to Financial Statements

security or index underlying the transaction exceeds or falls short of the offsetting interest rate obligation, a Portfolio will receive a payment from or make a payment to the counterparty.

**Credit Default Swaps** — Credit default swap agreements involve one party making a series of payments to another party in exchange for the right to receive a cash payment equal to the notional value of the swap in the event of a default by a third party, typically corporate issues or sovereign issues of an emerging market country. A Portfolio may use credit default swaps to provide a measure of protection against defaults of the issuers where the Portfolio owns or has exposure to the corporate or sovereign issue or to take an active long or short position on the likelihood of a particular issuer's default.

As a seller of protection, the Portfolio generally receives an upfront payment and/or a fixed rate of income throughout the term of the swap provided that there is no credit event. As the seller, the Portfolio adds leverage to its investments because the Portfolio has investment exposure on the notional amount of the swap. As a buyer of protection, the Portfolio generally makes an upfront payment or pays a fixed rate of interest throughout the term of the swap provided that there is no credit event. The Portfolio generally receives an amount up to the notional value of the swap if a credit event occurs.

Implied credit spreads, represented in absolute terms, utilized in determining the market value of credit default swap agreements on corporate issues or sovereign issues of an emerging market country serve as an indicator of the current status of the payment/performance risk and represent the likelihood of a credit event occurring. The implied credit spread of a particular referenced entity reflects the cost of selling protection and may include upfront payments required to be made to enter into the agreement. For credit default swap agreements on credit indices, the quoted market prices and resulting values serve as the indicator of the current status of the payment/performance risk. Wider credit spreads and increasing market values, in absolute terms when compared to the notional amount of the swap, represent a deterioration of the referenced entity's credit soundness and indicate a greater likelihood a credit event could occur as defined under the terms of the agreement. Open credit default swaps on corporate or sovereign issues and credit indices are disclosed in the Schedules of Investments.

If the Portfolio is a seller of protection and a credit event occurs, the Portfolio will either pay to the buyer of the protection an amount equal to the notional value of the swap and may take delivery of the obligation or pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation. The maximum potential amount of future payments (undiscounted) that a Portfolio as a seller of protection could be required to make under a credit default swap agreement would be equal to the notional amount of the agreement. Notional amounts and fair market value of all credit default swap agreements outstanding for each Portfolio are disclosed in the Schedules of Investments. These maximum potential amounts would be partially offset by any recovery values of the referenced obligations, upfront payments received upon entering into the agreement, or net amounts received by the Portfolio from the settlement of credit default swap agreements purchasing protection for the same referenced obligation.

**E. Derivative Disclosures** — Derivative positions held by the Portfolios by contract type and primary risk exposure, including location on the Statement of Assets and Liabilities and value as of December 31, 2019, are (amounts in thousands):

Portfolio	Asset Derivatives		Liability Derivatives	
	Statement of Assets and Liabilities Location	Value	Statement of Assets and Liabilities Location	Value
Index 500 Stock Portfolio				
Equity contracts	Receivables – Futures Variation Margin	\$ 109	Payables – Futures Variation Margin	\$ –
Large Company Value Portfolio				
Foreign exchange contracts	Receivables – Foreign Currency Sold	16	Payables – Foreign Currency Purchased	56
Index 400 Stock Portfolio				
Equity contracts	Receivables – Futures Variation Margin	19	Payables – Futures Variation Margin	–
Mid Cap Value Portfolio				
Foreign exchange contracts	Receivables – Foreign Currency Sold	115	Payables – Foreign Currency Purchased	324

## NOTE 6. PORTFOLIO RISK

In the normal course of business, the Portfolios trade financial instruments and enter into financial transactions where risk of potential loss exists. Security values fluctuate (market risk) and may decline due to factors affecting securities markets in general, particular industries represented in the securities markets or conditions specifically related to a particular company. Failure of the other party to a transaction to perform (credit risk), for example by not making principal and interest payments when due, reduces the value of the issuer's debt and could reduce the Portfolios' income. Similar to credit risk, the Portfolios may be exposed to counterparty risk, or the risk that an institution or other entity with which the Portfolios have unsettled or open transactions will fail to make required payments or otherwise comply with the terms of the instrument, transaction or contract. The potential loss could exceed the value of the financial assets recorded in the financial statements. Some of the Portfolios' investments may be illiquid and the Portfolios may not be able to vary the portfolio investments in response to changes in economic and other conditions. If a Portfolio is required to liquidate all or a portion of its investments quickly, the Portfolio may realize significantly less than the value at which it previously recorded those investments.

### Master Netting Arrangements

The Portfolios are subject to various Master Agreements that govern the terms of certain transactions. Master Repurchase Agreements and Global Master Repurchase Agreements are in place that governs repurchase, reverse repurchase, and sale-buyback financing transactions. Master Securities Forward Transaction Agreements are in place that govern the settlement of certain forward settling transactions including to-be-announced securities, delayed-delivery or sale-buyback financing transactions. Customer Account Agreements and related addenda are in place that govern certain cleared derivative transactions including futures and cleared OTC derivatives. International Swaps and Derivatives Association, Inc. Master Agreements and Credit Support Annexes ("ISDA agreements") are in place that governs certain OTC financial derivative transactions. ISDA agreements maintain provisions for general obligations, representations, agreements, collateral and events of default or termination. Events of termination include conditions that may entitle counterparties to elect to terminate early and cause settlement of all outstanding transactions under the applicable ISDA agreement. The terms of Master Agreements may reduce counterparty risk with respect to transactions governed by the Master Agreement under certain circumstances. Certain Portfolios have agreements with counterparties that contain provisions, or contingency features, that allow net settlement in the event of contract termination and permit termination by either party prior to maturity upon the occurrence of certain stated events, such as failure to pay or bankruptcy. In addition, certain agreements specify other events, the occurrence of which would allow one of the parties to terminate. For example, a downgrade in credit rating of counterparty would allow the fund to terminate while a decline in the Portfolio's net assets of more than a certain percentage would allow the counterparty to terminate. In such a situation, the counterparty involved would have the option to waive the triggering event or liquidate the affected positions pursuant to the terms of the related agreement. The aggregate amount of

# Notes to Financial Statements

derivatives in a liability position is disclosed in Note 5.

## Offsetting Assets and Liabilities

Certain Portfolios are parties to enforceable master netting or similar agreements which provide for the right of offset under certain circumstances. The Portfolios have made an accounting policy election not to offset qualifying financial and derivative instruments on the Statements of Assets and Liabilities. As such, all financial and derivative instruments are presented on a gross basis on the Statements of Assets and Liabilities. The impacts of netting arrangements that provide the right to offset are detailed below (amounts in thousands). The net amount represents the net receivable or payable that would be due from or to the counterparty in the event of default. Exposure from borrowings and other financing transactions such as repurchase agreements and certain forward settling transactions can only be netted across transactions governed under the same Master Agreement with the same legal entity. For certain Portfolios, derivative amounts do not reconcile to the Statements of Assets and Liabilities due to the Statements of Assets and Liabilities including derivatives that are not covered under master netting or similar agreements. The amount of collateral, for the year ended December 31, 2019, has been limited such that the net amount cannot be less than zero.

The following is a summary by counterparty of the market value of OTC financial derivative instruments and collateral as of period end:

### Large Company Value Portfolio

# Notes to Financial Statements

## NOTE 7. INVESTMENT ADVISORY, SUB-ADVISORY, AND COMPLIANCE FEES

The Series Fund and its Portfolios are parties to annually renewable contracts pursuant to which each Portfolio pays a charge for investment management and administrative services to MSA, an affiliate and wholly-owned subsidiary of Northwestern Mutual. Certain Portfolios, listed below, pay at a fixed annual rate based on the average daily net asset values of the Portfolio.

<u>Portfolio</u>	<u>Fee</u>
Index 500 Stock Portfolio.....	0.20%
Index 400 Stock Portfolio.....	0.25%
Mid Cap Value Portfolio .....	0.85%
Small Cap Value Portfolio.....	0.85%
Government Money Market Portfolio.....	0.30%
Select Bond Portfolio.....	0.30%
Balanced Portfolio .....	0.30%

For the other Portfolios, the rate for the investment advisory fee is graded by the asset size of the Portfolio according to the following schedules:

<u>Portfolio</u>	<u>First \$50 Million</u>	<u>Next \$50 Million</u>	<u>Excess Over \$100 Million</u>
Growth Stock Portfolio.....	0.60%	0.50%	0.40%
Large Cap Core Stock Portfolio.....	0.60%	0.50%	0.40%
Mid Cap Growth Stock Portfolio .....	0.80%	0.65%	0.50%
Small Cap Growth Stock Portfolio .....	0.80%	0.65%	0.50%
High Yield Bond Portfolio.....	0.60%	0.50%	0.40%

<u>Portfolio</u>	<u>First \$100 Million</u>	<u>Next \$400 Million</u>	<u>Excess Over \$500 Million</u>
Focused Appreciation Portfolio.....	0.80%	0.75%	0.70%

<u>Portfolio</u>	<u>First \$100 Million</u>	<u>Next \$150 Million</u>	<u>Excess Over \$250 Million</u>
Large Company Value Portfolio.....	0.72%	0.67%	0.62%
Domestic Equity Portfolio .....	0.65%	0.55%	0.50%
International Growth Portfolio.....	0.75%	0.65%	0.55%
Short-Term Bond Portfolio .....	0.35%	0.33%	0.30%
Long-Term U.S. Government Bond Portfolio.	0.555%	0.515%	0.495%

<u>Portfolio</u>	<u>First \$500 Million</u>	<u>Excess Over \$500 Million</u>
Equity Income Portfolio.....	0.65%	0.60%

<u>Portfolio</u>	<u>First \$200 Million</u>	<u>Excess Over \$200 Million</u>
Index 600 Stock Portfolio.....	0.25%	0.20%

# Notes to Financial Statements

<u>Portfolio</u>	<u>First \$50 Million</u>	<u>Excess Over \$50 Million</u>
International Equity Portfolio.....	0.85%	0.65%

<u>Portfolio</u>	<u>First \$250 Million</u>	<u>Next \$250 Million</u>	<u>Next \$500 Million</u>	<u>Excess Over \$1.0 Billion</u>
Emerging Markets Equity Portfolio.....	1.14%	1.08%	0.96%	0.78%

MSA, which is the manager and investment adviser of the Series Fund, contractually agreed to waive the management fee and absorb certain other operating expenses to the extent necessary so that Total Operating Expenses (excluding taxes, brokerage, other investment-related costs, interest and dividend expenses and charges, acquired fund fees, fees for class actions, other passive securities litigation and anti-trust claim filing services and such non-recurring and extraordinary expenses as they may arise) will not exceed the following amounts:

<u>Portfolio</u>		<u>Expiration</u>
Focused Appreciation Portfolio.....	0.90%	April 30, 2020
Large Cap Blend Portfolio.....	0.85%	April 30, 2020
Large Company Value Portfolio.....	0.80%	April 30, 2020
Domestic Equity Portfolio.....	0.75%	April 30, 2020
Equity Income Portfolio.....	0.75%	April 30, 2020
Mid Cap Value Portfolio.....	1.00%	April 30, 2020
Index 600 Stock Portfolio.....	0.35%	April 30, 2020
Small Cap Value Portfolio.....	1.00%	April 30, 2020
International Growth Portfolio.....	1.10%	April 30, 2020
Research International Core Portfolio.....	1.15%	April 30, 2020
Emerging Markets Equity Portfolio.....	1.50%	April 30, 2020
Short-Term Bond Portfolio.....	0.45%	April 30, 2020
Long-Term U.S. Government Bond Portfolio.....	0.65%	April 30, 2020
Inflation Protection Portfolio.....	0.65%	April 30, 2020
Multi-Sector Bond Portfolio.....	0.90%	April 30, 2020
Asset Allocation Portfolio.....	0.75%	April 30, 2020

Growth Stock Portfolio –MSA has agreed to waive a portion of its management fee such that the management fee is 0.60% on the Portfolio’s first \$50 million of average net assets, 0.50% on the next \$50 million, 0.40% on the next \$400 million, 0.38% on the next \$500 million, and 0.36% on average net assets in excess of \$1 billion. MSA may terminate this fee waiver agreement at any time after April 30, 2020.

Focused Appreciation Portfolio – MSA has agreed to waive a portion of its management fee such that the management fee is 0.66% on the Portfolio’s first \$100 million of average net assets, 0.61% on the next \$400 million, 0.60% on the next \$500 million, and 0.57% on average net assets in excess of \$1 billion. MSA may terminate this fee waiver agreement at any time after April 30, 2020.

Large Cap Core Stock Portfolio – MSA has agreed to waive a portion of its management fee such that the management fee is 0.60% on the Portfolio’s first \$50 million of average net assets, 0.50% on the next \$50 million, 0.40% on the next \$400 million, and 0.37% on average net assets in excess of \$500 million. MSA may terminate this fee waiver agreement at any time after April 30, 2020.

Large Cap Blend Portfolio – Effective May 1, 2019, MSA has agreed to waive a portion of its management fee such that the management fee is 0.76% on the Portfolio’s first \$150 million of average net assets, 0.69% on the next \$150 million, 0.62% on the next \$200 million, and 0.56% on average net assets in excess of \$500 million. MSA may terminate this fee waiver agreement at any time after April 30, 2020.

Index 500 Stock Portfolio – MSA has agreed to waive a portion of its management fee such that the management fee is 0.20% on the Portfolio’s first \$2 billion of average net assets, and 0.18% on average net assets in excess of \$2 billion. MSA may terminate this fee waiver agreement at any time after April 30, 2020.

MSA may terminate this fee waiver agreement at any time after April 30, 2020.

Equity Income Portfolio – For the period from January 1, 2019 through April 30, 2019, MSA agreed to waive a portion of its management fee such that the management fee was 0.62% on the Portfolio's first \$500 million of average net assets, 0.55% on the next \$1 billion, and 0.52% on the average net assets in excess of \$1.5 billion. Effective May 1, 2019, MSA has agreed to waive a portion of its management fee such that the management fee is 0.60% on the Portfolio's first \$500 million of average net assets, 0.55% on the next \$1 billion, and 0.52% on the average net assets in excess of \$1.5 billion. MSA may terminate this fee waiver agreement at any time after April 30, 2020.

Mid Cap Growth Stock Portfolio – MSA has agreed to waive a portion of its management fee such that the management fee is 0.80% on the Portfolio's first \$50 million, 0.65% on the next \$50 million, 0.50% on the next \$900 million, and 0.49% on average net assets in excess of \$1 billion. MSA may terminate this fee waiver agreement at any time after April 30, 2020.

Index 400 Stock Portfolio – MSA has agreed to waive a portion of its management fee such that the management fee is 0.25% on the Portfolio's first \$500 million and 0.20% on average net assets in excess of \$500 million. MSA may terminate this fee waiver agreement at any time after April 30, 2020.

Mid Cap Value Portfolio – For the period from January 1, 2019 through April 30, 2019, MSA agreed to waive a portion of its management fee such that the management fee was 0.79% on the Portfolio's first \$150 million of average net assets, 0.69% on the next \$350 million, and 0.66% on the average net assets in excess of \$500 million. Effective May 1, 2019, MSA has agreed to waive a portion of its management fee such that the management fee is 0.79% on the Portfolio's first \$150 million of average net assets, 0.68% on the next \$350 million, and 0.65% on the average net assets in excess of \$500 million. MSA may terminate this fee waiver agreement at any time after April 30, 2020.

Small Cap Value Portfolio – MSA has agreed to waive a portion of its management fee such that the management fee is 0.85% on the Portfolio's first \$500 million of average net assets, and 0.80% on average net assets in excess of \$500 million. MSA may terminate this fee waiver agreement at any time after April 30, 2020.

International Growth Portfolio – MSA has agreed to waive a portion of its management fee such that the management fee is 0.75% on the Portfolio's first \$100 million of average net assets, 0.65% on the next \$150 million, 0.55% on the next \$750 million, and 0.54% on average net assets in excess of \$1 billion. MSA may terminate this fee waiver agreement at any time after April 30, 2020.

Research International Core Portfolio – MSA has agreed to waive a portion of its management fee such that the management fee is 0.83% on the Portfolio's first \$150 million of average net assets, 0.77% on the next \$150 million, 0.70% on the next \$200 million, and 0.63% on average net assets in excess of \$500 million. MSA may terminate this fee waiver agreement at any time after April 30, 2020.

International Equity Portfolio – For the period from January 1, 2019 through April 30, 2019, MSA agreed to waive a portion of its management fee such that the management fee was 0.77% on the Portfolio's first \$50 million of average net assets, 0.57% on the next \$450 million, 0.54% on the next \$500 million, 0.47% on the next \$500 million, and 0.41% on the average net assets in excess of \$1.5 billion. Effective May 1, 2019, MSA has agreed to waive a portion of its management fee such that the management fee is 0.77% on the Portfolio's first \$50 million of average net assets, 0.57% on the next \$450 million, 0.54%

## Notes to Financial Statements

on the next \$500 million, 0.46% on the next \$500 million, and 0.40% on the average net assets in excess of \$1.5 billion. MSA may terminate this fee waiver agreement at any time after April 30, 2020.

Emerging Markets Equity Portfolio – For the period from January 1, 2019 through April 30, 2019, MSA agreed to waive a portion of its management fee such that its management fee was 1.01% on the Portfolio's first \$250 million of average net assets, 0.93% on the next \$250 million, 0.91% on the next \$500 million, and 0.78% on average net assets in excess of \$1 billion. Effective May 1, 2019, MSA has agreed to waive a portion of its management fee such that its management fee is 1.00% on the Portfolio's first \$250 million of average net assets, 0.92% on the next \$250 million, 0.89% on the next \$500 million, and 0.78% on average net assets in excess of \$1 billion. MSA may terminate this fee waiver agreement at any time after April 30, 2020.

Government Money Market Portfolio – MSA has agreed to waive a portion of its management fee such that the management fee is 0.30% on the Portfolio's first \$500 million of average net assets, 0.29% on the next \$500 million, and 0.28% in excess of \$1 billion. MSA may terminate this fee waiver agreement at any time after April 30, 2020.

Short-Term Bond Portfolio – MSA has agreed to waive a portion of its management fee such that the management fee is 0.35% on the Portfolio's first \$100 million of average net assets, 0.33% on the next \$150 million, 0.30% on the next \$250 million, and 0.28% on average net assets in excess of \$500 million. MSA may terminate this fee waiver agreement at any time after April 30, 2020.

Select Bond Portfolio – MSA has agreed to waive a portion of its management fee such that the management fee is 0.30% on the Portfolio's first \$2 billion of average net assets, and 0.28% on average net assets in excess of \$2 billion. MSA may terminate this fee waiver agreement at any time after April 30, 2020.

Long-Term U.S. Government Bond Portfolio – MSA has agreed to waive a portion of its management fee such that the management fee is 0.555% on the Portfolio's first \$100 million of average net assets, 0.515% on the next \$150 million, 0.495% of the next \$250 million, and 0.445% on average net assets in excess of \$500 million. MSA may terminate this fee waiver agreement at any time after April 30, 2020.

Inflation Protection Portfolio – MSA agreed to waive a portion of its management fee such that the management fee is 0.55% on the Portfolio's first \$100 million of average net assets, 0.50% on the next \$150 million, and 0.46% on average net assets in excess of \$250 million. MSA may terminate this fee waiver agreement at any time after April 30, 2020.

High Yield Bond Portfolio – MSA agreed to waive a portion of its management fee such that the management fee is 0.60% on the Portfolio's first \$50 million of average net assets, 0.50% on the next \$50 million, 0.40% on the next \$900 million, and 0.30% on average net assets in excess of \$1 billion. MSA may terminate this fee waiver agreement at any time after April 30, 2020.

Multi-Sector Bond Portfolio – For the period from January 1, 2019 through April 30, 2019, MSA agreed to waive a portion of its management fee such that the management fee was 0.74% on the Portfolio's first \$100 million of average net assets, 0.73% on the next \$150 million, 0.70% on the next \$250 million, and 0.67% on average net assets in excess of \$500 million. Effective May 1, 2019, MSA has agreed to waive a portion of its management fee such that the management fee is 0.74% on the Portfolio's first \$100 million of average net assets, 0.73% on the next \$150 million, 0.70% on the next \$250 million, and 0.65% on average net assets in excess of \$500 million. MSA may terminate this fee waiver agreement at any time after April 30, 2020.

Balanced Portfolio – MSA has agreed to waive a portion of its management fee such that the management fee is 0.05% on all average net assets. MSA may terminate this fee waiver agreement at any time after April 30, 2020.

Asset Allocation Portfolio – MSA has agreed to waive a portion of its management fee such that the management fee is 0.05% on all average net assets. MSA may terminate this fee waiver agreement at any time after April 30, 2020.

Waivers are not recoupable in future periods.

## Notes to Financial Statements

With respect to certain Portfolios, MSA has engaged and oversees unaffiliated sub-advisers who manage the day-to-day investment operations of such Portfolios. MSA pays each sub-adviser a fee based on the average daily net assets of each such Portfolio out of its investment management fee.

Compliance fees are paid to Northwestern Mutual, an affiliate of the Series Fund. The compliance fees paid are for the compensation, benefits and expenses of the Chief Compliance Officer and compliance staff. The amounts paid relate only to the Chief Compliance Officer and compliance staffs' duties and functions performed for the Series Fund.

### NOTE 8. FEDERAL INCOME TAX MATTERS

Taxable distributions from net investment income and realized capital gains in the Portfolios may differ from book amounts earned during the period due to differences in the timing of capital gains recognition and due to the reclassification of certain gains or losses between capital and income. The differences between cost amounts for book purposes and tax purposes are primarily due to the tax treatment of deferred losses, passive foreign investment companies, and financing transactions.

It is the policy of the Portfolios to reclassify the net effect of permanent differences between book and taxable income to capital accounts on the Statements of Assets and Liabilities. Permanent differences primarily relate to character differences with respect to income on swaps, foreign currency transactions, foreign bond sales, passive foreign investment companies and paydowns on structured product investments.

A summary of the Portfolios' capital loss carryovers as of December 31, 2019 is provided below:

	<u>Short- Term Loss Carryover</u>	<u>Long- Term Loss Carryover</u>	<u>Losses Utilized</u>
	(Amounts in thousands)		
Mid Cap Value Portfolio .....	\$ —	\$ 972	\$ —
International Equity Portfolio .....	8,477	32,052	—
Emerging Markets Equity Portfolio .....	—	25,681	2,106
Short-Term Bond Portfolio .....	589	1,582	915
Select Bond Portfolio .....	—	—	94,989

## NOTE 9. VOLUNTARY REIMBURSEMENTS

Northwestern Mutual voluntarily reimburses foreign equity portfolios for the benefit Northwestern Mutual receives from foreign dividend taxes charged against the Portfolios. The amounts reimbursed represent approximately 79% of the foreign dividend taxes withheld attributable to the portion of the Portfolio owned by Northwestern Mutual. Reimbursements are recorded when foreign dividend taxes are accrued.

# Notes to Financial Statements

Voluntary reimbursements for the year ended December 31, 2019 are summarized below:

<u>Portfolio</u>	<b>2019</b>	
	<u>Reimbursements</u>	
International Growth Portfolio .....	\$	858,932
International Equity Portfolio .....		5,395,054
Research International Core Portfolio .....		1,652,751
Emerging Markets Equity Portfolio .....		1,371,574

## NOTE 10. GUARANTEES

In the normal course of business, the Portfolios enter into contracts that contain a variety of representations which provide general indemnifications. The Portfolios' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Portfolios that have not yet occurred. However, the Portfolios expect the risk of material loss to be remote.

## NOTE 11. INVESTMENT INCOME AND SECURITIES TRANSACTIONS

For the year ended December 31, 2019, transactions in securities other than short term investments were:

<u>Portfolios</u>	<u>Non-U.S. Govt. Security Purchases</u>		<u>Non-U.S. Govt. Security Sales/ Maturities</u>		<u>U.S. Govt. Security Sales/ Maturities</u>

The Series Fund and its Portfolios are permitted to purchase securities from, and sell securities to (so called “cross-trades”), (i) other Portfolios, (ii) any registered investment company which is an affiliate, or an affiliate of an affiliate, or (iii) any person which is an affiliate, or an affiliate of an affiliate, of the Series Fund or the Portfolio solely by reason of having a common investment adviser or sub-adviser (or affiliated investment advisers) or common directors and/or officers, pursuant to procedures adopted by the Board under Rule 17a-7 of the 1940 Act (“Procedures”). These Procedures have been designed to ensure that any cross-trade of securities by a Portfolio complies with Rule 17a-7 of the 1940 Act. Each cross-trade is effected at the current market price as defined under the Procedures. Pursuant to the Procedures, for the year ended December 31, 2019, the Series Fund Portfolios engaged in the following cross-trades (amounts in thousands):

Portfolio	Cross Trade Purchases	Portfolio	Cross Trade Sales	
			Proceeds	Net Realized Gain (Loss) on Sales
Large Cap Core Portfolio	\$2,765	Large Cap Core Portfolio	\$2,091	\$218
Large Company Value Portfolio	1,897	Large Company Value Portfolio	1,564	67
Mid Cap Growth Stock Portfolio	613	Mid Cap Growth Stock Portfolio	539	(143)

# Notes to Financial Statements

Research International Core Portfolio	294	Research International Core Portfolio	95	30
High Yield Bond Portfolio	2,422			

## NOTE 12. LITIGATION

The Index 500 Stock, Small Cap Value and Equity Income Portfolios are among the defendants in two lawsuits relating to their receipt of proceeds from the 2007 Tribune Co. leveraged buy-out (“Tribune LBO”) transaction. One lawsuit asserts that the directors and officers of Tribune Co. intentionally defrauded Tribune creditors because Tribune was either insolvent or rendered insolvent by the transactions. Counsel for the Series Fund and other institutional defendants filed a motion to dismiss the intentional fraudulent transfer case in the Southern District of New York and the district court judge granted the motion to dismiss without leave to amend. The dismissal is being appealed to the U.S. Court of Appeals for the Second Circuit. The other set of lawsuits asserts that the transfer of proceeds to the above-noted Portfolios (and other shareholders) as part of the Tribune LBO were constructively fraudulent. Following the consolidation of the cases in the United States District Court for the Southern District of New York, the district court judge granted the motion to dismiss the constructive fraud lawsuit, and the dismissal was subsequently affirmed by the U.S. Court of Appeals for the Second Circuit. The appeal of the dismissal of the lawsuit was reconsidered by the U.S. Court of Appeals for the Second Circuit and the dismissal was reaffirmed. The lawsuits allege no misconduct by the Portfolios or management, and management intends to vigorously defend all claims and allegations. The plaintiffs in both lawsuits seek to recover amounts paid to Tribune shareholders in the leveraged buyout transaction, plus interest and attorneys’ fees and expenses. The value of the proceeds received by these Portfolios in 2007, and the percentage the proceeds represent of each Portfolio’s net assets as of December 31, 2019, were: Index 500 Stock Portfolio \$977,000 (0.03%) of net assets; Small Cap Value Portfolio \$618,000 (0.10% of net assets); and Equity Income Portfolio \$2,873,000 (0.35% of net assets). Management has not concluded that a loss is reasonably likely to occur, and therefore no loss accrual has been recorded.

# Report of Independent Registered Public Accounting Firm

To the Board of Directors of the Northwestern Mutual Series Fund, Inc. and Shareholders of the Growth Stock Portfolio, Focused Appreciation Portfolio, Large Cap Core Stock Portfolio, Large Cap Blend Portfolio, Index 500 Stock Portfolio, Large Company Value Portfolio, Domestic Equity Portfolio, Equity Income Portfolio, Mid Cap Growth Stock Portfolio, Index 400 Stock Portfolio, Mid Cap Value Portfolio, Small Cap Growth Stock Portfolio, Index 600 Stock Portfolio, Small Cap Value Portfolio, International Growth Portfolio, Research International Core Portfolio, International Equity Portfolio, Emerging Markets Equity Portfolio, Government Money Market Portfolio, Short-Term Bond Portfolio, Select Bond Portfolio, Long-Term U.S. Government Bond Portfolio, Inflation Protection Portfolio, High Yield Bond Portfolio, Multi-Sector Bond Portfolio, Balanced Portfolio and Asset Allocation Portfolio.

## ***Opinion on the Financial Statements***

We have audited the accompanying statements of assets and liabilities, including the schedules of investments, of the Growth Stock Portfolio, Focused Appreciation Portfolio, Large Cap Core Stock Portfolio, Large Cap Blend Portfolio, Index 500 Stock Portfolio, Large Company Value Portfolio, Domestic Equity Portfolio, Equity Income Portfolio, Mid Cap Growth Stock Portfolio, Index 400 Stock Portfolio, Mid Cap Value Portfolio, Small Cap Growth Stock Portfolio, Index 600 Stock Portfolio, Small Cap Value Portfolio, International Growth Portfolio, Research International Core Portfolio, International Equity Portfolio, Emerging Markets Equity Portfolio, Government Money Market Portfolio, Short-Term Bond Portfolio, Select Bond Portfolio, Long-Term U.S. Government Bond Portfolio, Inflation Protection Portfolio, High Yield Bond Portfolio, Multi-Sector Bond Portfolio, Balanced Portfolio and Asset Allocation Portfolio (constituting Northwestern Mutual Series Fund, Inc., hereafter collectively referred to as the "Funds") as of December 31, 2019, the related statements of operations for the year ended December 31, 2019, the statements of changes in net assets for each of the two years in the period ended December 31, 2019, and for the Long-Term U.S. Government Bond Portfolio the statement of cash flows for the year ended December 31, 2019, including the related notes, and the financial highlights for each of the five years in the period ended December 31, 2019 (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of each of the Funds as of December 31, 2019, the results of each of their operations for the year then ended,, the changes in each of their net assets for each of the two years in the period ended December 31, 2019, for the Long-Term U.S. Government Bond Portfolio, the results of its cash flows for the year then ended, and each of the financial highlights for each of the five years in the period ended December 31, 2019 in conformity with accounting principles generally accepted in the United States of America.

## ***Basis for Opinion***

These financial statements are the responsibility of the Funds' management. Our responsibility is to express an opinion on the Funds' financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Funds in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

# Report of Independent Registered Public Accounting Firm

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of December 31, 2019 by correspondence with the custodian, transfer agent and brokers; when replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinions.

# Proxy Voting and Portfolio Holdings (unaudited)

## Proxy Voting Guidelines

A description of the policies and procedures that the Portfolios use to determine how to vote proxies relating to portfolio securities is available without charge, upon request, by calling toll free 1-888-455-2232. It is also available on the Securities and Exchange Commission's website at <http://www.sec.gov>.

Information regarding how the Portfolios voted proxies relating to portfolio securities during the most recent twelve-month period ended June 30 is available without charge, upon request, by calling toll free 1-888-455-2232. It is also available on the Securities and Exchange Commission's website at <http://www.sec.gov>.

## Quarterly Filing of Portfolio Holdings

Each Portfolio, other than the Government Money Market Portfolio, files its complete schedule of portfolio holdings on a monthly basis with the Securities and Exchange Commission (SEC) as an exhibit to its reports on Form N-PORT. Each Portfolio's holdings reported on Form N-PORT for the first and third quarters of the fiscal year are available on the SEC's website at <http://www.sec.gov>. Portfolios that file their holdings on Form N-PORT also make their complete schedule of portfolio holdings for the most recent quarter of their fiscal year available on the Internet at [www.northwesternmutual.com](http://www.northwesternmutual.com).

The Government Money Market Portfolio files its complete schedule of portfolio holdings on a monthly basis with the SEC on Form N-MFP. Form N-MFP is available on the SEC's website at <http://www.sec.gov>. The Government Money Market Portfolio also makes its complete schedule of portfolio holdings for the most recent month available on the Internet at [www.northwesternmutual.com](http://www.northwesternmutual.com).

# Director and Officer Information (unaudited)

## Northwestern Mutual Series Fund, Inc.

The name, address and year of birth of the directors, as well as their affiliations, positions held with the Series Fund, principal occupations during the past five years and the number of portfolios overseen in the Northwestern Mutual fund complex, are shown below as of December 31, 2019, except as otherwise noted. Each director (whenever elected) shall hold office until the next annual meeting of shareholders and until his or her successor is elected and qualifies or until his or her earlier death, resignation or removal. A director shall retire at the end of the calendar year in which the first of the two events occurs: (i) he or she attains the age of seventy-three (73), or (ii) he or she has served a term or successive terms totaling thirteen (13) years, commencing on the date of his or her election or appointment to the Board. The statement of additional information contains additional information about Series Fund directors and is available without charge, upon request, by calling 1-888-455-2232.

# Approval and Continuance of Investment Advisory and Sub-Advisory Agreements (unaudited)

**Northwestern Mutual Series Fund, Inc.**

## **Annual Contract Review Process**

Under Section 15(c) of the Investment Company Act of 1940, as amended (the “1940 Act”), contracts for investment advisory services are required to be reviewed, evaluated and approved by a majority of an investment company’s independent directors each year. In addition, each investment company is required to disclose in its annual or semi-annual report, as applicable, the material factors and conclusions that formed the basis for the board’s approval or renewal of any investment advisory agreements within the investment company’s most recently completed fiscal half-year period.

At least annually, the Board of Directors (the “Board”) of Northwestern Mutual Series Fund, Inc. (the “Series Fund”) considers and votes upon the renewal of the investment sub-advisory agreements between Mason Street Advisors, LLC (“Mason Street Advisors”) and each of the sub-advisers of those portfolios of the Series Fund (each, a “Portfolio” and collectively, the “Portfolios”) for which Mason Street Advisors and the Board have appointed a sub-adviser. In order to afford the Board the opportunity to focus on a smaller number of relationships at any one meeting, the Board considers the annual continuation of the sub-advisory agreements on a staggered basis during the course of the year.

## **Board Approvals During the Six-Month Period Ended December 31, 2019**

At its August 29, 2019 meeting, the Board, including the directors who are not “interested persons” (as that term is defined in the 1940 Act) of the Series Fund or Mason Street Advisors (“Independent Directors”), unanimously approved a new Investment Sub-Advisory Agreement between Mason Street Advisors and T. Rowe Price Associates, Inc. (T. Rowe Price”) relating to the Series Fund’s Growth Stock Portfolio (the “New Sub-Advisory Agreement”).

Also at its August 29, 2019 meeting, the Board, including the Independent Directors, unanimously approved the continuance of a (1) Third Amended and Restated Investment Sub-Advisory Agreement between Mason Street Advisors and American Century Investment Management, Inc. (“American Century”) relating to the Series Fund’s Mid Cap Value, Large Company Value and Inflation Protection Portfolios, (2) Second Amended and Restated Investment Sub-Advisory Agreement between Mason Street Advisors and Delaware Investments Fund Advisers, a series of Macquarie Investment Management Business Trust (“Delaware”) relating to the Series Fund’s Domestic Equity Portfolio, (3) Second Amended and Restated Investment Sub-Advisory Agreement between Mason Street Advisors and Federated Investment Management Company (“Federated”) relating to the Series Fund’s High Yield Bond Portfolio, and a (4) Second Amended and Restated Investment Sub-Advisory Agreement between Mason Street Advisors and Loomis, Sayles & Company, L.P. (“Loomis Sayles”) relating to the Series Fund’s Focused Appreciation Portfolio.

At its November 21, 2019 meeting, the Board, including the Independent Directors, unanimously approved the continuance of a (1) Fourth Amended and Restated Investment Sub-Advisory Agreement between Mason Street Advisors and T. Rowe Price relating to the Series Fund’s Short-Term Bond, Small Cap Value and Equity Income Portfolios, (2) Second Amended and Restated Investment Sub-Advisory Agreement between Mason Street Advisors and Wells Capital Management, Incorporated (“Wells Capital”) relating to the Series Fund’s Select Bond Portfolio, (3) Third Amended and Restated Investment Sub-Advisory Agreement between Mason Street Advisors and Pacific Investment Management Company LLC (“PIMCO”) relating to the Series Fund’s Long-Term U.S. Government Bond and Multi-Sector Bond Portfolios, and a (4) Second Amended and Restated Investment Sub-Advisory Agreement between Mason Street Advisors and BlackRock Advisors, LLC (“BlackRock”) relating to the Series Fund’s Government Money Market Portfolio.

American Century, Delaware, Federated, Loomis Sayles, T. Rowe Price, Wells Capital, PIMCO and BlackRock are sometimes collectively referred to hereinafter as the “Sub-Advisers,” and their respective sub-advised Portfolios (with the exception of the Growth Stock Portfolio) are collectively referred to herein as the “Sub-Advised Portfolios.” The respective Investment Sub-Advisory Agreements with the Sub-Advisers (except for the New Sub-Advisory Agreement with T. Rowe Price) are collectively referred to herein as the “Existing Sub-Advisory Agreements.”

# Approval and Continuance of Investment Advisory and Sub-Advisory Agreements (unaudited)

In determining whether to approve the New Sub-Advisory Agreement and the continuance of the Existing Sub-Advisory Agreements on behalf of the Series Fund, the Board requested and received detailed information from Mason Street Advisors and the Sub-Advisers in advance of each meeting to assist them in their evaluation, including information compiled by certain independent providers of evaluative data. With respect to the continuance of the Existing Sub-Advisory Agreements, while particular focus was given to an evaluation of the services, performance, fees, costs, and certain other relevant information under such Agreements at the meeting at which their continuance is formally considered, the evaluation process with respect to the Sub-Advisers and the nature, extent and quality of the services they provide to the Sub-Advised Portfolios pursuant to the terms of the Existing Sub-Advisory Agreements is an ongoing one. As a result, the Board's consideration of such services, and the performance, fees, costs and other relevant factors was informed by information provided and deliberations that occurred at other meetings throughout the year.

The Independent Directors received a memorandum from their counsel advising them of their responsibilities in connection with the review and approval of the New Sub-Advisory Agreement and the continuance of the Existing Sub-Advisory Agreements, and summarizing the legal standards governing the review and approval of these Agreements. The Independent Directors reviewed these standards with their counsel during the course of the meetings, including how these standards should be applied to the review of information relating to sub-advisers under the Series Fund's manager of managers structure. During the course of their deliberations, the Independent Directors had the opportunity to meet privately without representatives of Mason Street Advisors and the Sub-Advisers present, and were represented throughout the process by legal counsel.

## **Continuation of the Sub-Advisory Agreements between Mason Street Advisors and Certain Sub-Advisors**

At its August 29, 2019 and November 21, 2019 meetings, the Board, including the Independent Directors, unanimously approved the continuance of the Existing Sub-Advisory Agreements. In connection with those meetings, the directors received a presentation from representatives of each Sub-Adviser involved in the management of the respective Sub-Advised Portfolios. In addition to the information presented by and about the Sub-Advisers during the course of those meetings, the directors also had available for consideration each Sub-Adviser's Section 15(c) Report, which contained responses to the information request letter prepared by counsel to the Independent Directors requesting certain information from the Sub-Advisers designed to assist the directors in fulfilling their responsibilities when considering the continuance of the Existing Sub-Advisory Agreements. The directors also had available Mason Street Advisors' Executive Summary and Overview regarding each of the Sub-Advisers, and other materials prepared by Mason Street Advisors. The materials contained detailed information on performance over multiple time periods, expenses, brokerage commissions, portfolio turnover, style consistency, key portfolio statistics and metrics, and other factors with respect to each of the Sub-Advised Portfolios. The materials also contained an analysis of the Sub-Advisers' responses to the compliance questions contained in the Section 15(c) Report and the observations of the Series Fund's Chief Compliance Officer regarding the compliance structure and practices of each of the Sub-Advisers. The directors also considered their experience with and knowledge of the nature and quality of the services provided by the Sub-Advisers and their ongoing discussions with representatives of Mason Street Advisors, its affiliates and each Sub-Adviser.

The material factors and conclusions that formed the basis for the Board's approval of the continuance of each of the Existing Sub-Advisory Agreements include those discussed below. The directors evaluated a variety of information they deemed relevant on a Portfolio-by-Portfolio basis. No one particular factor was identified as determinative, but rather it was a combination of all the factors and conclusions that formed the basis for the determinations made by the Board. Further, different directors may have placed greater weight on certain factors than did other directors.

**Nature, Extent and Quality of Services.** In considering the nature, extent and quality of each Sub-Adviser's services the directors reviewed each Sub-Adviser's financial strength, assets under management, and overall reputation. The directors evaluated the investment strategies employed by each Sub-Adviser, as well as the personnel providing such services with respect to each Sub-Advised Portfolio. The directors considered informational updates given by the portfolio managers, which included reports regarding how the Sub-Advised Portfolios were being positioned in the current market environment.

# Approval and Continuance of Investment Advisory and Sub-Advisory Agreements (unaudited)

The directors also considered Mason Street Advisors' reports on due diligence visits and conference calls that had been conducted with certain of the Sub-Advisers.

With respect to American Century, the directors considered personnel changes at the organizational and portfolio management level, including American Century's adoption of a co-Chief Investment Officer structure and the expertise and experience of the persons holding those roles. The directors considered changes to the portfolio management team for the Large Company Value Portfolio that had been implemented, as well as the alignment of the investment process for the Large Company Value Portfolio with American Century's other value strategy mandates, and observed that these personnel and process changes had made a positive impact on the Portfolio's performance. With respect to Federated, the directors considered the firm's enhancement to its investment process to include the addition of ESG factors as part of its qualitative analysis. The directors noted favorably that there had been longstanding stability with respect to the personnel on the investment team for the High Yield Bond Portfolio. With respect to Loomis Sayles, the directors commented positively on the well-articulated investment process employed for the Focused Appreciation Portfolio. The directors considered the expanded responsibilities of the portfolio manager for the Focused Appreciation Portfolio, concluding that the additional duties would not impact the portfolio manager's ability to continue to provide the same level of service to the Portfolio. With respect to Delaware, the directors noted favorably the addition of two analysts to the firm's portfolio management team for the Domestic Equity Portfolio. The directors considered compensation arrangements in place at Delaware for the portfolio managers, as well as the level of each portfolio manager's investment in the respective mandate for which each was responsible. With respect to T. Rowe Price and PIMCO, the directors commented positively on the quality of the presentations made to the Board by their respective investment management teams. With respect to the Equity Income Portfolio in particular, the Board noted favorably that the portfolio manager remained committed to the Portfolio's investment strategy. With respect to Wells Capital, the directors considered the firm's succession planning for the portfolio management team serving the Select Bond Portfolio.

The directors also considered and expressed satisfaction with each Sub-Adviser's investment philosophy and process and the scope of services provided by the Sub-Advisers. Consideration was also given to the Sub-Advisers' respective reputations and experience in providing investment management services and the performance of each Sub-Advised Portfolio. Based on their review of these factors, their discussions with the Sub-Advisers, and their experience with the services provided by the Sub-Advisers for their respective Sub-Advised Portfolios, the Board concluded, within the context of their overall determinations regarding the Existing Sub-Advisory Agreements, that they were satisfied with the nature, extent and quality of services, and the resources committed by each Sub-Adviser in providing those services, and were satisfied with the experience and capabilities of the Sub-Advisers and the personnel associated with the Sub-Advised Portfolios.

**Investment Performance.** The directors reviewed the investment performance of each of the Sub-Advised Portfolios over a variety of time periods. In addition to reviewing the performance of each Sub-Advised Portfolio for both short-term and long-term periods, the directors considered (i) a comparison of each Sub-Advised Portfolio's one-, three- and five-year (as applicable) performance to the returns of appropriate benchmarks and indices, and to the performance averages of each Sub-Advised Portfolio's respective Broadridge and Lipper peer groups for the same periods, (ii) the Broadridge overall star rating and Lipper quintile rating for each Sub-Advised Portfolio and (iii) the Broadridge and the Lipper performance rankings for one-, three- and five-year time periods (as applicable). The directors evaluated each Sub-Advised Portfolio's performance against these peer groups and industry benchmarks and indices, and viewed this information as providing an objective comparative benchmark against which they could assess the performance of the Sub-Advised Portfolios. The directors further considered the performance of accounts managed in a similar manner by each of the Sub-Advisers and information from the Sub-Advisers regarding any significant differences in the performance of those accounts from that of the Sub-Advised Portfolios.

The directors commented favorably on the continued strong performance of the Inflation Protection Portfolio. The directors observed that changes to the portfolio management team for the Large Company Value Portfolio had resulted in improved performance. The directors noted that, while the performance of the Mid Cap Value Portfolio had lagged for the three-year period ended June 30, 2019, the Portfolio's performance over other periods had been more favorable and that, overall, the Portfolio's performance contour had been consistent with its stated investment strategy. The directors commented favorably

# Approval and Continuance of Investment Advisory and Sub-Advisory Agreements (unaudited)

on the strong performance of the Portfolios sub-advised by Federated and Loomis. The directors considered the comments of Delaware regarding the near-term underperformance of the Domestic Equity Portfolio, and acknowledged that the investment environment had been challenging for value managers. The directors noted favorably the strong performance records achieved by T. Rowe Price with respect to the Small Cap Value Portfolio and PIMCO with respect to the Multi-Sector Bond Portfolio.

In addition to performance information presented at the meeting, the directors considered the detailed performance information, market commentary, portfolio analysis and portfolio manager presentations they received periodically throughout the year. Generally speaking, while attentive to the short-term performance results because of the trend that such performance might signal, the directors placed greater weight on longer-term performance. For the reasons and based on the discussion summarized above, the Board concluded that, considering the investment performance within the context of its overall determinations regarding the Existing Sub-Advisory Agreements, it was satisfied with the relative investment performance of the Sub-Advised Portfolios.

**Management Fees and Other Expenses.** The directors evaluated the reasonableness of the management fees and total expenses paid by the Sub-Advised Portfolios under the Existing Sub-Advisory Agreements. The directors considered the actual and contractual fees paid by each Sub-Advised Portfolio. The directors also considered the sub-advisory fees paid by Mason Street Advisors out of its management fee, including a comparison of those fees with fees charged by the respective Sub-Advisors for similarly managed accounts. In considering the level of management fees, the directors also considered the size of the Sub-Advised Portfolios, expenses assumed by Mason Street Advisors, and the existing expense limitation and/or fee waiver arrangements agreed to by Mason Street Advisors with respect to each Sub-Advised Portfolio.

As part of their evaluation, the directors received and reviewed an independent analysis prepared by Broadridge of comparative expense data for each Sub-Advised Portfolio. Broadridge provided data as of December 31, 2018 comparing each Sub-Advised Portfolio's net and total expenses with those in a category of funds underlying variable insurance products. Categories were selected by Broadridge based upon having similar investment classifications, objectives, and asset allocations. The directors considered the comparative data as a guide to help assess the reasonableness of each Sub-Advised Portfolio's net and total expense ratios. The directors considered that the Broadridge expense rankings of the Mid Cap Value and Inflation Protection Portfolios sub-advised by American Century, the Domestic Equity Portfolio sub-advised by Delaware, the High Yield Bond Portfolio sub-advised by Federated, the Focused Appreciation Portfolio sub-advised by Loomis Sayles, the Short-Term Bond and Equity Income Portfolios sub-advised by T. Rowe Price, the Select Bond Portfolio sub-advised by Wells Capital, and the Government Money Market Portfolio sub-advised by BlackRock were in the top Broadridge quartile (meaning lowest net expenses) of their respective categories. The directors considered that the expense rankings of the Large Company Value Portfolio sub-advised by American Century, the Small Cap Value Portfolio sub-advised by T. Rowe Price, and the Long-Term U.S. Government Bond and Multi-Sector Bond Portfolios sub-advised by PIMCO were within the second quartile of their respective categories.

Based on their review of the above information and other factors deemed relevant by the directors, the Board concluded that the management fees and total operating expenses of each of the Sub-Advised Portfolios were reasonable in relation to the nature, scope and quality of services provided and the performance of the Sub-Advised Portfolios over time and the expense limitation and fee waivers that are in place.

**Costs and Profitability.** The directors reviewed information provided by Mason Street Advisors regarding the profitability realized by Mason Street Advisors from the Sub-Advised Portfolios. The directors considered Mason Street Advisors' quarterly presentation to the directors regarding Mason Street Advisors' revenues, expenses, income and profit margins allocable to its services to the Sub-Advised Portfolios on an aggregate and a per Portfolio basis, and Mason Street Advisors' allocation methodology with respect to the revenues and expenses. The profitability information presented for the directors' consideration was supplemented by the aforementioned information regarding the expense-based ranking of each Sub-Advised Portfolio within the Portfolio's respective Broadridge peer group category. The directors then considered the profitability information related to certain of the Sub-Advised Portfolios where such information had been provided. The directors recognized that the sub-advisory fees were the result of arm's-length negotiations between Mason Street

## Approval and Continuance of Investment Advisory and Sub-Advisory Agreements (unaudited)

Advisors and such Sub-Advisers. The directors also recognized that there are limitations inherent in allocating costs and calculating profitability for organizations such as the Sub-Advisers, and that it is difficult to make comparisons of profitability among investment advisers because comparative information is not generally publicly available and, when available, such information may have been developed using a variety of assumptions and other factors. The directors concluded that they had received sufficient information to evaluate the issues related to costs and profitability.

The directors considered certain fall-out benefits that may be realized by Mason Street Advisors and its affiliates due to their relationship with the Sub-Advised Portfolios, including the participation of mutual fund families advised by certain Sub-Advisers to the Sub-Advised Portfolios on the brokerage platform maintained by a brokerage affiliate of Mason Street Advisors, the participation of such fund families in mutual fund partner programs offered by such brokerage affiliate, and the payment of fees by the fund families based upon participation on the brokerage platform and the mutual fund partner program maintained by the brokerage affiliate of Mason Street Advisors. The directors reviewed information concerning certain of the Sub-Advisers' soft dollar arrangements and any other benefits to the Sub-Advisers arising from their relationships with the Sub-Advised Portfolios. Based on their review, the Board concluded, within the context of their overall determinations regarding the Existing Sub-Advisory Agreements, that they were satisfied that the fees paid by each of the Sub-Advised Portfolios, and the profits realized by Mason Street Advisors and the Sub-Advisers due to their relationship with the Sub-Advised Portfolios, were not excessive.

**Economies of Scale.** The directors considered whether each Sub-Advised Portfolio's expense structure permitted economies of scale to be shared with the Sub-Advised Portfolio's investors. The directors considered the breakpoints contained in the advisory fee schedules for the Sub-Advised Portfolios and the extent to which each Sub-Advised Portfolio may benefit from economies of scale through those breakpoints. The directors took into account the expense limitation arrangements in place for the Mid Cap Value, Large Company Value, Inflation Protection, Domestic Equity, Focused Appreciation, Short-Term Bond, Small Cap Value, Equity Income, Long-Term U.S. Government Bond and Multi-Sector Bond Portfolios, and the fee waiver arrangements in place with respect to the Mid Cap Value, Large Company Value, Inflation Protection, Domestic Equity, High Yield Bond, Focused Appreciation, Short-Term Bond, Small Cap Value, Equity Income, Select Bond, Long-Term U.S. Government Bond, Multi-Sector Bond and Government Money Market Portfolios. The directors also considered the total assets and expense ratio of each Sub-Advised Portfolio. Based on this information, the Board concluded, within the context of its overall determinations regarding the Existing Sub-Advisory Agreements, that each Sub-Advised Portfolio's fee structure reflected appropriate economies of scale for the benefit of such Portfolio's investors.

**Other Information.** The directors were presented with other information intended to assist them in their consideration of the continuation of the Existing Sub-Advisory Agreements, including information about the services provided by affiliates of Mason Street Advisors to the Portfolios and information regarding Mason Street Advisors' and the Sub-Advisers' brokerage practices and commissions. The directors took into consideration reports from Mason Street Advisors on its review of the respective compliance programs of the Sub-Advisers, including any recent compliance exceptions noted and the applicable Sub-Adviser's response. Also considered were key affiliations and business relationships between the Sub-Advisers and their affiliates and Mason Street Advisors' parent company and affiliates. Their review further included information relating to each Sub-Adviser's risk management infrastructure, pending or recent litigation or regulatory actions to which an Sub-Adviser or its affiliates may have been a party, and the applicable Sub-Adviser's responses to those actions. The directors also considered information regarding each Sub-Adviser's code of ethics, approach to portfolio manager compensation, succession planning, as well as information supplied by the Sub-Advisers related to their cybersecurity programs and business continuity plans, and other matters they deemed relevant.

**Conclusions of the Directors.** Based on a consideration of all information deemed relevant in its totality, the Board, including the Independent Directors, and assisted by the advice of legal counsel independent of Mason Street Advisors, in the exercise of their reasonable business judgment concluded that the terms of the Existing Sub-Advisory Agreements were fair and reasonable and approved the continuation of each Agreement for another year as being in the best interests of each Portfolio.

# Approval and Continuance of Investment Advisory and Sub-Advisory Agreements (unaudited)

## **Approval of New Investment Sub-Advisory Agreement**

At the August 29, 2019 meeting, the Board, including the Independent Directors, unanimously approved the New Sub-Advisory Agreement between Mason Street Advisors and T. Rowe Price relating to the Growth Stock Portfolio (the "Portfolio"). The Board's decision to retain T. Rowe Price as sub-adviser for the Portfolio was reached after extensive research, evaluation and review of numerous candidate firms and their respective organizational structures, investment processes and long-term performance records.

## **Board Consideration of Alternative Sub-Advisory Candidates and Selection of T. Rowe Price as New Sub-Adviser**

In determining whether to approve the New Sub-Advisory Agreement on behalf of the Portfolio, the directors requested and received detailed information from Mason Street Advisors and T. Rowe Price to assist them in their evaluation, including reports based upon information compiled by certain independent providers of evaluative data. The Independent Directors also received a memorandum from their counsel advising them of their responsibilities in connection with the approval of the New Sub-Advisory Agreement, and had an opportunity to review with their counsel the legal standards governing the review of the New Sub-Advisory Agreement, including how these standards should be applied to the review of information relating to the sub-adviser under the Series Fund's manager of managers structure. In addition, during the course of their deliberations, the Independent Directors had the opportunity to meet privately without representatives of Mason Street Advisors and T. Rowe Price, and were represented throughout the process by legal counsel to the Independent Directors.

The material factors and conclusions that formed the basis for the Board's determination to approve the New Sub-Advisory Agreement include those discussed below. In addition to the information provided to them in anticipation of and at the August 2019 Board meeting, the directors considered the in-person presentation of T. Rowe Price related to the Portfolio at a meeting of the Investment Oversight Committee of the Board held on August 29, 2019, and T. Rowe Price's responses to the directors' questions during the presentation session at the Investment Oversight Committee meeting.

The process that culminated with the directors determining to engage T. Rowe Price as the replacement investment sub-adviser for the Portfolio had been initiated by the Board several months earlier. At its February 28, 2019 meeting, the directors instructed Mason Street Advisors to identify potential replacement candidates to serve as sub-adviser to the Portfolio. At its June 5, 2019 meeting the Board was presented with a list of qualifying sub-advisory firms for the Portfolio mandate, along with a detailed review of comparative information regarding each of the candidates. Based upon a review of the list of qualified sub-advisers, the directors narrowed down the list of candidates to three sub-advisory candidate firms for the Portfolio mandate.

The three final candidates for the Portfolio mandate were reviewed and considered at the Board's August 29, 2019 meeting. The directors received an in-person presentation at the August 2019 Board meeting provided by representatives from each of the three candidate firms. Extensive background information and assessment data were used to evaluate, compare and contrast the three candidates. The information compiled for purposes of facilitating the Board's review of the candidates was a combination of assessment data and evaluative reports developed by Mason Street Advisors as well as data provided by the candidates, which was formatted in a manner to permit the Board to effectively conduct its due diligence review of the information and engage in a thorough comparative analysis. Among other factors, the Board considered details of each candidate's investment performance and risk/return metrics over various time periods, peer group ratings and rankings, representative holdings, key points of differentiation and competitive advantages, portfolio characteristics, mandate assets under management, investment personnel, process and strategies, proposed sub-advisory fees and breakpoints, the impact on Mason Street Advisors' profitability, and other operational and enterprise factors. The directors considered information provided regarding each candidate's investment philosophy and portfolio construction process.

Also considered by the directors were the results of due diligence compliance reviews that had been prepared on the three final sub-advisory candidates. The due diligence reviews were based on the candidates' responses to informational requests, as well as interviews with compliance and/or legal staff representatives of each candidate. Such reviews included information about each candidate's compliance program, compliance policies and procedures, brokerage practices and use of soft dollars,

## Approval and Continuance of Investment Advisory and Sub-Advisory Agreements (unaudited)

trading policies and procedures, codes of ethics and proxy voting procedures. Given that T. Rowe Price currently serves as a sub-adviser to the Series Fund's Small Cap Value, Equity Income and Short-Term Bond Portfolios, and the firm's compliance program is subject to periodic review and oversight, the compliance assessment of T. Rowe Price was based in part on previous compliance reviews and reports and the experiences with the firm and its compliance function. The Series Fund's Chief Compliance Officer received compliance-related due diligence materials from T. Rowe Price similar to those materials provided by the other sub-advisory candidates, and such materials were reviewed and reported on by the Series Fund's Chief Compliance Officer to the directors at the August 2019 Board meeting. The directors also had available for consideration each candidate's responses to the compliance sections of the informational requests, and the candidates' responses to informational requests related to proxy voting, brokerage and risk management practices.

The Board's review of the candidates involved assessment of multiple factors which included, without limitation, the following:

**Nature, Extent and Quality of Services.** The directors evaluated the nature, scope, extent and quality of services that would be provided to the Portfolio by the three sub-advisory candidates. The directors considered the information developed from the extensive process utilized to identify qualified sub-advisers for the Portfolio, as well as the analysis and assessment provided by Mason Street Advisors with respect to the sub-advisory candidates. The directors viewed favorably the depth of experience of the T. Rowe Price Large Cap Growth Equity team in managing accounts, including accounts for other mutual funds, using investment strategies similar to those employed for the Portfolio. The directors' consideration included information about T. Rowe Price's organization and ownership structure, and the tenure, experience and performance of the firm's investment management team, including particularly the qualifications and experience of the investment personnel who would be providing services to the Portfolio.

The directors considered Mason Street Advisors' positive assessment of T. Rowe Price, based upon the robustness and continuity of the firm's investment processes, their effective use of investment team analysts, and the significant experience of the lead portfolio manager. The directors also considered Mason Street Advisors' expression of confidence in the current working relationship with T. Rowe Price related to the Series Fund portfolios for which they function as a sub-adviser, as well as their favorable view of the firm's utilization of supporting research and resources, and their practices related to succession planning. The directors reviewed the firm's approach to succession planning, concluding that it was thoughtful and thorough. The directors were positively impressed with the strength of the in-person presentation by T. Rowe Price. The directors commented favorably on the depth of resources in place at the firm, including particularly the investment analyst group. The directors noted that T. Rowe Price was a recognized asset manager with a positive reputation with both the Northwestern Mutual field force and variable product clients. The directors considered potential advantages that T. Rowe Price may have as a sub-adviser based upon its size, noting that the growth stock mandate was the firm's largest mandate based upon assets under management, and this would suggest that the mandate will continue to be able to secure strong investment talent.

The directors considered the different investment approaches utilized by each of the candidates for the Portfolio mandate, and the positive and negative considerations of each. The directors also took into consideration the suitability of each candidate's respective investment mandate with respect to Northwestern Mutual's variable products. Finally, the directors took into consideration T. Rowe Price's general reputation and the strength of the investment-related resources available to be committed in managing the Portfolio. Based on their review of these factors and other factors deemed relevant, the Board concluded that they were satisfied with the nature, extent and quality of the services to be provided by T. Rowe Price with respect to the Portfolio, and the resources to be committed by T. Rowe Price in providing such services.

**Investment Performance.** In order to evaluate investment performance, the directors reviewed the performance record of the three final sub-advisory candidates for a composite of managed accounts, including mutual fund accounts, with investment objectives, investment policies and strategies substantially similar to the Portfolio (the "composites"). The directors considered the performance returns of these composites for both short- and long-term periods. The directors also reviewed performance analytics reports for each of the candidates which compared multiple metrics, including information ratio, Sharpe ratio, Sortino ratio, up/down market capture ratios, standard deviation and tracking error for each of the mandates that were considered. The directors also evaluated the relative performance of the candidates' composites versus the appropriate index, and considered Morningstar peer group rankings and ratings for each of the candidates' mandates.

## Approval and Continuance of Investment Advisory and Sub-Advisory Agreements (unaudited)

The directors also took into consideration information presented regarding the composition of accounts managed by the candidates in a mandate similar to the Portfolio, including sector weightings, number of holdings, portfolio turnover, and top ten holdings percentages, as well as attribution information presented regarding the drivers of performance of such accounts.

Based on these and other factors deemed relevant, the Board concluded that they were satisfied with the experience and capabilities of T. Rowe Price, the personnel to be associated with the management of the Portfolio, and the firm's investment performance record across accounts managed in a mandate similar to the Portfolio.

**Management Fees and Other Expenses.** In evaluating the management fees paid by the Portfolio, the directors considered the contractual fees (and applicable breakpoints) paid by the Portfolio under the Advisory Agreement between Mason Street Advisors and the Series Fund with respect to the Portfolio. The directors considered the sub-advisory fees (and applicable breakpoints) proposed by the three sub-advisory candidates for services to be provided to the Portfolio. In connection with their review of proposed sub-advisory fees, the directors also considered the proposed allocation between Mason Street Advisors and each sub-advisory candidate of the Portfolio's investment advisory fee (i.e., the amount of the advisory fee retained by Mason Street Advisors relative to that would be paid to a sub-advisory candidate as a management fee). In evaluating proposed sub-advisory fees relative to the Portfolio, the directors considered information relating to amounts the sub-advisory candidates charged under other advisory contracts involving a similar investment mandate. The directors considered the existing structure, size, and total operating expenses of the Portfolio. They also considered the advisory fee waiver arrangement that was in place for the Portfolio.

The directors determined that the fees proposed by T. Rowe Price were favorable and were the product of an arm's-length negotiation between Mason Street Advisors and the firm. Based on their review of the management fees and other expenses, comparative fee data and other factors deemed relevant by the directors, the Board concluded that the management fees, the sub-advisory fees proposed by T. Rowe Price, and the total operating expenses of the Portfolio were reasonable in relation to the nature, scope and quality of the services to be provided by T. Rowe Price.

**Costs and Profitability.** The directors considered Mason Street Advisors' pricing methodology for its services as investment adviser for the products of which the Portfolio is an investment option. Mason Street Advisors provided comparative information regarding the proposed sub-advisory fees of the candidates, projections regarding the amount of the advisory fee that Mason Street Advisors would retain based upon the candidates' proposed sub-advisory fees, and profitability analysis scenarios for the Portfolio based upon the sub-advisory fees proposed by the candidates. The directors considered the financial condition of Mason Street Advisors and Mason Street Advisors' costs and profitability related to the Portfolio in light of the sub-advisory fees negotiated with T. Rowe Price.

Based on their review of the sub-advisory fees proposed by T. Rowe Price and the profitability analysis for the Portfolio reflecting the incorporation of such sub-advisory fees, the Board concluded that they were satisfied that Mason Street Advisors' resulting level of profitability related to services provided to the Portfolio was appropriate and not excessive.

**Economies of Scale.** The directors considered whether the Portfolio's expense structure permitted economies of scale to be shared with investors in the Portfolio. They also took into consideration the total assets and expense ratios of the Portfolio. The directors considered the breakpoints contained in the management fee schedules applicable to the Portfolio, as well as the breakpoints contained in the sub-advisory fee schedule for the Portfolio proposed by T. Rowe Price, and the extent to which a Portfolio may benefit from economies of scale through those breakpoints. The directors also considered the fee waiver agreement in place for the Portfolio. Based on this information, the Board concluded that the fee structure for the Portfolio reflected appropriate economies of scale between the Portfolio and Mason Street Advisors.

**Other Information.** The directors were presented with other information intended to assist them in their consideration of the approval of the New Sub-Advisory Agreement, including information regarding any regulatory inquiries, examinations or actions to which T. Rowe Price or its affiliates may have been a party, and issues arising out of those regulatory events. The directors also received information regarding internal policy and investment decision making authority and practices in place

## Approval and Continuance of Investment Advisory and Sub-Advisory Agreements (unaudited)

for T. Rowe Price as well as portfolio manager compensation practices as they may apply to the portfolio managers proposed to provide services to the Portfolio.

**Conclusions of the Directors.** Based on a consideration of all information deemed relevant in its totality, the Board, including the Independent Directors, and assisted by the advice of legal counsel independent of Mason Street Advisors, in the exercise of its business judgment concluded that it was in the best interest of the Portfolio to approve hiring T. Rowe Price as sub-adviser for the Portfolio and entering into the New Sub-Advisory Agreement between Mason Street Advisors and T. Rowe Price.

# Fidelity® Variable Insurance Products:

## Mid Cap Portfolio

**Annual Report**  
**December 31, 2019**

See the inside front cover for important information about access to your fund's shareholder reports.

Beginning on January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, and if your insurance carrier elects to participate, you may not be receiving paper copies of the Fund's shareholder reports from the insurance company that offers your variable insurance product unless you specifically request paper copies from your financial professional or the administrator of your variable insurance product. Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may elect to receive shareholder reports and other communications from the Fund electronically, by contacting your financial professional or the administrator of your variable insurance product. If you own a Fidelity-administered variable insurance product, please visit [fidelity.com/mailpreferences](https://www.fidelity.com/mailpreferences) to make your election or call 1-800-343-3548.

You may elect to receive all future reports in paper free of charge. If you wish to continue receiving paper copies of your shareholder reports, you may contact your financial professional or the administrator of your variable insurance product. If you own a Fidelity-administered variable insurance product, please visit [fidelity.com/mailpreferences](https://www.fidelity.com/mailpreferences) to make your election or call 1-800-343-3548. Your election to receive reports in paper will apply to all funds available under your variable insurance product.

# Performance: The Bottom Line

Average annual total return reflects the change in the value of an investment, assuming reinvestment of distributions from dividend income and capital gains (the profits earned upon the sale of securities that have grown in value, if any) and assuming a constant rate of performance each year. During periods of reimbursement by Fidelity, a fund's total return will be greater than it would be had the reimbursement not occurred. Performance numbers are net of all underlying fund operating expenses, but do not include any insurance charges imposed by your insurance company's separate account. If performance information included the effect of these additional charges, the total returns would have been lower. How a fund did yesterday is no guarantee of how it will do tomorrow.

## Average Annual Total Returns

For the periods ended December 31, 2019

	Past 1 year	Past 5 years	Past 10 years
Initial Class	23.45%	7.12%	10.45%
Service Class	23.35%	7.01%	10.34%
Service Class 2	23.17%	6.86%	10.18%
Investor Class	23.35%	7.04%	10.36%

## \$10,000 Over 10 Years

Let's say hypothetically that \$10,000 was invested in VIP Mid Cap Portfolio – Initial Class on December 31, 2009.

The chart shows how the value of your investment would have changed, and also shows how the S&P MidCap 400® Index performed over the same period.

# Management's Discussion of Fund Performance

**Market Recap:** U.S. stocks continued to roll in 2019, with the S&P 500<sup>®</sup> index soaring 31.49% and marking history as the longest and strongest bull market ever, despite persistent, nagging concerns about global economic growth and trade. After a rough end to 2018, equities sharply reversed course to begin the new year amid upbeat company earnings and signs the Federal Reserve may pause on rates. The uptrend continued until May, when the index sunk as trade negotiations between the U.S. and China broke down. The bull market roared back to record a series of highs in July, when the Fed cut interest rates for the first time since 2008. Volatility intensified in August, as the Treasury yield curve inverted, which some investors viewed as a sign the U.S. economy could be heading for recession. But the market proved resilient, hitting a new high on October 30, when the Fed lowered rates for the third time in 2019, and moving even higher through year-end. Gains were robust and broad-based, with information technology (+50%) leading the way with its best calendar-year result in a decade, amid strong growth trends. Communication services (+33%) and financials (+32%) also stood out. In contrast, energy (+12%) was by far the weakest group — struggling amid sluggish oil prices — while several strong gainers nonetheless fell short of the broader market: industrials and real estate (+29% each), consumer discretionary and consumer staples (+28% each), utilities (+26%), materials (+25%), and health care (+21%).

**Comments from Co-Portfolio Managers Thomas Allen and Daniel Sherwood:** For the year, the fund's share classes gained roughly 23%, trailing the 26.20% advance of the benchmark S&P MidCap 400<sup>®</sup> Index. Versus the benchmark, the portfolio's positioning among industrials stocks detracted the most from relative performance in 2019. Lackluster investment choices in materials, information technology and consumer discretionary also hurt. A cash position of roughly 5%, on average, further weighed on the fund's relative result in a rising stock market. In terms of individual holdings, fertilizer stock Mosaic was the largest relative detractor, returning -25% the past year. Concerns about trade with China, coupled with historic rain and flooding that significantly delayed planting in the U.S. "Corn Belt," forced the company to reduce financial guidance for the full year. Spirit Airlines also hampered relative performance this period, returning -30%. An overweight stake in chemical company Chemours (-33%) also proved disappointing. In contrast, the portfolio's positioning in utilities lifted our relative result. Picks in energy, consumer staples and communication services added considerable value, but were partly offset by sizable overweightings in each of those lagging sectors. The top relative contributor was Euronet Worldwide, a provider of payment and transaction processing. Our stake here gained about 54%, mainly due to a strong first half of 2019 for the stock. Oil & gas exploration & production company Anadarko Petroleum (+64%) also aided the fund's performance. The stock moved sharply higher in April after the company became the target of a bidding war between Chevron and Occidental Petroleum, and we exited the majority of our position by the end of that month. All contributors and detractors mentioned here were out-of-benchmark positions, except for Chemours.

*The views expressed above reflect those of the portfolio manager(s) only through the end of the period as stated on the cover of this report and do not necessarily represent the views of Fidelity or any other person in the Fidelity organization. Any such views are subject to change at any time based upon market or other conditions and Fidelity disclaims any responsibility to update such views. These views may not be relied on as investment advice and, because investment decisions for a Fidelity fund are based on numerous factors, may not be relied on as an indication of trading intent on behalf of any Fidelity fund.*

**Note to shareholders:** On February 22, 2019, Daniel Sherwood assumed co-management responsibilities for the fund, joining Co-Manager Thomas Allen.

# Investment Summary (Unaudited)

## Top Ten Stocks as of December 31, 2019

	% of fund's net assets
Activision Blizzard, Inc.	2.0
The AES Corp.	2.0
Electronic Arts, Inc.	1.8
FleetCor Technologies, Inc.	1.6
Euronet Worldwide, Inc.	1.6
Deckers Outdoor Corp.	1.5
ITT, Inc.	1.4

### Legend

- (a) Non-income producing
- (b) Security or a portion of the security is on loan at period end.
- (c) Level 3 security
- (d) Affiliated fund that is generally available only to investment companies and other accounts managed by Fidelity Investments. The rate quoted is the annualized seven-day yield of the fund at period end. A complete unaudited listing of the fund's holdings as of its most recent quarter end is available upon request. In addition, each Fidelity Central Fund's financial statements, which are not covered by the Fund's Report of Independent Registered Public Accounting Firm, are available on the SEC's website or upon request.
- (e) Investment made with cash collateral received from securities on loan.

See accompanying notes which are an integral part of the financial statements.

## Affiliated Central Funds

Information regarding fiscal year to date income earned by the Fund from investments in Fidelity Central Funds is as follows:

Fund	Income earned
Fidelity Cash Central Fund	\$ 9,220,954
Fidelity Securities Lending Cash Central Fund	551,895
Total	<u>\$ 9,772,849</u>

Amounts in the income column in the above table include any capital gain distributions from underlying funds, which are presented in the corresponding line-item in the Statement of Operations, if applicable. Amount for Fidelity Securities Lending Cash Central Fund represents the income earned on investing cash collateral, less rebates paid to borrowers and any lending agent fees associated with the loan, plus any premium payments received for lending certain types of securities.

## Investment Valuation

The following is a summary of the inputs used, as of December 31, 2019, involving the Fund's assets and liabilities carried at fair value. The inputs or methodology used for valuing securities may not be an indication of the risk associated with investing in those securities. For more information on valuation inputs, and their aggregation into the levels used below, please refer to the Investment Valuation section in the accompanying Notes to Financial Statements.

# Notes to Financial Statements

For the period ended December 31, 2019

## 1. Organization.

VIP Mid Cap Portfolio (the Fund) is a fund of Variable Insurance Products Fund III (the Trust) and is authorized to issue an unlimited number of shares. The Trust is registered under the Investment Company Act of 1940, as amended (the 1940 Act), as an open-end management investment company organized as a Massachusetts business trust. Shares of the Fund may only be purchased by insurance companies for the purpose of funding variable annuity or variable life insurance contracts. The Fund offers the following classes of shares: Initial Class shares, Service Class shares, Service Class 2 shares and Investor Class shares. All classes have equal rights and voting privileges, except for matters affecting a single class.

## 2. Investments in Fidelity Central Funds.

The Fund invests in Fidelity Central Funds, which are open-end investment companies generally available only to other investment companies and accounts managed by the investment adviser and its affiliates. The Fund's Schedule of Investments lists each of the Fidelity Central Funds held as of period end, if any, as an investment of the Fund, but does not include the underlying holdings of each Fidelity Central Fund. As an Investing Fund, the Fund indirectly bears its proportionate share of the expenses of the underlying Fidelity Central Funds.

The Money Market Central Funds seek preservation of capital and current income and are managed by Fidelity Investments Money Management, Inc. (FIMM), an affiliate of the investment adviser. Annualized expenses of the Money Market Central Funds as of their most recent shareholder report date ranged from less than .005% to .01%.

A complete unaudited list of holdings for each Fidelity Central Fund is available upon request or at the Securities and Exchange Commission (the SEC) website at [www.sec.gov](http://www.sec.gov). In addition, the financial statements of the Fidelity Central Funds, which are not covered by the Fund's Report of Independent Registered Public Accounting Firm, are available on the SEC website or upon request.

## 3. Significant Accounting Policies.

The Fund is an investment company and applies the accounting and reporting guidance of the Financial Accounting Standards Board (FASB) Accounting Standards Codification Topic 946 Financial Services — Investments Companies. The financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP), which require management to make certain estimates and assumptions at the date of the financial statements. Actual results could differ from those estimates. Subsequent events, if any, through the date that the financial statements were issued have been evaluated in the preparation of the financial statements. The following summarizes the significant accounting policies of the Fund:

**Investment Valuation.** Investments are valued as of 4:00 p.m. Eastern time on the last calendar day of the period. The Board of Trustees (the Board) has delegated the day to day responsibility for the valuation of the Fund's investments to the Fair Value Committee (the Committee) established by the Fund's investment adviser. In accordance with valuation policies and procedures approved by the Board, the Fund attempts to obtain prices from one or more third party pricing vendors or brokers to value its investments. When current market prices, quotations or currency exchange rates are not readily available or reliable, investments will be fair valued in good faith by the Committee, in accordance with procedures adopted by the Board. Factors used in determining fair value vary by investment type and may include market or investment specific events. The frequency with which these procedures are used cannot be predicted and they may be utilized to a significant extent. The Committee oversees the Fund's valuation policies and procedures and reports to the Board on the Committee's activities and fair value determinations. The Board monitors the appropriateness of the procedures used in valuing the Fund's investments and ratifies the fair value determinations of the Committee.

The Fund categorizes the inputs to valuation techniques used to value its investments into a disclosure hierarchy consisting of three levels as shown below:

Level 1 — quoted prices in active markets for identical investments

Level 2 — other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, etc.)

Level 3 — unobservable inputs (including the Fund's own assumptions based on the best information available)

Valuation techniques used to value the Fund's investments by major category are as follows:

Equity securities, including restricted securities, for which market quotations are readily available, are valued at the last reported sale price or official closing price as reported by a third party pricing vendor on the primary market or exchange on which they are traded and are categorized as Level 1 in the hierarchy. In the event there were no sales during the day or closing prices are not available, securities are valued at the last quoted bid price or may be valued using the last available price and are generally categorized as Level 2 in the hierarchy. For foreign equity securities, when market or security specific events arise, comparisons to the valuation of American Depositary Receipts (ADRs), futures contracts, Exchange-Traded Funds (ETFs) and certain indexes as well as quoted prices for similar securities may be used and would be categorized as Level 2 in the hierarchy. For equity securities, including restricted securities, where observable inputs are limited, assumptions about market activity and risk are used and these securities may be categorized as Level 3 in the hierarchy.

Investments in open-end mutual funds, including the Fidelity Central Funds, are valued at their closing net asset value (NAV) each business day and are categorized as Level 1 in the hierarchy.

Changes in valuation techniques may result in transfers in or out of an assigned level within the disclosure hierarchy. The aggregate value of investments by input level as of December 31, 2019 is included at the end of the Fund's Schedule of Investments.

**Foreign Currency.** The Fund may use foreign currency contracts to facilitate transactions in foreign-denominated securities. Gains and losses from these transactions may arise from changes in the value of the foreign currency or if the counterparties do not perform under the contracts' terms.

Foreign-denominated assets, including investment securities, and liabilities are translated into U.S. dollars at the exchange rates at period end. Purchases and sales of investment securities, income and dividends received and expenses denominated in foreign currencies are translated into U.S. dollars at the exchange rate in effect on the transaction date.

The effects of exchange rate fluctuations on investments are included with the net realized and unrealized gain (loss) on investment securities. Other foreign currency transactions resulting in realized and unrealized gain (loss) are disclosed separately.

**Investment Transactions and Income.** For financial reporting purposes, the Fund's investment holdings and NAV include trades executed through the end of the last business day of the period. The NAV per share for processing shareholder transactions is calculated as of the close of business of the New York Stock Exchange (NYSE), normally 4:00 p.m. Eastern time and includes trades executed through the end of the prior business day. Gains and losses on securities sold are determined on the basis of identified cost and include proceeds received from litigation. Dividend income is recorded on the ex-dividend date, except for certain dividends from foreign securities where the ex-dividend date may have passed, which are recorded as soon as the Fund is informed of the ex-dividend date. Non-cash dividends included in dividend income, if any, are recorded at the fair market value of the securities received. Income and capital gain distributions from Fidelity Central Funds, if any, are recorded on the ex-dividend date. Certain distributions received by the Fund represent a return of capital or capital gain. The Fund determines the components of these distributions subsequent to the ex-dividend date, based upon receipt of tax filings or other correspondence relating to the underlying investment. These distributions are recorded as a reduction of cost of investments and/or as a realized gain. Investment income is recorded net of foreign taxes withheld where recovery of such taxes is uncertain.

**Class Allocations and Expenses.** Investment income, realized and unrealized capital gains and losses, common expenses of the Fund, and certain fund-level expense reductions, if any, are allocated daily on a pro-rata basis to each class based on the relative net assets of each class to the total net assets of the Fund. Each class differs with respect to transfer agent and distribution and service plan fees incurred. Certain expense reductions may also differ by class. For the reporting period, the allocated portion of income and expenses to each class as a percent of its average net assets may vary due to the timing of recording these transactions in relation to fluctuating net assets of the classes. Expenses directly attributable to a fund are charged to that fund. Expenses attributable to more than one fund are allocated among the respective funds on the basis of relative net assets or other appropriate methods. Expense estimates are accrued in the period to which they relate and adjustments are made when actual amounts are known.

**Deferred Trustee Compensation.** Under a Deferred Compensation Plan (the Plan), certain independent Trustees have elected to defer receipt of a portion of their annual compensation. Deferred amounts are invested in a cross-section of Fidelity funds, are marked-to-market and remain in the Fund until distributed in accordance with the Plan. The investment of deferred amounts and the offsetting payable to the Trustees of \$36,987 are included in the accompanying Statement of Assets and Liabilities in other receivables and other payables and accrued expenses, respectively.

**Income Tax Information and Distributions to Shareholders.** Each year, the Fund intends to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code, including distributing substantially all of its taxable income and realized gains. As a result, no provision for U.S. Federal income taxes is required. As of December 31, 2019, the Fund did not have any unrecognized tax benefits in the financial statements; nor is the Fund aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months. The Fund files a U.S. federal tax return, in addition to state and local tax returns as required. The Fund's federal income tax returns are subject to examination by the Internal Revenue Service (IRS) for a period of three fiscal years after they are filed. State and local tax returns may be subject to examination for an additional fiscal year depending on the jurisdiction. Foreign taxes are provided for based on the Fund's understanding of the tax rules and rates that exist in the foreign markets in which it invests.

Distributions are declared and recorded on the ex-dividend date. Income and capital gain distributions are declared separately for each class. Income and capital gain distributions are determined in accordance with income tax regulations, which may differ from GAAP.

Capital accounts within the financial statements are adjusted for permanent book-tax differences. These adjustments have no impact on net assets or the results of operations. Capital accounts are not adjusted for temporary book-tax differences which will reverse in a subsequent period.

Book-tax differences are primarily due to foreign currency transactions, passive foreign investment companies (PFIC), deferred trustees compensation and losses deferred due to wash sales.

As of period end, the cost and unrealized appreciation (depreciation) in securities, and derivatives if applicable, for federal income tax purposes were as follows:

Gross unrealized appreciation	\$1,972,443,184
Gross unrealized depreciation	<u>(236,756,092)</u>
Net unrealized appreciation (depreciation)	<u>\$1,735,687,092</u>
Tax Cost	<u>\$5,644,445,445</u>

The tax-based components of distributable earnings as of period end were as follows:

Undistributed ordinary income	<u>\$ 9,303,684</u>
Capital loss carryforward	<u>\$ (208,332,654)</u>
Net unrealized appreciation (depreciation) on securities and other investments	<u>\$1,735,647,373</u>

Capital loss carryforwards are only available to offset future capital gains of the Fund to the extent provided by regulations and may be limited. The capital loss carryforward information presented below, including any applicable limitation, is estimated as of fiscal period end and is subject to adjustment.

No expiration	
Short-term	\$ (162,302,952)
Long-term	<u>(46,029,702)</u>
Total capital loss carryforward	<u>\$ (208,332,654)</u>

## Notes to Financial Statements – continued

The tax character of distributions paid was as follows:

	December 31, 2019	December 31, 2018
Ordinary Income	\$ 50,964,046	\$ 54,137,705
Long-term Capital Gains	<u>820,182,256</u>	<u>729,299,832</u>
Total	<u>\$871,146,302</u>	<u>\$783,437,537</u>

### 4. Purchases and Sales of Investments.

Purchases and sales of securities, other than short-term securities, aggregated \$2,360,778,376 and \$2,546,557,602, respectively.

### 5. Fees and Other Transactions with Affiliates.

**Management Fee.** Fidelity Management & Research Company (the investment adviser) and its affiliates provide the Fund with investment management related services for which the Fund pays a monthly management fee. The management fee is the sum of an individual fund fee rate that is based on an annual rate of .30% of the Fund's average net assets and an annualized group fee rate that averaged .24% during the period. The group fee rate is based upon the average net assets of all the mutual funds advised by the investment adviser, including any mutual funds previously advised by the investment adviser that are currently advised by Fidelity SelectCo, LLC, an affiliate of the investment adviser. The group fee rate decreases as assets under management increase and increases as assets under management decrease. For the reporting period, the total annual management fee rate was .54% of the Fund's average net assets.

**Distribution and Service Plan Fees.** In accordance with Rule 12b-1 of the 1940 Act, the Fund has adopted separate 12b-1 Plans for each Service Class of shares. Each Service Class pays Fidelity Distributors Corporation (FDC), an affiliate of the investment adviser, a service fee. For the period, the service fee is based on an annual rate of .10% of Service Class' average net assets and .25% of Service Class 2's average net assets.

For the period, total fees, all of which were re-allowed to insurance companies for the distribution of shares and providing shareholder support services, were as follows:

Service Class	\$ 549,656
Service Class 2	<u>12,623,443</u>
	<u>\$13,173,099</u>

**Transfer Agent Fees.** Fidelity Investments Institutional Operations Company, Inc. (FIIOC), an affiliate of the investment adviser, is the Fund's transfer, dividend disbursing, and shareholder servicing agent. FIIOC receives an asset-based fee with respect to each class. Each class pays a fee for transfer agent services, typesetting and printing and mailing of shareholder reports, excluding mailing of proxy statements, equal to an annual rate of class-level average net assets. The annual rate for Investor Class is .15% and the annual rate for all other classes is .07%. For the period, transfer agent fees for each class were as follows:

Initial Class	\$ 737,650
Service Class	355,182
Service Class 2	3,262,534
Investor Class	<u>832,466</u>
	<u>\$5,187,832</u>

**Accounting and Security Lending Fees.** Fidelity Service Company, Inc. (FSC), an affiliate of the investment adviser, maintains the Fund's accounting records. The accounting fee is based on the level of average net assets for each month. Prior to April 1, 2019, FSC had a separate agreement with the Fund for administration of the security lending program, based on the number and duration of lending transactions. For the period, the total fees paid for accounting and administration of securities lending were equivalent to the following annual rates:

	% of Average Net Assets
VIP Mid Cap Portfolio	.02

**Brokerage Commissions.** A portion of portfolio transactions were placed with brokerage firms which are affiliates of the investment adviser. Brokerage commissions are included in net realized gain (loss) and change in net unrealized appreciation (depreciation) in the Statement of Operations. The commissions paid to these affiliated firms were as follows:

	Amount
VIP Mid Cap Portfolio	\$105,116

**Interfund Lending Program.** Pursuant to an Exemptive Order issued by the SEC, the fund, along with other registered investment companies having management contracts with Fidelity Management & Research Company (FMR) or other affiliated entities of FMR, may participate in an interfund lending program. This program provides an alternative credit facility allowing the fund to borrow from, or lend money to, other participating affiliated funds. At period end, there were no interfund loans outstanding. Activity in this program during the period for which loans were outstanding was as follows:

	Borrower or Lender	Average Loan Balance	Weighted Average Interest Rate	Interest Expense
VIP Mid Cap Portfolio	Borrower	\$116,079,000	1.78%	\$5,753

**Interfund Trades.** The Fund may purchase from or sell securities to other Fidelity Funds under procedures adopted by the Board. The procedures have been designed to ensure these interfund trades are executed in accordance with Rule 17a-7 of the 1940 Act. Interfund trades are included within the respective purchases and sales amounts shown in the Purchases and Sales of Investments note.

## 6. Committed Line of Credit.

The Fund participates with other funds managed by the investment adviser or an affiliate in a \$4.25 billion credit facility (the "line of credit") to be utilized for temporary or emergency purposes to fund shareholder redemptions or for other short-term liquidity purposes. The Fund has agreed to pay commitment fees on its pro-rata portion of the line of credit, which amounted to \$19,653 and is reflected in Miscellaneous expenses on the Statement of Operations. During the period, the Fund did not borrow on this line of credit.

## 7. Security Lending.

The Fund lends portfolio securities from time to time in order to earn additional income. For equity securities, lending agents are used, including National Financial Services (NFS), an affiliate of the Fund. Pursuant to a securities lending agreement, NFS will receive a fee, which is capped at 9.9% of daily lending revenue, for its services as lending agent. The Fund may lend securities to certain qualified borrowers, including NFS. On the settlement date of the loan, the Fund receives collateral (in the form of U.S. Treasury obligations, letters of credit and/or cash) against the loaned securities and maintains collateral in an amount not less than 100% of the market value of the loaned securities during the period of the loan. The market value of the loaned securities is determined at the close of business of the Fund and any additional required collateral is delivered to the Fund on the next business day. The Fund or borrower may terminate the loan at any time, and if the borrower defaults on its obligation to return the securities loaned because of insolvency or other reasons, the Fund may apply collateral received from the borrower against the obligation. The Fund may experience delays and costs in recovering the securities loaned. Any cash collateral received is invested in the Fidelity Securities Lending Cash Central Fund. The value of loaned securities and cash collateral at period end are disclosed on the Fund's Statement of Assets and Liabilities. At period end, there were no security loans outstanding with NFS, as affiliated borrower. Total fees paid by the Fund to NFS, as lending agent, amounted to \$34,391. Security lending income represents the income earned on investing cash collateral, less rebates paid to borrowers and any lending agent fees associated with the loan, plus any premium payments received for lending certain types of securities. Security lending income is presented in the Statement of Operations as a component of income from Fidelity Central Funds, and includes \$28,471 from securities loaned to NFS, as affiliated borrower.

## 8. Expense Reductions.

Commissions paid to certain brokers with whom the investment adviser, or its affiliates, places trades on behalf of the Fund include an amount in addition to trade execution, which may be rebated back to the Fund to offset certain expenses. This amount totaled \$457,848 for the period.

In addition, during the period the investment adviser reimbursed and/or waived a portion of fund-level operating expenses in the amount of \$55,244.

## 9. Distributions to Shareholders.

Distributions to shareholders of each class were as follows:

	Year ended December 31, 2019	Year ended December 31, 2018
<b>Distributions to shareholders</b>		
Initial Class	\$142,831,190	\$130,588,444
Service Class	64,998,396	55,957,161
Service Class 2	594,808,621	538,053,244
Investor Class	68,508,095	58,838,688
Total	<u>\$871,146,302</u>	<u>\$783,437,537</u>

## 10. Share Transactions.

Transactions for each class of shares were as follows:

	Shares Year ended December 31, 2019	Shares Year ended December 31, 2018	Dollars Year ended December 31, 2019	Dollars Year ended December 31, 2018
Initial Class				

## Notes to Financial Statements – continued

	Shares Year ended December 31, 2019	Shares Year ended December 31, 2018	Dollars Year ended December 31, 2019	Dollars Year ended December 31, 2018

### 11. Other.

The Fund's organizational documents provide former and current trustees and officers with a limited indemnification against liabilities arising in connection with the performance of their duties to the Fund. In the normal course of business, the Fund may also enter into contracts that provide general indemnifications. The Fund's maximum exposure under these arrangements is unknown as this would be dependent on future claims that may be made against the Fund. The risk of material loss from such claims is considered remote.

At the end of the period, the investment adviser or its affiliates were the owners of record of 12% of the total outstanding shares of the Fund and one otherwise unaffiliated shareholder was the owner of record of 11% of the total outstanding shares of the Fund.

Effective January 1, 2020, following any required regulatory notices and approvals:

Investment advisers Fidelity Investments Money Management, Inc., FMR Co., Inc., and Fidelity SelectCo, LLC, merged with and into Fidelity Management & Research Company. In connection with the merger transactions, the resulting, merged investment adviser was then redomiciled from Massachusetts to Delaware, changed its corporate structure from a corporation to a limited liability company, and changed its name to "Fidelity Management & Research Company LLC".

Broker-dealer Fidelity Distributors Corporation merged with and into Fidelity Investments Institutional Services Company, Inc. ("FIISC"). FIISC was then redomiciled from Massachusetts to Delaware, changed its corporate structure from a corporation to a limited liability company, and changed its name to "Fidelity Distributors Company LLC".

Fidelity Investments Institutional Operations Company, Inc. (FIIOC) converted from a Massachusetts corporation to a Massachusetts LLC, and changed its name to "Fidelity Investments Institutional Operations Company LLC".

# Report of Independent Registered Public Accounting Firm

To the Board of Trustees of Variable Insurance Products Fund III and Shareholders of VIP Mid Cap Portfolio:

## **Opinion on the Financial Statements**

We have audited the accompanying statement of assets and liabilities, including the schedule of investments, of VIP Mid Cap Portfolio (one of the funds constituting Variable Insurance Products Fund III, referred to hereafter as the "Fund") as of December 31, 2019, the related statement of operations for the year ended December 31, 2019, the statement of changes in net assets for each of the two years in the period ended December 31, 2019, including the related notes, and the financial highlights for each of the five years in the period ended December 31, 2019 (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Fund as of December 31, 2019, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period ended December 31, 2019 and the financial highlights for each of the five years in the period ended December 31, 2019 in conformity with accounting principles generally accepted in the United States of America.

## **Basis for Opinion**

These financial statements are the responsibility of the Fund's management. Our responsibility is to express an opinion on the Fund's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Fund in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of December 31, 2019 by correspondence with the custodian and brokers; when replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinion.

PricewaterhouseCoopers LLP  
Boston, Massachusetts  
February 11, 2020

We have served as the auditor of one or more investment companies in the Fidelity group of funds since 1932.

# Trustees and Officers

The Trustees, Members of the Advisory Board (if any), and officers of the trust and fund, as applicable, are listed below. The Board of Trustees governs the fund and is responsible for protecting the interests of shareholders. The Trustees are experienced executives who meet periodically throughout the year to oversee the fund's activities, review contractual arrangements with companies that provide services to the fund, oversee management of the risks associated with such activities and contractual arrangements, and review the fund's performance. Except for Michael E. Wiley, each of the Trustees oversees 302 funds. Mr. Wiley oversees 199 funds.

The Trustees hold office without limit in time except that (a) any Trustee may resign; (b) any Trustee may be removed by written instrument, signed by at least two-thirds of the number of Trustees prior to such removal; (c) any Trustee who requests to be retired or who has become incapacitated by illness or injury may be retired by written instrument signed by a majority of the other Trustees; and (d) any Trustee may be removed at any special meeting of shareholders by a two-thirds vote of the outstanding voting securities of the trust. Each Trustee who is not an interested person (as defined in the Investment Company Act of 1940 (1940 Act)) of the trust and the fund is referred to herein as an Independent Trustee. Each Independent Trustee shall retire not later than the last day of the calendar year in which his or her 75th birthday occurs. The Independent Trustees may waive this mandatory retirement age policy with respect to individual Trustees. Officers and Advisory Board Members hold office without limit in time, except that any officer or Advisory Board Member may resign or may be removed by a vote of a majority of the Trustees at any regular meeting or any special meeting of the Trustees. Except as indicated, each individual has held the office shown or other offices in the same company for the past five years.

The fund's Statement of Additional Information (SAI) includes more information about the Trustees. To request a free copy, call Fidelity at 1-877-208-0098.

**Experience, Skills, Attributes, and Qualifications of the Trustees.** The Governance and Nominating Committee has adopted a statement of policy that describes the experience, qualifications, attributes, and skills that are necessary and desirable for potential Independent Trustee candidates (Statement of Policy). The Board believes that each Trustee satisfied at the time he or she was initially elected or appointed a Trustee, and continues to satisfy, the standards contemplated by the Statement of Policy. The Governance and Nominating Committee also engages professional search firms to help identify potential Independent Trustee candidates who have the experience, qualifications, attributes, and skills consistent with the Statement of Policy. From time to time, additional criteria based on the composition and skills of the current Independent Trustees, as well as experience or skills that may be appropriate in light of future changes to board composition, business conditions, and regulatory or other developments, have also been considered by the professional search firms and the Governance and Nominating Committee. In addition, the Board takes into account the Trustees' commitment and participation in Board and committee meetings, as well as their leadership of standing and ad hoc committees throughout their tenure.

In determining that a particular Trustee was and continues to be qualified to serve as a Trustee, the Board has considered a variety of criteria, none of which, in isolation, was controlling. The Board believes that, collectively, the Trustees have balanced and diverse experience, qualifications, attributes, and skills, which allow the Board to operate effectively in governing the fund and protecting the interests of shareholders. Information about the specific experience, skills, attributes, and qualifications of each Trustee, which in each case led to the Board's conclusion that the Trustee should serve (or continue to serve) as a trustee of the fund, is provided below.

**Board Structure and Oversight Function.** James C. Curvey is an interested person and currently serves as Chairman. The Trustees have determined that an interested Chairman is appropriate and benefits shareholders because an interested Chairman has a personal and professional stake in the quality and continuity of services provided to the fund. Independent Trustees exercise their informed business judgment to appoint an individual of their choosing to serve as Chairman, regardless of whether the Trustee happens to be independent or a member of management. The Independent Trustees have determined that they can act independently and effectively without having an Independent Trustee serve as Chairman and that a key structural component for assuring that they are in a position to do so is for the Independent Trustees to constitute a substantial majority for the Board. The Independent Trustees also regularly meet in executive session. Ned C. Lautenbach serves as Chairman of the Independent Trustees and as such (i) acts as a liaison between the Independent Trustees and management with respect to matters important to the Independent Trustees and (ii) with management prepares agendas for Board meetings.

Fidelity® funds are overseen by different Boards of Trustees. The fund's Board oversees Fidelity's high income and certain equity funds, and other Boards oversee Fidelity's investment-grade bond, money market, asset allocation, and other equity funds. The asset allocation funds may invest in Fidelity® funds overseen by the fund's Board. The use of separate Boards, each with its own committee structure, allows the Trustees of each group of Fidelity® funds to focus on the unique issues of the funds they oversee, including common research, investment, and operational issues. On occasion, the separate Boards establish joint committees to address issues of overlapping consequences for the Fidelity® funds overseen by each Board.

The Trustees operate using a system of committees to facilitate the timely and efficient consideration of all matters of importance to the Trustees, the fund, and fund shareholders and to facilitate compliance with legal and regulatory requirements and oversight of the fund's activities and associated risks. The Board, acting through its committees, has charged FMR and its affiliates with (i) identifying events or circumstances the occurrence of which could have demonstrably adverse effects on the fund's business and/or reputation; (ii) implementing processes and controls to lessen the possibility that such events or circumstances occur or to mitigate the effects of such events or circumstances if they do occur; and (iii) creating and maintaining a system designed to evaluate continuously business and market conditions in order to facilitate the identification and implementation processes described in (i) and (ii) above. Because the day-to-day operations and activities of the fund are carried out by or through FMR, its affiliates, and other service providers, the fund's exposure to risks is mitigated but not eliminated by the processes overseen by the Trustees. While each of the Board's committees has responsibility for overseeing different aspects of the fund's activities, oversight is exercised primarily through the Operations, Audit, and Compliance Committees. Appropriate personnel, including but not limited to the fund's Chief Compliance Officer (CCO), FMR's internal auditor, the independent accountants, the fund's Treasurer and portfolio management personnel, make periodic reports to the Board's committees, as appropriate, including an annual review of Fidelity's risk management program for the Fidelity® funds. The responsibilities of each standing committee, including their oversight responsibilities, are described further under "Standing Committees of the Trustees."

Interested Trustees\*:

Correspondence intended for a Trustee who is an interested person may be sent to Fidelity Investments, 245 Summer Street, Boston, Massachusetts 02210.

Name, Year of Birth; Principal Occupations and Other Relevant Experience+

James C. Curvey (1935)

Year of Election or Appointment: 2007

Trustee

Chairman of the Board of Trustees

Mr. Curvey also serves as Trustee of other Fidelity® funds. Mr. Curvey is Vice Chairman (2007-present) and Director of FMR LLC (diversified financial services company). In addition, Mr. Curvey is an Overseer Emeritus for the Boston Symphony Orchestra, a Director of Artis-Naples, and a Trustee of Brewster Academy in Wolfeboro, New Hampshire. Previously, Mr. Curvey served as a Director of Fidelity Research & Analysis Co. (investment adviser firm, 2009-2018), Director of Fidelity Investments Money Management, Inc. (investment adviser firm, 2009-2014) and a Director of FMR and FMR Co., Inc. (investment adviser firms, 2007-2014).

\* Determined to be an "Interested Trustee" by virtue of, among other things, his or her affiliation with the trust or various entities under common control with FMR.

+ The information includes the Trustee's principal occupation during the last five years and other information relating to the experience, attributes, and skills relevant to the Trustee's qualifications to serve as a Trustee, which led to the conclusion that the Trustee should serve as a Trustee for the fund.

Independent Trustees:

Prior to joining Fidelity Investments, Mr. Spector served as Director at the Siegfried Group (accounting firm, 2013-2016), and prior to Siegfried Group as audit senior manager at Deloitte & Touche (accounting firm, 2005-2013).

Jim Wegmann (1979)

Year of Election or Appointment: 2019

Assistant Treasurer

Mr. Wegmann also serves as Assistant Treasurer of other funds. Mr. Wegmann is an employee of Fidelity Investments (2011-present).

# Shareholder Expense Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs and (2) ongoing costs, including management fees, distribution and/or service (12b-1) fees and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period (July 1, 2019 to December 31, 2019).

## Actual Expenses

The first line of the accompanying table for each class of the Fund provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000.00 (for example, an \$8,600 account value divided by \$1,000.00 = 8.6), then multiply the result by the number in the first line for a class of the Fund under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period. The estimate of expenses does not include any fees or other expenses of any variable annuity or variable life insurance product. If they were, the estimate of expenses you paid during the period would be higher, and your ending account value would be lower. In addition, the Fund, as a shareholder in the underlying Fidelity Central Funds, will indirectly bear its pro-rata share of the fees and expenses incurred by the underlying Fidelity Central Funds. These fees and expenses are not included in the Fund's annualized expense ratio used to calculate the expense estimate in the table below.

## Hypothetical Example for Comparison Purposes

The second line of the accompanying table for each class of the Fund provides information about hypothetical account values and hypothetical expenses based on a Class' actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Class' actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds. The estimate of expenses does not include any fees or other expenses of any variable annuity or variable life insurance product. If they were, the estimate of expenses you paid during the period would be higher, and your ending account value would be lower. In addition, the Fund, as a shareholder in the underlying Fidelity Central Funds, will indirectly bear its pro-rata share of the fees and expenses incurred by the underlying Fidelity Central Funds. These fees and expenses are not included in the Fund's annualized expense ratio used to calculate the expense estimate in the table below.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transaction costs. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds.

	Annualized Expense Ratio- <sup>A</sup>	Beginning Account Value July 1, 2019	Ending Account Value December 31, 2019	Expenses Paid During Period- <sup>B</sup> July 1, 2019 to December 31, 2019
Initial Class	.62%			
Actual		\$1,000.00	\$1,051.60	\$3.21
Hypothetical- <sup>C</sup>		\$1,000.00	\$1,022.08	\$3.16
Service Class	.72%			
Actual		\$1,000.00	\$1,051.20	\$3.72
Hypothetical- <sup>C</sup>		\$1,000.00	\$1,021.58	\$3.67
Service Class 2	.87%			
Actual		\$1,000.00	\$1,050.40	\$4.50
Hypothetical- <sup>C</sup>		\$1,000.00	\$1,020.82	\$4.43
Investor Class	.70%			
Actual		\$1,000.00	\$1,051.20	\$3.62
Hypothetical- <sup>C</sup>		\$1,000.00	\$1,021.68	\$3.57

<sup>A</sup> Annualized expense ratio reflects expenses net of applicable fee waivers.

<sup>B</sup> Expenses are equal to each Class' annualized expense ratio, multiplied by the average account value over the period, multiplied by 184/365 (to reflect the one-half year period).

<sup>C</sup> 5% return per year before expenses

## **Distributions (Unaudited)**

Initial Class, Service Class, and Service Class 2 designates 100% of the dividends distributed in February and December, respectively during the fiscal year as qualifying for the dividends—received deduction for corporate shareholders.

# Board Approval of Investment Advisory Contracts

## VIP Mid Cap Portfolio

At its November 2019 meeting, the Board of Trustees, including the Independent Trustees (together, the Board), voted to approve an amended and restated management contract and amended and restated sub-advisory agreements (together, the Amended and Restated Contracts) for the fund, effective January 1, 2020, for a one month period through January 31, 2020, in connection with an upcoming consolidation of certain of Fidelity's advisory businesses.

The Board considered that, on or about January 1, 2020, each of FMR Co., Inc. (FMRC), Fidelity Investments Money Management, Inc. (FIMM), and SelectCo, LLC (SelectCo) will merge with and into Fidelity Management & Research Company (FMR) and that, after the merger, FMR will redomicile as a Delaware limited liability company. The Board also approved the termination of the sub-advisory agreement with FMRC upon the completion of the merger. The Board noted that the Amended and Restated Contracts would be updated to reflect the renamed adviser, Fidelity Management & Research Company LLC and its new form of organization and domicile. The Board also noted that the Amended and Restated Contracts will not change the investment processes, the level or nature of services provided, the resources and personnel allocated, trading and compliance operations, or any fees or expenses paid by the fund.

The Board concluded that the fund's Amended and Restated Contracts are fair and reasonable, and that the fund's Advisory Contracts should be approved through January 31, 2020.

In connection with its consideration of future renewals of the fund's Amended and Restated Contracts, the Board will consider: (i) the nature, extent and quality of services provided to the fund, including shareholder and administrative services and investment performance; (ii) the competitiveness of the management fee and total expenses for the fund; (iii) the costs of the services and profitability, including the revenues earned and the expenses incurred in conducting the business of developing, marketing, distributing, managing, administering, and servicing the fund and its shareholders, to the extent applicable; and (iv) whether there have been economies of scale in respect of the Fidelity funds, whether the Fidelity funds (including the fund) have appropriately benefited from any such economies of scale, and whether there is the potential for realization of any further economies.

Based on its evaluation of all of the conclusions noted above, and after considering all factors it believed relevant, the Board ultimately concluded that the fund's management fee structure is fair and reasonable, and that the continuation of the fund's Amended and Restated Contracts should be approved.

# Fidelity® Variable Insurance Products:

## Contrafund® Portfolio

**Annual Report**  
**December 31, 2019**

See the inside front cover for important information about access to your fund's shareholder reports.

Beginning on January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, and if your insurance carrier elects to participate, you may not be receiving paper copies of the Fund's shareholder reports from the insurance company that offers your variable insurance product unless you specifically request paper copies from your financial professional or the administrator of your variable insurance product. Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may elect to receive shareholder reports and other communications from the Fund electronically, by contacting your financial professional or the administrator of your variable insurance product. If you own a Fidelity-administered variable insurance product, please visit [fidelity.com/mailpreferences](https://www.fidelity.com/mailpreferences) to make your election or call 1-800-343-3548.

You may elect to receive all future reports in paper free of charge. If you wish to continue receiving paper copies of your shareholder reports, you may contact your financial professional or the administrator of your variable insurance product. If you own a Fidelity-administered variable insurance product, please visit [fidelity.com/mailpreferences](https://www.fidelity.com/mailpreferences) to make your election or call 1-800-343-3548. Your election to receive reports in paper will apply to all funds available under your variable insurance product.

# Performance: The Bottom Line

Average annual total return reflects the change in the value of an investment, assuming reinvestment of distributions from dividend income and capital gains (the profits earned upon the sale of securities that have grown in value, if any) and assuming a constant rate of performance each year. During periods of reimbursement by Fidelity, a fund's total return will be greater than it would be had the reimbursement not occurred. Performance numbers are net of all underlying fund operating expenses, but do not include any insurance charges imposed by your insurance company's separate account. If performance information included the effect of these additional charges, the total returns would have been lower. How a fund did yesterday is no guarantee of how it will do tomorrow.

## Average Annual Total Returns

For the periods ended December 31, 2019

	Past 1 year	Past 5 years	Past 10 years
Initial Class	31.58%	10.30%	12.30%
Service Class	31.45%	10.19%	12.19%
Service Class 2	31.27%	10.02%	12.02%
Investor Class	31.49%	10.21%	12.21%

## \$10,000 Over 10 Years

Let's say hypothetically that \$10,000 was invested in VIP Contrafund<sup>SM</sup> Portfolio – Initial Class on December 31, 2009.

The chart shows how the value of your investment would have changed, and also shows how the S&P 500<sup>®</sup> Index performed over the same period.

# Management's Discussion of Fund Performance

**Market Recap:** U.S. stocks continued to roll in 2019, with the S&P 500<sup>®</sup> index soaring 31.49% and marking history as the longest and strongest bull market ever, despite persistent, nagging concerns about global economic growth and trade. After a rough end to 2018, equities sharply reversed course to begin the new year amid upbeat company earnings and signs the Federal Reserve may pause on rates. The uptrend continued until May, when the index sunk as trade negotiations between the U.S. and China broke down. The bull market roared back to record a series of highs in July, when the Fed cut interest rates for the first time since 2008. Volatility intensified in August, as the Treasury yield curve inverted, which some investors viewed as a sign the U.S. economy could be heading for recession. But the market proved resilient, hitting a new high on October 30, when the Fed lowered rates for the third time in 2019, and moving even higher through year-end. Gains were robust and broad-based, with information technology (+50%) leading the way with its best calendar-year result in a decade, amid strong growth trends. Communication services (+33%) and financials (+32%) also stood out. In contrast, energy (+12%) was by far the weakest group — struggling amid sluggish oil prices — while several strong gainers nonetheless fell short of the broader market: industrials and real estate (+29% each), consumer discretionary and consumer staples (+28% each), utilities (+26%), materials (+25%), and health care (+21%).

**Comments from Co-Portfolio Managers William Danoff and Jean Park:** For the year, the fund's share classes gained about 31% to 32%, roughly in line with the benchmark S&P 500<sup>®</sup> index. Versus the benchmark, a considerable overweighting in the market-leading information technology sector notably contributed, as did underexposure to energy. Our picks in health care and consumer staples also helped. The biggest individual contributor was a large investment in Microsoft (+58%), which benefited from enterprises moving their information technology workloads from their own data centers to larger and cheaper third-party data centers. It also helped to overweight Facebook (+57%), as the social-media platform operator reported better-than-expected revenue and earnings. Microsoft and Facebook were among the fund's top holdings. Conversely, security selection in information technology and financials detracted most. The fund's modest position in cash hampered relative performance in a strong market. The largest individual relative detractor was an underweighting in Apple (+89%), a maker of personal electronics and a sizable benchmark component the past year. The company had favorable financial results, driven by its wearables, home and accessories segment. Underexposure to Apple allowed us to invest in companies with better growth prospects. In health care, it hurt to overweight UnitedHealth Group, as shares of the managed health care and insurance giant gained 20% in 2019, lagging the benchmark.

*The views expressed above reflect those of the portfolio manager(s) only through the end of the period as stated on the cover of this report and do not necessarily represent the views of Fidelity or any other person in the Fidelity organization. Any such views are subject to change at any time based upon market or other conditions and Fidelity disclaims any responsibility to update such views. These views may not be relied on as investment advice and, because investment decisions for a Fidelity fund are based on numerous factors, may not be relied on as an indication of trading intent on behalf of any Fidelity fund.*

## Legend

- (a) Non-income producing
- (b) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. At the end of the period, the value of these securities amounted to \$46,941,927 or 0.3% of net assets.
- (c) Restricted securities – Investment in securities not registered under the Securities Act of 1933 (excluding 144A issues). At the end of the period, the value of restricted securities (excluding 144A issues) amounted to \$3,479,221 or 0.0% of net assets.
- (d) Level 3 security
- (e) Security or a portion of the security is on loan at period end.
- (f) Affiliated fund that is generally available only to investment companies and other accounts managed by Fidelity Investments. The rate quoted is the annualized seven-day yield of the fund at period end. A complete unaudited listing of the fund's holdings as of its most recent quarter end is available upon request. In addition, each Fidelity Central Fund's financial statements, which are not covered by the Fund's Report of Independent Registered Public Accounting Firm, are available on the SEC's website or upon request.
- (g) Investment made with cash collateral received from securities on loan.

Additional information on each restricted holding is as follows:

Security	Acquisition Date	Acquisition Cost
Allbirds, Inc.	10/9/18	\$ 1,434,943
Allbirds, Inc. Series A	10/9/18	\$ 566,344
Allbirds, Inc. Series B	10/9/18	\$ 99,472
Allbirds, Inc. Series C	10/9/18	\$ 950,908
Allbirds, Inc. Series Seed	10/9/18	\$ 304,284

See accompanying notes which are an integral part of the financial statements.

## Schedule of Investments – continued

### Affiliated Central Funds

Information regarding fiscal year to date income earned by the Fund from investments in Fidelity Central Funds is as follows:

Fund	Income earned
Fidelity Cash Central Fund	\$ 5,213,607
Fidelity Securities Lending Cash Central Fund	1,057,918
Total	<u>\$ 6,271,525</u>

Amounts in the income column in the above table include any capital gain distributions from underlying funds, which are presented in the corresponding line-item in the Statement of Operations, if applicable. Amount for Fidelity Securities Lending Cash Central Fund represents the income earned on investing cash collateral, less rebates paid to borrowers and any lending agent fees associated with the loan, plus any premium payments received for lending certain types of securities.

### Investment Valuation

The following is a summary of the inputs used, as of December 31, 2019, involving the Fund's assets and liabilities carried at fair value. The inputs or methodology used for valuing securities may not be an indication of the risk associated with investing in those securities. For more information on valuation inputs, and their aggregation into the levels used below, please refer to the Investment Valuation section in the accompanying Notes to Financial Statements.

# Notes to Financial Statements

For the period ended December 31, 2019

## 1. Organization.

VIP Contrafund Portfolio (the Fund) is a fund of Variable Insurance Products Fund II (the Trust) and is authorized to issue an unlimited number of shares. The Trust is registered under the Investment Company Act of 1940, as amended (the 1940 Act), as an open-end management investment company organized as a Massachusetts business trust. Shares of the Fund may only be purchased by insurance companies for the purpose of funding variable annuity or variable life insurance contracts. The Fund offers the following classes of shares: Initial Class shares, Service Class shares, Service Class 2 shares and Investor Class shares. All classes have equal rights and voting privileges, except for matters affecting a single class.

## 2. Investments in Fidelity Central Funds.

The Fund invests in Fidelity Central Funds, which are open-end investment companies generally available only to other investment companies and accounts managed by the investment adviser and its affiliates. The Fund's Schedule of Investments lists each of the Fidelity Central Funds held as of period end, if any, as an investment of the Fund, but does not include the underlying holdings of each Fidelity Central Fund. As an Investing Fund, the Fund indirectly bears its proportionate share of the expenses of the underlying Fidelity Central Funds.

The Money Market Central Funds seek preservation of capital and current income and are managed by Fidelity Investments Money Management, Inc. (FIMM), an affiliate of the investment adviser. Annualized expenses of the Money Market Central Funds as of their most recent shareholder report date ranged from less than .005% to .01%.

A complete unaudited list of holdings for each Fidelity Central Fund is available upon request or at the Securities and Exchange Commission (the SEC) website at [www.sec.gov](http://www.sec.gov). In addition, the financial statements of the Fidelity Central Funds, which are not covered by the Fund's Report of Independent Registered Public Accounting Firm, are available on the SEC website or upon request.

## 3. Significant Accounting Policies.

The Fund is an investment company and applies the accounting and reporting guidance of the Financial Accounting Standards Board (FASB) Accounting Standards Codification Topic 946 Financial Services — Investments Companies. The financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP), which require management to make certain estimates and assumptions at the date of the financial statements. Actual results could differ from those estimates. Subsequent events, if any, through the date that the financial statements were issued have been evaluated in the preparation of the financial statements. The following summarizes the significant accounting policies of the Fund:

**Investment Valuation.** Investments are valued as of 4:00 p.m. Eastern time on the last calendar day of the period. The Board of Trustees (the Board) has delegated the day to day responsibility for the valuation of the Fund's investments to the Fair Value Committee (the Committee) established by the Fund's investment adviser. In accordance with valuation policies and procedures approved by the Board, the Fund attempts to obtain prices from one or more third party pricing vendors or brokers to value its investments. When current market prices, quotations or currency exchange rates are not readily available or reliable, investments will be fair valued in good faith by the Committee, in accordance with procedures adopted by the Board. Factors used in determining fair value vary by investment type and may include market or investment specific events. The frequency with which these procedures are used cannot be predicted and they may be utilized to a significant extent. The Committee oversees the Fund's valuation policies and procedures and reports to the Board on the Committee's activities and fair value determinations. The Board monitors the appropriateness of the procedures used in valuing the Fund's investments and ratifies the fair value determinations of the Committee.

The Fund categorizes the inputs to valuation techniques used to value its investments into a disclosure hierarchy consisting of three levels as shown below:

Level 1 — quoted prices in active markets for identical investments

Level 2 — other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, etc.)

Level 3 — unobservable inputs (including the Fund's own assumptions based on the best information available)

Valuation techniques used to value the Fund's investments by major category are as follows:

Equity securities, including restricted securities, for which market quotations are readily available, are valued at the last reported sale price or official closing price as reported by a third party pricing vendor on the primary market or exchange on which they are traded and are categorized as Level 1 in the hierarchy. In the event there were no sales during the day or closing prices are not available, securities are valued at the last quoted bid price or may be valued using the last available price and are generally categorized as Level 2 in the hierarchy. For foreign equity securities, when market or security specific events arise, comparisons to the valuation of American Depositary Receipts (ADRs), futures contracts, Exchange-Traded Funds (ETFs) and certain indexes as well as quoted prices for similar securities may be used and would be categorized as Level 2 in the hierarchy. For equity securities, including restricted securities, where observable inputs are limited, assumptions about market activity and risk are used and these securities may be categorized as Level 3 in the hierarchy.

Investments in open-end mutual funds, including the Fidelity Central Funds, are valued at their closing net asset value (NAV) each business day and are categorized as Level 1 in the hierarchy.

Changes in valuation techniques may result in transfers in or out of an assigned level within the disclosure hierarchy. The aggregate value of investments by input level as of December 31, 2019 is included at the end of the Fund's Schedule of Investments.

**Foreign Currency.** The Fund may use foreign currency contracts to facilitate transactions in foreign-denominated securities. Gains and losses from these transactions may arise from changes in the value of the foreign currency or if the counterparties do not perform under the contracts' terms.

Foreign-denominated assets, including investment securities, and liabilities are translated into U.S. dollars at the exchange rates at period end. Purchases and sales of investment securities, income and dividends received and expenses denominated in foreign currencies are translated into U.S. dollars at the exchange rate in effect on the transaction date.

The effects of exchange rate fluctuations on investments are included with the net realized and unrealized gain (loss) on investment securities. Other foreign currency transactions resulting in realized and unrealized gain (loss) are disclosed separately.

## Notes to Financial Statements – continued

**Investment Transactions and Income.** For financial reporting purposes, the Fund's investment holdings and NAV include trades executed through the end of the last business day of the period. The NAV per share for processing shareholder transactions is calculated as of the close of business of the New York Stock Exchange (NYSE), normally 4:00 p.m. Eastern time and includes trades executed through the end of the prior business day. Gains and losses on securities sold are determined on the basis of identified cost and include proceeds received from litigation. Dividend income is recorded on the ex-dividend date, except for certain dividends from foreign securities where the ex-dividend date may have passed, which are recorded as soon as the Fund is informed of the ex-dividend date. Non-cash dividends included in dividend income, if any, are recorded at the fair market value of the securities received. Income and capital gain distributions from Fidelity Central Funds, if any, are recorded on the ex-dividend date. Certain distributions received by the Fund represent a return of capital or capital gain. The Fund determines the components of these distributions subsequent to the ex-dividend date, based upon receipt of tax filings or other correspondence relating to the underlying investment. These distributions are recorded as a reduction of cost of investments and/or as a realized gain. Investment income is recorded net of foreign taxes withheld where recovery of such taxes is uncertain.

**Class Allocations and Expenses.** Investment income, realized and unrealized capital gains and losses, common expenses of the Fund, and certain fund-level expense reductions, if any, are allocated daily on a pro-rata basis to each class based on the relative net assets of each class to the total net assets of the Fund. Each class differs with respect to transfer agent and distribution and service plan fees incurred. Certain expense reductions may also differ by class. For the reporting period, the allocated portion of income and expenses to each class as a percent of its average net assets may vary due to the timing of recording these transactions in relation to fluctuating net assets of the classes. Expenses directly attributable to a fund are charged to that fund. Expenses attributable to more than one fund are allocated among the respective funds on the basis of relative net assets or other appropriate methods. Expense estimates are accrued in the period to which they relate and adjustments are made when actual amounts are known.

**Deferred Trustee Compensation.** Under a Deferred Compensation Plan (the Plan), certain independent Trustees have elected to defer receipt of a portion of their annual compensation. Deferred amounts are invested in a cross-section of Fidelity funds, are marked-to-market and remain in the Fund until distributed in accordance with the Plan. The investment of deferred amounts and the offsetting payable to the Trustees of \$1,028,905 are included in the accompanying Statement of Assets and Liabilities in other receivables and other payables and accrued expenses, respectively.

**Income Tax Information and Distributions to Shareholders.** Each year, the Fund intends to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code, including distributing substantially all of its taxable income and realized gains. As a result, no provision for U.S. Federal income taxes is required. As of December 31, 2019, the Fund did not have any unrecognized tax benefits in the financial statements; nor is the Fund aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months. The Fund files a U.S. federal tax return, in addition to state and local tax returns as required. The Fund's federal income tax returns are subject to examination by the Internal Revenue Service (IRS) for a period of three fiscal years after they are filed. State and local tax returns may be subject to examination for an additional fiscal year depending on the jurisdiction. Foreign taxes are provided for based on the Fund's understanding of the tax rules and rates that exist in the foreign markets in which it invests. The Fund is subject to a tax imposed on capital gains by certain countries in which it invests. An estimated deferred tax liability for net unrealized appreciation on the applicable securities is included in Other payables and accrued expenses on the Statement of Assets & Liabilities.

Distributions are declared and recorded on the ex-dividend date. Income and capital gain distributions are declared separately for each class. Income and capital gain distributions are determined in accordance with income tax regulations, which may differ from GAAP.

Capital accounts within the financial statements are adjusted for permanent book-tax differences. These adjustments have no impact on net assets or the results of operations. Capital accounts are not adjusted for temporary book-tax differences which will reverse in a subsequent period.

Book-tax differences are primarily due to foreign currency transactions, certain foreign taxes, passive foreign investment companies (PFIC), redemptions in kind, deferred trustees compensation and losses deferred due to wash sales.

As of period end, the cost and unrealized appreciation (depreciation) in securities, and derivatives if applicable, for federal income tax purposes were as follows:

Gross unrealized appreciation	\$ 6,126,650,041
Gross unrealized depreciation	<u>(79,877,767)</u>
Net unrealized appreciation (depreciation)	<u>\$ 6,046,772,274</u>
Tax Cost	<u>\$12,209,267,358</u>

The tax-based components of distributable earnings as of period end were as follows:

Undistributed ordinary income	<u>\$ 17,764,319</u>
Undistributed long-term capital gain	<u>\$ 88,928,002</u>
Net unrealized appreciation (depreciation) on securities and other investments	<u>\$6,046,705,392</u>

The tax character of distributions paid was as follows:

	December 31, 2019	December 31, 2018
Ordinary Income	\$ 58,328,154	\$ 169,336,386
Long-term Capital Gains	<u>2,043,989,637</u>	<u>1,660,686,162</u>
Total	<u>\$2,102,317,791</u>	<u>\$1,830,022,548</u>

**Restricted Securities.** The Fund may invest in securities that are subject to legal or contractual restrictions on resale. These securities generally may be resold in transactions exempt from registration or to the public if the securities are registered. Disposal of these securities may involve time-consuming negotiations and expense, and prompt sale at an acceptable price may be difficult. Information regarding restricted securities is included at the end of the Fund's Schedule of Investments.

#### 4. Purchases and Sales of Investments.

Purchases and sales of securities, other than short-term securities and in-kind transactions, aggregated \$6,502,892,337 and \$8,464,734,008, respectively.

**Unaffiliated Redemptions In-Kind.** During the period, 12,062,536 shares of the Fund were redeemed in-kind for investments, and cash with a value of \$400,234,962. The net realized gain of \$150,078,422 on investments delivered through in-kind redemptions is included in the accompanying Statement of Operations. The amount of the in-kind redemptions is included in share transactions in the accompanying Statement of Changes in Net Assets as well as the Notes to Financial Statements. The Fund recognized no gain or loss for federal income tax purposes.

**Prior Fiscal Year Unaffiliated Redemptions In-Kind.** During the prior period, 21,612,787 shares of the Fund were redeemed in-kind for investments and cash with a value of \$749,882,972. The Fund had a net realized gain of \$218,492,937 on investments delivered through in-kind redemptions. The amount of the in-kind redemptions is included in share transactions in the accompanying Statement of Changes in Net Assets as well as the Notes to Financial Statements. The Fund recognized no gain or loss for federal income tax purposes.

#### 5. Fees and Other Transactions with Affiliates.

**Management Fee.** Fidelity Management & Research Company (the investment adviser) and its affiliates provide the Fund with investment management related services for which the Fund pays a monthly management fee. The management fee is the sum of an individual fund fee rate that is based on an annual rate of .30% of the Fund's average net assets and an annualized group fee rate that averaged .24% during the period. The group fee rate is based upon the average net assets of all the mutual funds advised by the investment adviser, including any mutual funds previously advised by the investment adviser that are currently advised by Fidelity SelectCo, LLC, an affiliate of the investment adviser. The group fee rate decreases as assets under management increase and increases as assets under management decrease. For the reporting period, the total annual management fee rate was .54% of the Fund's average net assets.

**Distribution and Service Plan Fees.** In accordance with Rule 12b-1 of the 1940 Act, the Fund has adopted separate 12b-1 Plans for each Service Class of shares. Each Service Class pays Fidelity Distributors Corporation (FDC), an affiliate of the investment adviser, a service fee. For the period, the service fee is based on an annual rate of .10% of Service Class' average net assets and .25% of Service Class 2's average net assets.

For the period, total fees, all of which were re-allowed to insurance companies for the distribution of shares and providing shareholder support services, were as follows:

Service Class	\$ 1,471,239
Service Class 2	<u>19,707,320</u>
	<u>\$21,178,559</u>

**Transfer Agent Fees.** Fidelity Investments Institutional Operations Company, Inc. (FIOOC), an affiliate of the investment adviser, is the Fund's transfer, dividend disbursing, and shareholder servicing agent. FIOOC receives an asset-based fee with respect to each class. Each class pays a fee for transfer agent services, typesetting and printing and mailing of shareholder reports, excluding mailing of proxy statements, equal to an annual rate of class-level average net assets. The annual rate for Investor Class is .15% and the annual rate for all other classes is .07%. For the period, transfer agent fees for each class were as follows:

Initial Class	\$ 4,367,723
Service Class	950,568
Service Class 2	5,093,412
Investor Class	<u>2,306,345</u>
	<u>\$12,718,048</u>

**Accounting and Security Lending Fees.** Fidelity Service Company, Inc. (FSC), an affiliate of the investment adviser, maintains the Fund's accounting records. The accounting fee is based on the level of average net assets for each month. Prior to April 1, 2019, FSC had a separate agreement with the Fund for administration of the security lending program, based on the number and duration of lending transactions. For the period, the total fees paid for accounting and administration of securities lending were equivalent to the following annual rates:

VIP Contrafund Portfolio	% of Average Net Assets .01
--------------------------	--------------------------------

**Brokerage Commissions.** A portion of portfolio transactions were placed with brokerage firms which are affiliates of the investment adviser. Brokerage commissions are included in net realized gain (loss) and change in net unrealized appreciation (depreciation) in the Statement of Operations. The commissions paid to these affiliated firms were as follows:

VIP Contrafund Portfolio	Amount <u>\$164,614</u>
--------------------------	----------------------------

## Notes to Financial Statements – continued

**Interfund Trades.** The Fund may purchase from or sell securities to other Fidelity Funds under procedures adopted by the Board. The procedures have been designed to ensure these interfund trades are executed in accordance with Rule 17a-7 of the 1940 Act. Interfund trades are included within the respective purchases and sales amounts shown in the Purchases and Sales of Investments note.

**Other.** During the period, the investment adviser reimbursed the Fund for certain losses in the amount of \$125,688.

### 6. Committed Line of Credit.

The Fund participates with other funds managed by the investment adviser or an affiliate in a \$4.25 billion credit facility (the “line of credit”) to be utilized for temporary or emergency purposes to fund shareholder redemptions or for other short-term liquidity purposes. The Fund has agreed to pay commitment fees on its pro-rata portion of the line of credit, which amounted to \$46,796 and is reflected in Miscellaneous expenses on the Statement of Operations. During the period, the Fund did not borrow on this line of credit.

### 7. Security Lending.

The Fund lends portfolio securities from time to time in order to earn additional income. For equity securities, lending agents are used, including National Financial Services (NFS), an affiliate of the Fund. Pursuant to a securities lending agreement, NFS will receive a fee, which is capped at 9.9% of daily lending revenue, for its services as lending agent. The Fund may lend securities to certain qualified borrowers, including NFS. On the settlement date of the loan, the Fund receives collateral (in the form of U.S. Treasury obligations, letters of credit and/or cash) against the loaned securities and maintains collateral in an amount not less than 100% of the market value of the loaned securities during the period of the loan. The market value of the loaned securities is determined at the close of business of the Fund and any additional required collateral is delivered to the Fund on the next business day. The Fund or borrower may terminate the loan at any time, and if the borrower defaults on its obligation to return the securities loaned because of insolvency or other reasons, the Fund may apply collateral received from the borrower against the obligation. The Fund may experience delays and costs in recovering the securities loaned. Any cash collateral received is invested in the Fidelity Securities Lending Cash Central Fund. The value of loaned securities and cash collateral at period end are disclosed on the Fund’s Statement of Assets and Liabilities. At period end, there were no security loans outstanding with NFS, as affiliated borrower. Total fees paid by the Fund to NFS, as lending agent, amounted to \$32,857. Security lending income represents the income earned on investing cash collateral, less rebates paid to borrowers and any lending agent fees associated with the loan, plus any premium payments received for lending certain types of securities. Security lending income is presented in the Statement of Operations as a component of income from Fidelity Central Funds, and includes \$14,302 from securities loaned to NFS, as affiliated borrower.

### 8. Expense Reductions.

Commissions paid to certain brokers with whom the investment adviser, or its affiliates, places trades on behalf of the Fund include an amount in addition to trade execution, which may be rebated back to the Fund to offset certain expenses. This amount totaled \$343,079 for the period.

In addition, during the period the investment adviser reimbursed and/or waived a portion of fund-level operating expenses in the amount of \$130,033.

### 9. Distributions to Shareholders.

Distributions to shareholders of each class were as follows:

	Year ended December 31, 2019	Year ended December 31, 2018
<b>Distributions to shareholders</b>		
Initial Class	\$ 815,577,615	\$ 698,874,927
Service Class	174,225,616	143,784,613
Service Class 2	926,626,620	843,883,749
Investor Class	185,887,940	143,479,259
Total	<u>\$2,102,317,791</u>	<u>\$1,830,022,548</u>

### 10. Share Transactions.

(a) Amount includes in-kind redemptions (see the Prior Fiscal Year Unaffiliated Redemptions In-Kind note for additional details).

(b) Amount includes in-kind redemptions (see the Unaffiliated Redemptions In-Kind note for additional details).

## 11. Other.

The Fund's organizational documents provide former and current trustees and officers with a limited indemnification against liabilities arising in connection with the performance of their duties to the Fund. In the normal course of business, the Fund may also enter into contracts that provide general indemnifications. The Fund's maximum exposure under these arrangements is unknown as this would be dependent on future claims that may be made against the Fund. The risk of material loss from such claims is considered remote.

At the end of the period, the investment adviser or its affiliates were the owners of record of 15% of the total outstanding shares of the Fund and two otherwise unaffiliated shareholders were the owner of record of 23% of the total outstanding shares of the Fund.

Effective January 1, 2020, following any required regulatory notices and approvals:

Investment advisers Fidelity Investments Money Management, Inc., FMR Co., Inc., and Fidelity SelectCo, LLC, merged with and into Fidelity Management & Research Company. In connection with the merger transactions, the resulting, merged investment adviser was then redomiciled from Massachusetts to Delaware, changed its corporate structure from a corporation to a limited liability company, and changed its name to "Fidelity Management & Research Company LLC".

Broker-dealer Fidelity Distributors Corporation merged with and into Fidelity Investments Institutional Services Company, Inc. ("FIISC"). FIISC was then redomiciled from Massachusetts to Delaware, changed its corporate structure from a corporation to a limited liability company, and changed its name to "Fidelity Distributors Company LLC".

Fidelity Investments Institutional Operations Company, Inc. (FIIOC) converted from a Massachusetts corporation to a Massachusetts LLC, and changed its name to "Fidelity Investments Institutional Operations Company LLC".

# Report of Independent Registered Public Accounting Firm

To the Trustees of Variable Insurance Products Fund II and Shareholders of VIP Contrafund Portfolio:

## Opinion on the Financial Statements and Financial Highlights

We have audited the accompanying statement of assets and liabilities of VIP Contrafund Portfolio (the "Fund"), a fund of Variable Insurance Products Fund II, including the schedule of investments, as of December 31, 2019, the related statement of operations for the year then ended, the statement of changes in net assets for each of the two years in the period then ended, the financial highlights for each of the five years in the period then ended, and the related notes. In our opinion, the financial statements and financial highlights present fairly, in all material respects, the financial position of the Fund as of December 31, 2019, and the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended in conformity with accounting principles generally accepted in the United States of America.

## Basis for Opinion

These financial statements and financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on the Fund's financial statements and financial highlights based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Fund in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement, whether due to error or fraud. The Fund is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements and financial highlights, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements and financial highlights. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements and financial highlights. Our procedures included confirmation of securities owned as of December 31, 2019, by correspondence with the custodians and brokers; when replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinion.

/s/ Deloitte & Touche LLP  
Boston, Massachusetts  
February 10, 2020

We have served as the auditor of one or more of the Fidelity investment companies since 1999.

# Trustees and Officers

The Trustees, Members of the Advisory Board (if any), and officers of the trust and fund, as applicable, are listed below. The Board of Trustees governs the fund and is responsible for protecting the interests of shareholders. The Trustees are experienced executives who meet periodically throughout the year to oversee the fund's activities, review contractual arrangements with companies that provide services to the fund, oversee management of the risks associated with such activities and contractual arrangements, and review the fund's performance. Except for Michael E. Wiley, each of the Trustees oversees 302 funds. Mr. Wiley oversees 199 funds.

The Trustees hold office without limit in time except that (a) any Trustee may resign; (b) any Trustee may be removed by written instrument, signed by at least two-thirds of the number of Trustees prior to such removal; (c) any Trustee who requests to be retired or who has become incapacitated by illness or injury may be retired by written instrument signed by a majority of the other Trustees; and (d) any Trustee may be removed at any special meeting of shareholders by a two-thirds vote of the outstanding voting securities of the trust. Each Trustee who is not an interested person (as defined in the Investment Company Act of 1940 (1940 Act)) of the trust and the fund is referred to herein as an Independent Trustee. Each Independent Trustee shall retire not later than the last day of the calendar year in which his or her 75th birthday occurs. The Independent Trustees may waive this mandatory retirement age policy with respect to individual Trustees. Officers and Advisory Board Members hold office without limit in time, except that any officer or Advisory Board Member may resign or may be removed by a vote of a majority of the Trustees at any regular meeting or any special meeting of the Trustees. Except as indicated, each individual has held the office shown or other offices in the same company for the past five years.

The fund's Statement of Additional Information (SAI) includes more information about the Trustees. To request a free copy, call Fidelity at 1-877-208-0098.

**Experience, Skills, Attributes, and Qualifications of the Trustees.** The Governance and Nominating Committee has adopted a statement of policy that describes the experience, qualifications, attributes, and skills that are necessary and desirable for potential Independent Trustee candidates (Statement of Policy). The Board believes that each Trustee satisfied at the time he or she was initially elected or appointed a Trustee, and continues to satisfy, the standards contemplated by the Statement of Policy. The Governance and Nominating Committee also engages professional search firms to help identify potential Independent Trustee candidates who have the experience, qualifications, attributes, and skills consistent with the Statement of Policy. From time to time, additional criteria based on the composition and skills of the current Independent Trustees, as well as experience or skills that may be appropriate in light of future changes to board composition, business conditions, and regulatory or other developments, have also been considered by the professional search firms and the Governance and Nominating Committee. In addition, the Board takes into account the Trustees' commitment and participation in Board and committee meetings, as well as their leadership of standing and ad hoc committees throughout their tenure.

In determining that a particular Trustee was and continues to be qualified to serve as a Trustee, the Board has considered a variety of criteria, none of which, in isolation, was controlling. The Board believes that, collectively, the Trustees have balanced and diverse experience, qualifications, attributes, and skills, which allow the Board to operate effectively in governing the fund and protecting the interests of shareholders. Information about the specific experience, skills, attributes, and qualifications of each Trustee, which in each case led to the Board's conclusion that the Trustee should serve (or continue to serve) as a trustee of the fund, is provided below.

**Board Structure and Oversight Function.** James C. Curvey is an interested person and currently serves as Chairman. The Trustees have determined that an interested Chairman is appropriate and benefits shareholders because an interested Chairman has a personal and professional stake in the quality and continuity of services provided to the fund. Independent Trustees exercise their informed business judgment to appoint an individual of their choosing to serve as Chairman, regardless of whether the Trustee happens to be independent or a member of management. The Independent Trustees have determined that they can act independently and effectively without having an Independent Trustee serve as Chairman and that a key structural component for assuring that they are in a position to do so is for the Independent Trustees to constitute a substantial majority for the Board. The Independent Trustees also regularly meet in executive session. Ned C. Lautenbach serves as Chairman of the Independent Trustees and as such (i) acts as a liaison between the Independent Trustees and management with respect to matters important to the Independent Trustees and (ii) with management prepares agendas for Board meetings.

Fidelity® funds are overseen by different Boards of Trustees. The fund's Board oversees Fidelity's high income and certain equity funds, and other Boards oversee Fidelity's investment-grade bond, money market, asset allocation, and other equity funds. The asset allocation funds may invest in Fidelity® funds overseen by the fund's Board. The use of separate Boards, each with its own committee structure, allows the Trustees of each group of Fidelity® funds to focus on the unique issues of the funds they oversee, including common research, investment, and operational issues. On occasion, the separate Boards establish joint committees to address issues of overlapping consequences for the Fidelity® funds overseen by each Board.

The Trustees operate using a system of committees to facilitate the timely and efficient consideration of all matters of importance to the Trustees, the fund, and fund shareholders and to facilitate compliance with legal and regulatory requirements and oversight of the fund's activities and associated risks. The Board, acting through its committees, has charged FMR and its affiliates with (i) identifying events or circumstances the occurrence of which could have demonstrably adverse effects on the fund's business and/or reputation; (ii) implementing processes and controls to lessen the possibility that such events or circumstances occur or to mitigate the effects of such events or circumstances if they do occur; and (iii) creating and maintaining a system designed to evaluate continuously business and market conditions in order to facilitate the identification and implementation processes described in (i) and (ii) above. Because the day-to-day operations and activities of the fund are carried out by or through FMR, its affiliates, and other service providers, the fund's exposure to risks is mitigated but not eliminated by the processes overseen by the Trustees. While each of the Board's committees has responsibility for overseeing different aspects of the fund's activities, oversight is exercised primarily through the Operations, Audit, and Compliance Committees. Appropriate personnel, including but not limited to the fund's Chief Compliance Officer (CCO), FMR's internal auditor, the independent accountants, the fund's Treasurer and portfolio management personnel, make periodic reports to the Board's committees, as appropriate, including an annual review of Fidelity's risk management program for the Fidelity® funds. The responsibilities of each standing committee, including their oversight responsibilities, are described further under "Standing Committees of the Trustees."

(2009-2017). Mr. Dirks is a member of the Finance Committee (2016-present) and Board of Directors (2017-present) and is Treasurer (2018-present) of the Asolo Repertory Theatre.

Donald F. Donahue (1950)

Year of Election or Appointment: 2018

Trustee

Mr. Donahue also serves as a Trustee of other Fidelity® funds. Mr. Donahue is President and Chief Executive Officer of Miranda Partners, LLC (risk consulting for the financial services industry, 2012-present). Previously, Mr. Donahue served as a Member of the Advisory Board of certain Fidelity® funds (2015-2018) and Chief Executive Officer (2006-2012), Chief Operating Officer (2003-2006), and Managing Director, Customer Marketing and Development (1999-2003) of The Depository Trust & Clearing Corporation (financial markets infrastructure). Mr. Donahue serves as a Member (2007-present) and Co-Chairman (2016-present) of the Board of Directors of United Way of New York, Member of the Board of Directors of NYC Leadership Academy (2012-present) and Member of the Board of Advisors of Ripple Labs, Inc. (financial services, 2015-present). He also served as Chairman (2010-2012) and Member of the Board of Directors (2012-2013) of Omgeo, LLC (financial services), Treasurer of United Way of New York (2012-2016), and Member of the Board of Directors of XBRL US (financial services non-profit, 2009-2012) and the International Securities Services Association (2009-2012).

Alan J. Lacy (1953)

Year of Election or Appointment: 2008

Trustee

Mr. Lacy also serves as Trustee of other Fidelity® funds. Mr. Lacy serves as a Director of Bristol-Myers Squibb Company (global pharmaceuticals, 2008-present). He is a Trustee of the California Chapter of The Nature Conservancy (2015-present) and a Director of the Center for Advanced Study in the Behavioral Sciences at Stanford University (2015-present). In addition, Mr. Lacy served as Senior Adviser (2007-2014) of Oak Hill Capital Partners, L.P. (private equity) and also served as Chief Executive Officer (2005) and Vice Chairman (2005-2006) of Sears Holdings Corporation (retail) and Chief Executive Officer and Chairman of the Board of Sears, Roebuck and Co. (retail, 2000-2005). Previously, Mr. Lacy served as Chairman (2014-2017) and a member (2010-2017) of the Board of Directors of Dave & Buster’s Entertainment, Inc. (restaurant and entertainment complexes), as Chairman (2008-2011) and a member (2006-2015) of the Board of Trustees of the National Parks Conservation Association, and as a member of the Board of Directors for The Hillman Companies, Inc. (hardware wholesalers, 2010-2014), Earth Fare, Inc. (retail grocery, 2010-2014), and The Western Union Company (global money transfer, 2006-2011).

Ned C. Lautenbach (1944)

Year of Election or Appointment: 2000

Trustee

Chairman of the Independent Trustees

Mr. Lautenbach also serves as Trustee of other Fidelity® funds. Mr. Lautenbach currently serves as Chair (2018-present) and Member (2013-present) of the Board of Governors, State University System of Florida and is a member of the Council on Foreign Relations (1994-present). He is also a member and has most recently served as Chairman of the Board of Directors of Artis-Naples (2012-present). Previously, Mr. Lautenbach served as a member and then Lead Director of the Board of Directors of Eaton Corporation (diversified industrial, 1997-2016). He was also a Partner and Advisory Partner at Clayton, Dubilier & Rice, LLC (private equity investment, 1998-2010), as well as a Director of Sony Corporation (2006-2007). In addition, Mr. Lautenbach also had a 30-year career with IBM (technology company) during which time he served as Senior Vice President and a member of the Corporate Executive Committee (1968-1998).

Joseph Mauriello (1944)

Year of Election or Appointment: 2008

Trustee

Mr. Mauriello also serves as Trustee of other Fidelity® funds. Prior to his retirement in January 2006, Mr. Mauriello served in numerous senior management positions including Deputy Chairman and Chief Operating Officer (2004-2005), and Vice Chairman of Financial Services (2002-2004) of KPMG LLP US (professional services, 1965-2005). Mr. Mauriello currently serves as a member of the Independent Directors Council (IDC) Governing Council (2015-present). Previously, Mr. Mauriello served as a member of the Board of Directors of XL Group plc. (global insurance and re-insurance, 2006-2018).

Cornelia M. Small (1944)

Year of Election or Appointment: 2005

Trustee

Ms. Small also serves as Trustee of other Fidelity® funds. Ms. Small is a member of the Board of Directors (2009-present) and Chair of the Investment Committee (2010-present) of the Teagle Foundation. Ms. Small also serves on the Investment Committee of the Berkshire Taconic Community Foundation (2008-present). Previously, Ms. Small served as Chairperson (2002-2008) and a member of the Investment Committee and Chairperson (2008-2012) and a member of the Board of Trustees of Smith College. In addition, Ms. Small served as Chief Investment Officer, Director of Global Equity Investments, and a member of the Board of Directors of Scudder, Stevens & Clark and Scudder Kemper Investments.

Garnett A. Smith (1947)

Year of Election or Appointment: 2018

Trustee

Mr. Smith also serves as Trustee of other Fidelity® funds. Prior to Mr. Smith's retirement, he served as Chairman and Chief Executive Officer of Inbrand Corp. (manufacturer of personal absorbent products, 1990-1997). He also served as President (1986-1990) of Inbrand Corp. Prior to his employment with Inbrand Corp., he was employed by a retail fabric chain and North Carolina National Bank. In addition, Mr. Smith served as a Member of the Advisory Board of certain Fidelity® funds (2012-2013) and as a board member of the Jackson Hole Land Trust (2009-2012).

David M. Thomas (1949)

Year of Election or Appointment: 2008

Trustee

Mr. Thomas also serves as Trustee of other Fidelity® funds. Mr. Thomas serves as Non-Executive Chairman of the Board of Directors of Fortune Brands Home and Security (home and security products, 2011-present) and as a member of the Board of Directors (2004-present) and Presiding Director (2013-present) of Interpublic Group of Companies, Inc. (marketing communication). Previously, Mr. Thomas served as Executive Chairman (2005-2006) and Chairman and Chief Executive Officer (2000-2005) of IMS Health, Inc. (pharmaceutical and healthcare information solutions), a Director of Fortune Brands, Inc. (consumer products, 2000-2011), and a member of the Board of Trustees of the University of Florida (2013-2018).

Michael E. Wiley (1950)

Year of Election or Appointment: 2018

Trustee

Mr. Wiley also serves as Trustee or Member of the Advisory Board of other Fidelity® funds. Mr. Wiley serves as a Director of High Point Resources (exploration and production, 2005-present). Previously, Mr. Wiley served as a Director of Andeavor Corporation (independent oil refiner and marketer, 2005-2018), a Director of Andeavor Logistics LP (natural resources logistics, 2015-2018), a Director of Post Oak Bank (privately-held bank, 2004-2018), a Director of Asia Pacific Exploration Consolidated (international oil and gas exploration and production, 2008-2013), a member of the Board of Trustees of the University of Tulsa (2000-2006; 2007-2010), a Senior Energy Advisor of Katzenbach Partners, LLC (consulting, 2006-2007), an Advisory Director of Riverstone Holdings (private investment), a Director of Spinnaker Exploration Company (exploration and production, 2001-2005) and Chairman, President, and CEO of Baker Hughes, Inc. (oilfield services, 2000-2004).

+ The information includes the Trustee's principal occupation during the last five years and other information relating to the experience, attributes, and skills relevant to the Trustee's qualifications to serve as a Trustee, which led to the conclusion that the Trustee should serve as a Trustee for the fund.

Advisory Board Members and Officers:

Correspondence intended for a Member of the Advisory Board (if any) may be sent to Fidelity Investments, P.O. Box 55235, Boston, Massachusetts 02205-5235. Correspondence intended for an officer or Peter S. Lynch may be sent to Fidelity Investments, 245 Summer Street, Boston, Massachusetts 02210. Officers appear below in alphabetical order.

## Trustees and Officers – continued

### Name, Year of Birth; Principal Occupation

Vicki L. Fuller (1957)

Year of Election or Appointment: 2018

Member of the Advisory Board

Ms. Fuller also serves as Member of the Advisory Board of other Fidelity® funds. Ms. Fuller serves as a member of the Board of Directors, Audit Committee, and Nominating and Governance Committee of The Williams Companies, Inc. (natural gas infrastructure, 2018-present). Previously, Ms. Fuller served as the Chief Investment Officer of the New York State Common Retirement Fund (2012-2018) and held a variety of positions at AllianceBernstein L.P. (global asset management, 1985-2012), including Managing Director (2006-2012) and Senior Vice President and Senior Portfolio Manager (2001-2006).

Patricia L. Kampling (1959)

Year of Election or Appointment: 2020

Member of the Advisory Board

Ms. Kampling also serves as Member of the Advisory Board of other Fidelity® funds. Prior to her retirement, Ms. Kampling served as Chairman of the Board and Chief Executive Officer (2012-2019), President and Chief Operating Officer (2011-2012) and Executive Vice President and Chief Financial Officer (2010-2011) of Alliant Energy Corporation. Ms. Kampling currently serves as a member of the Board, Compensation Committee and Executive Committee and as Chair of the Audit Committee of Briggs & Stratton Corporation (manufacturing, 2011-present) and as a member of the Board, Audit, Finance and Risk Committee and Safety, Environmental, Technology and Operations Committee of American Water Works Company, Inc. (utilities company, 2019-present). In addition, Ms. Kampling currently serves as a member of the Board of the Nature Conservancy, Wisconsin Chapter (2019-present). Previously, Ms. Kampling served as a member of the Board of Interstate Power and Light Company (2012-2019) and Wisconsin Power and Light Company (2012-2019) (each a subsidiary of Alliant Energy Corporation) and as a member of the Board and Workforce Development Committee of the Business Roundtable (2018-2019).

Peter S. Lynch (1944)

Year of Election or Appointment: 2003

Member of the Advisory Board

Mr. Lynch also serves as Member of the Advisory Board of other Fidelity® funds. Mr. Lynch is Vice Chairman and a Director of Fidelity Management & Research Company LLC (investment adviser firm). In addition, Mr. Lynch serves as a Trustee of Boston College and as the Chairman of the Inner-City Scholarship Fund. Previously, Mr. Lynch served as Vice Chairman and a Director of FMR Co., Inc. (investment adviser firm) and on the Special Olympics International Board of Directors (1997-2006).

Susan Tomasky (1953)

Year of Election or Appointment: 2020

Member of the Advisory Board

Ms. Tomasky also serves as Member of the Advisory Board of other Fidelity® funds. Prior to her retirement, Ms. Tomasky served in various executive officer positions at American Electric Power Company, Inc. (1998-2011), including most recently as President of AEP Transmission (2007-2011). Ms. Tomasky currently serves as a member of the Board and Sustainability Committee and as Chair of the Audit Committee of Marathon Petroleum Corporation (2018-present) and as a member of the Board, Corporate Governance Committee and Organization and Compensation Committee and as Chair of the Audit Committee of Public Service Enterprise Group, Inc. (utilities company, 2012-present). In addition, Ms. Tomasky currently serves as a member of the Board of the Columbus Regional Airport Authority (2007-present), as a member of the Board of the Royal Shakespeare Company – America (2009-present), as a member of the Board of the Columbus Association for the Performing Arts (2011-present) and as a member of the Board of Kenyon College (2016-present). Previously, Ms. Tomasky served as a member of the Board (2011-2019) and as Lead Independent Director (2015-2018) of Andeavor Corporation (previously Tesoro Corporation) (independent oil refiner and marketer) and as a member of the Board of Summit Midstream Partners LP (energy, 2012-2018).

Elizabeth Paige Baumann (1968)

Year of Election or Appointment: 2017

Anti-Money Laundering (AML) Officer

Ms. Baumann also serves as AML Officer of other funds. She is Chief AML Officer (2012-present) and Senior Vice President (2014-present) of FMR LLC (diversified financial services company) and is an employee of Fidelity Investments. Previously, Ms. Baumann served as AML Officer of the funds (2012-2016), and Vice President (2007-2014) and Deputy Anti-Money Laundering Officer (2007-2012) of FMR LLC.

Craig S. Brown (1977)

Year of Election or Appointment: 2019

Assistant Treasurer

Mr. Brown also serves as Assistant Treasurer of other funds. Mr. Brown is an employee of Fidelity Investments (2013-present).

John J. Burke III (1964)

Year of Election or Appointment: 2018

Chief Financial Officer

Mr. Burke also serves as Chief Financial Officer of other funds. Mr. Burke serves as Head of Investment Operations for Fidelity Fund and Investment Operations (2018-present) and is an employee of Fidelity Investments (1998-present). Previously Mr. Burke served as head of Asset Management Investment Operations (2012-2018).

William C. Coffey (1969)

Year of Election or Appointment: 2019

Assistant Secretary

Mr. Coffey also serves as Assistant Secretary of other funds. He is Senior Vice President and Deputy General Counsel of FMR LLC (diversified financial services company, 2010-present), and is an employee of Fidelity Investments. Previously, Mr. Coffey served as Secretary and CLO of certain funds (2018-2019); CLO, Secretary, and Senior Vice President of Fidelity Management & Research Company and FMR Co., Inc. (investment adviser firms, 2018-2019); Secretary of Fidelity SelectCo, LLC and Fidelity Investments Money Management, Inc. (investment adviser firms, 2018-2019); CLO of Fidelity Management & Research (Hong Kong) Limited, FMR Investment Management (UK) Limited, and Fidelity Management & Research (Japan) Limited (investment adviser firms, 2018-2019); and Assistant Secretary of certain funds (2009-2018).

Timothy M. Cohen (1969)

Year of Election or Appointment: 2018

Vice President

Mr. Cohen also serves as Vice President of other funds. Mr. Cohen serves as Co-Head of Equity (2018-present), a Director of Fidelity Management & Research (Japan) Limited (investment adviser firm, 2016-present), and is an employee of Fidelity Investments. Previously, Mr. Cohen served as Executive Vice President of Fidelity SelectCo, LLC (2019), Head of Global Equity Research (2016-2018), Chief Investment Officer — Equity and a Director of Fidelity Management & Research (U.K.) Inc. (investment adviser firm, 2013-2015) and as a Director of Fidelity Management & Research (Hong Kong) Limited (investment adviser firm, 2017).

Jonathan Davis (1968)

Year of Election or Appointment: 2010

Assistant Treasurer

Mr. Davis also serves as Assistant Treasurer of other funds. Mr. Davis serves as Assistant Treasurer of FMR Capital, Inc. (2017-present) and is an employee of Fidelity Investments. Previously, Mr. Davis served as Vice President and Associate General Counsel of FMR LLC (diversified financial services company, 2003-2010).

Laura M. Del Prato (1964)

Year of Election or Appointment: 2018

Assistant Treasurer

Ms. Del Prato also serves as an officer of other funds. Ms. Del Prato is an employee of Fidelity Investments (2017-present). Prior to joining Fidelity Investments, Ms. Del Prato served as a Managing Director and Treasurer of the JPMorgan Mutual Funds (2014-2017). Prior to JPMorgan, Ms. Del Prato served as a partner at Cohen Fund Audit Services (accounting firm, 2012-2013) and KPMG LLP (accounting firm, 2004-2012).

Colm A. Hogan (1973)

Year of Election or Appointment: 2020

Assistant Treasurer

Mr. Hogan also serves as an officer of other funds. Mr. Hogan serves as Assistant Treasurer of FMR Capital, Inc. (2017-present) and is an employee of Fidelity Investments (2005-present). Previously, Mr. Hogan served as Deputy Treasurer of certain Fidelity® funds (2016-2020) and Assistant Treasurer of certain Fidelity® funds (2016-2018).

Pamela R. Holding (1964)

Year of Election or Appointment: 2018

Vice President

Ms. Holding also serves as Vice President of other funds. Ms. Holding serves as Co-Head of Equity (2018-present) and is an employee of Fidelity Investments (2013-present). Previously, Ms. Holding served as Executive Vice President of Fidelity SelectCo, LLC (2019) and as Chief Investment Officer of Fidelity Institutional Asset Management (2013-2018).

Cynthia Lo Bessette (1969)

Year of Election or Appointment: 2019

Secretary and Chief Legal Officer (CLO)

Ms. Lo Bessette also serves as an officer of other funds. Ms. Lo Bessette serves as CLO, Secretary, and Senior Vice President of Fidelity Management & Research Company LLC (investment adviser firm, 2019-present); and CLO of Fidelity Management & Research (Hong Kong) Limited, FMR Investment Management (UK) Limited, and Fidelity Management & Research (Japan) Limited (investment adviser firms, 2019-present). She is a Senior Vice President and Deputy General Counsel of FMR LLC (diversified financial services company, 2019-present), and is an employee of Fidelity Investments. Previously, Ms. Lo Bessette served as CLO, Secretary, and Senior Vice President of FMR Co., Inc. (investment adviser firm, 2019); Secretary of Fidelity SelectCo, LLC and Fidelity Investments Money Management, Inc. (investment adviser firms, 2019). Prior to joining Fidelity Investments, Ms. Lo Bessette was Executive Vice President, General Counsel (2016-2019) and Senior Vice President, Deputy General Counsel (2015-2016) of OppenheimerFunds (investment management company) and Deputy Chief Legal Officer (2013-2015) of Jennison Associates LLC (investment adviser firm).

## Trustees and Officers – continued

Chris Maher (1972)

Year of Election or Appointment: 2020

Deputy Treasurer

Mr. Maher also serves as an officer of other funds. Mr. Maher serves as Assistant Treasurer of FMR Capital, Inc. (2017-present), and is an employee of Fidelity Investments (2008-present). Previously, Mr. Maher served as Assistant Treasurer of certain funds (2013-2020); Vice President of Asset Management Compliance (2013), Vice President of the Program Management Group of FMR (investment adviser firm, 2010-2013), and Vice President of Valuation Oversight (2008-2010).

Kenneth B. Robins (1969)

Year of Election or Appointment: 2016

Chief Compliance Officer

Mr. Robins also serves as an officer of other funds. Mr. Robins serves as Compliance Officer of Fidelity Management & Research Company LLC (investment adviser firm, 2016-present) and is an employee of Fidelity Investments (2004-present). Previously, Mr. Robins served as Compliance Officer of FMR Co., Inc. (investment adviser firm, 2016-2019), as Executive Vice President of Fidelity Investments Money Management, Inc. (investment adviser firm, 2013-2016) and served in other fund officer roles.

Stacie M. Smith (1974)

Year of Election or Appointment: 2016

President and Treasurer

Ms. Smith also serves as an officer of other funds. Ms. Smith serves as Assistant Treasurer of FMR Capital, Inc. (2017-present), is an employee of Fidelity Investments (2009-present), and has served in other fund officer roles. Prior to joining Fidelity Investments, Ms. Smith served as Senior Audit Manager of Ernst & Young LLP (accounting firm, 1996-2009). Previously, Ms. Smith served as Assistant Treasurer (2013-2019) and Deputy Treasurer (2013-2016) of certain Fidelity® funds.

Marc L. Spector (1972)

Year of Election or Appointment: 2016

Assistant Treasurer

Mr. Spector also serves as an officer of other funds. Mr. Spector serves as Assistant Treasurer of FMR Capital, Inc. (2017-present) and is an employee of Fidelity Investments (2016-present). Prior to joining Fidelity Investments, Mr. Spector served as Director at the Siegfried Group (accounting firm, 2013-2016), and prior to Siegfried Group as audit senior manager at Deloitte & Touche (accounting firm, 2005-2013).

Jim Wegmann (1979)

Year of Election or Appointment: 2019

Assistant Treasurer

Mr. Wegmann also serves as Assistant Treasurer of other funds. Mr. Wegmann is an employee of Fidelity Investments (2011-present).

# Shareholder Expense Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs and (2) ongoing costs, including management fees, distribution and/or service (12b-1) fees and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period (July 1, 2019 to December 31, 2019).

## Actual Expenses

The first line of the accompanying table for each class of the Fund provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000.00 (for example, an \$8,600 account value divided by \$1,000.00 = 8.6), then multiply the result by the number in the first line for a class of the Fund under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period. The estimate of expenses does not include any fees or other expenses of any variable annuity or variable life insurance product. If they were, the estimate of expenses you paid during the period would be higher, and your ending account value would be lower. In addition, the Fund, as a shareholder in the underlying Fidelity Central Funds, will indirectly bear its pro-rata share of the fees and expenses incurred by the underlying Fidelity Central Funds. These fees and expenses are not included in the Fund's annualized expense ratio used to calculate the expense estimate in the table below.

## Hypothetical Example for Comparison Purposes

The second line of the accompanying table for each class of the Fund provides information about hypothetical account values and hypothetical expenses based on a Class' actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Class' actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds. The estimate of expenses does not include any fees or other expenses of any variable annuity or variable life insurance product. If they were, the estimate of expenses you paid during the period would be higher, and your ending account value would be lower. In addition, the Fund, as a shareholder in the underlying Fidelity Central Funds, will indirectly bear its pro-rata share of the fees and expenses incurred by the underlying Fidelity Central Funds. These fees and expenses are not included in the Fund's annualized expense ratio used to calculate the expense estimate in the table below.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transaction costs. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds.

	Annualized Expense Ratio- <sup>A</sup>	Beginning Account Value July 1, 2019	Ending Account Value December 31, 2019	Expenses Paid During Period- <sup>B</sup> July 1, 2019 to December 31, 2019
Initial Class	.61%			
Actual		\$1,000.00	\$1,093.90	\$3.22
Hypothetical- <sup>C</sup>		\$1,000.00	\$1,022.13	\$3.11
Service Class	.71%			
Actual		\$1,000.00	\$1,093.20	\$3.75
Hypothetical- <sup>C</sup>		\$1,000.00	\$1,021.63	\$3.62
Service Class 2	.86%			
Actual		\$1,000.00	\$1,092.60	\$4.54
Hypothetical- <sup>C</sup>		\$1,000.00	\$1,020.87	\$4.38
Investor Class	.69%			
Actual		\$1,000.00	\$1,093.60	\$3.64
Hypothetical- <sup>C</sup>		\$1,000.00	\$1,021.73	\$3.52

<sup>A</sup> Annualized expense ratio reflects expenses net of applicable fee waivers.

<sup>B</sup> Expenses are equal to each Class' annualized expense ratio, multiplied by the average account value over the period, multiplied by 184/365 (to reflect the one-half year period).

<sup>C</sup> 5% return per year before expenses

## Distributions (Unaudited)

The Board of Trustees of VIP Contrafund Portfolio voted to pay to shareholders of record at the opening of business on record date, the following distributions per share derived from capital gains realized from sales of portfolio securities, and dividends derived from net investment income:

	Pay Date	Record Date	Dividends	Capital Gains
<b>VIP Contrafund Portfolio</b>				
Initial Class	02/07/20	02/07/20	\$0.044	\$0.183
Service Class	02/07/20	02/07/20	\$0.038	\$0.183
Service Class 2	02/07/20	02/07/20	\$0.030	\$0.183
Investor Class	02/07/20	02/07/20	\$0.040	\$0.183

The fund hereby designates as a capital gain dividend with respect to the taxable year ended December 31, 2019, \$ 90,144,811, or, if subsequently determined to be different, the net capital gain of such year.

Initial Class, Service Class, Service Class 2 and Investor Class designate 100% of the dividends distributed during the fiscal year as qualifying for the dividends—received deduction for corporate shareholders.

# Board Approval of Investment Advisory Contracts

## VIP Contrafund Portfolio

At its November 2019 meeting, the Board of Trustees, including the Independent Trustees (together, the Board), voted to approve an amended and restated management contract and amended and restated sub-advisory agreements (together, the Amended and Restated Contracts) for the fund, effective January 1, 2020, for a one month period through January 31, 2020, in connection with an upcoming consolidation of certain of Fidelity's advisory businesses.

The Board considered that, on or about January 1, 2020, each of FMR Co., Inc. (FMRC), Fidelity Investments Money Management, Inc. (FIMM), and SelectCo, LLC (SelectCo) will merge with and into Fidelity Management & Research Company (FMR) and that, after the merger, FMR will redomicile as a Delaware limited liability company. The Board also approved the termination of the sub-advisory agreement with FMRC upon the completion of the merger. The Board noted that the Amended and Restated Contracts would be updated to reflect the renamed adviser, Fidelity Management & Research Company LLC and its new form of organization and domicile. The Board also noted that the Amended and Restated Contracts will not change the investment processes, the level or nature of services provided, the resources and personnel allocated, trading and compliance operations, or any fees or expenses paid by the fund.

The Board concluded that the fund's Amended and Restated Contracts are fair and reasonable, and that the fund's Advisory Contracts should be approved through January 31, 2020.

In connection with its consideration of future renewals of the fund's Amended and Restated Contracts, the Board will consider: (i) the nature, extent and quality of services provided to the fund, including shareholder and administrative services and investment performance; (ii) the competitiveness of the management fee and total expenses for the fund; (iii) the costs of the services and profitability, including the revenues earned and the expenses incurred in conducting the business of developing, marketing, distributing, managing, administering, and servicing the fund and its shareholders, to the extent applicable; and (iv) whether there have been economies of scale in respect of the Fidelity funds, whether the Fidelity funds (including the fund) have appropriately benefited from any such economies of scale, and whether there is the potential for realization of any further economies.

Based on its evaluation of all of the conclusions noted above, and after considering all factors it believed relevant, the Board ultimately concluded that the fund's management fee structure is fair and reasonable, and that the continuation of the fund's Amended and Restated Contracts should be approved.

Annual Report

December 31, 2019

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, you may no longer receive paper copies of the Fund's annual and semi-annual shareholder reports by mail from the insurance company that issued your variable annuity and variable life insurance contract or from the financial intermediary that administers your qualified pension or retirement plan, unless you specifically request paper copies of the reports from your insurance company or financial intermediary. Instead, the reports will be made available on the Fund's website [www.nb.com/AMTliterature](http://www.nb.com/AMTliterature), and may also be available on a website from the insurance company or financial intermediary that offers your contract or administers your retirement plan, and such insurance company or financial intermediary will notify you by mail each time a report is posted and provide you with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may elect to receive shareholder reports and other communications from the insurance company or financial intermediary electronically by following the instructions provided by the insurance company or financial intermediary. If offered by your insurance company or financial intermediary, you may elect to receive all future reports in paper and free of charge from the insurance company or financial intermediary. You can contact your insurance company or financial intermediary if you wish to continue receiving paper copies of your shareholder reports. Your election to receive reports in paper will apply to all funds available under your contract or retirement plan.

---

# Sustainable Equity Portfolio Commentary (Unaudited)

The Neuberger Berman Advisers Management Trust Sustainable Equity Portfolio Class I generated a total return of 25.88% for the 12 months ended December 31, 2019, trailing the 31.49% total return of its benchmark, the S&P 500® Index (the Index), for the same period. (Performance for all share classes is provided in the table immediately following this letter.)

The Index returns outpaced earnings growth this year as valuation multiples continued to expand within a backdrop of steady, albeit slow, economic growth, less slack in the economy, low inflation, a de-escalation in trade tensions, and supportive monetary policy.

The Information Technology (IT) sector was the biggest driver of Index returns. Growth-focused investors created a narrow market, where the value-versus-growth dispersion continued, and stocks with high revenue growth surged past those of more established businesses. Although this backdrop was a headwind given our valuation-sensitive discipline, the market's volatility allowed us to opportunistically add high quality names at valuations we consider attractive.

By sector, Financials and Utilities contributed most to the Fund's relative returns versus the Index. Danaher and Aptiv were our top individual contributors. Danaher announced plans to acquire GE's healthcare assets, further positioning the diversified life sciences company for strong organic growth in the fast growing biopharma business. Aptiv outperformed as the company continued to capture the secular growth in autonomous technology, electrification and enhanced safety of automobiles.

IT and Consumer Staples sectors were our largest areas of underperformance. EQT Corp. and Premier Inc. were our largest absolute detractors. EQT, a natural gas exploration and delivery company, underperformed around concerns related to oversupply in U.S. natural gas. We sold Premier believing uncertainty in the healthcare regulatory backdrop could undermine the company's future growth potential.

In addition to Premier, sales included Cimarex Energy, Schlumberger, Equitrans Midstream Corp., eBay, ManpowerGroup and 3M. Purchases included National Grid, an investor-owned utility facilitating de-carbonization of the grid. The company is investing in safety, reliability and modernization, including the ability to help deliver smart grid technology, renewable energy connections and electric vehicle charging infrastructure. Volatility allowed our entry at a discounted price-to-earnings ratio relative to the overall market and sector. Other new holdings include Stanley Black & Decker, Vestas Wind Systems, United Rentals, Microsoft, CSX, Arista Networks and Zebra Technologies.

Despite current healthy economic fundamentals, we anticipate the slow growth environment to continue, with U.S. GDP in the 2% range. However, we believe a tight labor market and the U.S. Federal Reserve Board's need to monetize growing fiscal deficits could result in inflation. While currently subdued, we are mindful of the potential impact of inflation across our portfolio.

Globally, geopolitical issues—including the Chinese economic slowdown, Hong Kong unrest, Brexit, and any re-escalation of global trade conflicts—could fuel market volatility and weigh on global economic growth.

We continue to focus on owning best-in-class businesses exposed to secular growth trends (energy efficiency, health and nutrition, accelerating innovation, etc.) that we believe will enable them to grow and increase market share even within a slower growth backdrop.

We believe the fundamentals of the businesses the Fund owns can translate such top-line growth into stronger, advantaged bottom-line growth, supported by competitive advantages, attractive return on capital profiles and demonstrated leadership in environmental, social and governance (ESG) practices—in fact, 63% of the companies in our portfolio by weight this year ranked as either Trendsetters or First Tier by the CPA-Zicklin Index\*. We believe our portfolio holdings also have the balance sheet strength and free cash flow generation that could enable them to weather global economic turmoil, should it occur.

---

We look forward to continuing to serve your investment needs.

Sincerely,

INGRID S. DYOTT AND SAJJAD S. LADIWALA  
CO-PORTFOLIO MANAGERS

**\* The CPA-Zicklin Index benchmarks the political disclosure and accountability policies and practices for election-related spending of leading U.S. public companies. Issued annually, it is produced by the Center for Political Accountability in conjunction with the Zicklin Center for Business Ethics Research at The Wharton School at the University of Pennsylvania. Companies receiving a score of 90% or higher for political disclosure and accountability received the "Trendsetter" designation, while companies that scored between 80-100% were ranked in the "First Tier."**

## SECTOR ALLOCATION

(as a % of Total Investments\*)

Communication Services	7.1%
Consumer Discretionary	10.6
Consumer Staples	5.1
Energy	2.3
Financials	13.5
Health Care	18.7
Industrials	15.3
Information Technology	18.0
Materials	4.7
Real Estate	1.6
Utilities	1.6
Short-Term Investments	1.5
Total	100.0%

\* Derivatives, if any, are excluded from this chart.

## PERFORMANCE HIGHLIGHTS

	Inception Date	Average Annual Total Return Ended 12/31/2019			
		1 Year	5 Years	10 Years	Life of Fund
Class I	02/18/1999	25.88%	8.98%	11.92%	7.54%
Class S <sup>2</sup>	05/01/2006	25.58%	8.74%	11.72%	7.42%
S&P 500 <sup>®</sup> Index <sup>1,3</sup>		31.49%	11.70%	13.56%	6.78%

The performance data quoted represent past performance and do not indicate future results. Current performance may be lower or higher than the performance data quoted. For current performance data, please visit <http://www.nb.com/amtportfolios/performance>.

The results shown in the table reflect the reinvestment of income dividends and other distributions, if any. The results do not reflect the effect of taxes a shareholder would pay on Fund distributions or on the redemption of Fund shares. The results do not reflect fees and expenses of the variable annuity and variable life insurance policies or the qualified pension and retirement plans whose proceeds are invested in the Fund.

The investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost.

Returns would have been lower if Neuberger Berman Investment Advisers LLC ("Management") had not reimbursed certain expenses and/or waived a portion of the investment management fees during certain of the periods shown. Repayment by a class (of expenses previously reimbursed and/or fees previously waived by Management) will decrease the class's returns. Please see Note B in the Notes to Financial Statements for specific information regarding expense reimbursement and/or fee waiver arrangements.

As stated in the Fund's most recent prospectus, the total annual operating expense ratios for fiscal year 2018 were 0.95% and 1.20% for Class I and Class S shares, respectively (before expense reimbursements and/or fee waivers, if any). The expense ratio was 1.18% for Class S shares after expense reimbursements and/or fee waivers. The expense ratios for the annual period ended December 31, 2019 can be found in the Financial Highlights section of this report.

## COMPARISON OF A \$10,000 INVESTMENT

This graph shows the change in value of a hypothetical \$10,000 investment in the Fund over the past 10 fiscal years, or since the Fund's inception, if it has not operated for 10 years. The graph is based on Class I shares only; the performance of the Fund's share classes will differ primarily due to different class expenses (see Performance Highlights chart above). The result is compared with benchmarks, which include a broad-based market index and may include a more narrowly based index. Market indices have not been reduced to reflect any of the fees and costs of investing. The results shown in the graph reflect the reinvestment of income dividends and other distributions, if any. The results do not reflect the effect of taxes a shareholder would pay on Fund distributions or on the redemption of Fund shares. The results do not reflect fees and expenses of the variable annuity and variable life insurance policies or the qualified pension and retirement plans whose proceeds are invested in the Fund. Results represent past performance and do not indicate future results.

Please see Endnotes for additional information.

---

## Endnotes

- 1 The date used to calculate Life of Fund performance for the index is February 18, 1999, the inception date of Class I shares, the Fund's oldest share class.
- 2 Performance shown prior to May 1, 2006 for Class S shares is that of Class I shares, which has lower expenses and correspondingly higher returns than Class S shares.
- 3 The S&P 500® Index is a float-adjusted market capitalization-weighted index that focuses on the large-cap segment of the U.S. equity market, and includes a significant portion of the total value of the market. Please note that the index described in this report does not take into account any fees, expenses or tax consequences of investing in the individual securities that it tracks, and that individuals cannot invest directly in any index. Data about the performance of an index are prepared or obtained by Neuberger Berman Investment Advisers LLC ("Management") and reflect the reinvestment of income dividends and other distributions, if any. The Fund may invest in securities not included in a described index and generally does not invest in all securities included in a described index.

The investments for the Fund are managed by the same portfolio manager(s) who manage(s) one or more other registered funds that have names, investment objectives and investment styles that are similar to those of the Fund. You should be aware that the Fund is likely to differ from those other mutual fund(s) in size, cash flow pattern and tax matters. Accordingly, the holdings and performance of the Fund can be expected to vary from those of the other mutual fund(s).

Shares of the separate Neuberger Berman Advisers Management Trust Portfolios, including the Fund, are not available to the general public. Shares of the Fund may be purchased only by life insurance companies to be held in their separate accounts, which fund variable annuity and variable life insurance policies, and by qualified pension and retirement plans.

Statistics and projections in this report are derived from sources deemed to be reliable but cannot be regarded as a representation of future results of the Fund. This report is prepared for the general information of shareholders and is not an offer of shares of the Fund. Shares are sold only through the currently effective prospectus, which must precede or accompany this report.

The "Neuberger Berman" name and logo and "Neuberger Berman Investment Advisers LLC" name are registered service marks of Neuberger Berman Group LLC. The individual Fund name in this piece is either a service mark or registered service mark of Neuberger Berman Investment Advisers LLC, an affiliate of Neuberger Berman BD LLC, distributor, member FINRA.

## Information About Your Fund's Expenses (Unaudited)

As a Fund shareholder, you incur two types of costs: (1) transaction costs such as fees and expenses that are, or may be, imposed under your variable contract or qualified pension plan; and (2) ongoing costs, including management fees, distribution and/or service (12b-1) fees (if applicable), and other Fund expenses. This example is intended to help you understand your ongoing costs (in U.S. dollars) of investing in the Fund and compare these costs with the ongoing costs of investing in other mutual funds.

This table is designed to provide information regarding costs related to your investments. The following examples are based on an investment of \$1,000 made at the beginning of the six month period ended December 31, 2019 and held for the entire period. The table illustrates the Fund's costs in two ways:

**Actual Expenses and Performance:** The first section of the table provides information about actual account values and actual expenses in dollars, based on the Fund's actual performance during the period indicated. You may use the information in this line, together with the amount you invested, to estimate the expenses you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first section of the table under the heading entitled "Expenses Paid During the Period" to estimate the expenses you paid over the period.

**Hypothetical Example for Comparison Purposes:** The second section of the table provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return at 5% per year before expenses. This return is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in this Fund versus other funds. To do so, compare the expenses shown in this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses in the table are meant to highlight your ongoing costs only and do not include any transaction costs, such as fees and expenses that are, or may be imposed under your variable contract or qualified pension plan. Therefore, the information under the heading "Hypothetical (5% annual return before expenses)" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transaction costs were included, your costs would have been higher.

## Expense Example (Unaudited)

### NEUBERGER BERMAN ADVISERS MANAGEMENT TRUST SUSTAINABLE EQUITY PORTFOLIO

	Beginning Account Value	Ending Account Value	Expenses Paid During the Period	Expense Ratio
Actual	7/1/19	12/31/19	7/1/19 – 12/31/19	
Class I	\$1,000.00	\$1,106.30	\$4.88 <sup>(a)</sup>	0.92%
Class S	\$1,000.00	\$1,104.50	\$6.21 <sup>(a)</sup>	1.17%
<b>Hypothetical (5% annual return before expenses)</b>				
Class I	\$1,000.00	\$1,020.57	\$4.69 <sup>(b)</sup>	0.92%
Class S	\$1,000.00	\$1,019.31	\$5.96 <sup>(b)</sup>	1.17%

(a) For each class, expenses are equal to the annualized expense ratio for the class, multiplied by the average account value over the period, multiplied by 184/365 (to reflect the one-half year period shown).

(b) Hypothetical expenses are equal to the annualized expense ratios for each class, multiplied by the average account value over the period (assuming a 5% annual return), multiplied by 184/365 (to reflect the one-half year period shown).

# Notes to Financial Statements Sustainable Equity Portfolio

## Note A—Summary of Significant Accounting Policies:

- 1 **General:** Neuberger Berman Advisers Management Trust (the “Trust”) is a Delaware statutory trust organized pursuant to an Amended and Restated Trust Instrument dated March 27, 2014. The Trust is currently comprised of six separate operating series (each individually a “Fund,” and collectively the “Funds”) each of which is diversified. The Trust is registered as an open-end management investment company under the Investment Company Act of 1940, as amended (the “1940 Act”), and its shares are registered under the Securities Act of 1933, as amended. Neuberger Berman Advisers Management Trust Sustainable Equity Portfolio (the “Fund”) currently offers Class I and Class S shares. The Trust’s Board of Trustees (the “Board”) may establish additional series or classes of shares without the approval of shareholders.

A balance indicated with a “—”, reflects either a zero balance or a balance that rounds to less than 1.

The assets of each Fund belong only to that Fund, and the liabilities of each Fund are borne solely by that Fund and no other.

The Fund is an investment company and accordingly follows the investment company accounting and reporting guidance of the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 946 “Financial Services—Investment Companies.”

The preparation of financial statements in accordance with U.S. generally accepted accounting principles (“GAAP”) requires Neuberger Berman Investment Advisers LLC (“Management” or “NBIA”) to make estimates and assumptions at the date of the financial statements. Actual results could differ from those estimates.

Shares of the Fund are not available to the general public and may be purchased only by life insurance companies to serve as an investment vehicle for premiums paid under their variable annuity and variable life insurance contracts and to certain qualified pension and other retirement plans.

- 2 **Portfolio valuation:** In accordance with ASC 820 “Fair Value Measurement” (“ASC 820”), all investments held by the Fund are carried at the value that Management believes the Fund would receive upon selling an investment in an orderly transaction to an independent buyer in the principal or most advantageous market for the investment under current market conditions. Various inputs, including the volume and level of activity for the asset or liability in the market, are considered in valuing the Fund’s investments, some of which are discussed below. Significant Management judgment may be necessary to value investments in accordance with ASC 820.

ASC 820 established a three-tier hierarchy of inputs to create a classification of value measurements for disclosure purposes. The three-tier hierarchy of inputs is summarized in the three broad Levels listed below.

- Level 1—quoted prices in active markets for identical investments
- Level 2—other observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, amortized cost, etc.)
- Level 3—unobservable inputs (including the Fund’s own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing an investment are not necessarily an indication of the risk associated with investing in those securities.

The value of the Fund’s investments in equity securities, for which market quotations are readily available, is generally determined by Management by obtaining valuations from independent pricing services based on the latest sale price quoted on a principal exchange or market for that security (Level 1 inputs). Securities traded primarily on the NASDAQ Stock Market are normally valued at the NASDAQ Official Closing Price (“NOCP”) provided by NASDAQ each business day. The NOCP is the most recently reported price as of 4:00:02 p.m., Eastern

---

Time, unless that price is outside the range of the “inside” bid and asked prices (i.e., the bid and asked prices that dealers quote to each other when trading for their own accounts); in that case, NASDAQ will adjust the price to equal the inside bid or asked price, whichever is closer. Because of delays in reporting trades, the NOCP may not be based on the price of the last trade to occur before the market closes. If there is no sale of a security on a particular day, the independent pricing services may value the security based on market quotations.

Management has developed a process to periodically review information provided by independent pricing services for all types of securities.

Certificates of deposit are valued at amortized cost (Level 2 inputs).

Investments in non-exchange traded investment companies are valued using the respective fund’s daily calculated net asset value (“NAV”) per share (Level 2 inputs).

If a valuation is not available from an independent pricing service, or if Management has reason to believe that the valuation received does not represent the amount the Fund might reasonably expect to receive on a current sale in an orderly transaction, Management seeks to obtain quotations from brokers or dealers (generally considered Level 2 or Level 3 inputs depending on the number of quotes available). If such quotations are not readily available, the security is valued using methods the Board has approved in the good-faith belief that the resulting valuation will reflect the fair value of the security. Numerous factors may be considered when determining the fair value of a security based on Level 2 or Level 3 inputs, including available analyst, media or other reports, securities within the same industry with recent highly correlated performance, trading in futures or American Depositary Receipts and whether the issuer of the security being fair valued has other securities outstanding.

The value of the Fund’s investments in foreign securities is generally determined using the same valuation methods and inputs as other Fund investments, as discussed above. Foreign security prices expressed in local currency values are normally translated from the local currency into U.S. dollars using the exchange rates as of 4:00 p.m., Eastern Time on days the New York Stock Exchange (“NYSE”) is open for business. The Board has approved the use of ICE Data Pricing and Reference Data LLC (“ICE”) to assist in determining the fair value of foreign equity securities when changes in the value of a certain index suggest that the closing prices on the foreign exchanges may no longer represent the amount that the Fund could expect to receive for those securities or on days when foreign markets are closed and U.S. markets are open. In each of these events, ICE will provide adjusted prices for certain foreign equity securities using a statistical analysis of historical correlations of multiple factors (Level 2 inputs). In the absence of precise information about the market values of these foreign securities as of the time as of which the Fund’s share price is calculated, the Board has determined on the basis of available data that prices adjusted or evaluated in this way are likely to be closer to the prices the Fund could realize on a current sale than are the prices of those securities established at the close of the foreign markets in which the securities primarily trade.

Fair value prices are necessarily estimates, and there is no assurance that such a price will be at or close to the price at which the security is next quoted or next trades.

- 3 Foreign currency translations:** The accounting records of the Fund are maintained in U.S. dollars. Foreign currency amounts are normally translated into U.S. dollars using the exchange rate as of 4:00 p.m. Eastern Time, on days the NYSE is open for business, to determine the value of investments, other assets and liabilities. Purchase and sale prices of securities, and income and expenses, are translated into U.S. dollars at the prevailing rate of exchange on the respective dates of such transactions. Net unrealized foreign currency gain/(loss), if any, arises from changes in the value of assets and liabilities, other than investments in securities, as a result of changes in exchange rates and is stated separately in the Statement of Operations.
- 4 Securities transactions and investment income:** Securities transactions are recorded on trade date for financial reporting purposes. Dividend income is recorded on the ex-dividend date or, for certain foreign dividends, as soon as the Fund becomes aware of the dividends. Non-cash dividends included in dividend income, if any, are recorded at the fair market value of the securities received. Interest income, including accretion of discount

(adjusted for original issue discount, where applicable), and amortization of premium, where applicable, is recorded on the accrual basis. Realized gains and losses from securities transactions and foreign currency transactions, if any, are recorded on the basis of identified cost and stated separately in the Statement of Operations. Included in net realized gain/(loss) on investments are proceeds from the settlement of class action litigation(s) in which the Fund participated as a class member. The amount of such proceeds for the year ended December 31, 2019, was \$596.

- 5 Income tax information:** The Fund is treated as a separate entity for U.S. federal income tax purposes. It is the policy of the Fund to continue to qualify for treatment as a regulated investment company (“RIC”) by complying with the requirements of the U.S. Internal Revenue Code applicable to RICs and to distribute substantially all of its net investment income and net realized capital gains to its shareholders. To the extent the Fund distributes substantially all of its net investment income and net realized capital gains to shareholders, no federal income or excise tax provision is required.

The Fund has adopted the provisions of ASC 740 “Income Taxes” (“ASC 740”). ASC 740 sets forth a minimum threshold for financial statement recognition of a tax position taken, or expected to be taken, in a tax return. The Fund recognizes interest and penalties, if any, related to unrecognized tax positions as an income tax expense in the Statement of Operations. The Fund is subject to examination by U.S. federal and state tax authorities for returns filed for the tax years for which the applicable statutes of limitations have not yet expired. As of December 31, 2019, the Fund did not have any unrecognized tax positions.

At December 31, 2019, the cost for all long security positions for U.S. federal income tax purposes was \$440,307,172. Gross unrealized appreciation of long security positions and derivative instruments, if any, was \$184,681,851 and gross unrealized depreciation of long security positions and derivative instruments, if any, was \$12,509,145 resulting in net unrealized appreciation of \$172,172,706 based on cost for U.S. federal income tax purposes.

Income distributions and capital gain distributions are determined in accordance with income tax regulations, which may differ from GAAP. These differences are primarily due to differing treatments of income and gains on various investment securities held by the Fund, timing differences and differing characterization of distributions made by the Fund. The Fund may also utilize earnings and profits distributed to shareholders on redemption of their shares as a part of the dividends-paid deduction for income tax purposes.

Any permanent differences resulting from different book and tax treatment are reclassified at year-end and have no impact on net income, NAV or NAV per share of the Fund. For the year ended December 31, 2019, the Fund recorded the following permanent reclassifications primarily related to book to tax differences transferred to a surviving fund due to a reorganization. For the year ended December 31, 2019, the Fund recorded the following permanent reclassifications:

<b>Paid-in Capital</b>	<b>Total Distributable Earnings/(Losses)</b>
\$137,842	\$(137,842)

The tax character of distributions paid during the years ended December 31, 2019, and December 31, 2018, was as follows:

		<b>Distributions Paid From:</b>			
<b>Ordinary Income</b>		<b>Long-Term Capital Gain</b>		<b>Total</b>	
<b>2019</b>	<b>2018</b>	<b>2019</b>	<b>2018</b>	<b>2019</b>	<b>2018</b>
\$2,241,408	\$4,303,645	\$31,793,233	\$22,166,095	\$34,034,641	\$26,469,740

As of December 31, 2019, the components of distributable earnings (accumulated losses) on a U.S. federal income tax basis were as follows:

Undistributed Ordinary Income	Undistributed Long-Term Capital Gain	Unrealized Appreciation/ (Depreciation)	Loss Carryforwards and Deferrals	Other Temporary Differences	Total
\$3,284,616	\$24,327,166	\$172,179,778	\$—	\$—	\$199,791,560

The temporary differences between book basis and tax basis distributable earnings are primarily due to: losses disallowed and recognized on wash sales and tax adjustments related to other investments.

- 6 Distributions to shareholders:** The Fund may earn income, net of expenses, daily on its investments. Distributions from net investment income and net realized capital gains, if any, are generally distributed once a year (usually in October) and are recorded on the ex-date.

It is the policy of the Fund to pass through to its shareholders substantially all real estate investment trust (“REIT”) distributions and other income it receives, less operating expenses. The distributions the Fund receives from REITs are generally composed of income, capital gains, and/or return of REIT capital, but the REITs do not report this information to the Fund until the following calendar year. At December 31, 2019, the Fund estimated these amounts for the period January 1, 2019 to December 31, 2019 within the financial statements because the 2019 information is not available from the REITs until after the Fund’s fiscal year-end. All estimates are based upon REIT information sources available to the Fund together with actual IRS Forms 1099-DIV received to date. For the year ended December 31, 2019, the character of distributions, if any, paid to shareholders of the Fund disclosed within the Statements of Changes in Net Assets is based on estimates made at that time. Based on past experience it is possible that a portion of the Fund’s distributions during the current fiscal year, if any, will be considered tax return of capital, but the actual amount of the tax return of capital, if any, is not determinable until after the Fund’s fiscal year-end. After calendar year-end, when the Fund learns the nature of the distributions paid by REITs during that year, distributions previously identified as income are often re-characterized as return of capital and/or capital gain. After all applicable REITs have informed the Fund of the actual breakdown of distributions paid to the Fund during its fiscal year, estimates previously recorded are adjusted on the books of the Fund to reflect actual results. As a result, the composition of the Fund’s distributions as reported herein may differ from the final composition determined after calendar year-end and reported to Fund shareholders on IRS Form 1099-DIV.

- 7 Foreign taxes:** Foreign taxes withheld, if any, represent amounts withheld by foreign tax authorities, net of refunds recoverable.
- 8 Expense allocation:** Certain expenses are applicable to multiple funds within the complex of related investment companies. Expenses directly attributable to a fund are charged to that fund. Expenses of the Trust that are not directly attributable to a particular series of the Trust (e.g., the Fund) are allocated among the series of the Trust, on the basis of relative net assets, except where a more appropriate allocation of expenses to each of the series can otherwise be made fairly. Expenses borne by the complex of related investment companies, which includes open-end and closed-end investment companies for which NBIA serves as investment manager, that are not directly attributable to a particular investment company in the complex (e.g., the Trust) or series thereof are allocated among the investment companies in the complex or series thereof on the basis of relative net assets, except where a more appropriate allocation of expenses to each of the investment companies in the complex or series thereof can otherwise be made fairly. The Fund’s expenses (other than those specific to each class) are allocated proportionally each day among its classes based upon the relative net assets of each class.
- 9 Investments in foreign securities:** Investing in foreign securities may involve sovereign and other risks, in addition to the credit and market risks normally associated with domestic securities. These additional risks include the possibility of adverse political and economic developments (including political instability, nationalization, expropriation, or confiscatory taxation) and the potentially adverse effects of unavailability of public information regarding issuers, less governmental supervision and regulation of financial markets, reduced liquidity of certain

---

financial markets, and the lack of uniform accounting, auditing, and financial reporting standards or the application of standards that are different or less stringent than those applied in the United States. Foreign securities also may experience greater price volatility, higher rates of inflation, and delays in settlement.

- 10 Investment company securities and exchange-traded funds:** The Fund may invest in shares of other registered investment companies, including exchange-traded funds (“ETFs”), within the limitations prescribed by (a) the 1940 Act, (b) the exemptive order from the Securities and Exchange Commission (“SEC”) that permits the Fund to invest in both affiliated and unaffiliated investment companies, including ETFs, in excess of the limits in Section 12(d)(1)(A) of the 1940 Act, subject to the terms and conditions of such order, or (c) the ETF’s exemptive order or other relief. Some ETFs seek to track the performance of a particular market index. These indices include both broad-based market indices and more narrowly-based indices, including those relating to particular sectors, markets, regions or industries. However, some ETFs have an actively-managed investment objective. ETF shares are traded like traditional equity securities on a national securities exchange or NASDAQ. The Fund will indirectly bear its proportionate share of any management fees and other expenses paid by such other investment companies, which will decrease returns.
- 11 Securities lending:** The Fund, using State Street Bank and Trust Company (“State Street”) as its lending agent, may loan securities to qualified brokers and dealers in exchange for negotiated lender’s fees. These fees, if any, would be disclosed within the Statement of Operations under the caption “Income from securities loaned-net” and are net of expenses retained by State Street as compensation for its services as lending agent.

The initial cash collateral received by the Fund at the beginning of each transaction shall have a value equal to at least 102% of the prior day’s market value of the loaned securities (105% in the case of international securities). Thereafter, the value of the cash collateral is monitored on a daily basis, and cash collateral is moved daily between a counterparty and the Fund until the close of the transaction. The Fund may only receive collateral in the form of cash (U.S. dollars). Cash collateral is generally invested in a money market fund registered under the 1940 Act that is managed by an affiliate of State Street. The risks associated with lending portfolio securities include, but are not limited to, possible delays in receiving additional collateral or in the recovery of the loaned securities. Any increase or decrease in the fair value of the securities loaned and any interest earned or dividends paid or owed on those securities during the term of the loan would accrue to the Fund.

As of December 31, 2019, the Fund did not participate in securities lending.

- 12 Indemnifications:** Like many other companies, the Trust’s organizational documents provide that its officers (“Officers”) and trustees (“Trustees”) are indemnified against certain liabilities arising out of the performance of their duties to the Trust. In addition, both in some of its principal service contracts and in the normal course of its business, the Trust enters into contracts that provide indemnifications to other parties for certain types of losses or liabilities. The Trust’s maximum exposure under these arrangements is unknown as this could involve future claims against the Trust.
- 13 Other:** All net investment income and realized and unrealized capital gains and losses of the Fund are allocated, on the basis of relative net assets, pro rata among its respective classes.

## Note B—Investment Management Fees, Administration Fees, Distribution Arrangements, and Other Transactions with Affiliates:

The Fund retains NBIA as its investment manager under a Management Agreement. For such investment management services, the Fund pays NBIA a fee at the annual rate of 0.55% of the first \$250 million of the Fund’s average daily net assets, 0.525% of the next \$250 million, 0.50% of the next \$250 million, 0.475% of the next \$250 million, 0.45% of the next \$500 million, 0.425% of the next \$2.5 billion, and 0.40% of average daily net assets in excess of \$4 billion. Accordingly, for the year ended December 31, 2019, the investment management fee pursuant to the Management Agreement was equivalent to an annual effective rate of 0.53% of the Fund’s average daily net assets.

The Fund retains NBIA as its administrator under an Administration Agreement. Each class pays NBIA an administration fee at the annual rate of 0.30% of its average daily net assets under this agreement. Additionally, NBIA retains State Street as its sub-administrator under a Sub-Administration Agreement. NBIA pays State Street a fee for all services received under the Sub-Administration Agreement.

NBIA has contractually agreed to waive fees and/or reimburse the Fund's Class I and Class S shares so that the total annual operating expenses of those classes do not exceed the expense limitations as detailed in the following table. These undertakings exclude interest, taxes, transaction costs, brokerage commissions, acquired fund fees and expenses, extraordinary expenses, and dividend and interest expenses relating to short sales, if any (commitment fees relating to borrowings are treated as interest for purposes of this exclusion) ("annual operating expenses"); consequently, net expenses may exceed the contractual expense limitations. The Fund has agreed that each of its classes will repay NBIA for fees and expenses waived or reimbursed for that class provided that repayment does not cause that class's annual operating expenses to exceed its contractual expense limitation in place at the time the fees and expenses were waived or reimbursed, or the expense limitation in place at the time the Fund repays NBIA, whichever is lower. Any such repayment must be made within three years after the year in which NBIA incurred the expense.

During the year ended December 31, 2019, there was no repayment to NBIA under these agreements.

At December 31, 2019, the Fund's contingent liabilities to NBIA under the agreements were as follows:

Class	Contractual Expense Limitation <sup>(a)</sup>	Expiration	Expenses Reimbursed in Year Ended December 31,		
			2017	2018	2019
			Subject to Repayment until December 31,		
			2020	2021	2022
Class I	1.30%	12/31/22	\$—	\$—	\$—
Class S	1.17%	12/31/22	15,076	20,826	1,611

- (a) Expense limitation per annum of the respective class's average daily net assets.

Neuberger Berman BD LLC (the "Distributor") is the Fund's "principal underwriter" within the meaning of the 1940 Act. It acts as agent in arranging for the sale of the Fund's Class I shares without sales commission or other compensation and bears all advertising and promotion expenses incurred in the sale of those shares. The Board adopted a non-fee distribution plan for the Fund's Class I shares.

The Board has adopted a distribution and shareholder services plan (the "Plan") for Class S shares pursuant to Rule 12b-1 under the 1940 Act. The Plan provides that, as compensation for administrative and other services related to the sale and distribution of Class S shares, and ongoing services provided to investors in the class, the Distributor receives from Class S a fee at the annual rate of 0.25% of Class S's average daily net assets. The Distributor may pay a portion of the proceeds from the 12b-1 fee to institutions that provide such services, including insurance companies or their affiliates and qualified plan administrators ("intermediaries") for services they provide respecting the Fund to current and prospective variable contract owners and qualified plan participants that invest in the Fund through the intermediaries. Those institutions may use the payments for, among other purposes, compensating employees engaged in sales and/or shareholder servicing. The amount of fees paid by the class during any year may be more or less than the cost of distribution and other services provided to the class. FINRA rules limit the amount of annual distribution fees that may be paid by a mutual fund and impose a ceiling on the cumulative distribution fees paid. The Plan complies with those rules.

## Note C—Securities Transactions:

During the year ended December 31, 2019, there were purchase and sale transactions of long-term securities of \$108,454,406 and \$131,799,460, respectively.

During the year ended December 31, 2019, no brokerage commissions on securities transactions were paid to affiliated brokers.

## Note D—Fund Share Transactions:

Share activity for the years ended December 31, 2019, and December 31, 2018, was as follows:

### For the Year Ended December 31, 2019

	Shares Sold	Shares Issued on Reinvestment of Dividends and Distributions	Shares Issued in Connection With Tax-Free Reorganization (see Note F)	Shares Redeemed	Total
Class I	1,935,571	1,095,787	1,956,524	(1,650,810)	3,337,072
Class S	1,862,001	265,188	4,775	(680,000)	1,451,964

### For the Year Ended December 31, 2018

	Shares Sold	Shares Issued on Reinvestment of Dividends and Distributions	Shares Redeemed	Total
Class I	335,290	891,936	(1,116,631)	110,595
Class S	221,485	177,122	(681,518)	(282,911)

## Note E—Line of Credit:

At December 31, 2019, the Fund was a participant in a syndicated committed, unsecured \$700,000,000 line of credit (the “Credit Facility”), to be used only for temporary or emergency purposes. Series of other investment companies managed by NBIA also participate in this line of credit on substantially the same terms. Interest is charged on borrowings under this Credit Facility at the highest of (a) a federal funds effective rate plus 1.00% per annum, (b) a Eurodollar rate for a one-month period plus 1.00% per annum, and (c) an overnight bank funding rate plus 1.00% per annum. The Credit Facility has an annual commitment fee of 0.15% per annum of the available line of credit, which is paid quarterly. The Fund has agreed to pay its pro rata share of the annual commitment fee, based on the ratio of its individual net assets to the net assets of all participants at the time the fee is due, and interest charged on any borrowing made by the Fund and other costs incurred by the Fund. Because several mutual funds participate in the Credit Facility, there is no assurance that the Fund will have access to all or any part of the \$700,000,000 at any particular time. There were no loans outstanding under the Credit Facility at December 31, 2019. During the year ended December 31, 2019, the Fund did not utilize the Credit Facility.

## Note F—Reorganizations:

At a meeting held on December 13, 2018, the Board of the Trust approved two separate tax-free reorganizations of Neuberger Berman Advisers Management Trust Guardian Portfolio (“Guardian Portfolio”) and Neuberger Berman Advisers Management Trust Large Cap Value Portfolio (“Large Cap Value Portfolio”) (each, a “Merging Portfolio”) into the Fund (the “Surviving Portfolio,” and together with the Merging Portfolios, the “Reorganization Portfolios”). All Reorganization Portfolios are series of the Trust. After the close of business on April 30, 2019, the

Surviving Portfolio acquired all of the net assets of the Merging Portfolios in a tax-free exchange of shares pursuant to the Plan of Reorganization and Dissolution approved by the Board. Accordingly, shareholders of each Merging Portfolio became shareholders of the Surviving Portfolio.

<b>Guardian Portfolio</b>	<b>Shares Prior to Reorganization</b>	<b>Shares Issued by the Surviving Portfolio</b>	<b>Net Assets Prior to Reorganization</b>
<b>Class I</b>	743,986	308,792	\$8,065,623
<b>Class S</b>	11,758	4,775	125,163

<b>Large Cap Value Portfolio</b>	<b>Shares Prior to Reorganization</b>	<b>Shares Issued by the Surviving Portfolio</b>	<b>Net Assets Prior to Reorganization</b>
<b>Class I</b>	3,418,695	1,647,732	\$43,038,633

The appreciation of Guardian Portfolio and Large Cap Value Portfolio were \$2,282,095 and \$389,841, respectively, as of the date of the reorganization. The combined net assets of the Surviving Portfolio immediately after the reorganization were \$594,631,684. For financial reporting purposes, assets received and shares issued by the Surviving Portfolio were recorded at fair value; however, the cost basis of the investments received from the Merging Portfolios were carried forward to align ongoing reporting of the Surviving Portfolio's realized and unrealized gains and losses with amounts distributable to shareholders for tax purposes.

Assuming the reorganization had been completed on January 1, 2019, the beginning of the reporting period of the Surviving Portfolio, the Surviving Portfolio's pro forma results of operations for the year ended December 31, 2019, were as follows:

Net Investment Income/(Loss)	\$3,884,108
Net Realized and Unrealized Gains/(Losses) on Investments and Foreign Currency Transactions	\$127,335,428
Net Increase/(Decrease) in Net Assets resulting from Operations	\$131,219,536

Because the combined investment portfolios have been managed as a single integrated portfolio since the reorganization was completed, it is not practicable to separate the amounts of revenue and earnings of the Merging Portfolios that have been included in the Surviving Portfolio's Statement of Operations as of December 31, 2019.

## Note G—Recent Accounting Pronouncement:

In August 2018, FASB issued Accounting Standards Update No. 2018-13, Fair Value Measurement (Topic 820: "Disclosure Framework—Changes to the Disclosure Requirements for Fair Value Measurement") ("ASU 2018-13"). ASU 2018-13 eliminates the requirement to disclose the amount of and reasons for transfers between Level 1 and Level 2 of the fair value hierarchy, the timing of transfers between levels of the fair value hierarchy and the valuation processes for Level 3 fair value measurements. ASU 2018-13 will require the disclosure of the range and weighted average used to develop significant unobservable inputs for Level 3 fair value measurements and the changes in unrealized gains and losses for recurring Level 3 fair value measurements. ASU 2018-13 will also require that information is provided about the measurement uncertainty of Level 3 fair value measurements as of the reporting date. The guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019, and allows for early adoption of either the entire standard or only the provisions that eliminate or modify the disclosure requirements. Management has elected to adopt early the provisions that eliminate the disclosure requirements. Management is still currently evaluating the impact of applying the rest of the guidance.

# Financial Highlights

## Sustainable Equity Portfolio

The following tables include selected data for a share outstanding throughout each year and other performance information derived from the Financial Statements. Amounts that do not round to \$0.01 or \$(0.01) per share are presented as \$0.00 or \$(0.00), respectively. Ratios that do not round to 0.01% or (0.01)% are presented as 0.00% or (0.00)%, respectively. A “—” indicates that the line item was not applicable in the corresponding period.

# Notes to Financial Highlights Sustainable Equity Portfolio

- @ Calculated based on the average number of shares outstanding during each fiscal period.
- † Total return based on per share NAV reflects the effects of changes in NAV on the performance of the Fund during each fiscal period. Returns assume income dividends and other distributions, if any, were reinvested. Results represent past performance and do not indicate future results. Current returns may be lower or higher than the performance data quoted. Investment returns and principal will fluctuate and shares, when redeemed, may be worth more or less than original cost. Total return would have been lower if Management had not reimbursed and/or waived certain expenses. The total return information shown does not reflect charges and other expenses that apply to the separate accounts or the related insurance policies or other qualified pension or retirement plans, and the inclusion of these charges and other expenses would reduce the total return for all fiscal periods shown.
- ^ The class action proceeds listed in Note A of the Notes to Financial Statements had no impact on the Fund's total return for the year ended December 31, 2019. The class action proceeds received in 2018, 2017 and 2015 had no impact on the Fund's total return for the years ended December 31, 2018, 2017 and 2015, respectively.
- ‡ In May 2016, the Fund's custodian, State Street, announced that it had identified inconsistencies in the way in which the Fund was invoiced for categories of expenses, particularly those deemed "out-of-pocket" costs, from 1998 through November 2015, and refunded to the Fund certain expenses, plus interest, determined to be payable to the Fund for the period in question. These amounts were refunded to the Fund by State Street during the year ended December 31, 2017. These amounts had no impact on the Fund's total return for the year ended December 31, 2017.
- # Represents the annualized ratios of net expenses to average daily net assets if Management had not reimbursed certain expenses and/or waived a portion of the investment management fee and/or if the Fund had not received refunds, plus interest, from State Street noted in ‡ above for custodian out-of-pocket expenses previously paid during the year ended December 31, 2017. Management did not reimburse or waive fees during the fiscal periods shown for Class I.
- β The custodian expenses refund noted in ‡ above is non-recurring and is included in these ratios. Had the Fund not received the refund, the annualized ratio of net expenses to average net assets and the annualized ratio of net investment income/(loss) to average net assets would have been:

	<b>Ratio of Net Expenses to Average Net Assets Year Ended December 31, 2017</b>	<b>Ratio of Net Investment Income/(Loss) to Average Net Assets Year Ended December 31, 2017</b>
<b>Class I</b>	0.94%	0.48%
<b>Class S</b>	1.17%	0.25%

- ñ After the close of business on April 30, 2019, the Fund acquired all of the net assets of Neuberger Berman Advisers Management Trust Guardian Portfolio ("Guardian") and Neuberger Berman Advisers Management Trust Large Cap Value Portfolio ("Large Cap Value") in a tax-free exchange of shares pursuant to a Plan of Reorganization and Dissolution approved by the Board. Portfolio turnover excludes purchases of \$114,219,008 of securities acquired pursuant to the reorganization, and there were no sales made following a purchase-of-assets transaction relative to the reorganization.

Board of Trustees of the Neuberger Berman Advisers Management Trust

## **Opinion on the Financial Statements**

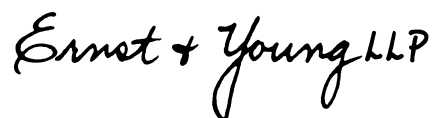

We have audited the accompanying statement of assets and liabilities of Sustainable Equity Portfolio (the “Portfolio”) (one of the portfolios constituting Neuberger Berman Advisers Management Trust (the “Trust”)), including the schedule of investments, as of December 31, 2019, and the related statement of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, the financial highlights for each of the five years in the period then ended and the related notes (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Portfolio (one of the portfolios constituting Neuberger Berman Advisers Management Trust) at December 31, 2019, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended and its financial highlights for each of the five years in the period then ended, in conformity with U.S. generally accepted accounting principles.

## **Basis for Opinion**

These financial statements are the responsibility of the Trust’s management. Our responsibility is to express an opinion on the Portfolio’s financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the Trust in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Trust is not required to have, nor were we engaged to perform, an audit of the Trust’s internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting, but not for the purpose of expressing an opinion on the effectiveness of the Trust’s internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 2019, by correspondence with the custodian and brokers or by other appropriate auditing procedures where replies from others were not received. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

The signature of Ernst & Young LLP is written in a cursive, handwritten style in black ink.

We have served as the auditor of one or more Neuberger Berman investment companies since 1954.

Boston, Massachusetts

## Proxy Voting Policies and Procedures

A description of the policies and procedures that the Trust uses to determine how to vote proxies relating to portfolio securities is available, without charge, by calling 800-877-9700 (toll-free) and on the SEC's website at [www.sec.gov](http://www.sec.gov). Information regarding how the Trust voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is also available upon request, without charge, by calling 800-877-9700 (toll-free), on the SEC's website at [www.sec.gov](http://www.sec.gov), and on Neuberger Berman's website at [www.nb.com](http://www.nb.com).

## Quarterly Portfolio Schedule

The Trust files a complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year as an exhibit to its report on Form N-PORT (Form N-Q for filings prior to March 31, 2019). The Trust's Forms N-Q and N-PORT are available on the SEC's website at [www.sec.gov](http://www.sec.gov). The portfolio holdings information on Form N-Q or Form N-PORT is available upon request, without charge, by calling 800-877-9700 (toll free).

## Board Consideration of the Management Agreement

On an annual basis, the Board of Trustees (the "Board") of Neuberger Berman Advisers Management Trust (the "Trust"), including the Trustees who are not "interested persons" of the Trust or of Neuberger Berman Investment Advisers LLC ("Management") (including its affiliates) ("Independent Fund Trustees"), considers whether to continue the management agreement with Management (the "Agreement") with respect to Sustainable Equity Portfolio (the "Fund"). Throughout the process, the Independent Fund Trustees are advised by counsel that is experienced in Investment Company Act of 1940 matters and that is independent of Management ("Independent Counsel"). At a meeting held on September 12, 2019, the Board, including the Independent Fund Trustees, approved the continuation of the Agreement for the Fund.

In evaluating the Agreement, the Board, including the Independent Fund Trustees, reviewed extensive materials provided by Management in response to questions submitted by the Independent Fund Trustees and Independent Counsel, and met with senior representatives of Management regarding its personnel, operations, and financial condition as they relate to the Fund. The annual contract review extends over at least two regular meetings of the Board to ensure that Management has time to respond to any questions the Independent Fund Trustees may have on their initial review of the materials and that the Independent Fund Trustees have time to consider those responses.

In connection with its deliberations, the Board also considered the broad range of information relevant to the annual contract review that is provided to the Board (including its various standing committees) at meetings throughout the year, including reports on investment performance, portfolio risk, and other portfolio information for the Fund, as well as periodic reports on, among other matters, pricing and valuation; quality and cost of portfolio trade execution; compliance; and shareholder and other services provided by Management and its affiliates. The Contract Review Committee, which is comprised of Independent Fund Trustees, was established by the Board to assist in its deliberations regarding the annual contract review. The Board has also established other committees that focus throughout the year on specific areas relevant to the annual contract review, such as Fund performance or compliance matters, and that are charged with specific responsibilities regarding the annual contract review. Those committees provide reports to the Contract Review Committee and the full Board, which consider that information as part of the annual contract review process. The Board's Contract Review Committee annually considers and updates the questions it asks of Management in light of legal advice furnished to them by Independent Counsel; their own business judgment; and developments in the industry, in the markets, in mutual fund regulation and litigation, and in Management's business model.

The Independent Fund Trustees received from Independent Counsel a memorandum discussing the legal standards for their consideration of the proposed continuation of the Agreement. During the course of the year and during their deliberations regarding the annual contract review, the Contract Review Committee and the Independent Fund Trustees met with Independent Counsel separately from representatives of Management.

---

Provided below is a description of the Board's contract approval process and material factors that the Board considered at its meetings regarding renewal of the Agreement and the compensation to be paid thereunder. In connection with its approval of the continuation of the Agreement, the Board evaluated the terms of the Agreement, the overall fairness of the Agreement to the Fund, and whether the Agreement was in the best interests of the Fund and its shareholders. The Board's determination to approve the continuation of the Agreement was based on a comprehensive consideration of all information provided to the Board throughout the year and specifically in connection with the annual contract review. The Board considered the Fund's investment management agreement separately from those of other funds of the Trust.

This description is not intended to include all of the factors considered by the Board. The Board members did not identify any particular information or factor that was all-important or controlling, and each Trustee may have attributed different weights to the various factors. The Board focused on the costs and benefits of the Agreement to the Fund and, through the Fund, its shareholders.

## Nature, Extent, and Quality of Services

With respect to the nature, extent, and quality of the services provided, the Board considered the investment philosophy and decision-making processes of, and the qualifications, experience, and capabilities of, and the resources available to, the portfolio management personnel of Management who perform services for the Fund. The Board noted that Management also provides certain administrative services, including fund accounting and compliance services. The Board also considered Management's policies and practices regarding brokerage, commissions, other trading costs, and allocation of portfolio transactions and reviewed the quality of the execution services that Management had provided. The Board also reviewed Management's use of brokers to execute Fund transactions that provide research services to Management. Moreover, the Board considered Management's approach to potential conflicts of interest both generally and between the Fund's investments and those of other funds or accounts managed by Management. The Board also noted that Management had increased its research capabilities with respect to environmental, social, and corporate governance matters and how those factors may relate to investment performance.

The Board noted the extensive range of services that Management provides to the Fund beyond the investment management services. The Board noted that Management is also responsible for monitoring compliance with the Fund's investment objectives, policies, and restrictions, as well as compliance with applicable law, including implementing rulemaking initiatives of the U.S. Securities and Exchange Commission. The Board considered that Management assumes significant ongoing risks with respect to all Funds, for which it is entitled to reasonable compensation. Specifically, Management's responsibilities include continual management of investment, operational, enterprise, legal, regulatory, and compliance risks as they relate to the Fund, and the Board considers on a regular basis information regarding Management's processes for monitoring and managing risk. In addition, the Board also noted that when Management launches a new fund or share class, it assumes entrepreneurial risk with respect to that fund or share class, and that some funds and share classes have been liquidated without ever having been profitable to Management.

The Board also noted Management's activities under its contractual obligation to oversee the Fund's various outside service providers, including its renegotiation of certain service providers' fees and its evaluation of service providers' infrastructure, cybersecurity programs, compliance programs, and business continuity programs, among other matters. The Board also considered Management's ongoing development of its own infrastructure and information technology to support the Fund through, among other things, cybersecurity, business continuity planning, and risk management. In addition, the Board noted the positive compliance history of Management, as no significant compliance problems were reported to the Board with respect to Management. The Board also considered the general structure of the portfolio managers' compensation and whether this structure provides appropriate incentives to act in the best interests of the Fund. The Board also considered the ability of Management to attract and retain qualified personnel to service the Fund.

As in past years, the Board also considered the manner in which Management addressed various matters that arose during the year, some of them a result of developments in the broader fund industry or the regulations governing it. In addition, the Board considered actions taken by Management in response to recent market conditions and considered the overall performance of Management in this context.

---

## Fund Performance

The Board requested a report from an outside consulting firm that specializes in the analysis of fund industry data that compared the Fund's performance, along with its fees and other expenses, to a group of industry peers and a broader universe of funds pursuing generally similar strategies with the same investment classification and/or objective. The Board considered the Fund's performance and fees in light of the limitations inherent in the methodology for constructing such comparative groups and determining which investment companies should be included in the comparative groups.

With respect to investment performance, the Board considered information regarding the Fund's short-, intermediate- and long-term performance, net of the Fund's fees and expenses on an absolute basis and relative to a benchmark index that does not deduct the fees or expenses of investing, and compared to the performance of the industry peer group and a broader universe of funds, each constructed by the consulting firm. The Board also reviewed performance in relation to certain measures of the degree of investment risk undertaken by the portfolio managers.

The broader universe of funds referenced in this section was identified by the consulting firm, as discussed above, and the risk/return ratio referenced is the Sharpe ratio provided by the consulting firm. For any period of underperformance, the Board considered the magnitude and duration of that underperformance relative to the broader universe, as defined below, and/or the benchmark (e.g., the amount by which a Fund underperformed, including, for example, whether the Fund slightly underperformed or significantly underperformed its benchmark). With respect to performance quintile rankings for the Fund compared to its broader universe ("Performance Universe"), the first quintile represents the highest (best) performance and the fifth quintile represents the lowest performance. The Board considered that, based on performance data for the periods ended December 31, 2018: (1) as compared to its benchmark, the Fund's performance was lower for the 1-, 3-, 5-, and 10-year periods; and (2) as compared to its Performance Universe, the Fund's performance was in the second quintile for the 1-year period and the third quintile for the 3-, 5-, and 10-year periods. In determining to renew the Agreement, the Board took into account that the Fund showed a risk/return ratio that was better than the median of its Performance Universe for the 5-year period, meaning that per unit of risk taken versus a presumed risk-free investment, the Fund achieved a higher level of return than the median of its Performance Universe for that period.

Noting that the Fund underperformed over certain periods, the Board discussed with Management the Fund's performance, potential reasons for the relative performance, and, if necessary, steps that Management had taken, or intended to take, to improve performance. The Board also met with the portfolio managers of the Fund during the 12 months prior to voting on the contract renewal to discuss the Fund's performance. The Board also considered Management's responsiveness to the Fund's relative performance. In this regard, the Board noted that performance, especially short-term performance, is only one of the factors that it deems relevant to its consideration of the Agreement and that, after considering all relevant factors, it determined to approve the continuation of the Agreement notwithstanding the Fund's relative performance.

## Fee Rates, Profitability, and Fall-out Benefits

With respect to the overall fairness of the Agreement, the Board considered the fee structure for the Fund under the Agreement as compared to the peer group provided by the consulting firm. The Board reviewed a comparison of the Fund's management fee to a peer group of comparable funds. The Board noted that the comparative management fee analysis includes, in the Fund's management fee, the separate administrative fees paid to Management. However, the Board noted that some funds in the peer group pay directly from fund assets for certain services that Management covers out of the administration fees for the Fund. Accordingly, the Board also considered the Fund's total expense ratio as compared with its peer group as a way of taking account of these differences.

The Board compared the Fund's contractual and actual management fees to the median of the contractual and actual management fees, respectively, of the Fund's peer group. (The actual management fees are the contractual management fees reduced by any fee waivers or other adjustments.) The Board also compared the Fund's total expenses to the median of the total expenses of the Fund's peer group. The Board noted that the Fund's actual management fee and total expenses

---

were higher than the peer group median, and considered whether specific portfolio management, administration or oversight needs contributed to the Fund's actual management fee and total expenses. With respect to the quintile rankings for fees and total expenses (net of waivers or other adjustments, if any) for the Fund compared to its peer group ("Expense Group"), the first quintile represents the lowest fees and/or total expenses and the fifth quintile represents the highest fees and/or total expenses. For fee comparisons and investment performance comparisons, the Board looked at the Fund's Class I as a proxy for both of the Fund's classes. The Board considered that, as compared to its Expense Group, the Fund's contractual management fee, the actual management fee, and total expenses each ranked in the fifth quintile. The Board considered Management's representations regarding the resources devoted to the sustainable equity strategy that are available to the portfolio management team. In addition to considering the above-referenced factors, the Board took note of its ongoing dialogue with Management regarding the dynamics of the insurance/annuity marketplace, including the specific challenges facing that market generally, which assisted the Board in understanding the context for the Fund's expense ratio and performance.

In concluding that the benefits accruing to Management and its affiliates by virtue of their relationship with the Fund were reasonable in light of the costs of providing the investment advisory and other services and the benefits accruing to the Fund, the Board reviewed specific data as to Management's estimated profit on the Fund for a recent period on a pre-tax basis without regard to distribution expenses, including year-over-year changes in each of Management's reported expense categories. (The Board also reviewed data on Management's estimated profit on the Fund after distribution/servicing expenses and taxes were factored in, as indicators of the health of the business and the extent to which Management is directing its profits into the growth of the business.) The Board considered the cost allocation methodology that Management used in developing its estimated profitability figures. In recent years, the Board engaged an independent forensic accountant to review the profitability methodology utilized by Management when preparing this information and discussed with the consultant its conclusion that Management's process for calculating and reporting its estimated profit was not unreasonable.

Recognizing that there is no uniform methodology within the asset management industry for determining profitability for this purpose and that the use of different reasonable methodologies can give rise to different profit and loss results, the Board, in recent years, requested from Management examples of profitability calculated by different methods and noted that the estimated profitability levels were still reasonable when calculated by these other methods. The Board further noted Management's representation that its estimate of profitability is derived using methodology that is consistent with the methodology used to assess and/or report measures of profitability elsewhere at the firm. In addition, the Board recognized that Management's calculations regarding its costs may not reflect all risks, including regulatory, legal, operational, reputational, and, where appropriate, entrepreneurial risks, associated with offering and managing a mutual fund in the current regulatory and market environment. The Board also considered any fall-out (i.e., indirect) benefits likely to accrue to Management or its affiliates from their relationship with the Fund. The Board recognized that Management and its affiliates should be entitled to earn a reasonable level of profits for services they provide to the Fund and, based on its review, concluded that Management's reported level of estimated profitability on the Fund was reasonable.

## Information Regarding Services to Other Clients

The Board also considered other funds and separate accounts that were advised or sub-advised by Management or its affiliates with investment objectives, policies and strategies that were similar to those of the Fund, and compared the fees charged to the Fund to the fees charged to such comparable funds and separate accounts. The Board considered the appropriateness and reasonableness of any differences between the fees charged to a Fund and such comparable funds and/or separate accounts, and determined that differences in fees and fee structures were consistent with the differences in the management and other services provided. The Board explored with Management its assertion that although, generally, the rates of fees paid by such accounts (other than mutual funds) were lower than the fee rates paid by the corresponding Fund, the differences reflected Management's greater level of responsibilities and significantly broader scope of services regarding the Fund, the more extensive regulatory obligations and risks associated with managing the Fund, and other financial considerations with respect to creation and sponsorship of the Fund.

---

## Economies of Scale

The Board also evaluated apparent or anticipated economies of scale in relation to the services Management provides to the Fund. The Board considered whether the Fund's fee structure provides for a reduction of payments resulting from the use of breakpoints, the size of any breakpoints in the Fund's advisory fees, and whether any such breakpoints are set at appropriate asset levels. The Board also compared the breakpoint structure to that of the peer group. In addition, the Board considered the expense limitation and/or fee waiver arrangements that reduces Fund expenses at all asset levels which can have an effect similar to breakpoints in sharing economies of scale with shareholders and provide protection from an increase in expenses if the Fund's assets decline. The Board also considered that Management has provided, at no added cost to the Fund, certain additional services, including but not limited to, services required by new regulations or regulatory interpretations, services impelled by changes in the securities markets or the business landscape, and/or services requested by the Board. The Board considered that this is a way of sharing economies of scale with the Fund and its shareholders.

## Conclusions

In approving the continuation of the Agreement, the Board concluded that, in its business judgment, the terms of the Agreement are fair and reasonable to the Fund and that approval of the continuation of the Agreement is in the best interests of the Fund and its shareholders. In reaching this determination, the Board considered that Management could be expected to continue to provide a high level of service to the Fund; that the Board retained confidence in Management's capabilities to manage the Fund; that the Fund's fee structure appeared to the Board to be reasonable given the nature, extent, and quality of services provided; and that the benefits accruing to Management and its affiliates by virtue of their relationship with the Fund were reasonable in light of the costs of providing the investment advisory and other services and the benefits accruing to the Fund. The Board's conclusions may be based in part on its consideration of materials prepared in connection with the approval or continuance of the Agreement in prior years and on the Board's ongoing regular review of Fund performance and operations throughout the year, in addition to material prepared specifically for the most recent annual review of the Agreement.

## Notice to Shareholders

100.00% of the dividends earned during the fiscal year ended December 31, 2019 qualify for the dividends received deduction for corporate shareholders.

The Fund designates \$31,793,233 as a capital gain distribution.

Beginning January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Funds' annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports from your financial professional or variable annuity provider. Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. If supported by your financial professional or variable annuity provider, you may elect to receive shareholder reports and other Fund communications electronically. Please contact your financial professional or variable annuity provider for more information.

You may elect to receive all future shareholder reports in paper free of charge. Please contact your financial professional or variable annuity provider to inform them that you wish to continue receiving paper copies of your shareholder reports. Your election to receive reports in paper will apply to all Russell Investment Funds and other funds you hold with your financial professional or variable annuity provider.

## Russell Investment Funds

Russell Investment Funds is a series investment company with nine different investment portfolios referred to as Funds. These financial statements report on five of these Funds.

# To Our Shareholders

Fellow Investors,

Your financial security is not only our focus; it is our purpose. We believe that the combination of our investment solutions, a sound plan and timely investment advice can help to achieve that financial security. That is the reason we work hard to maintain a time-tested, disciplined investment approach, focused on meeting the financial needs of clients like you.

Market volatility and the fear of a recession can make it difficult for individuals to stick to an investment plan. Some investors are tempted to leave sectors too early, to stay in too long, or to pull out too much. These types of behavior can cause the less-disciplined investor to fall into the harmful trap of buying high and selling low. However, we believe this is the type of market in which our process shines.

We maintain our focus and look to position our funds for the investing environment ahead, not the one that has just passed. With this in mind, we hold the following views on markets:

- We believe in the importance of diversifying globally. International investments provide diversification relative to U.S.-based investments as well as open the portfolio up to additional opportunities outside our borders.
- Within our equity exposure, we have an underweight preference for U.S. equities, driven by expensive valuations and cycle concerns. We're broadly neutral on developed international equities, and overweight on emerging markets equities, driven by valuations.
- Within our bond exposure, we continue to diversify across sectors. Additionally, active management will be important during a period of low anticipated fixed income returns.

2019 again showed that volatility is still present in the market. And we believe uncertainty about future market downturns helps to prove the value of a disciplined approach. As do, in our view, these key events of the last 12 months:

- Global growth concerns and geopolitical tension have remained in investors' thoughts. Progress in U.S.-China trade talks fluctuated over the period, with both countries implementing costly tariffs, which has impacted financial markets.
- While short-term recession risks remain low, the U.S. yield curve is signaling that the risk is increasing. The U.S. yield curve inverted for the first time since 2007 as government bond yields sunk to new depths.<sup>1</sup> The U.S. 10-year treasury reached its lowest since 2016<sup>2</sup> while the U.S. 30-year yield touched an all-time bottom in August.<sup>3</sup>
- Nevertheless, global equities have ground higher amid dovish central bank policy. The Federal Reserve cut rates three times, while the European Central Bank cut rates to a record -0.5% and restarted quantitative easing.<sup>4</sup> China's central bank also took steps to stimulate its economy.<sup>5</sup>
- Volatility spiked at points over the year<sup>6</sup>, but equity markets have not touched the volatility experienced during December 2018—where a Federal Reserve rate increase and a worsening of U.S.-China tensions led investors flight to safety.<sup>7</sup>
- 2019 saw positive returns from major asset classes, with U.S. large cap<sup>8</sup> and infrastructure asset classes<sup>9</sup> leading the way. Even with strong absolute performance it has not been without bumps; asset class leadership can change month-to-month and quarter-to-quarter, reinforcing the need for a balanced multi-asset approach to investing.

Looking forward to the year ahead, we believe we are late in the cycle; with some bright spots. The service sector is still robust in most economies; policy stimulus is being ramped up, with many central banks now cutting interest rates and indicating that more cuts are on the way; and an easing of trade tensions seems likely. On balance, we think it is more likely that the combination of trade-war resolution and policy stimulus will see the global economy recover in 2020. However, the asymmetry of the different outcomes—bear market versus limited upside—keeps us cautious until there is more clarity on the trade and stimulus outlook.

## To Our Shareholders

At Russell Investments, our purpose is to improve people's financial security. We have a long heritage of providing multi-asset solutions to help investors like you reach your financial goals, whether you're saving for retirement, already there or building a college fund. Thank you for the trust you have placed in our firm. All of us at Russell Investments appreciate the opportunity to help you achieve your own financial security.

Best regards,

Peter Gunning

## U.S. Strategic Equity Fund

### Portfolio Management Discussion and Analysis, continued — December 31, 2019 (Unaudited)

---

The U.S. Strategic Equity Fund (the “Fund”) employs a multi-manager approach whereby portions of the Fund are allocated to different money manager strategies. Fund assets not allocated to money managers are managed by Russell Investment Management, LLC (“RIM”), the Fund’s advisor. RIM may change the allocation of the Fund’s assets among money managers at any time, including not allocating Fund assets to one or more money manager strategies. An exemptive order from the Securities and Exchange Commission (“SEC”) permits RIM to engage or terminate a money manager at any time, subject to approval by the Fund’s Board, without a shareholder vote. Pursuant to the terms of the exemptive order, the Fund is required to notify its shareholders within 90 days of when a money manager begins providing services. As of December 31, 2019, the Fund had four money managers.

#### **What is the Fund’s investment objective?**

The Fund seeks to provide long term capital growth.

#### **How did the Fund perform relative to its benchmark for the fiscal year ended December 31, 2019?**

For the fiscal year ended December 31, 2019, the Fund gained 30.26%. This is compared to the Fund’s benchmark, the Russell 1000® Index, which gained 31.43% during the same period. The Fund’s performance includes operating expenses, whereas index returns are unmanaged and do not include expenses of any kind.

For the fiscal year ended December 31, 2019, the Morningstar® Insurance Large Blend Category, a group of funds that Morningstar considers to have investment strategies similar to those of the Fund, gained 29.72%. This result serves as a peer comparison and is expressed net of operating expenses.

RIM may assign a money manager a specific style or capitalization benchmark other than the Fund’s index. However, the Fund’s primary index remains the benchmark for the Fund and is representative of the aggregate of each money manager’s benchmark index.

#### **How did market conditions affect the Fund’s performance?**

The fiscal year ended December 31, 2019 saw the Fund underperform the Russell 1000® Index and outperform the Morningstar® Insurance Large Blend peer group. With a more dovish U.S. Federal Reserve in 2019, the U.S. equity market produced strong positive returns. Growth stocks performed better than value stocks for the 12-month period, but value had bursts of outperformance including the sharp “factor rotation” in September. Dynamic stocks slightly outperformed defensive stocks over the period. However, most of the outperformance came in the fourth quarter as phase one of the U.S.-China trade deal lifted investor sentiment and business surveys showed tentative signs of a bottoming in the global cycle.

#### **How did the investment strategies and techniques employed by the Fund and its money managers affect its benchmark relative performance?**

Over the period, the Fund maintained exposure to moderately priced securities with low price momentum as well as companies with lower financial leverage. Additionally, the Fund was tilted away from the largest market capitalization stocks due to valuation concerns. Overall, the Fund’s factor tilts provided negative results as underweights to large market capitalization, high leverage and high valuation stocks detracted from relative performance.

From a sector standpoint, the Fund was positioned toward more pro-cyclical areas of the market which are expected to benefit from a healthy domestic consumer such as the consumer discretionary, financials and energy sectors, while avoiding bond proxies. Sector allocation decisions were moderately beneficial over the period, including underweights to the health care and industrials sectors.

Stock selection by the Fund’s money managers was mixed, as positive selection within the energy and financials sectors was offset by negative selection within the information technology and communication services sectors.

The Fund employs discretionary and non-discretionary money managers. The Fund’s discretionary money managers select the individual portfolio securities for the assets assigned to them. The Fund’s non-discretionary money managers provide a model portfolio to RIM representing their investment recommendations, based upon which RIM purchases and sells securities for the Fund. RIM manages assets not allocated to money manager strategies and the Fund’s cash balances.

With respect to certain of the Fund’s money managers, Brandywine Global Investment Management, LLC outperformed the Russell 1000® Value Index. Factor exposures were rewarded, including the manager’s tilt toward stocks with low momentum. Stock selection within the energy, financials and information technology sectors was the primary driver of outperformance over the year.

During the period, RIM utilized a positioning strategy to control Fund-level exposures and risks through the purchase of a stock portfolio. Using the output from a quantitative model, the strategy seeks to position the portfolio to meet RIM’s overall preferred positioning with respect to Fund exposures along factor and industry dimensions. The Fund’s active positioning strategy provided exposure to RIM’s strategic equity beliefs associated with value, quality and low volatility factors. During the fiscal year, the strategy underperformed the Russell 1000® Index as the value factor lagged in the U.S. equity market. From a sector perspective, the positioning strategy’s large overweight to the health care sector detracted from benchmark relative performance.

# Russell Investment Funds

## U.S. Strategic Equity Fund

### Portfolio Management Discussion and Analysis, continued — December 31, 2019 (Unaudited)

---

During the period, RIM partially equitized the Fund's cash using index futures contracts to provide the Fund with greater market exposure. This had a positive impact on the Fund's absolute performance.

#### **Describe any changes to the Fund's structure or the money manager line-up.**

In February 2019, RIM replaced Suffolk Capital Management, LLC, which ceased operations as of end of January, with Jackson Square Partners, LLC.

In June 2019, RIM determined to no longer allocate Fund assets to Jacobs Levy Equity Management, Inc. and HS Management Partners, LLC's strategies. Allocations to the other money managers and the RIM positioning strategy were adjusted as a result.

#### Money Managers as of December 31, 2019

	Styles
Brandywine Global Investment Management, LLC	Value
HS Management Partners, LLC	Growth
Jacobs Levy Equity Management, Inc.	Market-Oriented
Jackson Square Partners, LLC	Growth

## U.S. Strategic Equity Fund

### Shareholder Expense Example — December 31, 2019 (Unaudited)

#### Fund Expenses

The following disclosure provides important information regarding the Fund's Shareholder Expense Example ("Example").

#### Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs, and (2) ongoing costs, including advisory and administrative fees and other Fund expenses. The Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds. The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period indicated, which for this Fund is from July 1, 2019 to December 31, 2019.

#### Actual Expenses

The information in the table under the heading "Actual Performance" provides information about actual account values and actual expenses. You may use the information in this column, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first column in the row entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

#### Hypothetical Example for Comparison Purposes

The information in the table under the heading "Hypothetical Performance (5% return before expenses)" provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the information under the heading "Hypothetical Performance (5% return before expenses)" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher. The fees and expenses shown in this section do not reflect any Insurance Company Separate Account Policy Charges.

	Actual Performance	Hypothetical Performance (5% return before expenses)
Beginning Account Value July 1, 2019	\$ 1,000.00	\$ 1,000.00
Ending Account Value December 31, 2019	\$ 1,085.00	\$ 1,020.92
Expenses Paid During Period*	\$ 4.47	\$ 4.33

\* Expenses are equal to the Fund's annualized expense ratio of 0.85% (representing the six month period annualized), multiplied by the average account value over the period, multiplied by 184/365 (to reflect the one-half year period).

### Related Party Transactions, Fees and Expenses

Accrued fees payable to affiliates for the period ended December 31, 2019 were as follows:

Advisory fees	\$ 314,350
Administration fees	21,531
Transfer agent fees	1,894
Trustee fees	1,517
	<u>\$ 339,292</u>

Transactions (amounts in thousands) during the period ended December 31, 2019 with Underlying Funds which are, or were, an affiliated company are as follows:

	Fair Value, Beginning of Period	Purchases	Sales	Realized Gain (Loss)	Change in Unrealized Gain (Loss)	Fair Value, End of Period	Income Distributions	Capital Gains Distributions
U.S. Cash Management Fund	\$ 17,324	\$ 147,513	\$ 143,107	\$ 5	\$ —	\$ 21,735	\$ 402	\$ —
U.S. Cash Collateral Fund	9,290	113,779	115,734	—	—	7,335	236	—
	<u>\$ 26,614</u>	<u>\$ 261,292</u>	<u>\$ 258,841</u>	<u>\$ 5</u>	<u>\$ —</u>	<u>\$ 29,070</u>	<u>\$ 638</u>	<u>\$ —</u>

### Federal Income Taxes

At December 31, 2019, the cost of investments and net unrealized appreciation (depreciation), undistributed ordinary income and undistributed long-term capital gains for income tax purposes were as follows:

Cost of Investments	Unrealized Appreciation	Unrealized Depreciation	Net Unrealized Appreciation (Depreciation)	Undistributed Ordinary Income	Undistributed Long-Term Capital Gains (Capital Loss Carryforward)
\$ 455,422,241	\$ 70,527,672	\$ (6,042,481)	\$ 64,485,191	\$ —	\$ 4,481,071

For the fiscal years ended December 31, 2019 and December 31, 2018 respectively, the Fund made the following tax basis distributions:

December 31, 2019			December 31, 2018		
Ordinary Income Distributions	Long-Term Capital Gain Distributions	Return of Capital	Ordinary Income Distributions	Long-Term Capital Gain Distributions	Return of Capital
\$ 5,055,899	\$ 25,740,255	\$ —	\$ 19,913,216	\$ 65,982,476	\$ —

Net investment income and net realized gains (losses) in the financial statements may differ from taxable net investment income and net realized gains (losses). Capital accounts within the financial statements are adjusted for permanent book-tax differences. Book-tax differences are primarily due to foreign currency gains and losses, reclassifications of dividends, differences in treatment of income from swaps, net operating losses, investments in partnerships, investments in passive foreign investment companies (PFICs), tax straddle transaction, use of tax equalization and foreign capital gains taxes. These adjustments have no impact on the net assets. At December 31, 2019, there were no adjustments to the Statement of Assets and Liabilities.

See accompanying notes which are an integral part of the financial statements.

## U.S. Small Cap Equity Fund

### Portfolio Management Discussion and Analysis, continued — December 31, 2019 (Unaudited)

---

The U.S. Small Cap Equity Fund (the “Fund”) employs a multi-manager approach whereby portions of the Fund are allocated to different money manager strategies. Fund assets not allocated to money managers are managed by Russell Investment Management, LLC (“RIM”), the Fund’s advisor. RIM may change the allocation of the Fund’s assets among money managers at any time, including not allocating Fund assets to one or more money manager strategies. An exemptive order from the Securities and Exchange Commission (“SEC”) permits RIM to engage or terminate a money manager at any time, subject to approval by the Fund’s Board, without a shareholder vote. Pursuant to the terms of the exemptive order, the Fund is required to notify its shareholders within 90 days of when a money manager begins providing services. As of December 31, 2019, the Fund had eight money managers.

#### **What is the Fund’s investment objective?**

The Fund seeks to provide long term capital growth.

#### **How did the Fund perform relative to its benchmark for the fiscal year ended December 31, 2019?**

For the fiscal year ended December 31, 2019, the Fund gained 23.07%. This is compared to the Fund’s benchmark, the Russell 2000® Index, which gained 25.52% during the same period. The Fund’s performance includes operating expenses, whereas index returns are unmanaged and do not include expenses of any kind.

For the fiscal year ended December 31, 2019, the Morningstar® Insurance Small Blend Category, a group of funds that Morningstar considers to have investment strategies similar to those of the Fund, gained 24.79%. This result serves as a peer comparison and is expressed net of operating expenses.

RIM may assign a money manager a specific style or capitalization benchmark other than the Fund’s index. However, the Fund’s primary index remains the benchmark for the Fund and is representative of the aggregate of each money manager’s benchmark index.

#### **How did market conditions affect the Fund’s performance?**

The fiscal year ended December 31, 2019 saw the Fund underperform the Russell 2000® Index and the Morningstar® Insurance Small Blend peer group. With a more dovish U.S. Federal Reserve in 2019, the U.S. equity market produced strong positive returns. Growth stocks performed better than value stocks for the 12-month period, but value had bursts of outperformance including the sharp “factor rotation” in September. Dynamic stocks slightly outperformed defensive stocks over the period. However, most of the outperformance came in the fourth quarter as phase one of the U.S.-China trade deal lifted investor sentiment and business surveys showed tentative signs of a bottoming in the global cycle.

#### **How did the investment strategies and techniques employed by the Fund and its money managers affect its benchmark relative performance?**

Over the period, the Fund maintained exposure to small and micro capitalization stocks trading at discounted valuations as well as companies with lower volatility, lower momentum and higher quality characteristics. This positioning was in recognition of perceived valuation opportunities as well as the risk of elevated levels of corporate debt and unprofitability among U.S. small cap companies. Within the U.S. small cap market, a preference for low valuation and low momentum stocks negatively impacted benchmark relative performance. The Fund’s quality positioning also detracted as companies with lower return on equity outperformed.

Sector allocation decisions were positive, including an overweight to the information technology sector and an underweight to the health care sector. Over the period, the Fund increasingly moved towards a more neutral positioning compared to the benchmark as earnings growth rates for U.S. small/mid cap companies meaningfully decelerated and global economic data moderated throughout 2019. Investor sentiment was expected to remain volatile given ongoing uncertainty around the impact of trade disputes, the U.S. presidential election and the direction of monetary policy going into 2020.

Stock selection by the Fund’s money managers was the primary detractor during the period, including underperforming holdings within the health care, industrials and information technology sectors.

The Fund employs discretionary and non-discretionary money managers. The Fund’s discretionary money managers select the individual portfolio securities for the assets assigned to them. The Fund’s non-discretionary money managers provide a model portfolio to RIM representing their investment recommendations, based upon which RIM purchases and sells securities for the Fund. RIM manages assets not allocated to money manager strategies and the Fund’s cash balances.

With respect to certain of the Fund’s money managers, Copeland Capital Management, LLC was the best performing money manager for the fiscal year and outperformed the Russell 2000® Index. While the manager’s overweights to the energy and consumer staples sectors were headwinds, strong stock selection within the communication services, financials and energy sectors was the primary driver of outperformance.

Boston Partners Global Investors, Inc. faced the strongest headwinds over the fiscal year and underperformed their 50% Russell 2000® Value / 50% Russell 2000® Microcap Value Index. A large overweight to the energy sector held back benchmark relative performance over the one-year period. Additionally,

# Russell Investment Funds

## U.S. Small Cap Equity Fund

### Portfolio Management Discussion and Analysis, continued — December 31, 2019 (Unaudited)

underperforming holdings within the energy, information technology and health care sectors were detractors over the period.

During the period, RIM utilized a positioning strategy to control Fund-level exposures and risks through the purchase of a stock portfolio. Using the output from a quantitative model, the strategy seeks to position the portfolio to meet RIM's overall preferred positioning with respect to Fund exposures along factor and industry dimensions. The Fund's active positioning strategy provided exposure to RIM's strategic equity beliefs associated with value, quality and low volatility factors. During the fiscal year, the strategy slightly outperformed the Russell 2000® Index. Factor impact was negative including tilts toward low valuation and low momentum stocks. Sector allocation decisions were additive to benchmark relative performance, including underweights to the energy and consumer staples sectors.

During the period, RIM partially equitized the Fund's cash using index futures contracts to provide the Fund with greater market exposure. This had a positive impact on the Fund's absolute performance.

#### Describe any changes to the Fund's structure or the money manager line-up.

In June 2019, RIM determined to no longer allocate Fund assets to DePrince, Race & Zollo, Inc. and Penn Capital Management

Company, Inc.'s strategies. Allocations to the other money managers were adjusted as a result.

In September 2019, RIM hired Ranger Investment Management, L.P., terminated Falcon Point Investors, LLC and determined to no longer allocate Fund assets to Calamos Advisors, LLC's strategy.

Money Managers as of December 31, 2019	Styles
Ancora Advisor, LLC	Market-Oriented
Boston Partners Global Investors, Inc.	Value
Calamos Advisors LLC	Growth
Copeland Capital Management LLC	Market-Oriented
DePrince, Race & Zollo, Inc.	Value
Jacobs Levy Equity Management, Inc.	Market-Oriented
Penn Capital Management Company, Inc.	Market-Oriented
Ranger Investment Management L.P.	Growth

\* Assumes initial investment on January 1, 2010.

\*\* Russell 2000® Index measures the performance of the small-cap segment of the U.S. equity universe. The Russell 2000® Index is a subset of the Russell 3000® Index representing approximately 10% of the total market capitalization of that index. It includes approximately 2000 of the smallest securities based on a combination of their market cap and current index membership. The Russell 2000® Index is constructed to provide a comprehensive and unbiased small-cap opportunity barometer and is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small-cap opportunity set.

\*\*\* The U.S. Small Cap Equity Linked Benchmark provides a means to compare the Fund's average annual returns to a secondary benchmark that takes into account historical changes in the Fund's primary benchmark. The U.S. Small Cap Equity Linked Benchmark represents the returns of the Russell 2500™ Index through April 30, 2012 and the returns of the Russell 2000® Index thereafter.

§ Annualized.

The performance shown in this section does not reflect any Insurance Company Separate Account or Policy Charges. Performance is historical and assumes reinvestment of all dividends and capital gains. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than when purchased. Past performance is not indicative of future results. Additionally, the returns presented herein may differ from the performance reported in the Financial Highlights as the returns herein are calculated in a manner consistent with standardized performance in accordance with Securities and Exchange Commission rules, while the performance in the Financial Highlights has been calculated in accordance with U.S. Generally Accepted Accounting Principles ("U.S. GAAP").

## U.S. Small Cap Equity Fund

### Shareholder Expense Example — December 31, 2019 (Unaudited)

#### Fund Expenses

The following disclosure provides important information regarding the Fund's Shareholder Expense Example ("Example").

#### Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs, and (2) ongoing costs, including advisory and administrative fees and other Fund expenses. The Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds. The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period indicated, which for this Fund is from July 1, 2019 to December 31, 2019.

#### Actual Expenses

The information in the table under the heading "Actual Performance" provides information about actual account values and actual expenses. You may use the information in this column, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first column in the row entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

#### Hypothetical Example for Comparison Purposes

The information in the table under the heading "Hypothetical Performance (5% return before expenses)" provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the information under the heading "Hypothetical Performance (5% return before expenses)" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher. The fees and expenses shown in this section do not reflect any Insurance Company Separate Account Policy Charges.

	Actual Performance	Hypothetical Performance (5% return before expenses)
Beginning Account Value July 1, 2019	\$ 1,000.00	\$ 1,000.00
Ending Account Value December 31, 2019	\$ 1,058.80	\$ 1,018.80
Expenses Paid During Period*	\$ 6.59	\$ 6.46

\* Expenses are equal to the Fund's annualized expense ratio of 1.27% (representing the six month period annualized), multiplied by the average account value over the period, multiplied by 184/365 (to reflect the one-half year period).

# Russell Investment Funds

## U.S. Small Cap Equity Fund

### Schedule of Investments, continued — December 31, 2019

\* Less than 0.05% of net assets.

\*\* Futures and foreign currency exchange contract values reflect the unrealized appreciation (depreciation) on the investments.

\*\*\* Refer to Schedule of Investments for detailed sector breakout.

(a) Certain investments that are measured at fair value using the net asset value per share (or its equivalent) practical expedient have not been classified in the fair value levels. The fair value amounts presented in the table are intended to permit reconciliation to the amounts presented in the Schedule of Investments.

For a description of the Levels, see note 2 in the Notes to Financial Statements.

For a disclosure on transfers between Levels 1, 2 and 3 during the period ended December 31, 2019, see note 2 in the Notes to Financial Statements.

Investments in which significant unobservable inputs (Level 3) were used in determining a fair value for the period ended December 31, 2019, were less than 1% of net assets.

# Russell Investment Funds

## U.S. Small Cap Equity Fund

### Fair Value of Derivative Instruments — December 31, 2019

Amounts in thousands

<b>Derivatives not accounted for as hedging instruments</b>	<b>Equity Contracts</b>
Location: Statement of Assets and Liabilities - Assets	
Variation margin on futures contracts*	\$ 97
<b>Derivatives not accounted for as hedging instruments</b>	<b>Equity Contracts</b>
Location: Statement of Operations - Net realized gain (loss)	
Futures contracts	\$ 970
Location: Statement of Operations - Net change in unrealized appreciation (depreciation)	
Futures contracts	\$ 213

\* Includes cumulative appreciation/depreciation of futures contracts as reported in the Schedule of Investments. Only variation margin is reported within the Statement of Assets and Liabilities.

### Related Party Transactions, Fees and Expenses

Accrued fees payable to affiliates for the period ended December 31, 2019 were as follows:

Advisory fees	\$ 172,774
Administration fees	9,599
Transfer agent fees	845
Trustee fees	907
	<u>\$ 184,125</u>

Transactions (amounts in thousands) during the period ended December 31, 2019 with Underlying Funds which are, or were, an affiliated company are as follows:

	Fair Value, Beginning of Period	Purchases	Sales	Realized Gain (Loss)	Change in Unrealized Gain (Loss)	Fair Value, End of Period	Income Distributions	Capital Gains Distributions
U.S. Cash Management Fund	\$ 9,000	\$ 50,373	\$ 50,920	\$ 4	\$ —	\$ 8,457	\$ 172	\$ —
U.S. Cash Collateral Fund	7,689	72,397	64,562	—	—	15,524	296	—
	<u>\$ 16,689</u>	<u>\$ 122,770</u>	<u>\$ 115,482</u>	<u>\$ 4</u>	<u>\$ —</u>	<u>\$ 23,981</u>	<u>\$ 468</u>	<u>\$ —</u>

### Federal Income Taxes

At December 31, 2019, the cost of investments and net unrealized appreciation (depreciation), undistributed ordinary income and undistributed long-term capital gains for income tax purposes were as follows:

Cost of Investments	Unrealized Appreciation	Unrealized Depreciation	Net Unrealized Appreciation (Depreciation)	Undistributed Ordinary Income	Undistributed Long-Term Capital Gains (Capital Loss Carryforward)
\$ 233,455,222	\$ 25,684,516	\$ (6,086,434)	\$ 19,598,082	\$ —	\$ 4,892,231

For the fiscal years ended December 31, 2019 and December 31, 2018 respectively, the Fund made the following tax basis distributions:

December 31, 2019			December 31, 2018		
Ordinary Income Distributions	Long-Term Capital Gain Distributions	Return of Capital	Ordinary Income Distributions	Long-Term Capital Gain Distributions	Return of Capital
\$ 1,244,022	\$ 3,409,094	\$ —	\$ 11,168,845	\$ 29,683,414	\$ —

Net investment income and net realized gains (losses) in the financial statements may differ from taxable net investment income and net realized gains (losses). Capital accounts within the financial statements are adjusted for permanent book-tax differences. Book-tax differences are primarily due to foreign currency gains and losses, reclassifications of dividends, differences in treatment of income from swaps, net operating losses, investments in partnerships, investments in passive foreign investment companies (PFICs), tax straddle transaction, use of tax equalization and foreign capital gains taxes. These adjustments have no impact on the net assets. At December 31, 2019, there were no adjustments to the Statement of Assets and Liabilities.

See accompanying notes which are an integral part of the financial statements.

## International Developed Markets Fund

### Portfolio Management Discussion and Analysis, continued — December 31, 2019 (Unaudited)

---

International Developed Markets Fund (the “Fund”) employs a multi-manager approach whereby Russell Investment Management, LLC (“RIM”) manages a portion of the Fund’s assets based upon model portfolios provided by multiple non-discretionary money managers. The Fund’s money managers have non-discretionary assignments pursuant to which they provide a model portfolio to RIM representing their investment recommendations, based upon which RIM purchases and sells securities for the Fund. RIM also manages the portion of the Fund’s assets that RIM determines not to manage based upon model portfolios provided by the Fund’s money managers. RIM may change the allocation of the Fund’s assets at any time. An exemptive order from the Securities and Exchange Commission (“SEC”) permits RIM to engage or terminate a money manager at any time, subject to approval by the Fund’s Board, without a shareholder vote. Pursuant to the terms of the exemptive order, the Fund is required to notify its shareholders within 90 days of when a money manager begins providing services. As of December 31, 2019, the Fund had three money managers.

#### **What is the Fund’s investment objective?**

The Fund seeks to provide long term capital growth.

#### **How did the Fund perform relative to its benchmark for the fiscal year ended December 31, 2019?**

For the fiscal year ended December 31, 2019, the Fund gained 19.72%. This is compared to the Fund’s benchmark, the MSCI World ex USA Index (Net), which gained 22.49% during the same period. The Fund’s performance includes operating expenses, whereas index returns are unmanaged and do not include expenses of any kind.

For the fiscal year ended December 31, 2019, the Morningstar® Insurance Foreign Large Blend Category, a group of funds that Morningstar considers to have investment strategies similar to those of the Fund, gained 21.61%. This result serves as a peer comparison and is expressed net of operating expenses.

#### **How did market conditions affect the Fund’s performance?**

Non-U.S. developed markets were strongly positive over the period. Europe ex-UK recorded the strongest gains, while the United Kingdom and Asia-Pacific underperformed relative to the overall market.

In terms of sector performance within the Fund’s benchmark over the fiscal year, information technology and health care were the largest drivers of positive performance. Energy and communication services recorded the smallest gains.

In terms of factor performance, quality and growth factors were the biggest drivers of positive performance over the period. Momentum factor also outperformed while value and low volatility factors lagged.

#### **How did the investment strategies and techniques employed by the Fund and its money managers affect its benchmark relative performance?**

The Fund underperformed its benchmark for the one-year period ended December 31, 2019. Sector allocation detracted, mainly due to an underweight to health care and an overweight to communication services. An overweight to emerging markets further held back gains. Stock selection contributed negatively over the period, particularly within energy, consumer discretionary and health care sectors. Positive selection in financials moderated the loss.

The Fund’s money managers have non-discretionary assignments pursuant to which they provide a model portfolio to RIM representing their investment recommendations, based upon which RIM purchases and sells securities for the Fund. With respect to this portion of the Fund, RIM manages the Fund’s assets based upon the model portfolios provided by the Fund’s money managers. RIM manages assets not allocated to money manager strategies and the Fund’s cash balances.

With respect to certain of the Fund’s money managers, GQG Partners LLC (“GQG”) was the top performer during the period. GQG’s growth-oriented strategy was a tailwind. An underweight to energy and an overweight to information technology were additive. Effective stock selection in Europe and the financials sector also boosted performance.

Pzena Investment Management, LLC was the weakest performer as the manager’s value strategy faced headwinds. An overweight to energy and an underweight to health care were the main detractors. Stock selection in consumer discretionary and health care further detracted. An overweight to emerging markets also impacted negatively.

RIM manages a multi-factor positioning strategy that aims to increase the Fund’s value exposure while moderating volatility exposure and expressing RIM’s total preferred positioning across multiple factors and sectors. The strategy uses the output from a quantitative model to purchase a stock portfolio expressing these views. The positioning strategy’s benchmark-relative performance was negative for the period, as the strategy’s overweight to value detracted.

In addition, RIM utilized equity futures and currency forward contracts in order to position the portfolio to meet RIM’s overall preferred positioning with respect to country and currency exposures. This strategy detracted during the fiscal year.

During the period, RIM used index futures contracts to equitize a portion of the Fund’s cash. The decision to equitize cash was additive, as the market’s absolute return was positive over the period.

### Portfolio Management Discussion and Analysis, continued — December 31, 2019 (Unaudited)

---

#### Describe any changes to the Fund's structure or the money manager line-up.

In March 2019, Numeric Investors LLC was terminated and allocations to existing money managers were increased.

In June 2019, Janus Capital Management LLC and Perkins Investment Management, LLC were terminated. Wellington Management Company LLP's mandate was expanded to include its international contrarian value ex-small cap strategy. The objective of this change was to improve the Fund's excess return potential.

In December 2019, GQG Partners, LLC resigned its role in the Fund and Intermede Global Partners Inc. and Intermede Investment Partners Limited were hired.

#### Money Managers as of December 31, 2019

	Styles
Intermede Global Partners Inc. and	
Intermede Investment Partners Limited	Growth
Pzena Investment Management LLC	Value
Wellington Management Company LLP	Growth

**The views expressed in this report reflect those of the portfolio managers only through the end of the period covered by the report. These views do not necessarily represent the views of RIM or any other person in RIM or any other affiliated organization. These views are subject to change at any time based upon market conditions or other events, and RIM disclaims any responsibility to update the views contained herein. ## International Developed Markets Fund

### Shareholder Expense Example — December 31, 2019 (Unaudited)

#### Fund Expenses

The following disclosure provides important information regarding the Fund's Shareholder Expense Example ("Example").

#### Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs, and (2) ongoing costs, including advisory and administrative fees and other Fund expenses. The Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds. The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period indicated, which for this Fund is from July 1, 2019 to December 31, 2019.

#### Actual Expenses

The information in the table under the heading "Actual Performance" provides information about actual account values and actual expenses. You may use the information in this column, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first column in the row entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

#### Hypothetical Example for Comparison Purposes

The information in the table under the heading "Hypothetical Performance (5% return before expenses)" provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the information under the heading "Hypothetical Performance (5% return before expenses)" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher. The fees and expenses shown in this section do not reflect any Insurance Company Separate Account Policy Charges.

	Actual Performance	Hypothetical Performance (5% return before expenses)
Beginning Account Value July 1, 2019	\$ 1,000.00	\$ 1,000.00
Ending Account Value December 31, 2019	\$ 1,070.30	\$ 1,019.96
Expenses Paid During Period*	\$ 5.43	\$ 5.30

\* Expenses are equal to the Fund's annualized expense ratio of 1.04% (representing the six month period annualized), multiplied by the average account value over the period, multiplied by 184/365 (to reflect the one-half year period).

### Federal Income Taxes

At December 31, 2019, the cost of investments and net unrealized appreciation (depreciation), undistributed ordinary income and undistributed long-term capital gains for income tax purposes were as follows:

Cost of Investments	Unrealized Appreciation	Unrealized Depreciation	Net Unrealized Appreciation (Depreciation)	Undistributed Ordinary Income	Undistributed Long-Term Capital Gains (Capital Loss Carryforward)
\$ 372,550,212	\$ 34,999,189	\$ (16,374,263)	\$ 18,624,926	\$ 1,372,070	\$ (10,320,344)

For the fiscal years ended December 31, 2019 and December 31, 2018 respectively, the Fund made the following tax basis distributions:

December 31, 2019			December 31, 2018		
Ordinary Income Distributions	Long-Term Capital Gain Distributions	Return of Capital	Ordinary Income Distributions	Long-Term Capital Gain Distributions	Return of Capital
\$ 9,905,479	\$ —	\$ —	\$ 18,629,370	\$ 20,391,546	\$ —

Net investment income and net realized gains (losses) in the financial statements may differ from taxable net investment income and net realized gains (losses). Capital accounts within the financial statements are adjusted for permanent book-tax differences. Book-tax differences are primarily due to foreign currency gains and losses, reclassifications of dividends, differences in treatment of income from swaps, net operating losses, investments in partnerships, investments in passive foreign investment companies (PFICs), tax straddle transaction, use of tax equalization and foreign capital gains taxes. These adjustments have no impact on the net assets. At December 31, 2019, there were no adjustments to the Statement of Assets and Liabilities.

See accompanying notes which are an integral part of the financial statements.

## Strategic Bond Fund

### Portfolio Management Discussion and Analysis, continued — December 31, 2019 (Unaudited)

---

The Strategic Bond Fund (the “Fund”) employs a multi-manager approach whereby portions of the Fund are allocated to different money manager strategies. Fund assets not allocated to money managers are managed by Russell Investment Management, LLC (“RIM”), the Fund’s advisor. RIM may change the allocation of the Fund’s assets among money managers at any time. An exemptive order from the Securities and Exchange Commission (“SEC”) permits RIM to engage or terminate a money manager at any time, subject to approval by the Fund’s Board, without a shareholder vote. Pursuant to the terms of the exemptive order, the Fund is required to notify its shareholders within 90 days of when a money manager begins providing services. As of December 31, 2019, the Fund had three money managers.

#### **What is the Fund’s investment objective?**

The Fund seeks to provide total return.

#### **How did the Fund perform relative to its benchmark for the fiscal year ended December 31, 2019?**

For the fiscal year ended December 31, 2019, the Fund gained 9.19%. This is compared to the Fund’s benchmark, the Bloomberg Barclays U.S. Aggregate Bond Index, which gained 8.72% during the same period. The Fund’s performance includes operating expenses, whereas index returns are unmanaged and do not include expenses of any kind.

For the fiscal year ended December 31, 2019, the Morningstar® Insurance Intermediate-Term Bond Category, a group of funds that Morningstar considers to have investment strategies similar to those of the Fund, gained 8.68%. This return serves as a peer comparison and is expressed net of operating expenses.

RIM may assign a money manager a benchmark other than the Fund’s index. However, the Fund’s primary index remains the benchmark for the Fund.

#### **How did market conditions affect the Fund’s performance?**

The fiscal year ended December 31, 2019 began with a strong rally on the back of the market sell off that closed the prior year. Members of the U.S. Federal Reserve board began to quickly alter their late 2018 communications in favor of a less hawkish and eventually solidly dovish bias. This caused a reversal of market sentiment to open the year. However, interest rates remained contained and in fact continued to fall throughout much of the rest of the fiscal year. The 10-year Treasury, which began the fiscal year at a yield of 2.68%, fell to as low as 1.45% in early September before ending the fiscal year at a yield of 1.92%.

Credit spreads, on the other hand, reacted very favorably to the change in rhetoric, and ultimately policy, from the Fed. After the tumultuous period coming into the year, credit spreads experienced a sharp rally to start the new year, and most sectors of the market sustained that momentum to finish the fiscal year

with spreads notably tighter than where they started. The U.S. investment grade corporate market produced especially strong results with the Bloomberg Barclays U.S. Corporate Bond Index posting a total return of 14.5% for the fiscal year. Emerging market currencies also responded favorably to the loosening of financial conditions. Volatile and troubled economies such as Turkey and Argentina had some of the strongest performing currencies over the course of the fiscal year.

#### **How did the investment strategies and techniques employed by the Fund and its money managers affect its benchmark relative performance?**

The Fund was generally positioned long duration, underweight to government and government-guaranteed securities and overweight securitized credit, all of which contributed positively to benchmark-relative performance. A small underweight to investment grade corporates during parts of the year detracted modestly from performance.

The Fund employs discretionary money managers. The Fund’s discretionary money managers select the individual portfolio securities for the assets assigned to them. RIM manages assets not allocated to money manager strategies and the Fund’s cash balances.

With respect to certain of the Fund’s money managers, Western Asset Management Company (“Western”) was the best performing money manager, outperforming both the Fund’s benchmark and their RIM-assigned benchmark. Western’s strategic biases to overweight credit and maintain long duration were rewarded on both sides in the market environment. Western was also tactical with its duration and yield curve positioning, allowing it to add further value beyond its strategic biases. Furthermore, Western favored the value in BBB-rated corporate bonds and emerging market issuers, both of which were among the strongest performing segments of credit markets.

Schroder Investment Management North America Inc. (“Schroder”) was the worst performing money manager during the period, slightly underperforming the Fund’s benchmark but outperforming their RIM-assigned benchmark. The shorter duration nature of Schroder’s securitized credit mandate drove the underperformance relative to the Fund’s benchmark. However, Schroder’s lower quality bias and security selection within the securitized credit markets led to substantial outperformance relative to their RIM-assigned benchmark.

During the period, RIM managed multiple positioning strategies to seek to achieve the desired risk/return profile for the Fund.

The U.S. Investment Grade Intelligent Credit positioning strategy, which screens securities based on value within the Bloomberg Barclays US Corporate Bond Index and purchases physical bonds that RIM believes to be undervalued, outperformed the Fund’s

# Russell Investment Funds

## Strategic Bond Fund

### Portfolio Management Discussion and Analysis, continued — December 31, 2019 (Unaudited)

---

benchmark. The strategy benefited both from its longer duration nature as well as a concentrated emphasis on the investment grade corporate market.

On the downside, the U.S. Government positioning strategy, which seeks to provide exposure to securities issued by the U.S. Government, lagged as credit spread markets outperformed.

RIM also managed currency factor (carry, value and trend) and rates factor (carry and value) strategies which seek to generate active returns through currency and international rates positioning, respectively, to reduce the Fund's reliance on traditional fixed income market risks. The rates strategy produced solid positive performance while the currency factors had neutral performance for the fiscal year. Within the rates strategy, the global decline in interest rates led to considerable convergence in global interest rates, which was an especially positive tailwind for the value component with the rates factors. Among currency factors, solid performance among the carry and value factors, particularly within emerging market currencies, was generally offset by the drag from another year of negative results from the trend factor.

During the period, RIM also implemented numerous tactical positioning strategies via derivatives that added to Fund performance during the period. RIM utilized interest rate derivatives to extend duration throughout the period, which had the greatest impact on total performance. RIM also utilized credit default swaps to capture the market rally that began the period. The Fund's tactical positions in developed market currencies via forwards had a muted impact.

#### **Describe any changes to the Fund's structure or the money manager line-up.**

In March 2019, RIM terminated Insight Investment International Limited and reallocated the assets among existing strategies.

In September 2019, RIM terminated Metlife Investment Management, LLC and Scout Investments, LLC and reallocated the assets among existing strategies.

Money Managers as of December 31, 2019	Styles
Colchester Global Investors Limited	Generalist
Schroder Investment Management North America Inc.	Specialist

## Strategic Bond Fund

### Shareholder Expense Example — December 31, 2019 (Unaudited)

#### Fund Expenses

The following disclosure provides important information regarding the Fund's Shareholder Expense Example ("Example").

#### Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs, and (2) ongoing costs, including advisory and administrative fees and other Fund expenses. The Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds. The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period indicated, which for this Fund is from July 1, 2019 to December 31, 2019.

#### Actual Expenses

The information in the table under the heading "Actual Performance" provides information about actual account values and actual expenses. You may use the information in this column, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first column in the row entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

#### Hypothetical Example for Comparison Purposes

The information in the table under the heading "Hypothetical Performance (5% return before expenses)" provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the information under the heading "Hypothetical Performance (5% return before expenses)" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher. The fees and expenses shown in this do not reflect any Insurance Company Separate Account Policy Charges.

	Actual Performance	Hypothetical Performance (5% return before expenses)
Beginning Account Value July 1, 2019	\$ 1,000.00	\$ 1,000.00
Ending Account Value December 31, 2019	\$ 1,025.90	\$ 1,021.78
Expenses Paid During Period*	\$ 3.47	\$ 3.47

\* Expenses are equal to the Fund's annualized expense ratio of 0.68% (representing the six month period annualized), multiplied by the average account value over the period, multiplied by 184/365 (to reflect the one-half year period).

\* Less than 0.05% of net assets.

\*\* Futures and foreign currency exchange contract values reflect the unrealized appreciation (depreciation) on the investments.

(a) Certain investments that are measured at fair value using the net asset value per share (or its equivalent) practical expedient have not been classified in the fair value levels. The fair value amounts presented in the table are intended to permit reconciliation to the amounts presented in the Schedule of Investments.

For a description of the Levels, see note 2 in the Notes to Financial Statements.

For a disclosure on transfers between Levels 1, 2 and 3 during the period ended December 31, 2019, see note 2 in the Notes to Financial Statements.

Investments in which significant unobservable inputs (Level 3) were used in determining a fair value for the period ended December 31, 2019, were less than 1% of net assets.

See accompanying notes which are an integral part of the financial statements.

### Related Party Transactions, Fees and Expenses

Accrued fees payable to affiliates for the period ended December 31, 2019 were as follows:

Advisory fees	\$ 428,165
Administration fees	38,924
Transfer agent fees	3,426
Trustee fees	4,691
	<u>\$ 475,206</u>

Transactions (amounts in thousands) during the period ended December 31, 2019 with Underlying Funds which are, or were, an affiliated company are as follows:

	Fair Value, Beginning of Period	Purchases	Sales	Realized Gain (Loss)	Change in Unrealized Gain (Loss)	Fair Value, End of Period	Income Distributions	Capital Gains Distributions
U.S. Cash Management Fund	\$ 58,419	\$ 581,612	\$ 623,246	\$ 18	\$ 1	\$ 16,804	\$ 989	\$ —
	<u>\$ 58,419</u>	<u>\$ 581,612</u>	<u>\$ 623,246</u>	<u>\$ 18</u>	<u>\$ 1</u>	<u>\$ 16,804</u>	<u>\$ 989</u>	<u>\$ —</u>

### Federal Income Taxes

At December 31, 2019, the cost of investments and net unrealized appreciation (depreciation), undistributed ordinary income and undistributed long-term capital gains for income tax purposes were as follows:

Cost of Investments	Unrealized Appreciation	Unrealized Depreciation	Net Unrealized Appreciation (Depreciation)	Undistributed Ordinary Income	Undistributed Long-Term Capital Gains (Capital Loss Carryforward)
\$ 897,882,100	\$ 16,762,329	\$ (4,905,907)	\$ 11,856,422	\$ 2,256,071	\$ —

For the fiscal years ended December 31, 2019 and December 31, 2018 respectively, the Fund made the following tax basis distributions:

December 31, 2019			December 31, 2018		
Ordinary Income Distributions	Long-Term Capital Gain Distributions	Return of Capital	Ordinary Income Distributions	Long-Term Capital Gain Distributions	Return of Capital
\$ 33,102,127	\$ 3,613,267	\$ —	\$ 18,803,832	\$ —	\$ —

Net investment income and net realized gains (losses) in the financial statements may differ from taxable net investment income and net realized gains (losses). Capital accounts within the financial statements are adjusted for permanent book-tax differences. Book-tax differences are primarily due to foreign currency gains and losses, reclassifications of dividends, differences in treatment of income from swaps, net operating losses, investments in partnerships, investments in passive foreign investment companies (PFICs), tax straddle transaction, use of tax equalization and foreign capital gains taxes. These adjustments have no impact on the net assets.

At December 31, 2019, the Assets and Liabilities have been adjusted by the following amounts (in thousands):

Total distributable earnings (losses)	\$ 34
Additional paid-in capital	(34)

As permitted by tax regulations, the Fund intends to defer a net realized capital loss of \$5,164,455 incurred from November 1, 2019 to December 31, 2019, and treat it as arising in the fiscal year 2020.

See accompanying notes which are an integral part of the financial statements.

## Global Real Estate Securities Fund

### Portfolio Management Discussion and Analysis, continued — December 31, 2019 (Unaudited)

---

The Global Real Estate Securities Fund (the “Fund”) employs a multi-manager approach whereby Russell Investment Management, LLC (“RIM”) manages a portion of the Fund’s assets based upon model portfolios provided by multiple non-discretionary money managers. The Fund’s money managers have non-discretionary assignments pursuant to which they provide a model portfolio to RIM representing their investment recommendations, based upon which RIM purchases and sells securities for the Fund. RIM also manages the portion of the Fund’s assets that RIM determines not to manage based upon model portfolios provided by the Fund’s money managers. RIM may change the allocation of the Fund’s assets at any time. An exemptive order from the Securities and Exchange Commission (“SEC”) permits RIM to engage or terminate a money manager at any time, subject to approval by the Fund’s Board, without a shareholder vote. Pursuant to the terms of the exemptive order, the Fund is required to notify its shareholders within 90 days of when a money manager begins providing services. As of December 31, 2019, the Fund had two money managers.

#### **What is the Fund’s investment objective?**

The Fund seeks to provide current income and long term capital growth.

#### **How did the Fund perform relative to its benchmark for the fiscal year ended December 31, 2019?**

For the fiscal year ended December 31, 2019, the Fund gained 21.64%. This is compared to the Fund’s benchmark, the FTSE EPRA/NAREIT Developed Real Estate Index (Net), which gained 21.91% during the same period. The Fund’s performance includes operating expenses, whereas index returns are unmanaged and do not include expenses of any kind.

For the fiscal year ended December 31, 2019, the Morningstar® Insurance Global Real Estate Category, a group of funds that Morningstar considers to have investment strategies similar to those of the Fund, gained 22.49%. This result serves as a peer comparison and is expressed net of operating expenses.

#### **How did market conditions affect the Fund’s performance?**

For the fiscal year ended December 31, 2019, the global listed property market, as measured by the FTSE EPRA/NAREIT Developed Real Estate Index (Net), delivered a 21.91% return, while underperforming broader global equities. Within the global property securities market, all regions posted double-digit returns. Europe led the index with strong performance in the U.K., as uncertainty around Brexit was moderated after U.K.’s Conservative Party won a majority in the country’s general elections in December. North America followed with Canada ahead of the U.S. Asia was the weakest performer, underperforming the broader index, weighted down by Hong Kong as the city’s ongoing anti-government protests and an economy in technical

recession continued to weigh on the local market. With respect to property sectors, there was a wide dispersion in performance. The industrial and residential sectors were the strongest performers finishing with double-digit returns. The more cyclical office sector was also a solid performer, while self-storage and malls property types finished with weak returns.

#### **How did the investment strategies and techniques employed by the Fund and its money managers affect its benchmark relative performance?**

The Fund modestly underperformed its benchmark for the one-year period ending December 31, 2019. Detracting from performance was an overweight to Hong Kong and an underweight position to the U.S. industrial sector. Positive stock selection within the U.S. health care and self-storage sectors as well as an overweight position to the U.S. residential sector were beneficial. Stock selection within Japanese REITs and Singapore added value.

The Fund’s money managers have non-discretionary assignments pursuant to which they provide a model portfolio to RIM representing their investment recommendations, based upon which RIM purchases and sells securities for the Fund. With respect to this portion of the Fund, RIM manages the Fund’s assets based upon the model portfolios provided by the Fund’s money managers. RIM manages assets not allocated to money manager strategies and the Fund’s cash balances.

With respect to the Fund’s money managers, Cohen & Steers Capital Management, Inc., Cohen & Steers UK Limited and Cohen & Steers Asia Limited (together, “Cohen & Steers”) outperformed the Fund’s benchmark for the fiscal year. Cohen & Steers seeks to generate excess returns through a combination of fundamental bottom-up stock selection and top-down regional and property type allocation decisions. The key contributors to outperformance were bottom-up stock selection within the U.K. and Australia. Also contributing positively was an underweight to the U.S. malls sector and overweights to the U.S. residential and self-storage sectors. Detracting from performance was negative stock selection within the U.S. office sector.

RREEF America L.L.C., Deutsche Investments Australia Limited and Deutsche Alternatives Asset Management (Global) Limited (together, “Deutsche Asset Management”) provided the best performing strategy, outperforming the Fund’s benchmark for the fiscal year. Stock selection within the U.S. was a key contributor to outperformance. Results were positive within the malls, health care and lodging sectors. In addition, stock selection within Japan was beneficial. Negative stock selection within Hong Kong detracted from performance.

During the period, RIM continued to utilize a strategy to implement regional and property sector tilting through the direct purchase of real estate stocks. Using the output from a

### Portfolio Management Discussion and Analysis, continued — December 31, 2019 (Unaudited)

quantitative model, the strategy seeks to position the portfolio to meet RIM's overall preferred positioning with respect to regional and property type exposures. The strategy outperformed relative to the Fund's benchmark for the one-year period. Positive performance was driven by an underweight position to Hong Kong as well as overweights to the U.S. health care and residential sectors. Detracting from performance was an overweight to the U.S. malls sector.

During the period, the Fund used index futures and swap contracts to equitize the Fund's cash. The use of these derivatives had a modestly positive impact on absolute performance, as global equity markets delivered positive returns.

#### Describe any changes to the Fund's structure or the money manager line-up.

In June 2019, Morgan Stanley Investment Management, Inc., Morgan Stanley Investment Management Limited and Morgan Stanley Investment Management Company ("Morgan Stanley"), Cohen & Steers and Deutsche Asset Management were transitioned from discretionary to non-discretionary mandates.

In September 2019, RIM terminated Morgan Stanley and increased the allocations to Cohen & Steers and Deutsche Asset Management.

**The views expressed in this report reflect those of the portfolio managers only through the end of the period covered by the report. These views do not necessarily represent the views of RIM or any other person in RIM or any other affiliated organization. These views are subject to change at any time based upon market conditions or other events, and RIM disclaims any responsibility to update the views contained herein. These views should not be relied on as investment advice and, because investment decisions for a Russell Investment Funds ("RIF") Fund are based on numerous factors, should not be relied on as an indication of investment decisions of any RIF Fund.**

\* Assumes initial investment on January 1, 2010.

\*\* The FTSE EPRA/NAREIT Developed Real Estate Index (Net) is an unmanaged market-weighted total return index, which consists of publicly traded equity REITs and listed property companies from developed markets whose floats are larger than \$100 million and derive more than half of their revenue from property-related activities and is net of dividend withholding taxes.

\*\*\* The MSCI World Index (Net) is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets. The index consists of 23 developed market country indexes.

\*\*\*\* The Global Real Estate Linked Benchmark provides a means to compare the Fund's average annual returns to a secondary benchmark that takes into account historical changes in the Fund's primary benchmark. The Global Real Estate Linked Benchmark represents the returns of the FTSE NAREIT Equity REIT Index through September 30, 2010 and the returns of the FTSE EPRA/NAREIT Developed Real Estate Index (net) thereafter.

§ Annualized.

The performance shown in this section does not reflect any Insurance Company Separate Account or Policy Charges. Performance is historical and assumes reinvestment of all dividends and capital gains. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than when purchased. Past performance is not indicative of future results. Additionally, the returns presented herein may differ from the performance reported in the Financial Highlights as the returns herein are calculated in a manner consistent with standardized performance in accordance with Securities and Exchange Commission rules, while the performance in the Financial Highlights has been calculated in accordance with U.S. Generally Accepted Accounting Principles ("U.S. GAAP").

## Global Real Estate Securities Fund

### Shareholder Expense Example — December 31, 2019 (Unaudited)

#### Fund Expenses

The following disclosure provides important information regarding the Fund's Shareholder Expense Example ("Example").

#### Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs, and (2) ongoing costs, including advisory and administrative fees and other Fund expenses. The Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds. The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period indicated, which for this Fund is from July 1, 2019 to December 31, 2019.

#### Actual Expenses

The information in the table under the heading "Actual Performance" provides information about actual account values and actual expenses. You may use the information in this column, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first column in the row entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

#### Hypothetical Example for Comparison Purposes

The information in the table under the heading "Hypothetical Performance (5% return before expenses)" provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the information under the heading "Hypothetical Performance (5% return before expenses)" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher. The fees and expenses shown in this section do not reflect any Insurance Company Separate Account Policy Charges.

	Actual Performance	Hypothetical Performance (5% return before expenses)
Beginning Account Value July 1, 2019	\$ 1,000.00	\$ 1,000.00
Ending Account Value December 31, 2019	\$ 1,063.00	\$ 1,020.57
Expenses Paid During Period*	\$ 4.78	\$ 4.69

\* Expenses are equal to the Fund's annualized expense ratio of 0.92% (representing the six month period annualized), multiplied by the average account value over the period, multiplied by 184/365 (to reflect the one-half year period).

### Related Party Transactions, Fees and Expenses

Accrued fees payable to affiliates for the period ended December 31, 2019 were as follows:

Advisory fees	\$ 635,164
Administration fees	39,698
Transfer agent fees	3,494
Trustee fees	4,589
	<u>\$ 682,945</u>

Transactions (amounts in thousands) during the period ended December 31, 2019 with Underlying Funds which are, or were, an affiliated company are as follows:

	Fair Value, Beginning of Period	Purchases	Sales	Realized Gain (Loss)	Change in Unrealized Gain (Loss)	Fair Value, End of Period	Income Distributions	Capital Gains Distributions
U.S. Cash Management Fund	\$ 18,169	\$ 232,910	\$ 213,251	\$ 5	\$ (1)	\$ 37,832	\$ 530	\$ —
U.S. Cash Collateral Fund	2,813	146,702	119,571	—	—	29,944	419	—
	<u>\$ 20,982</u>	<u>\$ 379,612</u>	<u>\$ 332,822</u>	<u>\$ 5</u>	<u>\$ (1)</u>	<u>\$ 67,776</u>	<u>\$ 949</u>	<u>\$ —</u>

### Federal Income Taxes

At December 31, 2019, the cost of investments and net unrealized appreciation (depreciation), undistributed ordinary income and undistributed long-term capital gains for income tax purposes were as follows:

Cost of Investments	Unrealized Appreciation	Unrealized Depreciation	Net Unrealized Appreciation (Depreciation)	Undistributed Ordinary Income	Undistributed Long-Term Capital Gains (Capital Loss Carryforward)
\$ 849,652,379	\$ 128,917,279	\$ (3,424,290)	\$ 125,492,989	\$ —	\$ (1,118,050)

For the fiscal years ended December 31, 2019 and December 31, 2018 respectively, the Fund made the following tax basis distributions:

December 31, 2019			December 31, 2018		
Ordinary Income Distributions	Long-Term Capital Gain Distributions	Return of Capital	Ordinary Income Distributions	Long-Term Capital Gain Distributions	Return of Capital
\$ 46,690,134	\$ —	\$ —	\$ 39,290,345	\$ 1,093,348	\$ —

Net investment income and net realized gains (losses) in the financial statements may differ from taxable net investment income and net realized gains (losses). Capital accounts within the financial statements are adjusted for permanent book-tax differences. Book-tax differences are primarily due to foreign currency gains and losses, reclassifications of dividends, differences in treatment of income from swaps, net operating losses, investments in partnerships, investments in passive foreign investment companies (PFICs), tax straddle transaction, use of tax equalization and foreign capital gains taxes. These adjustments have no impact on the net assets.

At December 31, 2019, Assets and Liabilities have been adjusted by the following amount (in thousands):

Total distributable earnings (losses)	\$ 2,191
Additional paid-in capital	(2,191)

See accompanying notes which are an integral part of the financial statements.

## Notes to Financial Statements — December 31, 2019

---

### 1. Organization

Russell Investment Funds (the “Investment Company” or “RIF”) is a series investment company with nine different investment portfolios referred to as funds (each a “Fund” and collectively the “Funds”). These financial statements report on five of these Funds. The Investment Company provides the investment base for one or more variable insurance products issued by one or more insurance companies. These Funds are offered at net asset value (“NAV”) to qualified insurance company separate accounts offering variable insurance products. The Investment Company is registered under the Investment Company Act of 1940, as amended (“Investment Company Act”), as an open-end management investment company. It is organized and operated as a Massachusetts business trust under a Second Amended and Restated Master Trust Agreement dated March 1, 2018, as amended (“Master Trust Agreement”), and the provisions of Massachusetts law governing the operation of a Massachusetts business trust. The Investment Company’s Master Trust Agreement permits the Board of Trustees (the “Board”) to issue an unlimited number of shares of beneficial interest. Each of the Funds is diversified. Under the Investment Company Act, a diversified company is defined as a management company which meets the following requirements: at least 75% of the value of its total assets is represented by cash and cash equivalents (including receivables), government securities, securities of other investment companies, and other securities for the purposes of this calculation limited in respect of any one issuer to an amount not greater in value than five percent of the value of the total assets of such management company and to not more than 10% of the outstanding voting securities of such issuer.

### 2. Significant Accounting Policies

The Funds’ financial statements are prepared in accordance with U.S. generally accepted accounting principles (“U.S. GAAP”) which require the use of management estimates and assumptions at the date of the financial statements. Actual results could differ from those estimates. The Funds are considered investment companies under U.S. GAAP and follow the accounting and reporting guidance applicable to investment companies. The following is a summary of the significant accounting policies consistently followed by each Fund in the preparation of its financial statements.

In August 2018, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2018-13, Fair Value Measurement (Topic 820): Disclosure Framework - Changes to the Disclosure Requirements for Fair Value Measurements. The amendments in the ASU modify the disclosure requirements on fair value measurements in Topic 820. The ASU is effective for interim and annual reporting periods beginning after December 15, 2019. Management has evaluated the impact and believes the adoption of this ASU will not have a material impact on financial statements.

In March 2017, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2017-08, Receivables - Nonrefundable Fees and Other Costs (Subtopic 310-20) - Premium Amortization on Purchased Callable Debt Securities. The amendments in this update shorten the amortization period for certain callable debt securities held at a premium. Management has adopted the ASU and there was no material impact to the financial statements.

#### Security Valuation

The Funds value portfolio securities according to Board-approved securities valuation procedures which include market and fair value procedures. The Board has delegated the responsibility for administration of the securities valuation procedures to Russell Investments Fund Services, LLC (“RIFUS”).

U.S. GAAP defines fair value as the price that a Fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. It establishes a fair value hierarchy that prioritizes inputs to valuation methods and requires a separate disclosure of the fair value hierarchy for each major category of assets and liabilities, that segregates fair value measurements into levels (Level 1, 2, and 3). The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. Levels 1, 2 and 3 of the fair value hierarchy are defined as follows:

- Level 1 — Quoted prices (unadjusted) in active markets or exchanges for identical assets and liabilities.
- Level 2 — Inputs other than quoted prices included within Level 1 that are observable, which may include, but are not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, and inputs such as interest rates, yield curves, implied volatilities, credit spreads or other market corroborated inputs.
- Level 3 — Significant unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include assumptions made by RIFUS, acting at the discretion of the Board, that are used in determining the fair value of investments.

# Russell Investment Funds

## Notes to Financial Statements, continued — December 31, 2019

---

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, for example, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgement. Accordingly, the degree of judgement exercised in determining fair value is greatest for instruments categorized in Level 3. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

The valuation techniques and significant inputs used in determining the fair market values of financial instruments categorized as Level 1 and Level 2 of the fair value hierarchy are as follows:

Equity securities, including common and preferred stock, short securities, ETFs and restricted securities that are traded on a national securities exchange (or reported on the NASDAQ national market), are stated at the last reported sales price on the day of valuation or official closing price, as applicable. To the extent these securities are actively traded, and valuation adjustments are not applied, they are categorized as Level 1 of the fair value hierarchy. Preferred stock and other equities traded on inactive markets or valued by reference to similar instruments are categorized as Level 2 of the fair value hierarchy. Certain foreign equity securities may be fair valued using a pricing service that considers the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, exchange-traded funds, and the movement of certain indexes of securities, based on the statistical analysis of historical relationships. Foreign equity securities prices as described above are categorized as Level 2 of the fair value hierarchy.

Fixed income securities including corporate, convertible, U.S. government agency, municipal bonds and notes, U.S. treasury obligations, sovereign issues, bank loans, bank notes and non-U.S. bonds are normally valued by pricing service providers that use broker dealer quotations or valuation estimates from their internal pricing models. The pricing service providers' internal models use inputs that are observable such as issuer details, interest rates, yield curves, prepayment speeds, credit risks/spreads and default rates. Such fixed income securities that use pricing service internal models as described above are categorized as Level 2 of the fair value hierarchy. Such fixed income securities that use broker dealer quotations are categorized as Level 3 of the fair value hierarchy.

Fixed income securities purchased on a delayed-delivery basis and marked-to-market daily until settlement at the forward settlement date are categorized as Level 2 of the fair value hierarchy.

Mortgage and asset-backed securities are usually issued as separate tranches, or classes, of securities within each deal. These securities are also normally valued by pricing service providers that use broker dealer quotations or valuation estimates from their internal pricing models. The pricing models for these securities usually consider tranche-level attributes, including estimated cash flows of each tranche, market-based yield spreads for each tranche, and current market data, as well as incorporate deal collateral performance, as available. Mortgage and asset-backed securities that use these and similar valuation techniques and inputs as described above are categorized as Level 2 of the fair value hierarchy.

Investments in investment funds that are not traded on a national securities exchange will be valued based upon the NAV of such investments. The Funds have adopted the authoritative guidance under U.S. GAAP for estimating the fair value of investments in funds that have calculated NAV per share in accordance with the specialized accounting guidance for investment companies. Accordingly, the Funds estimate the fair value of an investment in a fund using the NAV per share without further adjustment as a practical expedient, if the NAV per share of the investment is determined in accordance with the specialized accounting guidance for investment companies as of the reporting entity's measurement date.

Short-term investments having a maturity of 60 days or less are generally valued at amortized cost, which approximates fair market value. These investments are categorized as Level 2 of the fair value hierarchy.

Derivative instruments are instruments such as foreign currency contracts, futures contracts, options contracts, or swap agreements that derive their value from underlying asset prices, indices, reference rates, and other inputs or a combination of these factors. Derivatives may be classified into two groups depending upon the way that they are traded: privately traded over-the-counter ("OTC") derivatives that do not go through an exchange or intermediary and exchange-traded derivatives that are traded through specialized derivatives exchanges or other regulated exchanges. OTC derivatives are normally valued on the basis of broker dealer quotations or pricing service providers. Depending on the product and the terms of the transaction, the value of the derivative

## Notes to Financial Statements, continued — December 31, 2019

---

instrument can be estimated by a pricing service provider using a series of techniques, including simulation pricing models. The pricing models use inputs that are observed from actively quoted markets such as issuer details, indices, spreads, interest rates, yield curves, dividends and exchange rates. OTC derivatives that use these and similar valuation techniques and inputs as described above are categorized as Level 2 of the fair value hierarchy, with the exception of foreign currency spot contracts which are categorized as Level 1 of the fair value hierarchy. OTC derivatives that use broker dealer quotations are categorized as level 3 of the fair value hierarchy. Exchange-traded derivatives are valued based on the last reported sales price on the day of valuation and are categorized as Level 1 of the fair value hierarchy.

Centrally cleared swaps listed or traded on a multilateral or trade facility platform, such as a registered exchange, are valued at the daily settlement price determined by the respective exchange. For centrally cleared credit default swaps, the clearing facility requires its members to provide actionable levels across complete term structures. These levels along with external third-party prices are used to produce daily settlement prices. These securities are categorized as Level 2 of the fair value hierarchy. Centrally cleared interest rate swaps are valued using a pricing model that references the underlying rates including the Overnight Index Swap ("OIS") rate and London Interbank Offered Rate ("LIBOR") forward rate to produce the daily settlement price. These securities are categorized as Level 2 of the fair value hierarchy.

Events or circumstances affecting the values of Fund securities that occur between the closing of the principal markets on which they trade and the time the NAV of Fund shares is determined may be reflected in the calculation of NAV for each applicable Fund when the Fund deems that the particular event or circumstance would materially affect such Fund's NAV. Funds that invest primarily in frequently traded exchange-listed securities will use fair value pricing in limited circumstances since reliable market quotations will often be readily available. Funds that invest in foreign securities use fair value pricing daily as events may occur between the close of foreign markets and the time of pricing. Although there are observable inputs assigned on a security level, prices are derived from factors using proprietary models or matrix pricing. For this reason, fair value factors will cause movement between Levels 1 and 2. Significant events that could trigger fair value pricing of one or more securities include: a company development such as a material business development; a natural disaster or emergency situation; or an armed conflict.

The NAV of a Fund's portfolio that includes foreign securities may change on days when shareholders will not be able to purchase or redeem Fund shares, since foreign securities can trade on non-business days.

For movements between the levels within the fair value hierarchy, the Funds have adopted a policy of recognizing the transfers as of period end.

The U.S. Strategic Equity, U.S. Small Cap Equity, International Developed Markets and Global Real Estate Securities Funds had no transfers between Levels 1, 2, and 3 for the period ended December 31, 2019.

The Strategic Bond Fund had transfers out of Level 3 into Level 2 representing financial instruments for which approved pricing became available. The amount transferred was \$68,895.

### Level 3 Fair Value Investments

The valuation techniques and significant inputs used in determining the fair values of financial instruments classified as Level 3 of the fair value hierarchy are as follows:

Securities and other assets for which market quotes are not readily available, or are not reliable, are valued at fair value as determined in good faith by RIFUS and are categorized as Level 3 of the fair value hierarchy. Market quotes are considered not readily available in circumstances where there is an absence of current or reliable market-based data (e.g., trade information or broker quotes). When RIFUS applies fair valuation methods that use significant unobservable inputs to determine a Fund's NAV, securities will not be priced on the basis of quotes from the primary market in which they are traded, but instead may be priced by another method that RIFUS believes accurately reflects fair value and will be categorized as Level 3 of the fair value hierarchy. Fair value pricing may require subjective determinations about the value of a security. While the securities valuation procedures are intended to result in a calculation of a Fund's NAV that fairly reflects security values as of the time of pricing, the process cannot guarantee that fair values determined by RIFUS would accurately reflect the price that a Fund could obtain for a security if it were to dispose of that security as of the time of pricing (for instance, in a forced or distressed sale). The prices used by a Fund may differ from the value that would be realized if the security was sold.

RIFUS employs third-party pricing vendors to provide fair value measurements. RIFUS oversees third-party pricing service providers in order to support the valuation process throughout the year.

# Russell Investment Funds

## Notes to Financial Statements, continued — December 31, 2019

---

The significant unobservable inputs used in fair value measurement of certain of the Funds' private equity securities include market data of comparable public companies, discount rates, EBITDA multiples, and future projected cash flows for the portfolio company. These inputs are utilized in valuation models that are based on market analysis and discounted cash flow methodologies. Significant increases or decreases in the unobservable inputs would have a direct and proportional impact to fair value.

The significant unobservable input used in the fair value measurement of certain Funds' debt securities is the yield to worst ratio. Significant increases (decreases) in the yield to worst ratio would result in a lower (higher) fair value measurement.

These significant unobservable inputs are further disclosed in the Presentation of Portfolio Holdings for each respective Fund as applicable.

If third-party evaluated vendor pricing is neither available nor deemed to be indicative of fair value, RIFUS may elect to obtain indicative market quotations ("broker quotes") directly from the broker or passed through from a third-party vendor. In the event that the source of fair value is from a single source broker quote, these securities are classified as Level 3 per the fair value hierarchy. Broker quotes are typically received from established market participants. Although independently received on a daily basis, RIFUS does not have the transparency to view the underlying inputs which support the broker quotes. Significant changes in the broker quote would have direct and proportional changes in the fair value of the security. There is a third-party pricing exception to the quantitative disclosure requirement when prices are not determined by the reporting entity. RIFUS is exercising this exception and has made a reasonable attempt to obtain quantitative information from the third-party pricing vendors regarding the unobservable inputs used.

For fair valuations using significant unobservable inputs, U.S. GAAP requires a reconciliation of the beginning to ending balances for reported fair values that present changes attributable to total realized and unrealized gains or losses, purchases and sales, and transfers in/out of the Level 3 category during the period. Additionally, U.S. GAAP requires quantitative information regarding the significant unobservable inputs used in the determination of fair value of assets categorized as Level 3 in the fair value hierarchy. In accordance with the requirements of U.S. GAAP, a fair value hierarchy, a Level 3 reconciliation and an additional disclosure about fair value measurements, if any, has been included in the Presentation of Portfolio Holdings for each respective Fund.

### Investment Transactions

Investment transactions are reflected as of the trade date for financial reporting purposes. This may cause the NAV stated in the financial statements to be different from the NAV at which shareholders may transact. Realized gains and losses from securities transactions, if applicable, are recorded on the basis of specific identified cost.

### Investment Income

Dividend income is recorded net of applicable withholding taxes on the ex-dividend date, except that certain dividends from foreign securities are recorded as soon as the Funds are informed of the dividend, subsequent to the ex-dividend date. To the extent the dividend represents a return of capital or capital gain for tax purposes, reclassifications are made which may be based on management's estimates. Interest income is recorded daily on the accrual basis. The Strategic Bond Fund classifies gains and losses realized on prepayments received on mortgage-backed securities as an adjustment to interest income. All premiums and discounts, including original issue discounts, are amortized/ accreted using the effective interest method. Debt obligation securities may be placed in a non-accrual status and related interest income may be reduced by stopping current accruals and writing off interest receivable when the collection of all or a portion of interest has become doubtful.

### Federal Income Taxes

Since the Investment Company is a Massachusetts business trust, each Fund is a separate corporate taxpayer and determines its net investment income and capital gains (or losses) and the amounts to be distributed to each Fund's shareholders without regard to the income and capital gains (or losses) of the other Funds.

For each year, each Fund intends to qualify or continue to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code") and intends to distribute all of its taxable income and capital gains. Therefore, no federal income tax provision is required for the Funds.

The Funds comply with the authoritative guidance for uncertainty in income taxes which requires management to determine whether a tax position of the Funds is more likely than not to be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. For tax positions meeting the more likely than not threshold, the tax amount recognized in the financial statements is reduced by the largest benefit that has a greater than 50% likelihood of being

# Russell Investment Funds

## Notes to Financial Statements, continued — December 31, 2019

realized upon ultimate settlement with the relevant taxing authority. Management determined that no accruals need to be made in the financial statements due to uncertain tax positions. Management continually reviews and adjusts the Funds' liability for income taxes based on analyses of tax laws and regulations, as well as their interpretations, and other relevant factors.

Each Fund files a U.S. tax return. At December 31, 2019, the Funds had recorded no liabilities for net unrecognized tax benefits relating to uncertain income tax positions they have taken or expect to take in future tax returns. While the statute of limitations remains open to examine the Funds' U.S. tax returns filed for the fiscal years ended December 31, 2016 through December 31, 2018, no examinations are in progress or anticipated at this time. The Funds are not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

### Dividends and Distributions to Shareholders

For all Funds, income, capital gain distributions and return of capital, if any, are recorded on the ex-dividend date. Income distributions are generally declared and paid according to the following schedule:

Declared	Payable	Funds
Quarterly	April, July, October and mid-December	U.S. Strategic Equity, U.S. Small Cap Equity, Strategic Bond and Global Real Estate Securities Funds
Annually	Mid-December	International Developed Markets Fund

The Funds intend to distribute substantially all of the distributions they receive from real estate investment trust ("REIT") investments, less expenses, as well as income from other investments. Such distributions may be comprised of income, return of capital, and capital gains. The Funds may also realize capital gains on the sale of its REIT shares and other investments.

Capital gain distributions are generally declared and paid annually. An additional distribution may be paid by the Funds to avoid imposition of federal income and excise tax on any remaining undistributed capital gains and net investment income.

The timing and characterization of certain income and capital gain distributions are determined in accordance with federal tax regulations which may differ from U.S. GAAP. As a result, net investment income and net realized gain (or loss) on investments and foreign currency-related transactions for a reporting period may differ significantly from distributions during such period. The differences between tax regulations and U.S. GAAP primarily relate to investments in options, futures, forward contracts, swap contracts, passive foreign investment companies, foreign-denominated investments, mortgage-backed securities, certain securities sold at a loss, wash sale deferrals and capital loss carryforwards. Accordingly, the Funds may periodically make reclassifications among certain of their capital accounts without impacting their NAVs.

### Expenses

The Funds pay their own expenses other than those expressly assumed by Russell Investment Management, LLC ("RIM"), the Funds' adviser, or RIFUS. Most expenses can be directly attributed to the individual Funds. Expenses which cannot be directly attributed to a specific Fund are allocated among all Funds principally based on their relative net assets.

### Foreign Currency Translations

The books and records of the Funds are maintained in U.S. dollars. Foreign currency amounts and transactions of the Funds are translated into U.S. dollars on the following basis:

- Fair value of investment securities, other assets and liabilities at the closing rate of exchange on the valuation date.
- Purchases and sales of investment securities and income at the closing rate of exchange prevailing on the respective trade dates of such transactions.

Net realized gains or losses from foreign currency-related transactions arise from: sales and maturities of short-term securities; sales of foreign currencies; currency gains or losses realized between the trade and settlement dates on securities transactions; the difference between the amounts of dividends, interest, and foreign withholding taxes recorded on the Funds' books and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized gains or losses from foreign currency-related transactions arise from changes in the value of assets and liabilities, other than investments in securities, as a result of changes in the exchange rates.

The Funds do not isolate that portion of the results of operations of the Funds that arises as a result of changes in exchange rates from that portion that arises from changes in market prices of investments during the year. Such fluctuations are included with the net realized and unrealized gain or loss from investments. However, for federal income tax purposes, the Funds do isolate the effects

# Russell Investment Funds

## Notes to Financial Statements, continued — December 31, 2019

of changes in foreign exchange rates from the fluctuations arising from changes in market prices for realized gain (or loss) on debt obligations.

### Capital Gains Taxes

The Funds may be subject to capital gains taxes and repatriation taxes imposed by certain countries in which they invest. The International Developed Markets and Global Real Estate Securities Funds may record a deferred capital gains tax liability with respect to the unrealized appreciation on foreign securities for potential capital gains and repatriation taxes at December 31, 2019. The accrual for capital gains and repatriation taxes is included in net unrealized appreciation (depreciation) on investments in the Statements of Assets and Liabilities. The amounts related to capital gains and repatriation taxes are included in net realized gain (loss) on investments in the Statements of Operations for the following Funds:

	Deferred Capital Gains Tax Liability	Capital Gains Taxes
International Developed Markets Fund	\$ 5,779	\$ 1,194
Strategic Bond Fund	11,792	—

### Derivatives

The Funds may invest in derivatives. Derivatives are instruments or agreements whose value is derived from an underlying security or index. They include options, futures, swaps and forwards. These instruments offer unique characteristics and risks that facilitate the Funds' investment strategies.

The Funds typically use derivatives in three ways: exposing cash to markets, hedging and return enhancement. In addition, certain Funds may enter into foreign exchange contracts for trade settlement purposes. The Funds may pursue their strategy of being fully invested by exposing cash to the performance of appropriate markets by purchasing securities and/or derivatives. This is intended to cause the Funds to perform as though cash were actually invested in those markets.

Hedging may be used by certain Funds to limit or control risks, such as adverse movements in exchange rates and interest rates. Return enhancement can be accomplished through the use of derivatives in a Fund, including using derivatives as a substitute for holding physical securities, and using them to express various macro views (e.g., interest rate movements, currency movements, and macro credit strategies). By purchasing certain instruments, the Funds may more effectively achieve the desired portfolio characteristics that assist them in meeting their investment objectives. Depending on how the derivatives are structured and utilized, the risks associated with them may vary widely. These risks include, but are not limited to, market risk, liquidity risk, leveraging risk, counterparty risk, basis risk, reinvestment risk, political risk, prepayment risk, extension risk, valuation risk and credit risk.

Futures, certain options and cleared swaps are traded or cleared on an exchange or central exchange clearing house. Exchange-traded or exchange-cleared transactions generally present less counterparty risk to a Fund. The exchange's clearing house stands between the Fund and the broker to the contract and therefore, credit risk is generally limited to the failure of the clearing house and the clearing member. Cleared swap contracts are subject to clearing house rules, including initial and variation margin requirement, daily settlement of obligations and the clearing house guarantee of payments to the broker. There is, however, still counterparty risk due to the insolvency of the broker with respect to any margin held in the brokers' customer accounts. While clearing members are required to segregate customer assets from their own assets, in the event of insolvency, there may be a shortfall in the amount of margin held by the broker for its clients. Collateral and margin requirements for exchange-traded or exchange-cleared derivatives are established through regulation, as well as set by the broker or applicable clearing house. Margin for exchange-traded and exchange-cleared transactions are detailed in the Statement of Assets and Liabilities as Receivables for Variation margin on future contracts and Payables for Variation margin on futures contracts. Securities and cash pledged as collateral are reflected as assets on the Statements of Assets and Liabilities as either a component of Investments at fair value (securities) or Receivable from broker. Cash collateral received is not typically held in a segregated account and as such is reflected as a liability on the Statement of Assets and Liabilities as Due to broker. Typically, the Funds and counterparties are not permitted to sell, repledge, rehypothecate or otherwise use collateral pledged by the other party unless explicitly permitted by each respective governing agreement.

In addition, proposed regulatory changes by the Securities and Exchange Commission ("SEC") relating to a mutual fund's use of derivatives could potentially limit or impact the Funds' ability to invest in derivatives and adversely affect the value or performance of the Funds or their derivative investments.

# Russell Investment Funds

## Notes to Financial Statements, continued — December 31, 2019

The effects of derivative instruments, categorized by risk exposure, on the Statement of Assets and Liabilities and the Statement of Operations, for the period ended December 31, 2019, if applicable, are disclosed in the Fair Value of Derivative Instruments table following each applicable Fund's Schedule of Investments.

### Foreign Currency Exchange Contracts

Certain Funds may enter into foreign currency exchange spot contracts and forward foreign currency exchange contracts ("FX contracts"). From time to time, certain Funds may enter into FX contracts to hedge certain foreign currency-denominated assets. FX contracts are recorded at fair value. Certain risks may arise upon entering into these FX contracts from the potential inability of counterparties to meet the terms of their FX contracts and are generally limited to the amount of unrealized gain on the FX contracts, if any, that are disclosed in the Statements of Assets and Liabilities.

For the period ended December 31, 2019, the following Funds entered into foreign currency exchange contracts primarily for the strategies listed below:

Funds	Strategies
International Developed Markets Fund	Return enhancement, hedging, exposing cash to markets, and trade settlement
Strategic Bond Fund	Return enhancement and hedging
Global Real Estate Securities Fund	Exposing cash to markets and trade settlement

The Funds' foreign currency contract notional dollar values outstanding fluctuate throughout the fiscal year as required to meet strategic requirements. The following tables illustrate the quarterly volume of foreign currency contracts. For the purpose of this disclosure, volume is measured by the amounts bought and sold in USD.

Quarter Ended	Outstanding Contract Amounts Sold			
	March 31, 2019	June 30, 2019	September 30, 2019	December 31, 2019
International Developed Markets Fund	\$ 166,952,447	\$ 108,530,104	\$ 68,435,457	\$ 68,753,406
Strategic Bond Fund	276,761,776	346,905,191	406,773,970	303,162,633
Global Real Estate Securities Fund	13,077,807	9,690,876	29,934,621	20,756,946

Quarter Ended	Outstanding Contract Amounts Bought			
	March 31, 2019	June 30, 2019	September 30, 2019	December 31, 2019
International Developed Markets Fund	\$ 166,988,286	\$ 108,684,111	\$ 67,845,339	\$ 69,080,121
Strategic Bond Fund	281,153,505	338,223,071	407,769,462	302,932,646
Global Real Estate Securities Fund	13,018,690	9,698,703	29,658,735	20,831,583

### Options

Certain Funds may purchase and sell (write) call and put options on securities and securities indices. Such options are traded on a national securities exchange or in an OTC market. The Funds may also purchase and sell (write) call and put options on foreign currencies.

When a Fund writes a covered call or a put option, an amount equal to the premium received by the Fund is included in the Fund's Statement of Assets and Liabilities as an asset and as an equivalent liability. The amount of the liability is subsequently marked-to-market to reflect the current fair value of the option written. The Fund receives a premium on the sale of a call option but gives up the opportunity to profit from any increase in the value of the underlying instrument above the exercise price of the option, and when the Fund writes a put option it is exposed to a decline in the price of the underlying instrument.

When a Fund sells an uncovered call option, it does not simultaneously have a long position in the underlying security. When a Fund sells an uncovered put option, it does not simultaneously have a short position in the underlying security. Uncovered options are riskier than covered options because there is no underlying security held by the Fund that can act as a partial hedge.

Whether an option which the Fund has written expires on its stipulated expiration date or the Fund enters into a closing purchase transaction, the Fund realizes a gain (or loss, if the cost of a closing purchase transaction exceeds the premium received when the option was sold) without regard to any unrealized gain or loss on the underlying security, and the liability related to such option is extinguished. If a call option which the Fund has written is exercised, the Fund realizes a capital gain or loss from the sale of the underlying security, and the proceeds from such sale are increased by the premium originally received. When a put option which a Fund has written is exercised, the amount of the premium originally received will reduce the cost of the security which a Fund purchases upon exercise of the option.

# Russell Investment Funds

## Notes to Financial Statements, continued — December 31, 2019

The Funds' use of written options involves, to varying degrees, elements of market risk in excess of the amount recognized in the Statements of Assets and Liabilities. The face or contract amounts of these instruments reflect the extent of the Funds' exposure to market risk. The risks may be caused by an imperfect correlation between movements in the price of the instrument and the price of the underlying securities and interest rates.

Certain Funds may enter into a swaption (an option on a swap). In a swaption, in exchange for an option, the buyer gains the right but not the obligation to enter into a specified swap agreement with the issuer on a specified future date. The writer of the contract receives the premium and bears the risk of unfavorable changes in the preset rate on the underlying swap.

For the period ended December 31, 2019, the Strategic Bond Fund purchased/sold options primarily for return enhancement and hedging.

The Strategic Bond Fund's options contracts notional amounts fluctuate throughout the fiscal year as required to meet strategic requirements. The following table illustrates the quarterly volume of options contracts measured by notional in USD.

Funds	Notional of Options Contracts Outstanding			
	March 31, 2019	June 30, 2019	September 30, 2019	December 31, 2019
Strategic Bond Fund	\$ 16,412,750	\$ 58,192,750	\$ 47,490,500	\$ 26,562,750

### Futures Contracts

The Funds may invest in futures contracts (i.e., interest rate, foreign currency and index futures contracts). The face or contract value of these instruments reflect the extent of the Funds' exposure to off balance sheet risk. The primary risks associated with the use of futures contracts are an imperfect correlation between the change in fair value of the securities held by the Funds and the prices of futures contracts, and the possibility of an illiquid market. Upon entering into a futures contract, the Funds are required to deposit with a broker an amount, termed the initial margin, which typically represents 5% to 10% of the purchase price indicated in the futures contract. Payments to and from the broker, known as variation margin, are typically required to be made on a daily basis as the price of the futures contract fluctuates. Changes in initial settlement value are accounted for as unrealized appreciation (depreciation) until the contracts are terminated, at which time realized gains and losses are recognized.

For the period ended December 31, 2019, the following Funds entered into futures contracts primarily for the strategies listed below:

Funds	Strategies
U.S. Strategic Equity Fund	Exposing cash to markets
U.S. Small Cap Equity Fund	Exposing cash to markets
International Developed Markets Fund	Return enhancement, hedging and exposing cash to markets
Strategic Bond Fund	Return enhancement, hedging and exposing cash to markets
Global Real Estate Securities Fund	Exposing cash to markets

The Funds' futures contracts notional amounts fluctuate throughout the fiscal year as required to meet strategic requirements. The following table illustrates the quarterly volume of futures contracts measured by notional in USD.

Funds	Notional of Futures Contracts Outstanding			
	March 31, 2019	June 30, 2019	September 30, 2019	December 31, 2019
U.S. Strategic Equity Fund	\$ 6,243,160	\$ 7,066,080	\$ 1,936,025	\$ 8,885,525
U.S. Small Cap Equity Fund	2,006,940	7,600,435	5,185,000	8,102,410
International Developed Markets Fund	118,377,117	112,050,501	109,639,209	114,067,224
Strategic Bond Fund	584,543,689	679,752,543	775,144,815	884,234,682
Global Real Estate Securities Fund	21,319,343	18,589,439	47,941,057	41,679,030

### Swap Agreements

Certain Funds may enter into swap agreements, on either an asset-based or liability-based basis, depending on whether they are hedging their assets or their liabilities, and will usually enter into swaps on a net basis (i.e., the two payment streams are netted out, with the Funds receiving or paying only the net amount of the two payments). When a Fund engages in a swap, it exchanges its obligations to pay or rights to receive payments for the obligations to pay or rights to receive payments of another party (i.e., an exchange of floating rate payments for fixed rate payments).

Certain Funds may enter into several different types of swap agreements including credit default, interest rate, total return (equity and/or index) and currency swaps. Credit default swaps are a counterparty agreement which allows the transfer of third-party credit

risk (the possibility that an issuer will default on its obligation by failing to pay principal or interest in a timely manner) from one party to another. The lender faces the credit risk from a third-party and the counterparty in the swap agrees to insure this risk in exchange for regular periodic payments. Interest rate swaps are a counterparty agreement, can be customized to meet each party's needs, and involve the exchange of a fixed or variable payment per period for a payment that is not fixed. Total return swaps are a counterparty agreement where two parties exchange two sets of cash flows on predetermined dates for an agreed upon amount of time. The cash flows will typically be an equity index value swapped with a floating rate such as LIBOR plus or minus a pre-defined spread. Total return swap agreements are a counterparty agreement intended to expose cash to markets or to effect investment transactions consistent with those Funds' investment objectives and strategies. Currency swaps are a counterparty agreement where two parties exchange specified amounts of different currencies which are followed by each paying the other a series of interest payments that are based on the principal cash flow. At maturity the principal amounts are returned.

The Funds generally expect to enter into these transactions primarily to preserve a return or spread on a particular investment or portion of their portfolios or to protect against any increase in the price of securities they anticipate purchasing at a later date, or for return enhancement. Under most swap agreements entered into by a Fund, the parties' obligations are determined on a "net basis". The net amount of the excess, if any, of the Funds' obligations over their entitlements with respect to each swap will be accrued on a daily basis and an amount of cash or liquid assets having an aggregate NAV at least equal to the accrued excess will be segregated. To the extent that the Funds enter into swaps on other than a net basis, the amount maintained in a segregated account will be the full amount of the Funds' obligations, if any, with respect to such swaps, accrued on a daily basis. If there is a default by the other party to such a transaction, the Funds will have contractual remedies pursuant to the agreement related to the transaction.

A Fund may not receive the expected amount under a swap agreement if the other party to the agreement defaults or becomes bankrupt.

### Credit Default Swaps

The Strategic Bond Fund may enter into credit default swaps. A credit default swap can refer to corporate issues, government issues, asset-backed securities or an index of assets, each known as the reference entity or underlying asset. The Fund may act as either the buyer or the seller of a credit default swap involving one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a default or other credit event. Depending upon the terms of the contract, the credit default swap may be closed via physical settlement. However, due to the possible or potential instability in the market, there is a risk that the Fund may be unable to deliver the underlying debt security to the other party to the agreement. Additionally, the Fund may not receive the expected amount under the swap agreement if the other party to the agreement defaults or becomes bankrupt. In an unhedged credit default swap, the Fund enters into a credit default swap without owning the underlying asset or debt issued by the reference entity. Credit default swaps allow the Fund to acquire or reduce credit exposure to a particular issuer, asset or basket of instruments.

As the seller of protection in a credit default swap, the Fund would be required to pay the par or other agreed-upon value (or otherwise perform according to the swap contract) of a reference debt obligation to the counterparty in the event of a default (or other specified credit event) and the counterparty would be required to surrender the reference debt obligation. In return, the Fund would receive from the counterparty a periodic stream of payments over the term of the contract provided that no credit event has occurred. If no credit event occurs, the Fund would keep the stream of payments and would have no payment obligations. As a seller of protection, the Fund would effectively add leverage to its portfolio because in addition to its total net assets, that Fund would be subject to investment exposure on the notional amount of the swap.

The Fund may also purchase protection via credit default swap contracts in order to offset the risk of default of debt securities held in their portfolios or to take a short position in a debt security, in which case the Fund would function as the counterparty referenced in the preceding paragraph.

If a credit event occurs and cash settlement is not elected, a variety of other deliverable obligations may be delivered in lieu of the specific referenced obligation. The ability to deliver other obligations may result in a cheapest-to-deliver option (the buyer of protection's right to choose the deliverable obligation with the lowest value following a credit event). The Fund may use credit default swaps to provide a measure of protection against defaults of the issuers (i.e., to reduce risk where the Fund owns or has exposure to the referenced obligation) or to take an active long or short position with respect to the likelihood (as measured by the credit default swap's spread) of a particular issuer's default.

Deliverable obligations for credit default swaps on asset-backed securities in most instances are limited to the specific referenced obligation as performance for asset-backed securities can vary across deals. Prepayments, principal paydowns, and other writedown

## Notes to Financial Statements, continued — December 31, 2019

---

or loss events on the underlying mortgage loans will reduce the outstanding principal balance of the referenced obligation. These reductions may be temporary or permanent as defined under the terms of the swap agreement and the notional amount for the swap agreement generally will be adjusted by corresponding amounts. The Strategic Bond Fund may use credit default swaps on asset-backed securities to provide a measure of protection against defaults (or other defined credit events) of the referenced obligation or to take an active long or short position with respect to the likelihood of a particular referenced obligation's default (or another defined credit event).

Credit default swap agreements on credit indices involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a write-down, principal shortfall, interest shortfall or default of all or part of the referenced entities comprising the credit index. A credit index is a basket of credit instruments or exposures designed to be representative of some part of the credit market as a whole. These indices are made up of reference credits that are judged by a poll of dealers to be the most liquid entities in the credit default swap market based on the sector of the index. Components of the indices may include, but are not limited to, investment grade securities, high yield securities, asset-backed securities, emerging markets, and/or various credit ratings within each sector. Credit indices are traded using credit default swaps with standardized terms including a fixed spread and standard maturity dates. An index credit default swap references all the names in the index, and if there is a default, the credit event is settled based on that name's weight in the index. The composition of the indices changes periodically, usually every six months, and, for most indices, each name has an equal weight in the index. Traders may use credit default swaps on indices to speculate on changes in credit quality.

Implied credit spreads, represented in absolute terms, utilized in determining the fair value of credit default swap agreements on corporate issues as of period-end are disclosed in the Schedules of Investments and generally serve as an indicator of the current status of the payment/performance risk and represent the likelihood or risk of default (or other defined credit event) for the credit derivative. The implied credit spread of a particular referenced entity reflects the cost of entering into a credit default swap and may include upfront payments required to be made to enter into the agreement. For credit default swap agreements on asset-backed securities and credit indices, the quoted market prices and resulting values serve as the indicator of the current status of the payment/performance risk. Wider credit spreads and increasing fair values, in absolute terms when compared to the notional amount of the swap, generally represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement. The maximum potential amount of future payments (undiscounted) that the Fund as a seller of protection could be required to make under a credit default swap agreement equals the notional amount of the agreement. Notional amounts of all credit default swap agreements outstanding as of December 31, 2019, for which a Fund is the seller of protection are disclosed in the Schedules of Investments. These potential amounts would be partially offset by any recovery values of the respective referenced obligations, upfront payments received upon entering into the agreement, or net amounts received from the settlement of buy protection credit default swap agreements entered into by the Fund for the same referenced entity or entities.

Credit default swaps could result in losses if the Fund does not correctly evaluate the creditworthiness of the company or companies on which the credit default swap is based. Credit default swap agreements may involve greater risks than if the Fund had invested in the reference obligation directly since, in addition to risks relating to the reference obligation, credit default swaps are subject to illiquidity and counterparty risk. The Fund will generally incur a greater degree of risk when it sells a credit default swap than when it purchases a credit default swap. As a buyer of a credit default swap, the Fund may lose its investment and recover nothing should a credit event fail to occur and the swap is held to its termination date. As seller of a credit default swap, if a credit event were to occur, the value of any deliverable obligation received by the Fund, coupled with the upfront or periodic payments previously received, may be less than what it pays to the buyer, resulting in a loss of value to the Fund.

If the creditworthiness of the Fund's swap counterparty declines, the risk that the counterparty may not perform could increase, potentially resulting in a loss to the Fund. To limit the counterparty risk involved in swap agreements, the Fund will only enter into swap agreements with counterparties that meet certain standards of creditworthiness. Although there can be no assurance that the Fund will be able to do so, the Fund may be able to reduce or eliminate its exposure under a swap agreement either by assignment or other disposition, or by entering into an offsetting swap agreement with the same party or another creditworthy party. The Fund may have limited ability to eliminate its exposure under a credit default swap if the credit quality of the reference entity or underlying asset has declined.

For the period ended December 31, 2019, the Strategic Bond Fund entered into credit default swaps primarily for return enhancement, hedging and exposing cash to markets.

# Russell Investment Funds

## Notes to Financial Statements, continued — December 31, 2019

The Strategic Bond Fund's credit default swap contract notional amounts outstanding fluctuate throughout the fiscal year as required to meet strategic requirements. The following table illustrates the quarterly volume of credit default swap contracts. For the purpose of this disclosure, volume is measured by notional amounts outstanding in USD at each quarter end.

Quarter Ended	Credit Default Swap Notional Amounts Outstanding			
	March 31, 2019	June 30, 2019	September 30, 2019	December 31, 2019
Strategic Bond Fund	\$ 36,699,702	\$ 36,190,000	\$ 18,034,200	\$ 24,575,200

### Interest Rate Swaps

The use of interest rate swaps is a highly specialized activity which involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. If RIM or a money manager using this technique is incorrect in its forecast of fair values, interest rates and other applicable factors, the investment performance of a Fund might diminish compared to what it would have been if this investment technique were not used.

Interest rate swaps do not involve the delivery of securities or other underlying assets or principal. Accordingly, the risk of loss with respect to interest rate swaps is limited to the net amount of interest payments that a Fund is contractually obligated to make. Interest rate swaps are traded on exchanges and are subject to central clearing. If the clearing house or futures commission merchant defaults, a Funds' risk of loss consists of the net amount of interest payments that a Fund is contractually entitled to receive. The counterparty risk for cleared derivatives is generally lower than for uncleared derivatives. However, clearing may subject a Fund to increased costs or margin requirements.

For the period ended December 31, 2019, the Strategic Bond Fund entered into interest rate swaps primarily for return enhancement, hedging and exposing cash to markets.

The Strategic Bond Fund's interest rate swap contract notional amounts outstanding fluctuate throughout the fiscal year as required to meet strategic requirements. The following table illustrates the quarterly volume of interest rate swap contracts. For the purpose of this disclosure, volume is measured by the notional amounts outstanding in USD at each quarter end.

	March 31, 2019	June 30, 2019	September 30, 2019	December 31, 2019
Strategic Bond Fund	\$ 60,993,824	\$ 81,003,255	\$ 89,927,991	\$ 100,754,192

### Total Return Swaps

Certain Funds may enter into total return swap agreements to expose cash to markets or to effect investment transactions. Total return swap agreements are two party contracts entered into primarily by institutional investors for periods ranging from a few weeks to more than one year. In a standard total return swap transaction, the two parties agree to exchange the returns (or differentials in rates of return) earned or realized on particular investments or instruments. The returns to be exchanged between the parties are calculated with respect to a "notional amount" (i.e., a specified dollar amount that is hypothetically invested in a "basket" of securities representing a particular index).

For the period ended December 31, 2019, there were no total return swaps held in the Funds.

### Currency Swaps

Certain Funds may enter into currency swap agreements to enhance returns or for hedging purposes. Currency swap agreements are agreements where two parties exchange specified amounts of different currencies which are followed by paying the other a series of interest payments that are based on the principal cash flow. At maturity, the principal amounts are exchanged.

For the period ended December 31, 2019, there were no currency swaps held in the Funds.

### Master Agreements

Certain Funds are parties to International Swaps and Derivatives Association, Inc. Master Agreements ("ISDA Master Agreements") with counterparties that govern transactions in OTC derivative and foreign exchange contracts entered into by the Funds and those counterparties. The ISDA Master Agreements contain provisions for general obligations, representations, agreements, collateral and events of default or termination. Events of termination and default include conditions that may entitle either party to elect to terminate early and cause settlement of all outstanding transactions under the applicable ISDA Master Agreement. Any election to terminate early could be material to the financial statements. Since different types of forward and OTC financial derivative transactions have different mechanics and are sometimes traded out of different legal entities of a particular counterparty organization, each type of transaction may be covered by a different ISDA Master Agreement, resulting in the need for multiple

## Notes to Financial Statements, continued — December 31, 2019

---

agreements with a single counterparty. As the ISDA Master Agreements are specific to unique operations of different asset types, they allow a Fund to net its total exposure to a counterparty in the event of a default with respect to all the transactions governed under a single agreement with a counterparty.

Master Repurchase Agreements (“Master Repo Agreements”) govern transactions between a Fund and select counterparties. The Master Repo Agreements maintain provisions for, among other things, initiation, income payments, events of default, and maintenance of collateral for repurchase and reverse repurchase agreements.

Master Securities Forward Transaction Agreements (“Master Forward Agreements”) govern the considerations and factors surrounding the settlement of certain forward settling transactions, such as delayed delivery by and between a Fund and select counterparties. The Master Forward Agreements maintain provisions for, among other things, initiation and confirmation, payment and transfer, events of default, termination, and maintenance of collateral.

### Disclosure about Offsetting Assets and Liabilities

Balance sheet disclosure is based on various netting agreements between brokers and counterparties, such as ISDA Master Agreements, Master Repo Agreements and Master Forward Agreements. Certain Funds utilize multiple counterparties. The quantitative disclosure begins with disaggregation of counterparties by legal entity and the roll up of the data to reflect a single counterparty in the table within the Funds’ financial statements. Net exposure represents the net receivable (payable) that would be due from/to the counterparty in the event of default. Exposure from OTC derivatives can only be netted across transactions governed under the same Master Agreement with the same legal entity.

### Loan Agreements

The Strategic Bond Fund may invest in direct debt instruments which are interests in amounts owed by corporate, governmental, or other borrowers to lenders or lending syndicates. The Fund’s investments in loans may be in the form of participations in loans or assignments of all or a portion of loans from third parties. A loan is often administered by a bank or other financial institution (the “agent”) that acts as agent for all holders. The agent administers the terms of the loan, as specified in the loan agreement. When investing in a loan participation, the Fund has the right to receive payments of principal, interest and any fees to which it is entitled only from the agent selling the loan agreement and only upon receipt by the agent of payments from the borrower. The Fund generally has no right to enforce compliance with the terms of the loan agreement with the borrower. As a result, the Fund may be subject to the credit risk of both the borrower and the agent that is selling the loan agreement. When the Fund purchases assignments from agents it acquires direct rights against the borrower on the loan. The total amount of unfunded loan commitments as of December 31, 2019 was \$19,710.

### Local Access Products

Certain Funds may invest in local access products, also known as certificates of participation, participation notes or participation interest notes. Local access products are issued by banks or broker-dealers and are designed to replicate the performance of foreign companies or foreign securities markets and can be used by the Fund as an alternative means to access the securities market of a frontier emerging market country. The performance results of local access products will not replicate exactly the performance of the foreign companies or foreign securities markets that they seek to replicate due to transaction and other expenses. Investments in local access products involve certain risks in addition to those associated with a direct investment in the underlying foreign companies or foreign securities markets whose return they seek to replicate. There can be no assurance that there will be a trading market or that the trading price of local access products will equal the underlying value of the foreign company or foreign securities market that it seeks to replicate. The Funds rely on the creditworthiness of the counterparty issuing the local access products and have no rights against the issuer of the underlying security. The Funds minimize this risk by entering into agreements only with counterparties that RIM deems creditworthy. Due to liquidity and transfer restrictions, the secondary markets on which the local access products are traded may be less liquid than the markets for other securities, or may be completely illiquid.

### Credit Linked Notes

Certain Funds may invest in credit linked notes. Credit linked notes are obligations between two or more parties where the payment of principal and/or interest is based on the performance of some obligation, basket of obligations, index or economic indicator (a “reference instrument”). In addition to the credit risk associated with the reference instrument and interest rate risk, the buyer and seller of a credit linked note or similar structured investment are subject to counterparty risk.

## Notes to Financial Statements, continued — December 31, 2019

---

### Short Sales

The U.S. Small Cap Equity Fund may enter into short sale transactions. In a short sale, the seller sells a security that it does not own, typically a security borrowed from a broker or dealer. Because the seller remains liable to return the underlying security that it borrowed from the broker or dealer, the seller must purchase the security prior to the date on which delivery to the broker or dealer is required. The Fund will incur a loss as a result of the short sale if the price of the security increases between the date of the short sale and the date on which the Fund must return the borrowed security. The Fund will realize a gain if the security declines in price between those dates. Short sales expose the Fund to the risk of liability for the fair value of the security that is sold (the amount of which increases as the fair value of the underlying security increases), in addition to the costs associated with establishing, maintaining and closing out the short position.

Although the Fund's potential for gain as a result of a short sale is limited to the price at which it sold the security short less the cost of borrowing the security, its potential for loss is theoretically unlimited because there is no limit to the cost of replacing the borrowed security. When the Fund makes a short sale, the Fund may use all or a portion of the cash proceeds of short sales to purchase other securities or for any other permissible Fund purpose. To the extent necessary to meet collateral requirements, the Fund is required to pledge assets in a segregated account maintained by the Fund's custodian for the benefit of the broker. The Fund also may use securities they own to meet any such collateral obligations. Until the Fund replaces a borrowed security in connection with a short sale, the Fund will: (a) maintain daily a segregated account, containing liquid assets at such a level that the amount deposited in the segregated account will equal the current requirement under Regulation T promulgated by the Board of Governors of the Federal Reserve System under the authority of Sections 7 and 8 of the Securities Exchange Act of 1934, as amended; or (b) otherwise cover its short position in accordance with positions taken by the staff of the Securities and Exchange Commission (e.g., taking an offsetting long position in the security sold short).

The U.S. Small Cap Fund may participate in a reciprocal lending program with State Street through which the Fund is permitted to use cash collateral received in connection with certain security lending activities to finance the Fund's short selling activity. Such arrangements subject the Fund to the risk that the counterparty holding the cash collateral may fail to return it promptly. This risk may be heightened during periods of market stress and volatility, particularly if the type of collateral provided is different than the type of security borrowed (e.g., cash is provided as collateral for a loan of an equity security).

As of December 31, 2019, the market value of the securities on loan through the reciprocal lending program for U.S. Small Cap Equity Fund was \$9,061,091.

As of December 31, 2019, the U.S. Small Cap Equity Fund held \$12,150,947 as collateral for short sales.

### Securities Lending

The Investment Company has a securities lending program whereby each Fund can loan securities with a value up to 33 1/3% of each Fund's total assets. The maturity associated with these securities is considered continuous. The Fund receives cash (U.S. currency), U.S. Government or U.S. Government Agency obligations as collateral against the loaned securities. The collateral cannot be resold, repledged or rehypothecated. As of December 31, 2019, to the extent that a loan was collateralized by cash, such collateral was invested by the securities lending agent, Goldman Sachs Agency Lending ("GSAL"), in the U.S. Cash Collateral Fund, an unregistered fund advised by RIM. The collateral received is recorded on a lending Fund's Statement of Assets and Liabilities along with the related obligation to return the collateral.

Income generated from the investment of cash collateral, less negotiated rebate fees paid to participating brokers, is divided between the Fund and the securities lending agent and is reported as securities lending income on the Fund's Statement of Operations. To the extent that a loan is secured by non-cash collateral, brokers pay the Fund negotiated lenders' fees, which are divided between the Fund and the securities lending agent and are recorded as securities lending income for the Fund. All collateral received will be in an amount at least equal to 102% (for loans of U.S. securities) or 105% (for loans of non-U.S. securities) of the fair value of the loaned securities at the inception of each loan. The fair value of the loaned securities is determined at the close of business of the Fund and any additional required collateral is delivered to the Fund the next day. Should the borrower of the securities fail financially, there is a risk of delay in recovery of the securities or loss of rights in the collateral.

### Emerging Markets Securities

Certain Funds may invest in emerging markets securities. Investing in emerging markets securities can pose some risks different from, and greater than, risks of investing in U.S. or developed markets securities. These risks include: a risk of loss due to exposure to economic structures that are generally less diverse and mature, and to political systems which may have less stability,

## Notes to Financial Statements, continued — December 31, 2019

---

than those of more developed countries; smaller market capitalization of securities markets, which may suffer periods of relative illiquidity; significant price volatility; restrictions on foreign investment; and possible difficulties in the repatriation of investment income and capital. In addition, foreign investors may be required to register the proceeds of sales and future economic or political crises could lead to price controls, forced mergers, expropriation or confiscatory taxation, seizure, nationalization, or creation of government monopolies. The currencies of emerging market countries may experience significant declines against the U.S. dollar, and devaluation may occur subsequent to investments in these currencies by the Funds. Emerging market securities may be subject to currency transfer restrictions and may experience delays and disruptions in settlement procedures. Inflation and rapid fluctuations in inflation rates have had, and may continue to have, negative effects on the economies and securities markets of certain emerging market countries.

### Emerging Markets Debt

The Strategic Bond Fund may invest in emerging markets debt. The Fund's emerging markets debt securities may include obligations of governments and corporations. As with any fixed income securities, emerging markets debt securities are subject to the risk of being downgraded in credit rating due to the risk of default. In the event of a default on any investments in foreign debt obligations, it may be more difficult for the Fund to obtain or to enforce a judgment against the issuers of such securities. With respect to debt issued by emerging market governments, such issuers may be unwilling to pay interest and repay principal when due, either due to an inability to pay or submission to political pressure not to pay, and as a result may default, declare temporary suspensions of interest payments or require that the conditions for payment be renegotiated.

### Repurchase Agreements

The Strategic Bond Fund may enter into repurchase agreements. A repurchase agreement is an agreement under which a Fund acquires a fixed income security from a commercial bank, broker or dealer and simultaneously agrees to resell such security to the seller at an agreed upon price and date (normally within a few days or weeks). The resale price reflects an agreed upon interest rate effective for the period the security is held by a Fund and is unrelated to the interest rate on the security. The securities acquired by a Fund constitute collateral for the repurchase obligation. In these transactions, the securities acquired by a Fund (including accrued interest earned thereon) must have a total value in excess of the value of the repurchase agreement and must be held by the custodian bank until repurchased. A Fund will not invest more than 15% of its net assets (taken at current fair value) in repurchase agreements maturing in more than seven days.

### Mortgage-Related and Other Asset-Backed Securities

The Strategic Bond Fund may invest in mortgage or other asset-backed securities ("ABS"). These securities may include mortgage instruments issued by U.S. government agencies ("agency mortgages") or those issued by private entities ("non-agency mortgages"). Specific types of instruments may include reverse mortgages, mortgage pass-through securities, collateralized mortgage obligations ("CMO"), commercial mortgage-backed securities, mortgage dollar rolls, CMO residuals, stripped mortgage-backed securities and other securities that directly or indirectly represent a participation in, or are secured by a payable from, mortgage loans on real property. The value of a Fund's mortgage-backed securities ("MBS") may be affected by, among other things, changes or perceived changes in interest rates, factors concerning the interests in and structure of the issuer or the originator of the mortgage, or the quality of the underlying assets. The mortgages underlying the securities may default or decline in quality or value. Through its investments in MBS, a Fund has exposure to subprime loans, Alt-A loans and non-conforming loans as well as to the mortgage and credit markets generally. Underlying collateral related to subprime, Alt-A and non-conforming mortgage loans has become increasingly susceptible to defaults and declines in quality or value, especially in a declining residential real estate market. In addition, regulatory or tax changes may adversely affect the mortgage securities markets as a whole.

### Mortgage-Backed Securities

MBS often have stated maturities of up to thirty years when they are issued, depending upon the length of the mortgages underlying the securities. In practice, however, unscheduled or early payments of principal and interest on the underlying mortgages may make the securities' effective maturity shorter than this, and the prevailing interest rates may be higher or lower than the current yield of a Fund's portfolio at the time resulting in reinvestment risk.

Rising or high interest rates may result in slower than expected principal payments which may tend to extend the duration of MBS, making them more volatile and more sensitive to changes in interest rates. This is known as extension risk.

# Russell Investment Funds

## Notes to Financial Statements, continued — December 31, 2019

---

MBS may have less potential for capital appreciation than comparable fixed income securities due to the likelihood of increased prepayments of mortgages resulting from foreclosures or declining interest rates. These foreclosed or refinanced mortgages are paid off at face value (par) or less, causing a loss, particularly for any investor who may have purchased the security at a premium or a price above par. In such an environment, this risk limits the potential price appreciation of these securities.

### Agency Mortgage-Backed Securities

Certain MBS may be issued or guaranteed by the U.S. government or a government sponsored entity, such as Fannie Mae (the Federal National Mortgage Association) or Freddie Mac (the Federal Home Loan Mortgage Corporation). Although these instruments may be guaranteed by the U.S. government or a government sponsored entity, many such MBS are not backed by the full faith and credit of the United States and are still exposed to the risk of non-payment.

### Privately Issued Mortgage-Backed Securities

MBS held by a Fund may be issued by private issuers including commercial banks, savings associations, mortgage companies, investment banking firms, finance companies and special purpose finance entities (called special purpose vehicles or SPVs) and other entities that acquire and package mortgage loans for resale as MBS. These privately issued non-agency MBS may offer higher yields than those issued by government agencies, but also may be subject to greater price changes than governmental issues. Subprime loans refer to loans made to borrowers with weakened credit histories or with a lower capacity to make timely payments on their loans. Alt-A loans refer to loans extended to borrowers who have incomplete documentation of income, assets, or other variables that are important to the credit underwriting processes. Non-conforming mortgages are loans that do not meet the standards that allow purchase by government-sponsored enterprises. MBS with exposure to subprime loans, Alt-A loans or nonconforming loans have had in many cases higher default rates than those loans that meet government underwriting requirements. The risk of non-payment is greater for MBS that are backed by mortgage pools that contain subprime, Alt-A and non-conforming loans, but a level of risk exists for all loans.

Unlike agency MBS issued or guaranteed by the U.S. government or a government-sponsored entity (e.g., Fannie Mae and Freddie Mac), MBS issued by private issuers do not have a government or government-sponsored entity guarantee, but may have credit enhancements provided by external entities such as banks or financial institutions or achieved through the structuring of the transaction itself. Examples of such credit support arising out of the structure of the transaction include the issue of senior and subordinated securities (e.g., the issuance of securities by an SPV in multiple classes or tranches, with one or more classes being senior to other subordinated classes as to the payment of principal and interest, with the result that defaults on the underlying mortgage loans are borne first by the holders of the subordinated class); creation of reserve funds (in which case cash or investments, sometimes funded from a portion of the payments on the underlying mortgage loans, are held in reserve against future losses); and overcollateralization (in which case the scheduled payments on, or the principal amount of, the underlying mortgage loans exceeds that required to make payment on the securities and pay any servicing or other fees). However, there can be no guarantee that credit enhancements, if any, will be sufficient to prevent losses in the event of defaults on the underlying mortgage loans. In addition, MBS that are issued by private issuers are not subject to the underwriting requirements for the underlying mortgages that are applicable to those MBS that have a government or government-sponsored entity guarantee. As a result, the mortgage loans underlying private MBS may, and frequently do, have less favorable collateral, credit risk or other underwriting characteristics than government or government-sponsored MBS and have wider variances in a number of terms including interest rate, term, size, purpose and borrower characteristics. Privately issued pools more frequently include second mortgages, high loan-to-value mortgages and manufactured housing loans. The coupon rates and maturities of the underlying mortgage loans in a private-label MBS pool may vary to a greater extent than those included in a government guaranteed pool, and the pool may include subprime mortgage loans.

Privately issued MBS are not traded on an exchange and there may be a limited market for the securities, especially when there is a perceived weakness in the mortgage and real estate market sectors. Without an active trading market, MBS held in a Fund's portfolio may be particularly difficult to value because of the complexities involved in assessing the value of the underlying mortgage loans.

### Asset-Backed Securities

ABS may include MBS, loans, receivables or other assets. The value of the Funds' ABS may be affected by, among other things, actual or perceived changes in interest rates, factors concerning the interests in and structure of the issuer or the originator of the receivables, the market's assessment of the quality of underlying assets or actual or perceived changes in the credit worthiness of the individual borrowers, the originator, the servicing agent or the financial institution providing the credit support.

## Notes to Financial Statements, continued — December 31, 2019

---

Payment of principal and interest may be largely dependent upon the cash flows generated by the assets backing the securities. Rising or high interest rates tend to extend the duration of ABS, making them more volatile and more sensitive to changes in interest rates. The underlying assets are sometimes subject to prepayments which can shorten the security's weighted average life and may lower its return. Defaults on loans underlying ABS have become an increasing risk for ABS that are secured by home equity loans related to sub-prime, Alt-A or non-conforming mortgage loans, especially in a declining residential real estate market.

ABS (other than MBS) present certain risks that are not presented by MBS. Primarily, these securities may not have the benefit of any security interest in the related assets. Credit card receivables are generally unsecured and the debtors are entitled to the protection of a number of state and federal consumer credit laws, many of which give such debtors the right to set off certain amounts owed on the credit cards, thereby reducing the balance due. There is the possibility that recoveries on repossessed collateral may not, in some cases, be available to support payments on these securities. ABS are often backed by a pool of assets representing the obligations of a number of different parties. To lessen the effect of failures by obligors on underlying assets to make payments, the securities may contain elements of credit support which fall into two categories: (i) liquidity protection, and (ii) protection against losses resulting from ultimate default by an obligor on the underlying assets. Liquidity protection refers to the provision of advances, generally by the entity administering the pool of assets, to ensure that the receipt of payments on the underlying pool occurs in a timely fashion. Protection against losses results from payment of the insurance obligations on at least a portion of the assets in the pool. This protection may be provided through guarantees, policies or letters of credit obtained by the issuer or sponsor from third parties, through various means of structuring the transaction or through a combination of such approaches. The Fund will not pay any additional or separate fees for credit support. The degree of credit support provided for each issue is generally based on historical information respecting the level of credit risk associated with the underlying assets.

Delinquency or loss in excess of that anticipated or failure of the credit support could adversely affect the return on an investment in such a security. The availability of ABS may be affected by legislative or regulatory developments. It is possible that such developments may require the Funds to dispose of any then-existing holdings of such securities.

### Forward Commitments

The Strategic Bond Fund may contract to purchase securities for a fixed price at a future date beyond customary settlement time. The price of the underlying securities and the date when the securities will be delivered and paid for are fixed at the time the transaction is negotiated. The Fund may dispose of a forward commitment transaction prior to settlement if it is appropriate to do so and may realize short-term gains (or losses) upon such sale. When effecting such transactions, cash or liquid high-grade debt obligations of the Fund in a dollar amount sufficient to make payment for the portfolio securities to be purchased will be earmarked on the Fund's records at the trade date and until the transaction is settled. A forward commitment transaction involves a risk of loss if the value of the security to be purchased declines prior to the settlement date or the other party to the transaction fails to complete the transaction.

The Strategic Bond Fund may invest in to-be-announced ("TBA") mortgage-backed securities. A TBA security is a forward mortgage-backed securities trade in which a seller agrees to issue a TBA mortgage-backed security at a future date. The securities are purchased and sold on a forward commitment basis with an approximate principal amount and maturity date. The actual principal amount and maturity date will be determined upon settlement when the specific mortgage pools are assigned. These securities are within the parameters of industry "good delivery" standards.

As of December 31, 2019, the Strategic Bond Fund had no cash collateral balances in connection with TBAs.

### Inflation-Indexed Bonds

The Strategic Bond Fund may invest in inflation-indexed securities, which are typically bonds or notes designed to provide a return higher than the rate of inflation (based on a designated index) if held to maturity. A common type of inflation-indexed security is a U.S. Treasury Inflation-Protected Security ("TIPS"). The principal of a TIPS increases with inflation and decreases with deflation, as measured by the Consumer Price Index. When a TIPS matures, the adjusted principal or original principal is paid, whichever is greater. TIPS pay interest twice a year, at a fixed rate. The rate is applied to the adjusted principal; so, like the principal, interest payments rise with inflation and fall with deflation.

### Guarantees

In the normal course of business, the Funds enter into contracts that contain a variety of representations which provide general indemnifications. The Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds expect the risk of loss to be remote.

# Russell Investment Funds

## Notes to Financial Statements, continued — December 31, 2019

### LIBOR

The Funds may invest in certain instruments including, but not limited to, repurchase agreements, collateralized loan obligations and mortgage-backed securities, that rely in some fashion upon LIBOR. LIBOR is an average interest rate, determined by the ICE Benchmark Administration, that banks charge one another for the use of short-term money. The United Kingdom's Financial Conduct Authority, which regulates LIBOR, has announced plans to phase out the use of LIBOR by the end of 2021. There remains uncertainty regarding the future utilization of LIBOR and the nature of any replacement rate (e.g., the Secured Overnight Financing Rate, which is intended to replace U.S. dollar LIBOR and measures the cost of overnight borrowings through repurchase agreement transactions collateralized with U.S. Treasury securities). Any potential effects of the transition away from LIBOR on the Funds or on certain instruments in which a Fund invests can be difficult to ascertain, and they may vary depending on factors that include, but are not limited to: (i) existing fallback or termination provisions in individual contracts and (ii) whether, how, and when industry participants develop and adopt new reference rates and fallbacks for both legacy and new products and instruments. For example, certain of the Fund's investments may involve individual contracts that have no existing fallback provision or language that contemplates the discontinuation of LIBOR, and those investments could experience increased volatility or illiquidity as a result of the transition process. In addition, interest rate provisions included in such contracts may need to be renegotiated in contemplation of the transition away from LIBOR. The transition may also result in a reduction in the value of certain instruments held by a Fund, including those described in this paragraph, or a reduction in the effectiveness of related Fund transactions such as hedges. Any such effects of the transition away from LIBOR, as well as other unforeseen effects, could result in losses to a Fund.

### Market, Credit and Counterparty Risk

In the normal course of business, the Funds trade financial instruments and enter into financial transactions where risk of potential loss exists due to changes in the market (market risk) or failure of the other party to a transaction to perform (credit risk). Similar to credit risk, the Funds may also be exposed to counterparty risk or risk that an institution or other entity with which the Funds have unsettled or open transactions will default. The potential loss could exceed the value of the relevant assets recorded in the Funds' financial statements (the "Assets"). The Assets consist principally of cash due from counterparties and investments. The extent of the Funds' exposure to market, credit and counterparty risks with respect to the Assets approximates their carrying value as recorded in the Funds' Statements of Assets and Liabilities.

Global economies and financial markets are becoming increasingly interconnected and political and economic conditions (including recent instability and volatility) and events (including natural disasters) in one country, region or financial market may adversely impact issuers in a different country, region or financial market. As a result, issuers of securities held by a Fund may experience significant declines in the value of their assets and even cease operations. Such conditions and/or events may not have the same impact on all types of securities and may expose a Fund to greater market and liquidity risk and potential difficulty in valuing portfolio instruments held. This could cause a Fund to underperform other types of investments.

## 3. Investment Transactions

### Securities

During the period ended December 31, 2019, purchases and sales of investment securities (excluding U.S. Government and Agency obligations, short-term investments, options, futures and repurchase agreements) were as follows:

		Purchases		Sales
U.S. Strategic Equity Fund	\$	441,515,002	\$	417,657,912
U.S. Small Cap Equity Fund		276,808,287		301,239,263
International Developed Markets Fund		262,990,171		274,664,398
Strategic Bond Fund		373,266,865		315,189,575
Global Real Estate Securities Fund		721,008,107		759,709,636

Purchases and sales of U.S. Government and Agency obligations (excluding short-term investments, options, futures and repurchase agreements) were as follows:

		Purchases		Sales
Strategic Bond Fund	\$	676,473,262	\$	691,984,241

## Notes to Financial Statements, continued — December 31, 2019

### 4. Related Party Transactions, Fees and Expenses

#### Adviser, Administrator, Transfer and Dividend Disbursing Agent

RIM provides or oversees the provision of all investment advisory and portfolio management services for the Funds. From its advisory fees received from the Funds, RIM, as agent for RIF, pays all fees to the money managers for their investment advisory services. Each money manager has agreed that it will look only to RIM for the payment of the money manager's fee, after RIF has paid RIM. Fees paid to the money managers are not affected by any voluntary or statutory expense limitations. RIFUS is the Funds' administrator and transfer agent. RIFUS, in its capacity as the Funds' administrator, provides or oversees the provision of all administrative services for the Funds. RIFUS, in its capacity as the Funds' transfer agent and dividend disbursing agent, is responsible for providing transfer agency and dividend disbursing services to the Funds. RIFUS is a wholly-owned subsidiary of RIM. RIM is an indirect, wholly-owned subsidiary of Russell Investments Group, Ltd., a Cayman company.

The Funds are permitted to invest their cash (i.e., cash awaiting investment or cash held to meet redemption requests or to pay expenses) in the U.S. Cash Management Fund, an unregistered fund advised by RIM. As of December 31, 2019, the Funds had invested \$95,142,064 in the U.S. Cash Management Fund. In addition, all or a portion of the collateral received from the Investment Company's securities lending program in the amount of \$53,841,150 is invested in the U.S. Cash Collateral Fund, an unregistered fund advised by RIM.

The advisory fee is based upon the average daily net assets of each Fund and the administration fee of up to 0.05% is based on the combined average daily net assets of the Funds. Advisory and administration fees are paid monthly.

Funds	Annual Rate	
	Adviser (%)	Administration (%)
U.S. Strategic Equity Fund	0.73	Up to 0.05
U.S. Small Cap Equity Fund	0.90	Up to 0.05
International Developed Markets Fund	0.90	Up to 0.05
Strategic Bond Fund	0.55	Up to 0.05
Global Real Estate Securities Fund	0.80	Up to 0.05

The following table shows the total amount of each of these fees paid by the Funds for the period ended December 31, 2019:

	Advisory	Administration
U.S. Strategic Equity Fund	\$ 3,162,336	\$ 216,599
U.S. Small Cap Equity Fund	2,032,869	112,937
International Developed Markets Fund	3,463,081	192,393
Strategic Bond Fund	4,982,598	452,964
Global Real Estate Securities Fund	7,347,925	459,245

There were no advisory fee waivers for the Funds during the period.

RIM does not have the ability to recover amounts waived or reimbursed from previous periods.

#### Transfer and Dividend Disbursing Agent

RIFUS serves as transfer agent and provides dividend disbursing services to the Funds. For this service, RIFUS is paid a fee based upon the average daily net assets of the Funds for transfer agency and dividend disbursing services. RIFUS retains a portion of this fee for services provided to the Funds and pays the balance to unaffiliated agents who assist in providing these services. Transfer agency fees paid by the Funds presented herein for the period ended December 31, 2019 were as follows:

	Amount
U.S. Strategic Equity Fund	\$ 18,504
U.S. Small Cap Equity Fund	9,633
International Developed Markets Fund	16,418
Strategic Bond Fund	38,699
Global Real Estate Securities Fund	39,212

# Russell Investment Funds

## Notes to Financial Statements, continued — December 31, 2019

### Distributor

Russell Investments Financial Services, LLC (the “Distributor”), a wholly-owned subsidiary of RIM, is the distributor for the Investment Company, pursuant to a distribution agreement with the Investment Company. The Distributor receives no compensation from the Investment Company for its services.

### Affiliated Brokerage Transactions

The Funds effect certain transactions through Russell Investments Implementation Services, LLC (“RIIS”). RIIS is a registered broker and investment adviser and an affiliate of RIM. RIIS uses a multi-venue trade management approach whereby RIIS allocates trades among RIIS’ network of independent brokers for execution, clearing and other services. Trades placed through RIIS and its independent brokers are made (i) to manage trading associated with changes in money managers, rebalancing across existing money managers, cash flows and other portfolio transitions, (ii) to execute portfolio securities transactions for the portion of each Fund’s assets that RIM determines not to allocate to money managers, (iii) to execute portfolio securities transactions for the portion of a Fund’s assets that RIM manages based upon model portfolios provided by the Fund’s non-discretionary managers, (iv) to execute money manager’s portfolio securities transactions for the segment of a Fund’s portfolio assigned to the money manager, or (v) to execute foreign currency transactions on behalf of the Funds. RIM has authorized RIIS to effect certain futures, swaps, OTC derivative transactions, and cleared swaps, including foreign currency spots, forwards and options trading on behalf of the Funds.

The Funds are permitted to purchase or sell securities from or to certain related affiliated funds under specified conditions outlined in procedures adopted by the Board. The procedures have been designed to ensure that any purchase or sale of securities by the Funds from or to another fund or portfolio that are, or could be, considered an affiliate by virtue of having a common investment adviser (or affiliated investment advisers), common Trustees and/or common officers complies with Rule 17a -7 of the Investment Company Act. Further, as defined under the procedures each transaction is effected at the current market value.

During the period ended December 31, 2019, the Funds did not engage in purchases and sales of securities pursuant to Rule 17a -7 of the Investment Company Act.

### Board of Trustees

The Russell Investments Fund Complex consists of Russell Investment Company (“RIC”), which has 34 funds and RIF, which has 9 funds. Each of the Trustees is a Trustee of RIC and RIF. The Russell Investments Fund Complex compensates each Trustee who is not an employee of RIM or its affiliates. Trustee compensation and expenses are allocated to each Fund based on its net assets relative to other funds in the Russell Investments Fund Complex.

For the period ended December 31, 2019, the regular compensation paid to the Trustees by the Russell Investments Fund Complex was \$1,612,750.

## 5. Federal Income Taxes

At December 31, 2019, the following Funds had net tax basis capital loss carryforwards which may be applied against any net realized taxable gains in each succeeding year or until their respective expiration dates, whichever occurs first. Available capital loss carryforwards and expiration dates are as follows:

Funds	No Expiration		Totals
	Short Term	Long-Term	
International Developed Markets Fund	\$ 1,024,488	\$ 9,295,856	\$10,320,344
Global Real Estate Securities Fund	411,623	706,427	1,118,050

## 6. Record Ownership

At December 31, 2019, the following table includes shareholders of record with greater than 10% of the total outstanding shares of each respective Fund:

	# of Shareholders	%
U.S. Strategic Equity Fund	2	75.5
U.S. Small Cap Equity Fund	2	72.8

# Russell Investment Funds

## Notes to Financial Statements, continued — December 31, 2019

---

International Developed Markets Fund	2	72.5
Strategic Bond Fund	1	71.2
Global Real Estate Securities Fund	2	90.9

### 7. Restricted Securities

Restricted securities are subject to contractual restrictions on resale, are often issued in private placement transactions, and are not registered under the Securities Act of 1933, as amended, ("the Act"). The most common types of restricted securities are those sold under Rule 144A of the Act and commercial paper sold under Section 4(2) of the Act.

See each Fund's Schedule of Investments for a list of restricted securities that have been footnoted as a restricted security or as an illiquid and restricted security.

### 8. Commitments and Contingencies

The Strategic Bond Fund may enter into certain credit agreements, all or a portion of which may be unfunded. The Fund is obligated to fund these loan commitments at the borrowers' discretion. Unfunded loan commitments and funded portions of credit agreements are marked to market daily and any unrealized appreciation or depreciation is included in the Statements of Assets and Liabilities and the Statements of Operations. Funded portions of credit agreements are presented in the Schedules of Investments. The unfunded loan commitments are footnoted in the Schedule of Investments.

### 9. Subsequent Events

Management has evaluated the events and/or transactions that have occurred through the date the financial statements were issued and noted no items requiring adjustments of the financial statements or additional disclosures.

## Report of Independent Registered Public Accounting Firm

To the Board of Trustees of Russell Investment Funds and Shareholders of U.S. Strategic Equity Fund, U.S. Small Cap Equity Fund, International Developed Markets Fund, Strategic Bond Fund and Global Real Estate Securities Fund

### ***Opinions on the Financial Statements***

We have audited the accompanying statements of assets and liabilities, including the schedules of investments, of U.S. Strategic Equity Fund, U.S. Small Cap Equity Fund, International Developed Markets Fund, Strategic Bond Fund and Global Real Estate Securities Fund (five of the funds constituting Russell Investment Funds, hereafter collectively referred to as the “Funds”) as of December 31, 2019, the related statements of operations for the year ended December 31, 2019, the statements of changes in net assets for each of the two years in the period ended December 31, 2019, including the related notes, and the financial highlights for each of the five years in the period ended December 31, 2019 (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of each of the Funds as of December 31, 2019, the results of each of their operations for the year then ended, the changes in each of their net assets for each of the two years in the period ended December 31, 2019 and each of the financial highlights for each of the five years in the period ended December 31, 2019 in conformity with accounting principles generally accepted in the United States of America.

### ***Basis for Opinions***

These financial statements are the responsibility of the Funds’ management. Our responsibility is to express an opinion on the Funds’ financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the Funds in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of December 31, 2019 by correspondence with the custodian, transfer agent and brokers; when replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinions.

*PricewaterhouseCoopers LLP*

February 21, 2020

We have served as the auditor of one or more investment companies in the Russell Investments family of funds since 1981.

# Russell Investment Funds

## Tax Information — December 31, 2019 (Unaudited)

---

For the tax year ended December 31, 2019, the Funds designate 100% or the maximum amount allowable of their net taxable income as qualified dividends taxed at individual net capital gain rates.

The Form 1099 you receive in January 2020 will show the tax status of all distributions paid to your account in calendar year 2019.

The Funds designate dividends distributed during the fiscal year as qualifying for the dividends received deduction for corporate shareholders as follows:

U.S. Strategic Equity	100.0%
U.S. Small Cap Equity	100.0%
International Developed Markets	0.0%
Global Real Estate Securities	0.0%
Strategic Bond	0.0%

Pursuant to Section 852 of the Internal Revenue Code, the Funds designate the following amounts as long-term capital gain dividends for their taxable year ended December 31, 2019:

U.S. Strategic Equity	\$ 25,740,255
U.S. Small Cap Equity	3,409,094
International Developed Markets	—
Global Real Estate Securities	—
Strategic Bond	3,613,267

The Funds listed below paid foreign taxes and recognized foreign source income during the taxable year ended December 31, 2019. Pursuant to Section 853 of the Internal Revenue Code, the Funds designate the following per share amounts of foreign taxes paid and income earned from foreign sources:

Fund Name	Foreign Taxes Paid	Foreign Taxes Paid Per Share	Foreign Source Income	Foreign Source Income Per Share
International Developed Markets	\$ 1,081,709	\$ 0.0319	\$ 12,317,178	\$ 0.3635

Please consult a tax adviser for any questions about federal or state income tax laws.

# Russell Investment Funds

## Affiliated Brokerage Transactions — December 31, 2019 (Unaudited)

---

As discussed in the Note 4 in the Notes to Financial Statements contained in this annual report, the Funds utilize RIIS and its independent brokers. RIIS is a registered broker dealer and investment adviser and an affiliate of RIM. RIIS uses a multi-venue trade management approach whereby RIIS allocates trades among RIIS' network of independent brokers for execution, clearing, and other services. Trades placed through RIIS and its independent brokers are made (i) to manage trading associated with changes in money managers, rebalancing across existing money managers, cash flows and other portfolio transitions, (ii) to execute portfolio securities transactions for the portion of each Fund's assets that RIM determines not to allocate to money managers, (iii) to execute portfolio securities transactions for the portion of a Fund's assets that RIM manages based upon model portfolios provided by the Funds' non-discretionary managers, (iv) to execute money manager portfolio securities transactions for the segment of a Fund's portfolio assigned to the money manager, or (v) to execute foreign currency transactions on behalf of the Funds. RIM has authorized RIIS to effect certain futures, swaps, OTC derivative transactions, and cleared swaps, including foreign currency spots, forwards and options trading on behalf of the Funds.

Amounts retained by RIIS for the period ended December 31, 2019 were as follows:

<u>Fund Name</u>	
U.S. Strategic Equity Fund	\$ 48,664
U.S. Small Cap Equity Fund	70,960
International Developed Markets Fund	105,629
Strategic Bond Fund	55,227
Global Real Estate Securities Fund	157,699

# Russell Investment Funds

## Basis for Approval of Investment Advisory Contracts — (Unaudited)

---

### Approval of Money Manager Contracts

The Board received the following proposals from RIM: (i) at a meeting held on August 27, 2019, to approve a new portfolio management contract for the U.S. Small Cap Equity Fund; and (ii) at a meeting held on December 10, 2019, to approve a new portfolio management contract for the International Developed Markets Fund. In the case of each proposed change, the Trustees approved the terms of the proposed portfolio management contract based upon RIM's recommendation to hire the Money Manager at the proposed fee rate; information as to the reason for the proposed change; information as to the Money Manager's role in the management of the Fund's investment portfolio (including the amount of Fund assets to be allocated to the Money Manager or managed pursuant to the Money Manager's strategy) and RIM's evaluation of the anticipated quality of the investment advisory services to be provided by the Money Manager; information as to any significant business relationships between the Money Manager and RIM or Russell Investments Financial Services, LLC, the Fund's underwriter; the CCO's evaluation of the Money Manager's compliance program, policies and procedures in relation to the Money Manager's role in the management of the Fund's investment portfolio, and certification that they were consistent with applicable legal standards; RIM's explanation as to the lack of relevance of Money Manager profitability to the evaluation of portfolio management contracts with Money Managers because the willingness of Money Managers to serve in such capacity depends upon arm's-length negotiations with RIM; RIM's awareness of the standard fee rates charged by the Money Manager to other clients; RIM's belief that the proposed Money Manager fees would be reasonable in light of the anticipated quality of investment advisory services to be rendered; the increase or decrease in aggregate Money Manager fees to be paid by RIM from its advisory fee as a result of the engagement of the Money Manager; and the expected costs of transitioning Fund assets to the Money Manager or its strategy. The Trustees' approval also reflected their findings at prior meetings, including their May 20, 2019 meeting in connection with their evaluation and approval of the Funds' existing investment advisory agreements with RIM and then current Money Managers for the Funds, as well as information received throughout the course of the year regarding, among other things, the quality of services provided to the Funds in the case of existing Money Managers and the reasonableness of the aggregate investment advisory fees paid by the Funds, as well as the fact that the aggregate investment advisory fees paid by the Funds would not increase or decrease as a result of the implementation of the proposed Money Manager changes because the Money Manager's investment advisory fees are paid by RIM.

# Russell Investment Funds

## Shareholder Requests for Additional Information — December 31, 2019 (Unaudited)

---

Each Fund files portfolio holdings information within 60 days after the end of each fiscal quarter as an exhibit on Form N-PORT. Portfolio holdings information for the third month of each fiscal quarter is publicly available on the SEC's website at <http://www.sec.gov>. Each Fund's complete schedule of portfolio holdings for the second and fourth quarters of each fiscal year is included in the semi-annual and annual reports to Fund shareholders.

The Board has delegated to RIM, as RIF's investment adviser, the primary responsibility for monitoring, evaluating and voting proxies solicited by or with respect to issuers of securities in which assets of the Funds may be invested. RIM has established a proxy voting committee and has adopted written proxy voting policies and procedures ("P&P") and proxy voting guidelines ("Guidelines"). The Funds maintain a Portfolio Holdings Disclosure Policy that governs the timing and circumstances of disclosure to shareholders and third parties of information regarding the portfolio investments held by the Funds. A description of the P&P, Guidelines, Portfolio Holdings Disclosure Policy and additional information about Fund Trustees are contained in the Funds' Statement of Additional Information ("SAI"). The SAI and information regarding how the Funds voted proxies relating to portfolio securities during the most recent 12-month period ended June 30, 2019 are available (i) free of charge, upon request, by calling the Funds at (800) 787-7354, and (ii) on the Securities and Exchange Commission's website at [www.sec.gov](http://www.sec.gov).

If possible, depending on contract owner registration and address information, and unless you have otherwise opted out, only one copy of the RIF prospectus and each annual and semi-annual report will be sent to contract owners at the same address. If you would like to receive a separate copy of these documents, please contact your Insurance Company. If you currently receive multiple copies of the prospectus, annual report and semi-annual report and would like to request to receive a single copy of these documents in the future, please call your insurance company.

Some insurance companies may offer electronic delivery of the Funds' prospectuses and annual and semi-annual reports. Please contact your insurance company for further details.

## Disclosure of Information about Fund Trustees and Officers – December 31, 2019 (Unaudited)

The following tables provide information for each officer and trustee of the Russell Investments Fund Complex. The Russell Investments Fund Complex consists of Russell Investment Company (“RIC”), which has 34 funds and Russell Investment Funds (“RIF”), which has 9 funds. Each of the trustees is a trustee of RIC and RIF. The first table provides information for the Interested Trustee. The second table provides information for the Independent Trustees. The third table provides information for the Trustee Emeritus. The fourth table provides information for the officers. Furthermore, each Trustee possesses the following specific attributes: Mr. Alston has business, financial and investment experience as a senior executive of an international real estate firm and is trained as a lawyer; Ms. Blake has had experience as a certified public accountant and has had experience as a member of boards of directors/trustees of other investment companies; Ms. Burgermeister has had experience as a certified public accountant and as a member of boards of directors/ trustees of other investment companies and has been determined by the Board to be an “audit committee financial expert”; Ms. Krysty has had business, financial and investment experience as the founder and senior executive of a registered investment adviser focusing on high net worth individuals as well as a certified public accountant and a member of the boards of other corporations and non-profit organizations; Ms. Dien Ledoux has had investment experience as a portfolio manager and has had experience as a member of the board of trustees of other investment companies; Mr. Tennison has had business, financial and investment experience as a senior executive of a corporation with international activities and was trained as an accountant; Mr. Thompson has had experience in business, governance, investment and financial reporting matters as a senior executive of an organization sponsoring and managing other investment companies, and, subsequently, has served as a board member of other investment companies. Mr. Spina has had experience with other financial services companies, including companies engaged in the sponsorship, management and distribution of investment companies. As a senior officer and/or director of the Funds, the Adviser and various affiliates of the Adviser providing services to the Funds, Mr. Spina is in a position to provide the Board with such parties' perspectives on the management, operations and distribution of the Funds.

Beginning January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Funds' annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports from your financial professional or variable annuity provider. Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. If supported by your financial professional or variable annuity provider, you may elect to receive shareholder reports and other Fund communications electronically. Please contact your financial professional or variable annuity provider for more information.

You may elect to receive all future shareholder reports in paper free of charge. Please contact your financial professional or variable annuity provider to inform them that you wish to continue receiving paper copies of your shareholder reports. Your election to receive reports in paper will apply to all Russell Investment Funds and other funds you hold with your financial professional or variable annuity provider.

## Russell Investment Funds

Russell Investment Funds is a series investment company with nine different investment portfolios referred to as Funds. These financial statements report on four of these Funds.

# To Our Shareholders

Fellow Investors,

Your financial security is not only our focus; it is our purpose. We believe that the combination of our investment solutions, a sound plan and timely investment advice can help to achieve that financial security. That is the reason we work hard to maintain a time-tested, disciplined investment approach, focused on meeting the financial needs of clients like you.

Market volatility and the fear of a recession can make it difficult for individuals to stick to an investment plan. Some investors are tempted to leave sectors too early, to stay in too long, or to pull out too much. These types of behavior can cause the less-disciplined investor to fall into the harmful trap of buying high and selling low. However, we believe this is the type of market in which our process shines.

We maintain our focus and look to position our funds for the investing environment ahead, not the one that has just passed. With this in mind, we hold the following views on markets:

- We believe in the importance of diversifying globally. International investments provide diversification relative to U.S.-based investments as well as open the portfolio up to additional opportunities outside our borders.
- Within our equity exposure, we have an underweight preference for U.S. equities, driven by expensive valuations and cycle concerns. We're broadly neutral on developed international equities, and overweight on emerging markets equities, driven by valuations.
- Within our bond exposure, we continue to diversify across sectors. Additionally, active management will be important during a period of low anticipated fixed income returns.

2019 again showed that volatility is still present in the market. And we believe uncertainty about future market downturns helps to prove the value of a disciplined approach. As do, in our view, these key events of the last 12 months:

- Global growth concerns and geopolitical tension have remained in investors' thoughts. Progress in U.S.-China trade talks fluctuated over the period, with both countries implementing costly tariffs, which has impacted financial markets.
- While short-term recession risks remain low, the U.S. yield curve is signaling that the risk is increasing. The U.S. yield curve inverted for the first time since 2007 as government bond yields sunk to new depths.<sup>1</sup> The U.S. 10-year treasury reached its lowest since 2016<sup>2</sup> while the U.S. 30-year yield touched an all-time bottom in August.<sup>3</sup>
- Nevertheless, global equities have ground higher amid dovish central bank policy. The Federal Reserve cut rates three times, while the European Central Bank cut rates to a record -0.5% and restarted quantitative easing.<sup>4</sup> China's central bank also took steps to stimulate its economy.<sup>5</sup>
- Volatility spiked at points over the year<sup>6</sup>, but equity markets have not touched the volatility experienced during December 2018—where a Federal Reserve rate increase and a worsening of U.S.-China tensions led investors flight to safety.<sup>7</sup>
- 2019 saw positive returns from major asset classes, with U.S. large cap<sup>8</sup> and infrastructure asset classes<sup>9</sup> leading the way. Even with strong absolute performance it has not been without bumps; asset class leadership can change month-to-month and quarter-to-quarter, reinforcing the need for a balanced multi-asset approach to investing.

Looking forward to the year ahead, we believe we are late in the cycle; with some bright spots. The service sector is still robust in most economies; policy stimulus is being ramped up, with many central banks now cutting interest rates and indicating that more cuts are on the way; and an easing of trade tensions seems likely. On balance, we think it is more likely that the combination of trade-war resolution and policy stimulus will see the global economy recover in 2020. However, the asymmetry of the different outcomes—bear market versus limited upside—keeps us cautious until there is more clarity on the trade and stimulus outlook.

## To Our Shareholders

At Russell Investments, our purpose is to improve people's financial security. We have a long heritage of providing multi-asset solutions to help investors like you reach your financial goals, whether you're saving for retirement, already there or building a college fund. Thank you for the trust you have placed in our firm. All of us at Russell Investments appreciate the opportunity to help you achieve your own financial security.

Best regards,

Peter Gunning

Global Chief Investment Officer, Russell Investments

# Russell Investment Funds

## Moderate Strategy Fund

### Portfolio Management Discussion and Analysis, continued — December 31, 2019 (Unaudited)

---

The Moderate Strategy Fund (the “Fund”) is a fund of funds that invests principally in other Russell Investment Funds (“RIF”) and Russell Investment Company (“RIC”) mutual funds (the “Underlying Funds”). The Underlying Funds employ a multi-manager approach whereby portions of the Underlying Funds are allocated to different money manager strategies. Underlying Fund assets not allocated to money managers are managed by Russell Investment Management, LLC (“RIM”), the Fund’s and Underlying Funds’ advisor. RIM, as the Underlying Funds’ advisor, may change the allocation of the Underlying Funds’ assets among money managers at any time. An exemptive order from the Securities and Exchange Commission (“SEC”) permits RIM to engage or terminate a money manager in an Underlying Fund at any time, subject to approval by the Underlying Fund’s Board, without a shareholder vote. Pursuant to the terms of the exemptive order, an Underlying Fund is required to notify its shareholders within 90 days of when a money manager begins providing services.

#### **What is the Fund’s investment objective?**

The Fund seeks to provide current income and moderate long term capital appreciation.

#### **How did the Fund perform relative to its benchmark for the fiscal year ended December 31, 2019?**

For the fiscal year ended December 31, 2019, the Fund gained 12.54%. This is compared to the Fund’s primary benchmark, the Bloomberg Barclays U.S. Aggregate Bond Index, which gained 8.72% during the same period. The Fund’s performance includes operating expenses, whereas index returns are unmanaged and do not include expenses of any kind.

For the fiscal year ended December 31, 2019, the Morningstar® Insurance Allocation – 30% to 50% Equity Category, a group of funds that Morningstar considers to have investment strategies similar to those of the Fund, gained 15.26%. This result serves as a peer comparison and is expressed net of operating expenses.

#### **How did market conditions affect the Fund’s performance?**

The Fund seeks to achieve its objective by investing in Underlying Funds that provide exposure to a range of diversified investments, and most major asset classes invested in by the Underlying Funds produced positive absolute returns during the period.

Within the Fund’s fixed income portfolio, exposure to securitized assets was beneficial, as a strong U.S. consumer and the low-rate environment created opportunities within prepayment risk assets. The low-rate environment was also beneficial to global infrastructure and global real estate investment trusts (“REITs”), as both asset classes posted strong returns over the period.

The U.S. equity market, as broadly measured by the Russell 3000® Index, surged to 31.02% at period-end, closing out a

strong year. From a style perspective, growth outperformed value. From a sector perspective, information technology was the best performing sector, while health care, materials, communication services and financials followed closely behind. The Fund’s strategic exposure to non-U.S. equities benefited performance over the period, as market sentiment in emerging markets improved due to apparent progress in the U.S.-China trade talks and a “phase one” deal.

#### **How did the investment strategies and techniques employed by the Fund and the Underlying Funds affect the Fund’s performance?**

The Fund is a fund of funds and its performance is based on RIM’s strategic asset allocations, the performance of the Underlying Funds in which the Fund invests, and tactical changes in the Fund’s asset allocation throughout the year. In order to seek to achieve the Fund’s objective during the period, RIM’s strategic asset allocation included investments in global equity, fixed income, multi-asset and alternative Underlying Funds.

Broadly, the Fund’s asset allocation was a positive contributor to performance relative to the Fund’s fixed income benchmark during the period. Allocations to global real estate investment trusts and infrastructure benefited the Fund, as both asset classes posted strong double-digit returns. Further, allocations to non-U.S. equities bolstered returns as well, outperforming the fixed income asset class.

The fixed income portion of the Fund’s portfolio provided positive results compared to the Fund’s fixed income benchmark. An allocation to the RIF Strategic Bond Fund was positive from a benchmark-relative perspective as a result of its exposure to securitized credit, which generated an above market yield. An allocation to the RIC Investment Grade Bond Fund also contributed positively as a result of the Underlying Fund’s underweight to government and government-guaranteed securities and an overweight to securitized credit. An allocation to the RIC Opportunistic Credit Fund was additive due to its higher allocation to high yield relative to the Bloomberg Barclays U.S. Aggregate Bond Index, and its emerging markets currency exposure provided a significant boost to active returns.

While the broader equity markets delivered strong absolute performance over the period, the Fund’s equity allocation exceeded the Fund’s fixed income benchmark. However, the equity Underlying Funds generally underperformed their respective equity benchmarks. The RIC Sustainable Equity Fund underperformed its benchmark, as it was consistently underweight stocks that have higher momentum and expensive valuations and overweight stocks with higher profitability. Both factor tilts negatively impacted benchmark-relative performance over the year. The RIF International Developed Markets Fund

# Russell Investment Funds

## Moderate Strategy Fund

### Portfolio Management Discussion and Analysis, continued — December 31, 2019 (Unaudited)

---

underperformed its benchmark due to its sector allocations – for instance, an underweight to health care and overweight to communication services detracted. A tilt toward low valuation stocks was a meaningful driver of underperformance for the RIC U.S. Dynamic Equity Fund. Coupled with negative stock selection within the information technology sector, the Underlying Fund underperformed its equity benchmark.

The alternative assets portion of the Fund's portfolio provided positive results compared to the Fund's fixed income benchmark. The RIF Global Real Estate Securities Fund outperformed the Fund's benchmark due to the overall strength of the asset class relative to fixed income, as real assets were bolstered by a low interest rate environment. The RIC Global Infrastructure Fund outperformed both the Fund's fixed income benchmark and its listed infrastructure benchmark due to out-of-index exposures to construction and engineering and specialized REITs. The RIC Commodity Strategies Fund outperformed its benchmark but struggled against the Fund's fixed income benchmark.

The multi-asset portion of the Fund's portfolio outperformed the Fund's fixed income benchmark. The RIC Multi-Strategy Income Fund benefited from overweight positions to mortgage back securities that added value due to the low interest rate environment. However, the Fund's regional positioning was challenged over the period, mainly driven by an overweight to non-U.S. equity and a U.S. equity underweight.

#### **Describe any changes to the Fund's structure or allocation to the Underlying Funds.**

RIM has the discretion to vary the Fund's actual allocation from the target strategic asset allocation by up to +/- 5% at the equity, fixed income, multi-asset or alternative category level based on RIM's capital markets research. In addition to investing in the Underlying Funds, RIM may seek to actively manage a Fund's overall exposures by investing in derivatives that RIM believes will achieve the desired risk/return profile for the Fund.

RIM continued to operate the Fund as a risk manager rather than risk taker during the period. RIM's tactical regional modifications

to the Fund's asset allocation versus strategic targets were challenged during the period, mainly driven by an overweight to non-U.S. equity and U.S. equity underweight while U.S. equity led global market performance. In terms of tactical asset class modifications, in the first quarter of 2019, real estate exposure was added given attractive valuations. At the beginning of 2019, RIM also increased exposure to high yield corporate credit, but pared back as spreads compressed to expensive levels.

Effective on November 13, 2019, the Fund's allocation to the Underlying Funds in which it invests was modified to an approximate target allocation of 34% to equity, 52% to fixed income, 12% to multi-asset and 2% to alternative asset classes.

RIM manages a global real yield positioning strategy and a currency factor positioning strategy for the Fund. Using futures, the global high real yield strategy took long positions in high quality government bonds whose net-of-inflation yields are expected to be relatively high and short positions where net-of-inflation yield is expected to be relatively low. The currency factor strategy utilized currency forward contracts to take long and short positions in global foreign exchange markets. The global real yield strategy detracted over the period as the long positions underperformed, with the cost split evenly between the U.S. and Canada. With respect to the currency factor strategy, the Fund's exposure moderately detracted.

**The views expressed in this report reflect those of the portfolio managers only through the end of the period covered by the report. These views do not necessarily represent the views of RIM, or any other person in RIM or any other affiliated organization. These views are subject to change at any time based upon market conditions or other events, and RIM disclaims any responsibility to update the views contained herein. These views should not be relied on as investment advice and, because investment decisions for a RIF Fund are based on numerous factors, should not be relied on as an indication of investment decisions of any RIF Fund.**

\* Assumes initial investment on January 1, 2010.

\*\* The Bloomberg Barclays U.S. Aggregate Bond Index is an index, with income reinvested, generally representative of intermediate-term government bonds, investment grade corporate debt securities and mortgage-backed securities.

\*\*\* The Russell 1000<sup>®</sup> Index includes the 1,000 largest companies in the Russell 3000<sup>®</sup> Index. The Russell 1000<sup>®</sup> Index represents the universe of stocks from which most active money managers typically select. The Russell 1000<sup>®</sup> Index return reflects adjustments from income dividends and capital gain distributions reinvested as of the ex-dividend dates.

§ Annualized.

The performance shown in this section does not reflect any Insurance Company Separate Account or Policy Charges. Performance is historical and assumes reinvestment of all dividends and capital gains. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than when purchased. Past performance is not indicative of future results. Additionally, the returns presented herein may differ from the performance reported in the Financial Highlights as the returns herein are calculated in a manner consistent with standardized performance in accordance with Securities and Exchange Commission rules, while the performance in the Financial Highlights has been calculated in accordance with U.S. Generally Accepted Accounting Principles ("U.S. GAAP").

### Shareholder Expense Example — December 31, 2019 (Unaudited)

#### Fund Expenses

The following disclosure provides important information regarding the Fund's Shareholder Expense Example ("Example").

#### Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs, and (2) ongoing costs, including advisory and administrative fees and other Fund expenses. The Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds. The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period indicated, which for this Fund is from July 1, 2019 to December 31, 2019.

#### Actual Expenses

The information in the table under the heading "Actual Performance" provides information about actual account values and actual expenses. You may use the information in this column, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first column in the row entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

#### Hypothetical Example for Comparison Purposes

The information in the table under the heading "Hypothetical Performance (5% return before expenses)" provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the information under the heading "Hypothetical Performance (5% return before expenses)" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher. The fees and expenses shown in this section do not reflect any Insurance Company Separate Account Policy Charges.

	Actual Performance	Hypothetical Performance (5% return before expenses)
Beginning Account Value July 1, 2019	\$ 1,000.00	\$ 1,000.00
Ending Account Value December 31, 2019	\$ 1,039.20	\$ 1,024.50
Expenses Paid During Period*	\$ 0.72	\$ 0.71

\* Expenses are equal to the Fund's annualized expense ratio of 0.14% (representing the six month period annualized), multiplied by the average account value over the period, multiplied by 184/365 (to reflect the one-half year period). May reflect amounts waived and/or reimbursed. Without any waivers and/or reimbursements, expenses would have been higher.

## Federal Income Taxes

At December 31, 2019, the cost of investments and net unrealized appreciation (depreciation), undistributed ordinary income and undistributed long-term capital gains for income tax purposes were as follows:

Cost of Investments	Unrealized Appreciation	Unrealized Depreciation	Net Unrealized Appreciation (Depreciation)	Undistributed Ordinary Income	Undistributed Long-Term Capital Gains (Capital Loss Carryforward)
\$ 94,471,654	\$ 4,899,930	\$ (451,424)	\$ 4,448,506	\$ 1,192,617	\$ (87,673)

For the fiscal years ended December 31, 2019 and December 31, 2018, respectively, the Fund made the following tax basis distributions:

December 31, 2019			December 31, 2018		
Ordinary Income Distributions	Long-Term Capital Gain Distributions	Return of Capital	Ordinary Income Distributions	Long-Term Capital Gain Distributions	Return of Capital
\$ 1,227,506	\$ 2,452,600	\$ —	\$ 4,830,202	\$ 947,736	\$ —

See accompanying notes which are an integral part of the financial statements.

### Federal Income Taxes, continued

---

Net investment income and net realized gains (losses) in the financial statements may differ from taxable net investment income and net realized gains (losses). Capital accounts within the financial statements are adjusted for permanent differences between book and tax accounting. Book-tax differences may be due to foreign currency gains and losses, reclassifications of dividends and differences in treatment of income from swaps. These adjustments have no impact on the net assets. At December 31, 2019, there were no adjustments to the Statement of Assets and Liabilities.

## Balanced Strategy Fund

### Portfolio Management Discussion and Analysis, continued — December 31, 2019 (Unaudited)

---

The Balanced Strategy Fund (the “Fund”) is a fund of funds that invests principally in other Russell Investment Funds (“RIF”) and Russell Investment Company (“RIC”) mutual funds (the “Underlying Funds”). The Underlying Funds employ a multi-manager approach whereby portions of the Underlying Funds are allocated to different money manager strategies. Underlying Fund assets not allocated to money managers are managed by Russell Investment Management, LLC (“RIM”), the Fund’s and Underlying Funds’ advisor. RIM, as the Underlying Funds’ advisor, may change the allocation of the Underlying Funds’ assets among money managers at any time. An exemptive order from the Securities and Exchange Commission (“SEC”) permits RIM to engage or terminate a money manager in an Underlying Fund at any time, subject to approval by the Underlying Fund’s Board, without a shareholder vote. Pursuant to the terms of the exemptive order, an Underlying Fund is required to notify its shareholders within 90 days of when a money manager begins providing services.

#### **What is the Fund’s investment objective?**

The Fund seeks to provide above average long term capital appreciation and a moderate level of current income.

#### **How did the Fund perform relative to its benchmark for the fiscal year ended December 31, 2019?**

For the fiscal year ended December 31, 2019, the Fund gained 16.45%. This is compared to the Fund’s primary benchmark, the Bloomberg Barclays U.S. Aggregate Bond Index, which gained 8.72% during the same period. The Fund’s performance includes operating expenses, whereas index returns are unmanaged and do not include expenses of any kind.

For the fiscal year ended December 31, 2019, the Morningstar® Insurance Allocation – 50% to 70% Equity Category, a group of funds that Morningstar considers to have investment strategies similar to those of the Fund, gained 19.04%. This result serves as a peer comparison and is expressed net of operating expenses.

#### **How did market conditions affect the Fund’s performance?**

The Fund seeks to achieve its objective by investing in Underlying Funds that provide exposure to a range of diversified investments, and most major asset classes invested in by the Underlying Funds produced positive absolute returns during the period.

Within the Fund’s fixed income portfolio, exposure to securitized assets was beneficial, as a strong U.S. consumer and the low-rate environment created opportunities within prepayment risk assets. The low-rate environment was also beneficial to global infrastructure and global real estate investment trusts (“REITs”), as both asset classes posted strong returns over the period.

The U.S. equity market, as broadly measured by the Russell 3000® Index, surged to 31.02% at period-end, closing out a

strong year. From a style perspective, growth outperformed value. From a sector perspective, information technology was the best performing sector, while health care, materials, communication services and financials followed closely behind. The Fund’s strategic exposure to non-U.S. equities benefited performance over the period, as market sentiment in emerging markets improved due to apparent progress in the U.S.-China trade talks and a “phase one” deal.

#### **How did the investment strategies and techniques employed by the Fund and the Underlying Funds affect the Fund’s performance?**

The Fund is a fund of funds and its performance is based on RIM’s strategic asset allocations, the performance of the Underlying Funds in which the Fund invests, and tactical changes in the Fund’s asset allocation throughout the year. In order to seek to achieve the Fund’s objective during the period, RIM’s strategic asset allocation included investments in global equity, fixed income, multi-asset and alternative Underlying Funds.

Broadly, the Fund’s asset allocation was a positive contributor to performance relative to the Fund’s fixed income benchmark during the period. Allocations to global real estate investment trusts and infrastructure benefited the Fund, as both asset classes posted strong double-digit returns. Further, allocations to non-U.S. equities bolstered returns as well, outperforming the fixed income asset class.

The fixed income portion of the Fund’s portfolio provided positive results compared to the Fund’s fixed income benchmark. An allocation to the RIF Strategic Bond Fund was positive from a benchmark-relative perspective as a result of its exposure to securitized credit, which generated an above market yield. An allocation to the RIC Investment Grade Bond Fund also contributed positively as a result of the Underlying Fund’s underweight to government and government-guaranteed securities and an overweight to securitized credit. An allocation to the RIC Opportunistic Credit Fund was additive due to its higher allocation to high yield relative to the Bloomberg Barclays U.S. Aggregate Bond Index, and its emerging markets currency exposure provided a significant boost to active returns.

While the broader equity markets delivered strong absolute performance over the period, the Fund’s equity allocation exceeded the Fund’s fixed income benchmark. However, the equity Underlying Funds generally underperformed their respective equity benchmarks. The RIC Sustainable Equity Fund underperformed its benchmark, as it was consistently underweight stocks that have higher momentum and expensive valuations and overweight stocks with higher profitability. Both factor tilts negatively impacted benchmark-relative performance over the year. The RIF International Developed Markets Fund

# Russell Investment Funds

## Balanced Strategy Fund

### Portfolio Management Discussion and Analysis, continued — December 31, 2019 (Unaudited)

---

underperformed its benchmark due to its sector allocations – for instance, an underweight to health care and overweight to communication services detracted. A tilt toward low valuation stocks was a meaningful driver of underperformance for the RIC U.S. Dynamic Equity Fund. Coupled with negative stock selection within the information technology sector, the Underlying Fund underperformed its equity benchmark.

The alternative assets portion of the Fund's portfolio provided positive results compared to the Fund's fixed income benchmark. The RIF Global Real Estate Securities Fund outperformed the Fund's benchmark due to the overall strength of the asset class relative to fixed income, as real assets were bolstered by a low interest rate environment. The RIC Global Infrastructure Fund outperformed both the Fund's fixed income benchmark and its listed infrastructure benchmark due to out-of-index exposures to construction and engineering and specialized REITs. The RIC Commodity Strategies Fund outperformed its benchmark but struggled against the Fund's fixed income benchmark.

The multi-asset portion of the Fund's portfolio outperformed the Fund's fixed income benchmark. The RIC Multi-Strategy Income Fund benefited from overweight positions to mortgage back securities that added value due to the low interest rate environment. However, the Fund's regional positioning was challenged over the period, mainly driven by an overweight to non-U.S. equity and a U.S. equity underweight.

#### **Describe any changes to the Fund's structure or allocation to the Underlying Funds.**

RIM has the discretion to vary the Fund's actual allocation from the target strategic asset allocation by up to +/- 5% at the equity, fixed income, multi-asset or alternative category level based on RIM's capital markets research. In addition to investing in the Underlying Funds, RIM may seek to actively manage a Fund's overall exposures by investing in derivatives that RIM believes will achieve the desired risk/return profile for the Fund.

RIM continued to operate the Fund as a risk manager rather than risk taker during the period. RIM's tactical regional modifications

to the Fund's asset allocation versus strategic targets were challenged during the period, mainly driven by an overweight to non-U.S. equity and U.S. equity underweight while U.S. equity led global market performance. In terms of tactical asset class modifications, in the first quarter of 2019, real estate exposure was added given attractive valuations. At the beginning of 2019, RIM also increased exposure to high yield corporate credit, but pared back as spreads compressed to expensive levels.

Effective on November 13, 2019, the Fund's allocation to the Underlying Funds in which it invests was modified to an approximate target allocation of 53% to equity, 33% to fixed income, 10% to multi-asset and 4% to alternative asset classes.

RIM manages a global real yield positioning strategy and a currency factor positioning strategy for the Fund. Using futures, the global high real yield strategy took long positions in high quality government bonds whose net-of-inflation yields are expected to be relatively high and short positions where net-of-inflation yield is expected to be relatively low. The currency factor strategy utilized currency forward contracts to take long and short positions in global foreign exchange markets. The global real yield strategy detracted over the period as the long positions underperformed, with the cost split evenly between the U.S. and Canada. With respect to the currency factor strategy, the Fund's exposure moderately detracted.

**The views expressed in this report reflect those of the portfolio managers only through the end of the period covered by the report. These views do not necessarily represent the views of RIM, or any other person in RIM or any other affiliated organization. These views are subject to change at any time based upon market conditions or other events, and RIM disclaims any responsibility to update the views contained herein. These views should not be relied on as investment advice and, because investment decisions for a RIF Fund are based on numerous factors, should not be relied on as an indication of investment decisions of any RIF Fund.**

## Balanced Strategy Fund

### Shareholder Expense Example — December 31, 2019 (Unaudited)

#### Fund Expenses

The following disclosure provides important information regarding the Fund's Shareholder Expense Example ("Example").

#### Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs, and (2) ongoing costs, including advisory and administrative fees and other Fund expenses. The Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds. The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period indicated, which for this Fund is from July 1, 2019 to December 31, 2019.

#### Actual Expenses

The information in the table under the heading "Actual Performance" provides information about actual account values and actual expenses. You may use the information in this column, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first column in the row entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

#### Hypothetical Example for Comparison Purposes

The information in the table under the heading "Hypothetical Performance (5% return before expenses)" provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the information under the heading "Hypothetical Performance (5% return before expenses)" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher. The fees and expenses shown in this section do not reflect any Insurance Company Separate Account Policy Charges.

	Actual Performance	Hypothetical Performance (5% return before expenses)
Beginning Account Value July 1, 2019	\$ 1,000.00	\$ 1,000.00
Ending Account Value December 31, 2019	\$ 1,055.50	\$ 1,024.50
Expenses Paid During Period*	\$ 0.73	\$ 0.71

\* Expenses are equal to the Fund's annualized expense ratio of 0.14% (representing the six month period annualized), multiplied by the average account value over the period, multiplied by 184/365 (to reflect the one-half year period). May reflect amounts waived and/or reimbursed. Without any waivers and/or reimbursements, expenses would have been higher.

### **Federal Income Taxes, continued**

---

Net investment income and net realized gains (losses) in the financial statements may differ from taxable net investment income and net realized gains (losses). Capital accounts within the financial statements are adjusted for permanent differences between book and tax accounting. Book-tax differences may be due to foreign currency gains and losses, reclassifications of dividends and differences in treatment of income from swaps. These adjustments have no impact on the net assets. At December 31, 2019, there were no adjustments to the Statement of Assets and Liabilities.

## Growth Strategy Fund

### Portfolio Management Discussion and Analysis, continued — December 31, 2019 (Unaudited)

---

The Growth Strategy Fund (the “Fund”) is a fund of funds that invests principally in other Russell Investment Funds (“RIF”) and Russell Investment Company (“RIC”) mutual funds (the “Underlying Funds”). The Underlying Funds employ a multi-manager approach whereby portions of the Underlying Funds are allocated to different money manager strategies. Underlying Fund assets not allocated to money managers are managed by Russell Investment Management, LLC (“RIM”), the Fund’s and Underlying Funds’ advisor. RIM, as the Underlying Funds’ advisor, may change the allocation of the Underlying Funds’ assets among money managers at any time. An exemptive order from the Securities and Exchange Commission (“SEC”) permits RIM to engage or terminate a money manager in an Underlying Fund at any time, subject to approval by the Underlying Fund’s Board, without a shareholder vote. Pursuant to the terms of the exemptive order, an Underlying Fund is required to notify its shareholders within 90 days of when a money manager begins providing services.

#### **What is the Fund’s investment objective?**

The Fund seeks to provide high long term capital appreciation, and as a secondary objective, current income.

#### **How did the Fund perform relative to its benchmark for the fiscal year ended December 31, 2019?**

For the fiscal year ended December 31, 2019, the Fund gained 18.06%. This is compared to the Fund’s primary benchmark, the Russell 1000® Index, which gained 31.43% during the same period. The Fund’s performance includes operating expenses, whereas index returns are unmanaged and do not include expenses of any kind.

For the fiscal year ended December 31, 2019, the Morningstar® Insurance Allocation – 70% to 85% Equity Category, a group of funds that Morningstar considers to have investment strategies similar to those of the Fund, gained 21.50%. This result serves as a peer comparison and is expressed net of operating expenses.

#### **How did market conditions affect the Fund’s performance?**

The Fund seeks to achieve its objective by investing in Underlying Funds that provide exposure to a range of diversified investments, and most major asset classes invested in by the Underlying Funds produced positive absolute returns during the period.

Within the Fund’s fixed income portfolio, exposure to securitized assets was beneficial, as a strong U.S. consumer and the low-rate environment created opportunities within prepayment risk assets. The low-rate environment was also beneficial to global infrastructure and global real estate investment trusts (“REITs”), as both asset classes posted strong returns over the period.

The U.S. equity market, as broadly measured by the Russell 3000® Index, surged to 31.02% at period-end, closing out a

strong year. From a style perspective, growth outperformed value. From a sector perspective, information technology was the best performing sector, while health care, materials, communication services and financials followed closely behind. The Fund’s strategic exposure to non-U.S. equities benefited performance over the period as market sentiment in emerging markets improved due to apparent progress in the U.S.-China trade talks and a “phase one” deal.

#### **How did the investment strategies and techniques employed by the Fund and the Underlying Funds affect the Fund’s performance?**

The Fund is a fund of funds and its performance is based on RIM’s strategic asset allocations, the performance of the Underlying Funds in which the Fund invests, and tactical changes in the Fund’s asset allocation throughout the year. In order to seek to achieve the Fund’s objective during the period, RIM’s strategic asset allocation included investments in global equity, fixed income, multi-asset and alternative Underlying Funds.

The Fund’s asset allocation was a detractor to performance relative to the Fund’s equity benchmark during the period. Allocations to global real estate investment trusts and infrastructure were costly, as were exposures to high yield credit and treasuries. Commodities delivered positive absolute performance, yet the Fund’s allocation to this asset class detracted as equities outperformed broadly across asset classes.

The fixed income portion of the Fund’s portfolio underperformed the Fund’s equity benchmark. Allocations to the RIF Strategic Bond Fund and RIC Opportunistic Credit Fund detracted as fixed income underperformed the broader equity markets.

While the broader equity markets delivered strong absolute performance over the period, the Fund’s equity allocation underperformed the Fund’s equity benchmark. In addition, the equity Underlying Funds generally underperformed their respective equity benchmarks. The RIC Sustainable Equity Fund underperformed its benchmark, as it was consistently underweight stocks with higher momentum and expensive and overweight stocks with higher profitability. Both factor tilts negatively impacted benchmark-relative performance over the year. The RIF International Developed Markets Fund underperformed its benchmark due to sector allocations – for instance, an underweight to health care and overweight to communication services detracted. A tilt toward low valuation stocks was also a meaningful driver of underperformance for the RIC U.S. Dynamic Equity Fund. Coupled with negative stock selection within the information technology sector, the Fund underperformed its equity benchmark.

The alternative assets portion of the Fund’s portfolio provided negative results compared to the Fund’s equity benchmark. The

# Russell Investment Funds

## Growth Strategy Fund

### Portfolio Management Discussion and Analysis, continued — December 31, 2019 (Unaudited)

---

RIF Global Real Estate Securities Fund underperformed the Fund's benchmark due to the relative strength of equities over real estate investment trusts. The RIC Global Infrastructure Fund underperformed the Fund's equity benchmark but outperformed its listed infrastructure benchmark due to out-of-index exposures to construction and engineering and specialized REITs. The RIC Commodity Strategies Fund struggled against the Fund's benchmark but fared better against its assigned benchmark.

The multi-asset portion of the Fund's portfolio underperformed the Fund's equity benchmark. The RIC Multi-Asset Growth Strategy Fund struggled to beat the equity returns with more diversified allocation to equity and fixed asset classes.

#### **Describe any changes to the Fund's structure or allocation to the Underlying Funds.**

RIM has the discretion to vary the Fund's actual allocation from the target strategic asset allocation by up to +/- 5% at the equity, fixed income, multi-asset or alternative category level based on RIM's capital markets research. In addition to investing in the Underlying Funds, RIM may seek to actively manage a Fund's overall exposures by investing in derivatives that RIM believes will achieve the desired risk/return profile for the Fund.

RIM continued to operate the Fund as a risk manager rather than risk taker during the period. RIM's tactical regional modifications to the Fund's asset allocation versus strategic targets were challenged during the period, mainly driven by an overweight to non-U.S. equity and U.S. equity underweight while U.S. equity led global market performance. In terms of tactical asset class modifications, in the first quarter of 2019, real estate exposure was added given attractive valuations. At the beginning of 2019,

RIM also increased exposure to high yield corporate credit, but pared back as spreads compressed to expensive levels.

Effective on November 13, 2019, the Fund's allocation to the Underlying Funds in which it invests was modified to an approximate target allocation of 70% to equity, 16% to fixed income, 10% to multi-asset and 4% to alternative asset classes.

RIM manages a global real yield positioning strategy and a currency factor positioning strategy for the Fund. Using futures, the global high real yield strategy took long positions in high quality government bonds whose net-of-inflation yields are expected to be relatively high and short positions where net-of-inflation yield is expected to be relatively low. The currency factor strategy utilized currency forward contracts to take long and short positions in global foreign exchange markets. The global real yield strategy detracted over the period as the long positions underperformed, with the cost split evenly between the U.S. and Canada. With respect to the currency factor strategy, the Fund's exposure moderately detracted.

**The views expressed in this report reflect those of the portfolio managers only through the end of the period covered by the report. These views do not necessarily represent the views of RIM, or any other person in RIM or any other affiliated organization. These views are subject to change at any time based upon market conditions or other events, and RIM disclaims any responsibility to update the views contained herein. ---

\* Assumes initial investment on January 1, 2010.

\*\* The Russell 1000<sup>®</sup> Index includes the 1,000 largest companies in the Russell 3000<sup>®</sup> Index. The Russell 1000<sup>®</sup> Index represents the universe of stocks from which most active money managers typically select. The Russell 1000<sup>®</sup> Index return reflects adjustments from income dividends and capital gain distributions reinvested as of the ex-dividend dates.

\*\*\* The Bloomberg Barclays U.S. Aggregate Bond Index is an index, with income reinvested, generally representative of intermediate-term government bonds, investment grade corporate debt securities and mortgage-backed securities.

\*\*\*\* The MSCI World ex USA Index (Net) is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets. The index consists of 22 developed market country indexes.

§ Annualized.

The performance shown in this section does not reflect any Insurance Company Separate Account or Policy Charges. Performance is historical and assumes reinvestment of all dividends and capital gains. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than when purchased. Past performance is not indicative of future results. Additionally, the returns presented herein may differ from the performance reported in the Financial Highlights as the returns herein are calculated in a manner consistent with standardized performance in accordance with Securities and Exchange Commission rules, while the performance in the Financial Highlights has been calculated in accordance with U.S. Generally Accepted Accounting Principles ("U.S. GAAP").

### Shareholder Expense Example — December 31, 2019 (Unaudited)

#### Fund Expenses

The following disclosure provides important information regarding the Fund's Shareholder Expense Example ("Example").

#### Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs, and (2) ongoing costs, including advisory and administrative fees and other Fund expenses. The Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds. The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period indicated, which for this Fund is from July 1, 2019 to December 31, 2019.

#### Actual Expenses

The information in the table under the heading "Actual Performance" provides information about actual account values and actual expenses. You may use the information in this column, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first column in the row entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

#### Hypothetical Example for Comparison Purposes

The information in the table under the heading "Hypothetical Performance (5% return before expenses)" provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the information under the heading "Hypothetical Performance (5% return before expenses)" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher. The fees and expenses shown in this section do not reflect any Insurance Company Separate Account Policy Charges.

	Actual Performance	Hypothetical Performance (5% return before expenses)
Beginning Account Value July 1, 2019	\$ 1,000.00	\$ 1,000.00
Ending Account Value December 31, 2019	\$ 1,060.30	\$ 1,024.45
Expenses Paid During Period*	\$ 0.78	\$ 0.77

\* Expenses are equal to the Fund's annualized expense ratio of 0.15% (representing the six month period annualized), multiplied by the average account value over the period, multiplied by 184/365 (to reflect the one-half year period). May reflect amounts waived and/or reimbursed. Without any waivers and/or reimbursements, expenses would have been higher.

## Federal Income Taxes

At December 31, 2019, the cost of investments and net unrealized appreciation (depreciation), undistributed ordinary income and undistributed long-term capital gains for income tax purposes were as follows:

Cost of Investments	Unrealized Appreciation	Unrealized Depreciation	Net Unrealized Appreciation (Depreciation)	Undistributed Ordinary Income	Undistributed Long-Term Capital Gains (Capital Loss Carryforward)
\$ 184,877,256	\$ 18,507,745	\$ (2,343,662)	\$ 16,164,083	\$ 2,538,831	\$ 3,418,527

See accompanying notes which are an integral part of the financial statements.

# Russell Investment Funds

## Growth Strategy Fund

### Federal Income Taxes, continued

---

For the fiscal years ended December 31, 2019 and December 31, 2018, respectively, the Fund made the following tax basis distributions:

December 31, 2019			December 31, 2018		
Ordinary Income Distributions	Long-Term Capital Gain Distributions	Return of Capital	Ordinary Income Distributions	Long-Term Capital Gain Distributions	Return of Capital
\$ 1,404,242	\$ 10,906,819	\$ —	\$ 10,477,718	\$ 8,298,093	\$ —

Net investment income and net realized gains (losses) in the financial statements may differ from taxable net investment income and net realized gains (losses). Capital accounts within the financial statements are adjusted for permanent differences between book and tax accounting. Book-tax differences may be due to foreign currency gains and losses, reclassifications of dividends and differences in treatment of income from swaps. These adjustments have no impact on the net assets. At December 31, 2019, there were no adjustments to the Statement of Assets and Liabilities.

## Equity Growth Strategy Fund

### Portfolio Management Discussion and Analysis, continued — December 31, 2019 (Unaudited)

---

The Equity Growth Strategy Fund (the “Fund”) is a fund of funds that invests principally in other Russell Investment Funds (“RIF”) and Russell Investment Company (“RIC”) mutual funds (the “Underlying Funds”). The Underlying Funds employ a multi-manager approach whereby portions of the Underlying Funds are allocated to different money manager strategies. Underlying Fund assets not allocated to money managers are managed by Russell Investment Management, LLC (“RIM”), the Fund’s and Underlying Funds’ advisor. RIM, as the Underlying Funds’ advisor, may change the allocation of the Underlying Funds’ assets among money managers at any time. An exemptive order from the Securities and Exchange Commission (“SEC”) permits RIM to engage or terminate a money manager in an Underlying Fund at any time, subject to approval by the Underlying Fund’s Board, without a shareholder vote. Pursuant to the terms of the exemptive order, an Underlying Fund is required to notify its shareholders within 90 days of when a money manager begins providing services.

#### **What is the Fund’s investment objective?**

The Fund seeks to provide high long term capital appreciation.

#### **How did the Fund perform relative to its benchmark for the fiscal year ended December 31, 2019?**

For the fiscal year ended December 31, 2019, the Fund gained 20.09%. This is compared to the Fund’s primary benchmark, the Russell 1000<sup>®</sup> Index, which gained 31.43% during the same period. The Fund’s performance includes operating expenses, whereas index returns are unmanaged and do not include expenses of any kind.

For the fiscal year ended December 31, 2019, the Morningstar<sup>®</sup> Insurance Allocation – 70% to 85% Equity Category, a group of funds that Morningstar considers to have investment strategies similar to those of the Fund, gained 21.50%. This result serves as a peer comparison and is expressed net of operating expenses.

#### **How did market conditions affect the Fund’s performance?**

The Fund seeks to achieve its objective by investing in Underlying Funds that provide exposure to a range of diversified investments, and most major asset classes invested in by the Underlying Funds produced positive absolute returns during the period.

Within the Fund’s fixed income portfolio, exposure to securitized assets was beneficial, as a strong U.S. consumer and the low-rate environment created opportunities within prepayment risk assets. The low-rate environment was also beneficial to global infrastructure and global real estate investment trusts (“REITs”), as both asset classes posted strong returns over the period.

The U.S. equity market, as broadly measured by the Russell 3000<sup>®</sup> Index, surged to 31.02% at period-end, closing out a strong year. From a style perspective, growth outperformed value.

From a sector perspective, information technology was the best performing sector, while health care, materials, communication services and financials followed closely behind. The Fund’s strategic exposure to non-U.S. equities benefited performance over the period as market sentiment in emerging markets improved due to apparent progress in the U.S.-China trade talks and a “phase one” deal.

#### **How did the investment strategies and techniques employed by the Fund and the Underlying Funds affect the Fund’s performance?**

The Fund is a fund of funds and its performance is based on RIM’s strategic asset allocations, the performance of the Underlying Funds in which the Fund invests, and tactical changes in the Fund’s asset allocation throughout the year. In order to seek to achieve the Fund’s objective during the period, RIM’s strategic asset allocation included investments in global equity, fixed income, multi-asset and alternative Underlying Funds.

The Fund’s asset allocation was a detractor to performance relative to the Fund’s equity benchmark during the period. Allocations to global real estate investment trusts and infrastructure were costly, as were exposures to high yield credit and treasuries. Commodities delivered positive absolute performance, yet the Fund’s allocation to this asset class detracted as equities outperformed broadly across asset classes.

The fixed income portion of the Fund’s portfolio underperformed the Fund’s equity benchmark. Allocations to the RIC Unconstrained Total Return Fund and RIC Opportunistic Credit Fund detracted as fixed income underperformed the broader equity markets.

While the broader equity markets delivered strong absolute performance over the period, the Fund’s equity allocation underperformed the Fund’s equity benchmark. In addition, the equity Underlying Funds generally underperformed their respective equity benchmarks. The RIC Sustainable Equity Fund underperformed its benchmark, as it was consistently underweight stocks with higher momentum and expensive and overweight stocks with higher profitability. Both factor tilts negatively impacted benchmark-relative performance over the year. The RIF International Developed Markets Fund underperformed its benchmark due to sector allocations – for instance, an underweight to health care and overweight to communication services detracted. A tilt toward low valuation stocks was also a meaningful driver of underperformance for the RIC U.S. Dynamic Equity Fund. Coupled with negative stock selection within the information technology sector, the Fund underperformed its equity benchmark.

The alternative assets portion of the Fund’s portfolio provided negative results compared to the Fund’s equity benchmark. The RIF Global Real Estate Securities Fund underperformed the

# Russell Investment Funds

## Equity Growth Strategy Fund

### Portfolio Management Discussion and Analysis, continued — December 31, 2019 (Unaudited)

---

Fund's benchmark due to the relative strength of equities over real estate investment trusts. The RIC Global Infrastructure Fund underperformed the Fund's equity benchmark but outperformed its listed infrastructure benchmark due to out-of-index exposures to construction and engineering and specialized REITs. The RIC Commodity Strategies Fund struggled against the Fund's benchmark but fared better against its assigned benchmark.

The multi-asset portion of the Fund's portfolio underperformed the Fund's equity benchmark. The RIC Multi-Asset Growth Strategy Fund struggled to beat the equity returns with a more diversified allocation to equity and fixed asset classes.

#### **Describe any changes to the Fund's structure or allocation to the Underlying Funds.**

RIM has the discretion to vary the Fund's actual allocation from the target strategic asset allocation by up to +/- 5% at the equity, fixed income, multi-asset or alternative category level based on RIM's capital markets research. In addition to investing in the Underlying Funds, RIM may seek to actively manage a Fund's overall exposures by investing in derivatives that RIM believes will achieve the desired risk/return profile for the Fund.

RIM continued to operate the Fund as a risk manager rather than risk taker during the period. RIM's tactical regional modifications to the Fund's asset allocation versus strategic targets were challenged during the period, mainly driven by an overweight to non-U.S. equity and U.S. equity underweight while U.S. equity led global market performance. In terms of tactical asset class modifications, in the first quarter of 2019, real estate exposure was added given attractive valuations. At the beginning of 2019,

RIM also increased exposure to high yield corporate credit, but pared back as spreads compressed to expensive levels.

Effective on November 13, 2019, the Fund's allocation to the Underlying Funds in which it invests was modified to an approximate target allocation of 80% to equity, 11% to fixed income, 4% to multi-asset and 5% to alternative asset classes.

RIM manages a global real yield positioning strategy and a currency factor positioning strategy for the Fund. Using futures, the global high real yield strategy took long positions in high quality government bonds whose net-of-inflation yields are expected to be relatively high and short positions where net-of-inflation yield is expected to be relatively low. The currency factor strategy utilized currency forward contracts to take long and short positions in global foreign exchange markets. The global real yield strategy detracted over the period as the long positions underperformed, with the cost split evenly between the U.S. and Canada. With respect to the currency factor strategy, the Fund's exposure moderately detracted.

**The views expressed in this report reflect those of the portfolio managers only through the end of the period covered by the report. These views do not necessarily represent the views of RIM, or any other person in RIM or any other affiliated organization. These views are subject to change at any time based upon market conditions or other events, and RIM disclaims any responsibility to update the views contained herein. These views should not be relied on as investment advice and, because investment decisions for a RIF Fund are based on numerous factors, should not be relied on as an indication of investment decisions of any RIF Fund.**

## Equity Growth Strategy Fund

### Shareholder Expense Example — December 31, 2019 (Unaudited)

#### Fund Expenses

The following disclosure provides important information regarding the Fund's Shareholder Expense Example ("Example").

#### Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs, and (2) ongoing costs, including advisory and administrative fees and other Fund expenses. The Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds. The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period indicated, which for this Fund is from July 1, 2019 to December 31, 2019.

#### Actual Expenses

The information in the table under the heading "Actual Performance" provides information about actual account values and actual expenses. You may use the information in this column, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first column in the row entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

#### Hypothetical Example for Comparison Purposes

The information in the table under the heading "Hypothetical Performance (5% return before expenses)" provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the information under the heading "Hypothetical Performance (5% return before expenses)" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher. The fees and expenses shown in this section do not reflect any Insurance Company Separate Account Policy Charges.

	Actual Performance	Hypothetical Performance (5% return before expenses)
Beginning Account Value July 1, 2019	\$ 1,000.00	\$ 1,000.00
Ending Account Value December 31, 2019	\$ 1,066.90	\$ 1,024.45
Expenses Paid During Period*	\$ 0.78	\$ 0.77

\* Expenses are equal to the Fund's annualized expense ratio of 0.15% (representing the six month period annualized), multiplied by the average account value over the period, multiplied by 184/365 (to reflect the one-half year period). May reflect amounts waived and/or reimbursed. Without any waivers and/or reimbursements, expenses would have been higher.

\* Futures and foreign currency exchange contract values reflect the unrealized appreciation (depreciation) on the investments.

(a) Certain investments that are measured at fair value using the net asset value per share (or its equivalent) practical expedient have not been classified in the fair value levels. The fair value amounts presented in the table are intended to permit reconciliation to the amounts presented in the Schedule of Investments.

For a description of the Levels, see note 2 in the Notes to Financial Statements.

For a disclosure on transfers between Levels 1, 2 and 3 during the period ended December 31, 2019, see note 2 in the Notes to Financial Statements.

### Federal Income Taxes, continued

---

Net investment income and net realized gains (losses) in the financial statements may differ from taxable net investment income and net realized gains (losses). Capital accounts within the financial statements are adjusted for permanent differences between book and tax accounting. Book-tax differences may be due to foreign currency gains and losses, reclassifications of dividends and differences in treatment of income from swaps. These adjustments have no impact on the net assets. At December 31, 2019, there were no adjustments to the Statement of Assets and Liabilities.

## LifePoints® Funds Variable Target Portfolio Series

### Notes to Financial Statements — December 31, 2019

#### 1. Organization

Russell Investment Funds (the “Investment Company” or “RIF”) is a series investment company with nine different investment portfolios referred to as funds (each a “Fund” and collectively the “Funds”). These financial statements report on four of these Funds. The Investment Company provides the investment base for one or more variable insurance products issued by one or more insurance companies. These Funds are offered at net asset value (“NAV”) to qualified insurance company separate accounts offering variable insurance products. The Investment Company is registered under the Investment Company Act of 1940, as amended (“Investment Company Act”), as an open-end management investment company. It is organized and operated as a Massachusetts business trust under a Second Amended and Restated Master Trust Agreement dated March 1, 2018, as amended (“Master Trust Agreement”), and the provisions of Massachusetts law governing the operation of a Massachusetts business trust. The Investment Company’s Master Trust Agreement permits the Board of Trustees (the “Board”) to issue an unlimited number of shares of beneficial interest. Each of the Funds is diversified. Under the Investment Company Act, a diversified company is defined as a management company which meets the following requirements: at least 75% of the value of its total assets is represented by cash and cash equivalents (including receivables), government securities, securities of other investment companies, and other securities for the purposes of this calculation limited in respect of any one issuer to an amount not greater in value than five percent of the value of the total assets of such management company and to not more than 10% of the outstanding voting securities of such issuer.

Each of the Funds listed in the table below is a “fund of funds” and diversifies its assets by investing principally, in shares of several other RIF Funds and in certain Russell Investment Company (“RIC”) Funds (the “Underlying Funds”). Each Fund seeks to achieve its specific investment objective by investing in different combinations of Underlying Funds. In addition to investing in the Underlying Funds, Russell Investment Management, LLC (“RIM”), the Funds’ investment adviser, may seek to actively manage the Funds’ overall exposures by investing in derivatives, including futures, options, forwards and swaps, that RIM believes will achieve the desired exposures for the Funds. The Funds may hold cash in connection with these investments. The Funds usually, but not always, pursue a strategy of being fully invested by exposing their cash to the performance of segments of the global equity market by purchasing index futures contracts (also known as “equitization”).

Each Fund intends its strategy of investing in combinations of equity, fixed income, multi-asset and alternative Underlying Funds to result in investment diversification that an investor could otherwise achieve only by holding numerous individual investments. A Fund’s actual allocation may vary from the target strategic asset allocation at any point in time (1) due to market movements, (2) by up to +/- 5% at the equity, fixed income, multi-asset or alternative category level based on RIM’s capital markets research, and/or (3) due to the implementation over a period of time of a change to the target strategic asset allocation including the addition of a new Underlying Fund. There may be no changes in the asset allocation or to the Underlying Funds in a given year or such changes may be made one or more times in a year.

The following table shows the Funds’ approximate expected target strategic asset allocation effective on or about December 31, 2019 to equity, fixed income, multi-asset, and alternative asset classes. The equity Underlying Funds in which the Funds may invest include the RIC Sustainable Equity, RIC U.S. Dynamic Equity, RIF U.S. Small Cap Equity, RIF U.S. Strategic Equity, RIC Emerging Markets, RIC Global Equity, and RIF International Developed Markets Funds. The fixed income Underlying Funds in which the Funds may invest include the RIC Opportunistic Credit, RIC Investment Grade Bond, RIC Short Duration Bond, RIC Unconstrained Total Return, and RIF Strategic Bond Funds. The multi-asset Underlying Funds in which the Funds may invest include the RIC Multi-Strategy Income and RIC Multi-Asset Growth Strategy Funds. The alternative Underlying Funds in which the Funds may invest include the RIC Commodity Strategies, RIC Global Infrastructure and RIF Global Real Estate Securities Funds.

	Asset Allocation*			
	Moderate Strategy Fund	Balanced Strategy Fund	Growth Strategy Fund	Equity Growth Strategy Fund
Equity	34%	53%	70%	80%
Fixed Income	52%	33%	16%	11%
Multi-Asset	12%	10%	10%	4%
Alternative **	2%	4%	4%	5%

\* As described above, actual asset allocation may vary.

\*\* Alternative Underlying Funds pursue investment strategies that differ from those of traditional broad market equity or fixed income funds.

## LifePoints® Funds Variable Target Portfolio Series

### Notes to Financial Statements, continued — December 31, 2019

---

#### 2. Significant Accounting Policies

The Funds' financial statements are prepared in accordance with U.S. generally accepted accounting principles ("U.S. GAAP") which require the use of management estimates and assumptions at the date of the financial statements. Actual results could differ from those estimates. The Funds are considered investment companies under U.S. GAAP and follow the accounting and reporting guidance applicable to investment companies. The following is a summary of the significant accounting policies consistently followed by each Fund in the preparation of its financial statements.

In August 2018, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2018-13, Fair Value Measurement (Topic 820): Disclosure Framework - Changes to the Disclosure Requirements for Fair Value Measurements. The amendments in the ASU modify the disclosure requirements on fair value measurements in Topic 820. The ASU is effective for interim and annual reporting periods beginning after December 15, 2019. Management has evaluated the impact and believes the adoption of this ASU will not have a material impact on financial statements.

#### Security Valuation

The Funds value portfolio securities according to Board-approved securities valuation procedures which include market and fair value procedures. The Board has delegated the responsibility for administration of the securities valuation procedures to Russell Investments Fund Services, LLC ("RIFUS"). The Funds value the shares of the Underlying Funds at the current NAV per share of each Underlying Fund. The Funds have adopted the authoritative guidance under U.S. GAAP for estimating the fair value of investments in funds that have calculated NAV per share in accordance with the specialized accounting guidance for investment companies. Accordingly, the Funds estimate the fair value of an investment in a fund using the NAV per share without further adjustment as a practical expedient, if the NAV per share of the investment is determined in accordance with the specialized accounting guidance for investment companies as of the reporting entity's measurement date.

U.S. GAAP defines fair value as the price that a Fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. It establishes a fair value hierarchy that prioritizes inputs to valuation methods and requires a separate disclosure of the fair value hierarchy for each major category of assets and liabilities, that segregates fair value measurements into levels (Level 1, 2, and 3). The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. Levels 1, 2 and 3 of the fair value hierarchy are defined as follows:

- Level 1 — Quoted prices (unadjusted) in active markets or exchanges for identical assets and liabilities.
- Level 2 — Inputs other than quoted prices included within Level 1 that are observable, which may include, but are not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, and inputs such as interest rates, yield curves, implied volatilities, credit spreads or other market corroborated inputs.
- Level 3 — Significant unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include assumptions made by RIFUS, acting at the discretion of the Board, that are used in determining the fair value of investments.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, for example, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgement. Accordingly, the degree of judgement exercised in determining fair value is greatest for instruments categorized in Level 3. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

The valuation techniques and significant inputs used in determining the fair market values of financial instruments categorized as Level 1 and Level 2 of the fair value hierarchy are as follows:

Equity securities, including common and preferred stock, short securities, ETFs and restricted securities that are traded on a national securities exchange, are stated at the last reported sales price on the day of valuation or official closing price, as applicable.

# Russell Investment Funds

## LifePoints® Funds Variable Target Portfolio Series

### Notes to Financial Statements, continued — December 31, 2019

---

To the extent these securities are actively traded, and valuation adjustments are not applied, they are categorized as Level 1 of the fair value hierarchy.

Investments in investment funds that are not traded on a national securities exchange (or reported on the NASDAQ national market) will be valued based upon the NAV of such investments. The Funds have adopted the authoritative guidance under U.S. GAAP for estimating the fair value of investments in funds that have calculated NAV per share in accordance with the specialized accounting guidance for investment companies. Accordingly, the Funds estimate the fair value of an investment in a fund using the NAV per share without further adjustment as a practical expedient, if the NAV per share of the investment is determined in accordance with the specialized accounting guidance for investment companies as of the reporting entity's measurement date.

Derivative instruments are instruments such as foreign currency contracts, futures contracts, options contracts, or swap agreements that derive their value from underlying asset prices, indices, reference rates, and other inputs or a combination of these factors. Derivatives may be classified into two groups depending upon the way that they are traded: privately traded over-the-counter (“OTC”) derivatives that do not go through an exchange or intermediary and exchange-traded derivatives that are traded through specialized derivatives exchanges or other regulated exchanges. OTC derivatives are normally valued on the basis of broker dealer quotations or pricing service providers. Depending on the product and the terms of the transaction, the value of the derivative instrument can be estimated by a pricing service provider using a series of techniques, including simulation pricing models. The pricing models use inputs that are observed from actively quoted markets such as issuer details, indices, spreads, interest rates, yield curves, dividends and exchange rates. OTC derivatives that use these and similar valuation techniques and inputs as described above are categorized as Level 2 of the fair value hierarchy, with the exception of foreign currency spot contracts which are categorized as Level 1 of the fair value hierarchy. OTC derivatives that use broker dealer quotations are categorized as level 3 of the fair value hierarchy. Exchange-traded derivatives are valued based on the last reported sales price on the day of valuation and are categorized as Level 1 of the fair value hierarchy.

Centrally cleared swaps listed or traded on a multilateral or trade facility platform, such as a registered exchange, are valued at the daily settlement price determined by the respective exchange. For centrally cleared credit default swaps, the clearing facility requires its members to provide actionable levels across complete term structures. These levels along with external third-party prices are used to produce daily settlement prices. These securities are categorized as Level 2 of the fair value hierarchy. Centrally cleared interest rate swaps are valued using a pricing model that references the underlying rates including the Overnight Index Swap (“OIS”) rate and London Interbank Offered Rate (“LIBOR”) forward rate to produce the daily settlement price. These securities are categorized as Level 2 of the fair value hierarchy.

For movements between the levels within the fair value hierarchy, the Funds have adopted a policy of recognizing the transfers as of period end.

For the period ended December 31, 2019, there was no movement between the levels of the fair value hierarchy.

#### Level 3 Fair Value Investments

The valuation techniques and significant inputs used in determining the fair values of financial instruments classified as Level 3 of the fair value hierarchy are as follows:

Securities and other assets for which market quotes are not readily available, or are not reliable, are valued at fair value as determined in good faith by RIFUS and are categorized as Level 3 of the fair value hierarchy. Market quotes are considered not readily available in circumstances where there is an absence of current or reliable market-based data (e.g., trade information or broker quotes). When RIFUS applies fair valuation methods that use significant unobservable inputs to determine a Fund's NAV, securities will not be priced on the basis of quotes from the primary market in which they are traded, but instead may be priced by another method that RIFUS believes accurately reflects fair value and will be categorized as Level 3 of the fair value hierarchy. Fair value pricing may require subjective determinations about the value of a security. While the securities valuation procedures are intended to result in a calculation of a Fund's NAV that fairly reflects security values as of the time of pricing, the process cannot guarantee that fair values determined by RIFUS would accurately reflect the price that a Fund could obtain for a security if it were to dispose of that security as of the time of pricing (for instance, in a forced or distressed sale). The prices used by a Fund may differ from the value that would be realized if the security was sold.

RIFUS employs third-party pricing vendors to provide fair value measurements. RIFUS oversees third-party pricing service providers in order to support the valuation process throughout the year.

# Russell Investment Funds

## LifePoints® Funds Variable Target Portfolio Series

### Notes to Financial Statements, continued — December 31, 2019

---

If third-party evaluated vendor pricing is neither available nor deemed to be indicative of fair value, RIFUS may elect to obtain indicative market quotations (“broker quotes”) directly from the broker or passed through from a third-party vendor. In the event that the source of fair value is from a single source broker quote, these securities are classified as Level 3 per the fair value hierarchy. Broker quotes are typically received from established market participants. Although independently received on a daily basis, RIFUS does not have the transparency to view the underlying inputs which support the broker quotes. Significant changes in the broker quote would have direct and proportional changes in the fair value of the security. There is a third-party pricing exception to the quantitative disclosure requirement when prices are not determined by the reporting entity. RIFUS is exercising this exception and has made a reasonable attempt to obtain quantitative information from the third-party pricing vendors regarding the unobservable inputs used.

For fair valuations using significant unobservable inputs, U.S. GAAP requires a reconciliation of the beginning to ending balances for reported fair values that present changes attributable to total realized and unrealized gains or losses, purchases and sales, and transfers in/out of the Level 3 category during the period. Additionally, U.S. GAAP requires quantitative information regarding the significant unobservable inputs used in the determination of fair value of assets categorized as Level 3 in the fair value hierarchy. In accordance with the requirements of U.S. GAAP, a fair value hierarchy, a Level 3 reconciliation and an additional disclosure about fair value measurements, if any, has been included in the Presentation of Portfolio Holdings for each respective Fund.

#### Investment Transactions

Investment transactions are reflected as of the trade date for financial reporting purposes. This may cause the NAV stated in the financial statements to be different from the NAV at which shareholders may transact. Realized gains and losses from securities transactions, if applicable, are recorded on the basis of specific identified cost within a particular Fund.

#### Investment Income

Distributions of income and capital gains from the Funds or Underlying Funds are recorded on the ex-dividend date.

#### Federal Income Taxes

Since the Investment Company is a Massachusetts business trust, each Fund is a separate corporate taxpayer and determines its net investment income and capital gains (or losses) and the amounts to be distributed to each Fund's shareholders without regard to the income and capital gains (or losses) of the other Funds.

For each year, each Fund intends to qualify or continue to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended (the “Code”) and intends to distribute all of its taxable income and capital gains. Therefore, no federal income tax provision is required for the Funds.

Each Fund files a U.S. tax return. At December 31, 2019, the Funds had recorded no liabilities for net unrecognized tax benefits relating to uncertain income tax positions they have taken or expect to take in future tax returns. While the statute of limitations remains open to examine the Funds' U.S. tax returns filed for the fiscal years ended December 31, 2016 through December 31, 2018, no examinations are in progress or anticipated at this time. The Funds are not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

The Funds comply with the authoritative guidance for uncertainty in income taxes which requires management to determine whether a tax position of the Funds is more likely than not to be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. For tax positions meeting the more likely than not threshold, the tax amount recognized in the financial statements is reduced by the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement with the relevant taxing authority. Management determined that no accruals need to be made in the financial statements due to uncertain tax positions. Management continually reviews and adjusts the Funds' liability for income taxes based on analyses of tax laws and regulations, as well as their interpretations, and other relevant factors.

#### Dividends and Distributions to Shareholders

Income dividends, capital gain distributions and return of capital, if any, are recorded on the ex-dividend date. Income dividends are generally declared and paid quarterly. Capital gain distributions are generally declared and paid annually. An additional distribution may be paid by the Funds to avoid imposition of federal income and excise tax on any remaining undistributed capital gains and net investment income.

# Russell Investment Funds

## LifePoints® Funds Variable Target Portfolio Series

### Notes to Financial Statements, continued — December 31, 2019

---

The timing and characterization of certain income and capital gain distributions are determined in accordance with federal tax regulations which may differ from U.S. GAAP. As a result, net investment income and net realized gain (or loss) on investment and foreign currency-related transactions for a reporting period may differ significantly from distributions during such period. The differences between tax regulations and U.S. GAAP primarily relate to investments in options, futures, forward contracts, swap contracts, the Underlying Funds sold at a loss, wash sale deferrals and capital loss carryforwards. Accordingly, the Funds may periodically make reclassifications among certain of their capital accounts without impacting their NAVs.

#### Expenses

Expenses included in the accompanying financial statements reflect the expenses of each Fund and do not include those expenses incurred by the Underlying Funds. Because the Underlying Funds have varied expense and fee levels and the Funds may own different proportions of the Underlying Funds at different times, the amount of the Underlying Funds' fees and expenses incurred indirectly by the Funds will vary.

The Funds pay their own expenses other than those expressly assumed by RIM, the Funds' adviser, or RIFUS. Most expenses can be directly attributed to the individual Funds. Expenses which cannot be directly attributed to a specific Fund are allocated among all Funds principally based on their relative net assets.

#### Derivatives

The Funds may invest in derivatives. Derivatives are instruments or agreements whose value is derived from an underlying security or index. They include options, futures, swaps and forwards. These instruments offer unique characteristics and risks that facilitate the Funds' investment strategies.

The Funds typically use derivatives in three ways: exposing cash to markets, hedging and return enhancement. In addition, the Funds may enter into foreign currency contracts for trade settlement purposes. The Funds may pursue their strategy of being fully invested by exposing cash to the performance of segments of the global equity market by purchasing index futures contracts. This is intended to cause the Funds to perform as though cash were actually invested in the global equity market.

Hedging may be used by the Funds to limit or control risks, such as adverse movements in exchange rates and interest rates. Return enhancement can be accomplished through the use of derivatives in a Fund, including using derivatives as a substitute for holding physical securities, and using them to express various macro views (e.g., interest rate movements, currency movements, and macro credit strategies). By purchasing certain instruments, the Funds may more effectively achieve the desired portfolio characteristics that assist them in meeting their investment objectives. Depending on how the derivatives are structured and utilized, the risks associated with them may vary widely. These risks include, but are not limited to, market risk, liquidity risk, leveraging risk, counterparty risk, basis risk, reinvestment risk, political risk, prepayment risk, extension risk, valuation risk and credit risk.

Futures, certain options and cleared swaps are traded or cleared on an exchange or central exchange clearing house. Exchange-traded or exchange-cleared transactions generally present less counterparty risk to a Fund. The exchange's clearing house stands between the Fund and the broker to the contract and therefore, credit risk is generally limited to the failure of the clearing house and the clearing member. Cleared swap contracts are subject to clearing house rules, including initial and variation margin requirement, daily settlement of obligations and the clearing house guarantee of payments to the broker. There is, however, still counterparty risk due to the insolvency of the broker with respect to any margin held in the brokers' customer accounts. While clearing members are required to segregate customer assets from their own assets, in the event of insolvency, there may be a shortfall in the amount of margin held by the broker for its clients. Collateral and margin requirements for exchange-traded or exchange-cleared derivatives are established through regulation, as well as set by the broker or applicable clearing house. Margin for exchange-traded and exchange-cleared transactions are detailed in the Statement of Assets and Liabilities as Receivables for Variation margin on future contracts and Payables for Variation margin on futures contracts. Securities and cash pledged as collateral are reflected as assets on the Statements of Assets and Liabilities as either a component of Investments at fair value (securities) or Receivable from broker. Cash collateral received is not typically held in a segregated account and as such is reflected as a liability on the Statement of Assets and Liabilities as Due to broker. Typically, the Funds and counterparties are not permitted to sell, repledge, rehypothecate or otherwise use collateral pledged by the other party unless explicitly permitted by each respective governing agreement.

In addition, proposed regulatory changes by the Securities and Exchange Commission ("SEC") relating to a mutual fund's use of derivatives could potentially limit or impact the Funds' ability to invest in derivatives and adversely affect the value or performance of the Funds or their derivative investments.

# Russell Investment Funds

## LifePoints® Funds Variable Target Portfolio Series

### Notes to Financial Statements, continued — December 31, 2019

The effects of derivative instruments, categorized by risk exposure, on the Statement of Assets and Liabilities and the Statement of Operations, for the period ended December 31, 2019, if applicable, are disclosed in the Fair Value of Derivative Instruments table following each applicable Fund's Schedule of Investments.

#### Foreign Currency Exchange Contracts

The Funds may enter into foreign currency exchange spot contracts and forward foreign currency exchange contracts ("FX contracts"). From time to time, the Funds may enter into FX contracts to hedge certain foreign currency-denominated assets. FX contracts are recorded at fair value. Certain risks may arise upon entering into these FX contracts from the potential inability of counterparties to meet the terms of their FX contracts and are generally limited to the amount of unrealized gain on the FX contracts, if any, that are disclosed in the Statements of Assets and Liabilities.

For the period ended December 31, 2019, the following Funds entered into foreign currency exchange contracts primarily for the strategies listed below:

Funds	Strategies
Moderate Strategy Fund	Return enhancement and hedging
Balanced Strategy Fund	Return enhancement and hedging
Growth Strategy Fund	Return enhancement and hedging
Equity Growth Strategy Fund	Return enhancement and hedging

The Funds' foreign currency contract notional dollar values outstanding fluctuate throughout the fiscal year as required to meet strategic requirements. The following tables illustrate the quarterly volume of foreign currency contracts. For the purpose of this disclosure, volume is measured by the amounts bought and sold in USD.

Quarter Ended	Outstanding Contract Amounts Sold			
	March 31, 2019	June 30, 2019	September 30, 2019	December 31, 2019
Moderate Strategy Fund	\$ 4,905,073	\$ 4,872,821	\$ 4,806,520	\$ 5,832,581
Balanced Strategy Fund	27,267,094	27,208,203	26,424,147	24,086,502
Growth Strategy Fund	20,864,821	20,806,082	20,173,112	21,924,976
Equity Growth Strategy Fund	6,992,077	6,998,613	6,823,926	6,490,002

Quarter Ended	Outstanding Contract Amounts Bought			
	March 31, 2019	June 30, 2019	September 30, 2019	December 31, 2019
Moderate Strategy Fund	\$ 4,912,234	\$ 4,883,162	\$ 4,790,978	\$ 5,852,546
Balanced Strategy Fund	27,448,081	27,200,421	26,596,040	23,989,245
Growth Strategy Fund	21,076,097	20,854,961	20,396,544	21,884,217
Equity Growth Strategy Fund	7,038,708	7,004,671	6,855,798	6,479,295

#### Options

The Funds may purchase and sell (write) call and put options on securities and securities indices. Such options are traded on a national securities exchange or in an OTC market. The Funds may also purchase and sell (write) call and put options on foreign currencies.

When a Fund writes a covered call or a put option, an amount equal to the premium received by the Fund is included in the Fund's Statement of Assets and Liabilities as an asset and as an equivalent liability. The amount of the liability is subsequently marked-to-market to reflect the current fair value of the option written. The Fund receives a premium on the sale of a call option but gives up the opportunity to profit from any increase in the value of the underlying instrument above the exercise price of the option, and when the Fund writes a put option it is exposed to a decline in the price of the underlying instrument.

When a Fund sells an uncovered call option, it does not simultaneously have a long position in the underlying security. When a Fund sells an uncovered put option, it does not simultaneously have a short position in the underlying security. Uncovered options are riskier than covered options because there is no underlying security held by the Fund that can act as a partial hedge.

Whether an option which the Fund has written expires on its stipulated expiration date or the Fund enters into a closing purchase transaction, the Fund realizes a gain (or loss, if the cost of a closing purchase transaction exceeds the premium received when the option was sold) without regard to any unrealized gain or loss on the underlying security, and the liability related to such option is extinguished. If a call option which the Fund has written is exercised, the Fund realizes a capital gain or loss from the sale of the underlying security, and the proceeds from such sale are increased by the premium originally received. When a put option which

# Russell Investment Funds

## LifePoints® Funds Variable Target Portfolio Series

### Notes to Financial Statements, continued — December 31, 2019

a Fund has written is exercised, the amount of the premium originally received will reduce the cost of the security which a Fund purchases upon exercise of the option.

The Funds' use of written options involves, to varying degrees, elements of market risk in excess of the amount recognized in the Statements of Assets and Liabilities. The face or contract amounts of these instruments reflect the extent of the Funds' exposure to market risk. The risks may be caused by an imperfect correlation between movements in the price of the instrument and the price of the underlying securities and interest rates.

The Funds may enter into a swaption (an option on a swap). In a swaption, in exchange for an option, the buyer gains the right but not the obligation to enter into a specified swap agreement with the issuer on a specified future date. The writer of the contract receives the premium and bears the risk of unfavorable changes in the preset rate on the underlying swap.

For the period ended December 31, 2019, the Funds purchased or sold options primarily for the strategies listed below:

Funds	Strategies
Moderate Strategy Fund	Return enhancement, hedging and exposing cash to markets
Balanced Strategy Fund	Return enhancement, hedging and exposing cash to markets
Growth Strategy Fund	Return enhancement, hedging and exposing cash to markets
Equity Growth Strategy Fund	Return enhancement, hedging and exposing cash to markets

The Funds' options contracts notional amounts fluctuate throughout the fiscal year as required to meet strategic requirements. The following table illustrates the quarterly volume of options contracts measured by notional in USD.

Funds	Notional of Options Contracts Outstanding			
	March 31, 2019	June 30, 2019	September 30, 2019	December 31, 2019
Moderate Strategy Fund	\$ 2,970,006	\$ —	\$ —	\$ —
Balanced Strategy Fund	15,839,969	—	—	—
Growth Strategy Fund	11,880,024	—	—	—
Equity Growth Strategy Fund	2,970,006	—	—	—

#### Futures Contracts

The Funds may invest in futures contracts (i.e., interest rate, foreign currency and index futures contracts). The face or contract value of these instruments reflect the extent of the Funds' exposure to off balance sheet risk. The primary risks associated with the use of futures contracts are an imperfect correlation between the change in fair value of the securities held by the Funds and the prices of futures contracts, and the possibility of an illiquid market. Upon entering into a futures contract, the Funds are required to deposit with a broker an amount, termed the initial margin, which typically represents 5% to 10% of the purchase price indicated in the futures contract. Payments to and from the broker, known as variation margin, are typically required to be made on a daily basis as the price of the futures contract fluctuates. Changes in initial settlement value are accounted for as unrealized appreciation (depreciation) until the contracts are terminated, at which time realized gains and losses are recognized.

For the period ended December 31, 2019, the following Funds entered into futures contracts primarily for the strategies listed below:

Funds	Strategies
Moderate Strategy Fund	Return enhancement, hedging, and exposing cash to markets
Balanced Strategy Fund	Return enhancement, hedging, and exposing cash to markets
Growth Strategy Fund	Return enhancement, hedging, and exposing cash to markets
Equity Growth Strategy Fund	Return enhancement, hedging, and exposing cash to markets

The Funds' futures contracts notional amounts fluctuate throughout the fiscal year as required to meet strategic requirements. The following table illustrates the quarterly volume of futures contracts measured by notional in USD.

Funds	Notional of Futures Contracts Outstanding			
	March 31, 2019	June 30, 2019	September 30, 2019	December 31, 2019
Moderate Strategy Fund	\$ 29,441,229	\$ 31,739,708	\$ 31,772,152	\$ 36,008,326
Balanced Strategy Fund	63,311,201	69,668,624	69,949,203	72,199,263
Growth Strategy Fund	72,687,385	89,617,357	89,395,571	75,630,479
Equity Growth Strategy Fund	18,307,057	18,816,467	18,751,014	18,542,790

## LifePoints® Funds Variable Target Portfolio Series

### Notes to Financial Statements, continued — December 31, 2019

---

#### Swap Agreements

The Funds may enter into swap agreements, on either an asset-based or liability-based basis, depending on whether they are hedging their assets or their liabilities, and will usually enter into swaps on a net basis (i.e., the two payment streams are netted out, with the Funds receiving or paying only the net amount of the two payments). When a Fund engages in a swap, it exchanges its obligations to pay or rights to receive payments for the obligations to pay or rights to receive payments of another party (i.e., an exchange of floating rate payments for fixed rate payments).

The Funds may enter into several different types of swap agreements including credit default, interest rate, total return and currency swaps. Credit default swaps are a counterparty agreement which allows the transfer of third-party credit risk (the possibility that an issuer will default on its obligation by failing to pay principal or interest in a timely manner) from one party to another. The lender faces the credit risk from a third-party and the counterparty in the swap agrees to insure this risk in exchange for regular periodic payments. Interest rate swaps are a counterparty agreement, can be customized to meet each party's needs, and involve the exchange of a fixed or variable payment per period for a payment that is not fixed. Total return swaps are a counterparty agreement where two parties exchange two sets of cash flows on predetermined dates for an agreed upon amount of time. The cash flows will typically be an equity index value swapped with a floating rate such as LIBOR plus or minus a pre-defined spread. Total return swap agreements are a counterparty agreement intended to expose cash to markets or to effect investment transactions consistent with those Funds' investment objectives and strategies. Currency swaps are a counterparty agreement where two parties exchange specified amounts of different currencies which are followed by each paying the other a series of interest payments that are based on the principal cash flow. At maturity the principal amounts are returned.

The Funds generally expect to enter into these transactions primarily to preserve a return or spread on a particular investment or portion of their portfolios or to protect against any increase in the price of securities they anticipate purchasing at a later date, or for return enhancement. Under most swap agreements entered into by a Fund, the parties' obligations are determined on a "net basis". The net amount of the excess, if any, of the Funds' obligations over their entitlements with respect to each swap will be accrued on a daily basis and an amount of cash or liquid assets having an aggregate NAV at least equal to the accrued excess will be segregated. To the extent that the Funds enter into swaps on other than a net basis, the amount maintained in a segregated account will be the full amount of the Funds' obligations, if any, with respect to such swaps, accrued on a daily basis. If there is a default by the other party to such a transaction, the Funds will have contractual remedies pursuant to the agreement related to the transaction.

A Fund may not receive the expected amount under a swap agreement if the other party to the agreement defaults or becomes bankrupt.

#### Credit Default Swaps

The Funds may enter into credit default swaps. A credit default swap can refer to corporate issues, government issues, asset-backed securities or an index of assets, each known as the reference entity or underlying asset. Funds may act as either the buyer or the seller of a credit default swap involving one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a default or other credit event. Depending upon the terms of the contract, the credit default swap may be closed via physical settlement. However, due to the possible or potential instability in the market, there is a risk that the Funds may be unable to deliver the underlying debt security to the other party to the agreement. Additionally, the Funds may not receive the expected amount under the swap agreement if the other party to the agreement defaults or becomes bankrupt. In an unhedged credit default swap, Funds enter into a credit default swap without owning the underlying asset or debt issued by the reference entity. Credit default swaps allow Funds to acquire or reduce credit exposure to a particular issuer, asset or basket of instruments.

As the seller of protection in a credit default swap, a Fund would be required to pay the par or other agreed-upon value (or otherwise perform according to the swap contract) of a reference debt obligation to the counterparty in the event of a default (or other specified credit event) and the counterparty would be required to surrender the reference debt obligation. In return, the Fund would receive from the counterparty a periodic stream of payments over the term of the contract provided that no credit event has occurred. If no credit event occurs, the Fund would keep the stream of payments and would have no payment obligations. As a seller of protection, the Fund would effectively add leverage to its portfolio because, in addition to its total net assets, that Fund would be subject to investment exposure on the notional amount of the swap.

The Funds may also purchase protection via credit default swap contracts in order to offset the risk of default of debt securities held in their portfolios or to take a short position in a debt security, in which case the Fund would function as the counterparty referenced in the preceding paragraph.

# Russell Investment Funds

## LifePoints® Funds Variable Target Portfolio Series

### Notes to Financial Statements, continued — December 31, 2019

---

If a credit event occurs and cash settlement is not elected, a variety of other deliverable obligations may be delivered in lieu of the specific referenced obligation. The ability to deliver other obligations may result in a cheapest-to-deliver option (the buyer of protection's right to choose the deliverable obligation with the lowest value following a credit event). The Funds may use credit default swaps to provide a measure of protection against defaults of the issuers (i.e., to reduce risk where Funds own or have exposure to the referenced obligation) or to take an active long or short position with respect to the likelihood (as measured by the credit default swap's spread) of a particular issuer's default.

Deliverable obligations for credit default swaps on asset-backed securities in most instances are limited to the specific referenced obligation as performance for asset-backed securities can vary across deals. Prepayments, principal paydowns, and other writedown or loss events on the underlying mortgage loans will reduce the outstanding principal balance of the referenced obligation. These reductions may be temporary or permanent as defined under the terms of the swap agreement and the notional amount for the swap agreement generally will be adjusted by corresponding amounts. The Funds may use credit default swaps on asset-backed securities to provide a measure of protection against defaults (or other defined credit events) of the referenced obligation or to take an active long or short position with respect to the likelihood of a particular referenced obligation's default (or another defined credit event).

Credit default swap agreements on credit indices involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a write-down, principal shortfall, interest shortfall or default of all or part of the referenced entities comprising the credit index. A credit index is a basket of credit instruments or exposures designed to be representative of some part of the credit market as a whole. These indices are made up of reference credits that are judged by a poll of dealers to be the most liquid entities in the credit default swap market based on the sector of the index. Components of the indices may include, but are not limited to, investment grade securities, high yield securities, asset-backed securities, emerging markets, and/or various credit ratings within each sector. Credit indices are traded using credit default swaps with standardized terms including a fixed spread and standard maturity dates. An index credit default swap references all the names in the index, and if there is a default, the credit event is settled based on that name's weight in the index. The composition of the indices changes periodically, usually every six months, and, for most indices, each name has an equal weight in the index. Traders may use credit default swaps on indices to speculate on changes in credit quality.

Implied credit spreads, represented in absolute terms, utilized in determining the fair value of credit default swap agreements on corporate issues as of period-end are disclosed in the Schedules of Investments and generally serve as an indicator of the current status of the payment/performance risk and represent the likelihood or risk of default (or other defined credit event) for the credit derivative. The implied credit spread of a particular referenced entity reflects the cost of entering into a credit default swap and may include upfront payments required to be made to enter into the agreement. For credit default swap agreements on asset-backed securities and credit indices, the quoted market prices and resulting values serve as the indicator of the current status of the payment/performance risk. Wider credit spreads and increasing fair values, in absolute terms when compared to the notional amount of the swap, generally represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement. The maximum potential amount of future payments (undiscounted) that Funds as a seller of protection could be required to make under a credit default swap agreement equals the notional amount of the agreement. Notional amounts of all credit default swap agreements outstanding as of December 31, 2019, for which a Fund is the seller of protection are disclosed in the Schedules of Investments. These potential amounts would be partially offset by any recovery values of the respective referenced obligations, upfront payments received upon entering into the agreement, or net amounts received from the settlement of buy protection credit default swap agreements entered into by a Fund for the same referenced entity or entities.

Credit default swaps could result in losses if the Funds do not correctly evaluate the creditworthiness of the company or companies on which the credit default swap is based. Credit default swap agreements may involve greater risks than if the Funds had invested in the reference obligation directly since, in addition to risks relating to the reference obligation, credit default swaps are subject to illiquidity and counterparty risk. A Fund will generally incur a greater degree of risk when it sells a credit default swap than when it purchases a credit default swap. As a buyer of a credit default swap, a Fund may lose its investment and recover nothing should a credit event fail to occur and the swap is held to its termination date. As seller of a credit default swap, if a credit event were to occur, the value of any deliverable obligation received by a Fund, coupled with the upfront or periodic payments previously received, may be less than what it pays to the buyer, resulting in a loss of value to the Fund.

If the creditworthiness of a Fund's swap counterparty declines, the risk that the counterparty may not perform could increase, potentially resulting in a loss to the Fund. To limit the counterparty risk involved in swap agreements, the Funds will only enter into swap agreements with counterparties that meet certain standards of creditworthiness. Although there can be no assurance that

# Russell Investment Funds

## LifePoints® Funds Variable Target Portfolio Series

### Notes to Financial Statements, continued — December 31, 2019

the Funds will be able to do so, the Funds may be able to reduce or eliminate their exposure under a swap agreement either by assignment or other disposition, or by entering into an offsetting swap agreement with the same party or another creditworthy party. The Funds may have limited ability to eliminate their exposure under a credit default swap if the credit quality of the reference entity or underlying asset has declined.

For the period ended December 31, 2019, the Funds entered into credit default swaps primarily for the strategies listed below:

Funds	Strategies
Moderate Strategy Fund	Return enhancement, hedging and exposing cash to markets
Balanced Strategy Fund	Return enhancement, hedging and exposing cash to markets
Growth Strategy Fund	Return enhancement, hedging and exposing cash to markets
Equity Growth Strategy Fund	Return enhancement, hedging and exposing cash to markets

The Funds' period end credit default swap contract notional amounts outstanding fluctuate throughout the fiscal year as required to meet strategic requirements. The following table illustrates the quarterly volume of credit default swap contracts. For the purpose of this disclosure, volume is measured by notional amounts outstanding in USD at each quarter end.

Quarter Ended	Credit Default Swap Notional Amounts Outstanding			
	March 31, 2019	June 30, 2019	September 30, 2019	December 31, 2019
Moderate Strategy Fund	\$ 14,700,000	\$ 16,700,000	\$ 16,700,000	\$ 14,444,000
Balanced Strategy Fund	23,100,000	23,100,000	23,100,000	18,780,000
Growth Strategy Fund	15,400,000	15,400,000	15,400,000	15,200,000
Equity Growth Strategy Fund	1,400,000	1,400,000	1,400,000	1,287,000

#### Total Return Swaps

The Funds may enter into total return swap agreements to expose cash to markets or to effect investment transactions. Total return swap agreements are two party contracts entered into primarily by institutional investors for periods ranging from a few weeks to more than one year. In a standard total return swap transaction, the two parties agree to exchange the returns (or differentials in rates of return) earned or realized on particular investments or instruments.

The returns to be exchanged between the parties are calculated with respect to a “notional amount” (i.e., a specified dollar amount that is hypothetically invested in a “basket” of securities representing a particular index).

For the period ended December 31, 2019, the Funds did not enter into any total return swaps.

#### Master Agreements

Certain Funds are parties to International Swaps and Derivatives Association, Inc. Master Agreements (“ISDA Master Agreements”) with counterparties that govern transactions in OTC derivative and foreign exchange contracts entered into by the Funds and those counterparties. The ISDA Master Agreements contain provisions for general obligations, representations, agreements, collateral and events of default or termination. Events of termination and default include conditions that may entitle either party to elect to terminate early and cause settlement of all outstanding transactions under the applicable ISDA Master Agreement. Any election to terminate early could be material to the financial statements. Since different types of forward and OTC financial derivative transactions have different mechanics and are sometimes traded out of different legal entities of a particular counterparty organization, each type of transaction may be covered by a different ISDA Master Agreement, resulting in the need for multiple agreements with a single counterparty. As the ISDA Master Agreements are specific to unique operations of different asset types, they allow a Fund to net its total exposure to a counterparty in the event of a default with respect to all the transactions governed under a single agreement with a counterparty.

Master Securities Forward Transaction Agreements (“Master Forward Agreements”) govern the considerations and factors surrounding the settlement of certain forward settling transactions, such as delayed delivery by and between a Fund and select counterparties. The Master Forward Agreements maintain provisions for, among other things, initiation and confirmation, payment and transfer, events of default, termination, and maintenance of collateral.

#### Disclosure about Offsetting Assets and Liabilities

Balance sheet disclosure is based on various netting agreements for OTC derivative transactions between brokers and counterparties, such as ISDA Master Agreements and Master Forward Agreements. Certain Funds utilize multiple counterparties. The quantitative disclosure begins with disaggregation of counterparties by legal entity and the roll up of the data to reflect a single counterparty in

# Russell Investment Funds

## LifePoints® Funds Variable Target Portfolio Series

### Notes to Financial Statements, continued — December 31, 2019

the table within the Funds' financial statements. Net exposure represents the net receivable (payable) that would be due from/to the counterparty in the event of default. Exposure from OTC derivatives can only be netted across transactions governed under the same Master Agreement with the same legal entity.

#### Guarantees

In the normal course of business, the Funds enter into contracts that contain a variety of representations which provide general indemnifications. The Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds expect the risk of loss to be remote.

#### LIBOR

The Funds may invest in certain instruments including, but not limited to, repurchase agreements, collateralized loan obligations and mortgage-backed securities, that rely in some fashion upon LIBOR. LIBOR is an average interest rate, determined by the ICE Benchmark Administration, that banks charge one another for the use of short-term money. The United Kingdom's Financial Conduct Authority, which regulates LIBOR, has announced plans to phase out the use of LIBOR by the end of 2021. There remains uncertainty regarding the future utilization of LIBOR and the nature of any replacement rate (e.g., the Secured Overnight Financing Rate, which is intended to replace U.S. dollar LIBOR and measures the cost of overnight borrowings through repurchase agreement transactions collateralized with U.S. Treasury securities). Any potential effects of the transition away from LIBOR on the Funds or on certain instruments in which a Fund invests can be difficult to ascertain, and they may vary depending on factors that include, but are not limited to: (i) existing fallback or termination provisions in individual contracts and (ii) whether, how, and when industry participants develop and adopt new reference rates and fallbacks for both legacy and new products and instruments. For example, certain of the Fund's investments may involve individual contracts that have no existing fallback provision or language that contemplates the discontinuation of LIBOR, and those investments could experience increased volatility or illiquidity as a result of the transition process. In addition, interest rate provisions included in such contracts may need to be renegotiated in contemplation of the transition away from LIBOR. The transition may also result in a reduction in the value of certain instruments held by a Fund, including those described in this paragraph, or a reduction in the effectiveness of related Fund transactions such as hedges. Any such effects of the transition away from LIBOR, as well as other unforeseen effects, could result in losses to a Fund.

#### Market, Credit and Counterparty Risk

In the normal course of business, the Funds and Underlying Funds trade financial instruments and enter into financial transactions where risk of potential loss exists due to changes in the market (market risk) or failure of the other party to a transaction to perform (credit risk). Similar to credit risk, the Funds and Underlying Funds may also be exposed to counterparty risk or risk that an institution or other entity with which the Funds or Underlying Funds have unsettled or open transactions will default. The potential loss could exceed the value of the relevant assets recorded in the Funds' and Underlying Funds' financial statements (the "Assets"). The Assets consist principally of cash due from counterparties and investments. The extent of the Funds' and Underlying Funds' exposure to market, credit and counterparty risks with respect to the Assets approximates their carrying value as recorded in the Funds' and Underlying Funds' Statements of Assets and Liabilities.

Global economies and financial markets are becoming increasingly interconnected and political and economic conditions (including recent instability and volatility) and events (including natural disasters) in one country, region or financial market may adversely impact issuers in a different country, region or financial market. As a result, issuers of securities held by a Fund or an Underlying Fund may experience significant declines in the value of their assets and even cease operations. Such conditions and/or events may not have the same impact on all types of securities and may expose a Fund or an Underlying Fund to greater market and liquidity risk and potential difficulty in valuing portfolio instruments held. This could cause a Fund or an Underlying Fund to underperform other types of investments.

### 3. Investment Transactions

#### Securities

During the period ended December 31, 2019, purchases and sales of investment securities (excluding short-term investments, options and futures) were as follows:

	Purchases		Sales	
Moderate Strategy Fund	\$	25,137,767	\$	31,484,325
Balanced Strategy Fund		79,791,050		84,620,529

### Notes to Financial Statements, continued — December 31, 2019

	Purchases	Sales
Growth Strategy Fund	67,241,026	68,901,657
Equity Growth Strategy Fund	17,555,212	20,746,308

#### 4. Related Party Transactions, Fees and Expenses

##### Adviser, Administrator, Transfer and Dividend Disbursing Agent

RIM provides or oversees the provision of all investment advisory and portfolio management services for the Funds. RIFUS is the Funds' administrator and transfer agent. RIFUS, in its capacity as the Funds' administrator, provides or oversees the provision of all administrative services for the Funds. RIFUS, in its capacity as the Funds' transfer agent and dividend disbursing agent, is responsible for providing transfer agency and dividend disbursing services to the Funds. RIFUS is a wholly-owned subsidiary of RIM. RIM is an indirect, wholly-owned subsidiary of Russell Investments Group, Ltd., a Cayman company.

The Funds are permitted to invest their cash (i.e., cash awaiting investment or cash held to meet redemption requests or to pay expenses) in the U.S. Cash Management Fund, an unregistered fund advised by RIM. As of December 31, 2019, the Funds had invested \$5,832,936 in the U.S. Cash Management Fund.

An affiliated company is a company in which a Fund has ownership of at least 5% of the voting securities or which the Fund controls, is controlled by or is under common control with. See each Fund's Related Party Transactions, Fees and Expenses for disclosure of transactions with affiliated companies.

The advisory fee of 0.20% is based upon the average daily net assets of each Fund and the administration fee of up to 0.0425% is based on the combined average daily net assets of the Funds. Advisory and administration fees are paid monthly. The following table shows the total amount of each of these fees paid by the Funds for the period ended December 31, 2019:

	Advisory	Administration
Moderate Strategy Fund	\$ 202,640	\$ 43,061
Balanced Strategy Fund	520,627	110,633
Growth Strategy Fund	400,869	85,185
Equity Growth Strategy Fund	96,682	20,545

RIM has agreed to certain waivers of its advisory fees as follows:

For the Moderate Strategy Fund, RIM has contractually agreed, until April 30, 2020, to waive up to the full amount of its 0.20% advisory fee and then to reimburse the Fund for other direct Fund-level expenses to the extent that direct Fund-level expenses exceed 0.14% of the average daily net assets of the Fund on an annual basis. Direct Fund-level expenses do not include extraordinary expenses or the expenses of other investment companies in which the Fund invests, including the Underlying Funds, which are borne indirectly by the Fund. This waiver and reimbursement may not be terminated during the relevant period except with Board approval.

For the Balanced Strategy Fund, RIM has contractually agreed, until April 30, 2020, to waive up to the full amount of its 0.20% advisory fee and then to reimburse the Fund for other direct Fund-level expenses to the extent that direct Fund-level expenses exceed 0.14% of the average daily net assets of the Fund on an annual basis. Direct Fund-level expenses do not include extraordinary expenses or the expenses of other investment companies in which the Fund invests, including the Underlying Funds, which are borne indirectly by the Fund. This waiver and reimbursement may not be terminated during the relevant period except with Board approval.

For the Growth Strategy Fund, RIM has contractually agreed, until April 30, 2020, to waive up to the full amount of its 0.20% advisory fee and then to reimburse the Fund for other direct Fund-level expenses to the extent that direct Fund-level expenses exceed 0.15% of the average daily net assets of the Fund on an annual basis. Direct Fund-level expenses do not include extraordinary expenses or the expenses of other investment companies in which the Fund invests, including the Underlying Funds, which are borne indirectly by the Fund. This waiver and reimbursement may not be terminated during the relevant period except with Board approval.

For the Equity Growth Strategy Fund, RIM has contractually agreed, until April 30, 2020, to waive up to the full amount of its 0.20% advisory fee and then to reimburse the Fund for other direct Fund-level expenses to the extent that direct Fund-level

# Russell Investment Funds

expenses exceed 0.15% of the average daily net assets of the Fund on an annual basis. Direct Fund-level expenses do not include extraordinary expenses or the expenses of other investment companies in which the Fund invests, including the Underlying Funds, which are borne indirectly by the Fund. This waiver and reimbursement may not be terminated during the relevant period except with Board approval.

For the period ended December 31, 2019, RIM waived/reimbursed the following expenses:

	Waiver	Reimbursement	Total
Moderate Strategy Fund	\$ 202,640	\$ 39,472	\$ 242,112
Balanced Strategy Fund	460,540	—	460,540
Growth Strategy Fund	357,922	—	357,922
Equity Growth Strategy Fund	96,682	65,179	161,861

RIM does not have the ability to recover amounts waived or reimbursed from previous periods.

#### Transfer and Dividend Disbursing Agent

RIFUS serves as transfer agent and provides dividend disbursing services to the Funds. For this service, RIFUS is paid a fee based upon the average daily net assets of the Funds for transfer agency and dividend disbursing services. RIFUS retains a portion of this fee for its services provided to the Funds and pays the balance to unaffiliated agents who assist in providing these services. Transfer agency fees paid by the Funds presented herein for the period ended December 31, 2019 were as follows:

	Amount
Moderate Strategy Fund	\$ 4,323
Balanced Strategy Fund	11,106
Growth Strategy Fund	8,552
Equity Growth Strategy Fund	2,061

#### Distributor

Russell Investments Financial Services, LLC, (the “Distributor”), a wholly-owned subsidiary of RIM, is the distributor for the Investment Company pursuant to a distribution agreement with the Investment Company. The Distributor receives no compensation from the Investment Company for its services.

#### Affiliated Brokerage Transactions

The Funds effect certain transactions through Russell Investments Implementation Services, LLC (“RIIS”). RIIS is a registered broker and investment adviser and an affiliate of RIM. RIIS uses a multi-venue trade management approach whereby RIIS allocates trades among RIIS’ network of independent brokers for execution, clearing and other services. RIM has authorized RIIS to effect certain futures, swaps, OTC derivative transactions, and cleared swaps, including foreign currency spots, forwards and options trading on behalf of the Funds.

#### Board of Trustees

The Russell Investments Fund Complex consists of RIC, which has 34 funds and RIF, which has 9 funds. Each of the Trustees is a Trustee of RIC and RIF. The Russell Investments Fund Complex compensates each Trustee who is not an employee of RIM or its affiliates. Trustee compensation and expenses are allocated to each Fund based on its net assets relative to other funds in the Russell Investments Fund Complex.

For the period ended December 31, 2019, the regular compensation paid to the Trustees by the Russell Investments Fund Complex was \$1,612,750.

## 5. Federal Income Taxes

At December 31, 2019, the following Funds had net tax basis capital loss carryforwards which may be applied against any net realized taxable gains in each succeeding year or until their respective expiration dates, whichever occurs first. Available capital loss carryforwards and expiration dates are as follows:

Funds	No Expiration		Totals
	Short Term	Long-Term	
Moderate Strategy Fund	\$ 87,673	\$ —	\$ 87,673

# Russell Investment Funds

## LifePoints® Funds Variable Target Portfolio Series

### Notes to Financial Statements, continued — December 31, 2019

---

#### 6. Record Ownership

As of December 31, 2019, the following table includes shareholders of record with greater than 10% of the total outstanding shares of each respective Fund.

	# of Shareholders	%
Moderate Strategy Fund	1	88.6
Balanced Strategy Fund	1	88.9
Growth Strategy Fund	2	97.8
Equity Growth Strategy Fund	2	97.1

#### 7. Subsequent Events

Management has evaluated the events and/or transactions that have occurred through the date the financial statements were issued and noted no items requiring adjustments to the financial statements or additional disclosures.

## Report of Independent Registered Public Accounting Firm

To the Board of Trustees of Russell Investment Funds and Shareholders of Moderate Strategy Fund, Balanced Strategy Fund, Growth Strategy Fund and Equity Growth Strategy Fund

### ***Opinions on the Financial Statements***

We have audited the accompanying statements of assets and liabilities, including the schedules of investments, of Moderate Strategy Fund, Balanced Strategy Fund, Growth Strategy Fund and Equity Growth Strategy Fund (four of the funds constituting Russell Investment Funds, hereafter collectively referred to as the “Funds”) as of December 31, 2019, the related statements of operations for the year ended December 31, 2019, the statements of changes in net assets for each of the two years in the period ended December 31, 2019, including the related notes, and the financial highlights for each of the five years in the period ended December 31, 2019 (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of each of the Funds as of December 31, 2019, the results of each of their operations for the year then ended, the changes in each of their net assets for each of the two years in the period ended December 31, 2019 and each of the financial highlights for each of the five years in the period ended December 31, 2019 in conformity with accounting principles generally accepted in the United States of America.

### ***Basis for Opinions***

These financial statements are the responsibility of the Funds’ management. Our responsibility is to express an opinion on the Funds’ financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the Funds in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of December 31, 2019 by correspondence with the transfer agents and brokers; when replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinions.

*PricewaterhouseCoopers LLP*

February 21, 2020

We have served as the auditor of one or more investment companies in the Russell Investments family of funds since 1981.

# Russell Investment Funds

## LifePoints® Funds Variable Target Portfolio Series

### Tax Information — December 31, 2019 (Unaudited)

---

For the tax year ended December 31, 2019, the Funds designate 100% or the maximum amount allowable of their net taxable income as qualified dividends taxed at individual net capital gain rates.

The Form 1099 you receive in January 2020 will show the tax status of all distributions paid to your account in calendar year 2019.

The Funds designate dividends distributed during the fiscal year as qualifying for the dividends received deduction for corporate shareholders as follows:

Moderate Strategy	11.6%
Balanced Strategy	34.5%
Growth Strategy	31.4%
Equity Growth Strategy	39.3%

Pursuant to Section 852 of the Internal Revenue Code, the Funds designate the following amounts as long-term capital gain dividends for their taxable year ended December 31, 2019:

Moderate Strategy	\$2,452,600
Balanced Strategy	\$4,954,324
Growth Strategy	\$10,906,819
Equity Growth Strategy	\$3,001,276

# Russell Investment Funds

## LifePoints® Funds Variable Target Portfolio Series

### Shareholder Requests for Additional Information — December 31, 2019 (Unaudited)

---

Each Fund files portfolio holdings information within 60 days after the end of each fiscal quarter as an exhibit on Form N-PORT. Portfolio holdings information for the third month of each fiscal quarter is publicly available on the SEC's website at <http://www.sec.gov>. Each Fund's complete schedule of portfolio holdings for the second and fourth quarters of each fiscal year is included in the semi-annual and annual reports to Fund shareholders.

The Board has delegated to RIM, as RIF's investment adviser, the primary responsibility for monitoring, evaluating and voting proxies solicited by or with respect to issuers of securities in which assets of the Underlying Funds may be invested. RIM has established a proxy voting committee and has adopted written proxy voting policies and procedures ("P&P") and proxy voting guidelines ("Guidelines"). The Funds maintain a Portfolio Holdings Disclosure Policy that governs the timing and circumstances of disclosure to shareholders and third parties of information regarding the portfolio investments held by the Funds. A description of the P&P, Guidelines, Portfolio Holdings Disclosure Policy and additional information about Fund Trustees are contained in the Funds' Statement of Additional Information ("SAI"). The SAI and information regarding how the Underlying Funds voted proxies relating to portfolio securities during the most recent 12-month period ended June 30, 2019 are available (i) free of charge, upon request, by calling the Funds at (800) 787-7354, and (ii) on the Securities and Exchange Commission's website at [www.sec.gov](http://www.sec.gov).

If possible, depending on contract owner registration and address information, and unless you have otherwise opted out, only one copy of the RIF prospectus and each annual and semi-annual report will be sent to contract owners at the same address. If you would like to receive a separate copy of these documents, please contact your Insurance Company. If you currently receive multiple copies of the prospectus, annual report and semi-annual report and would like to request to receive a single copy of these documents in the future, please call your Insurance Company.

Some Insurance Companies may offer electronic delivery of the Funds' prospectuses and annual and semi-annual reports. Please contact your Insurance Company for further details.

Financial statements of the Underlying Funds can be obtained at no charge by calling the Funds at (800)787-7354.

# CREDIT SUISSE FUNDS

## Annual Report

December 31, 2019

### ▪ CREDIT SUISSE TRUST COMMODITY RETURN STRATEGY PORTFOLIO

Beginning on January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Portfolio's shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports from Credit Suisse Asset Management, LLC or from your financial intermediary, such as a broker-dealer or bank. Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

You may elect to receive all future reports in paper free of charge. If you hold accounts directly with the Portfolio, you can call 877-870-2874 to inform Credit Suisse Asset Management, LLC that you wish to continue receiving paper copies of your shareholder reports. If you hold accounts through a financial intermediary, you can contact your financial intermediary to request that you continue to receive paper copies of your shareholder reports. Please note that not all financial intermediaries may offer this service. Your election to receive reports in paper will apply to all funds advised by Credit Suisse Asset Management, LLC, or all funds held with your financial intermediary, as applicable.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may elect to receive electronic delivery of shareholder reports and other communications by: (i) accessing the Credit Suisse Asset Management, LLC website at [www.credit-suisse.com/us/funds](http://www.credit-suisse.com/us/funds) and logging into your accounts, if you hold accounts directly with the Portfolio or (ii) contacting your financial intermediary, if you hold accounts through a financial intermediary. Please note that not all financial intermediaries may offer this service.

The Portfolio's investment objective, risks, charges and expenses (which should be considered carefully before investing), and more complete information about the Portfolio, are provided in the *Prospectus*, which should be read carefully before investing. You may obtain additional copies by calling 877-870-2874 or by visiting our website at [www.credit-suisse.com/us/funds](http://www.credit-suisse.com/us/funds).

Credit Suisse Securities (USA) LLC, Distributor, is located at Eleven Madison Avenue, New York, NY 10010. The Portfolio is advised by Credit Suisse Asset Management, LLC.

Credit Suisse Trust – Commodity Return Strategy Portfolio (the “Portfolio”) shares are not available directly to individual investors, but may be offered only through certain insurance products and pension and retirement plans.

*Portfolio shares are not deposits or other obligations of Credit Suisse Asset Management, LLC (“Credit Suisse”) or any affiliate, are not FDIC-insured and are not guaranteed by Credit Suisse or any affiliate. Portfolio investments are subject to investment risks, including loss of your investment.*

**Annual Investment Adviser’s Report**  
December 31, 2019 (unaudited)

---

January 15, 2020

Dear Shareholder:

We are pleased to present this Annual Report covering the activities of the Credit Suisse Trust — Commodity Return Strategy Portfolio (the “Portfolio”) for the 12 months ended December 31, 2019.

**Performance Summary**

01/01/19 – 12/31/19

**Fund & Benchmark**

Credit Suisse Trust — Commodity Return Strategy Portfolio <sup>1</sup>	6.69%
Bloomberg Commodity Index Total Return <sup>2</sup>	7.69%

**Market and Strategy Review:**

Commodities gained for the 12 months ended December 31, 2019. The Bloomberg Commodity Index Total Return (the “Benchmark”) increased 7.69%, with 14 out of 23 index constituents posting gains.

For the 12 months ended December 31, 2019, the Portfolio outperformed the Benchmark before fees and fund expenses, but underperformed net of fees and expenses. Commodity strategies and underlying cash management both positively contributed to relative performance. The Portfolio held derivatives linked to futures contracts which expire on different dates than those held within the Benchmark; this forward curve positioning in the Energy sector had the largest positive impact on Portfolio performance relative to the Benchmark. Positioning within the Livestock sector contributed modestly to positive relative performance for the period.

Precious Metals increased 17.02% amid continued loose monetary policy across central banks. Notably, the US Federal Reserve cut short-term interest rates three times from July to October in hopes of combating slowing economic growth expectations as US-China trade tensions continued to simmer. Escalating military tensions in the Middle East also added to the attractiveness of Gold and Silver as safe haven assets and alternative stores of wealth.

Energy rose 11.78%. The top three performers for the year came from the Energy sector. Gasoline, Brent Crude Oil and WTI Crude Oil rose 44.49%, 35.57% and 34.44%, respectively. This strong performance was largely supported by supply drivers, with continued voluntary OPEC+ production cuts as well as involuntary cuts stemming from US sanctions on Iran and domestic problems in Venezuela. The various instances of increasing or decreasing tensions in the

**Credit Suisse Trust — Commodity Return Strategy Portfolio**  
**Annual Investment Adviser's Report (continued)**  
December 31, 2019 (unaudited)

---

Middle East also helped drive volatility in petroleum prices throughout the year. The back and forth on US-China trade tensions also influenced prices during the year as well. A positive demand driver for low-sulfur petroleum products was a new international maritime rule set to go into effect in 2020. Meanwhile, gains in Crude Oil and petroleum products were offset by losses in Natural Gas, the largest Index detractor for the one-year period. Natural Gas was the worst performing commodity, down 37.42%. With the exception of a few short-lived cold fronts, most of the continental US experienced warmer-than-average temperatures during the winter seasons, dampening heating demand. This, along with strong production growth, allowed the pace of inventory builds to materially surpass the five-year historical average. Forecasts of mild temperatures into mid-January 2020 further weighed on heating demand expectations towards the end of the year.

Industrial Metals gained 6.98%, led higher by Nickel, as the Indonesian government announced that it would institute a ban on all nickel ore exports starting in January 2020, two years earlier than expected.

Agriculture increased 1.72%, led higher by Soybean Oil, as US soybean oil reserves consistently came in lower than last year's figures throughout the third quarter. The oilseed derivative also received a boost in the fourth quarter from higher biofuel blending mandates in Indonesia and Malaysia that go into effect in January 2020. This, along with lower-than-expected Malaysian production in November, tightened fundamentals for palm oil, a key substitute for soybean oil. Meanwhile, Kansas City Wheat declined the most in the sector during the one-year period as supportive growing conditions in the Black Sea Region and the US Northern Plains led to better-than-expected crop yields for the 2019 harvest.

Livestock declined 5.99%, led lower by Lean Hogs. Lean Hogs fell 19.18% after the US Department of Agriculture reported increases in pork production, frozen inventories and herd sizes throughout the year while the timing of more US pork exports to China remained uncertain as a partial US-China trade agreement remained unsigned by year end. Losses in Lean Hogs were slightly offset by gains in Live Cattle. Live Cattle increased, mostly in the last four months of the year, as the demand outlook brightened for US beef. The US signed trade agreements with Japan, Canada and Mexico, its largest beef consumers internationally.

**Outlook:**

Global trade developments became a major theme in December. The US started off the month by reinstating tariffs on steel and aluminum sourced from Brazil and Argentina while also proposing over \$2 billion in new levies on French

**Credit Suisse Trust — Commodity Return Strategy Portfolio**  
**Annual Investment Adviser’s Report (continued)**  
December 31, 2019 (unaudited)

---

goods. The US administration’s attitude towards protectionist trade policies later softened as the US and China agreed in principle to a Phase One trade deal that avoided an escalation in US tariffs initially scheduled for December 15th. Although full details of the agreement have yet to be released, China announced its commitment to substantially increase its purchases of US agricultural products. Given the prolonged length of the US-China trade war, it may take time for US suppliers to reestablish supply chains to China. In addition, the US House of Representatives signed the revised US-Mexico-Canada Agreement with ratification expected in January. Lower trade barriers worldwide may improve global growth forecasts while also supporting commodity demand.

Entering 2020, new International Maritime Organization (“IMO”) regulations will require the shipping industry to use more expensive, cleaner burning fuels or to install scrubbers to clean fuels on ships. Even those involved in the supply chain of refining fuels may be impacted, though it remains unclear how exactly the new rules will impact various grades of crude oil, shipping fuels, and shipping rates. All of these costs may add inflationary pressure to the energy sector. Energy market participants will also closely monitor OPEC+ compliance with the new production cut targets as well as any changes in growth in US oil production. Rising geopolitical tensions in the Middle East between the US and Iran also has the potential to shock the energy complex. Near month-end, an Iran-sanctioned attack on an Iraqi military base resulted in the death of a US contractor while also causing injuries to US and Iraqi personnel. Pro-Iranian protestors also attacked the US embassy in Baghdad, Iraq. In response to these events, the US announced plans to retaliate against Iran. This rapid escalation of tensions may increase the risks that oil infrastructure of US allies in the region may be targeted, including the key shipping channel of the Strait of Hormuz as well as production and refining facilities in Iraq or elsewhere in the Middle East.

In macro-economic related news, the Chinese economy showed signs of improvement during the month, highlighted by larger-than-expected, year-over-year increases in industrial production and retail sales for November. However, economic readings in the US were less supportive of an improved growth outlook as US jobless claims and key indicators of the US manufacturing sector underperformed expectations. Further progress on trade discussions between the two countries may lend support to improved growth forecasts. Central banks of developed countries seem in no rush to tighten amid mixed economic signals as well as rising geopolitical risk.

*This Portfolio is non-diversified, which means it may invest a greater proportion of its assets in the securities of a smaller number of issuers than a diversified mutual fund and may therefore be subject to greater volatility. The Portfolio's investment in commodity-linked derivative instruments may subject the Portfolio to greater volatility than investment in traditional securities, particularly in investments involving leverage.*

*The use of derivatives such as commodity-linked structured notes, swaps and futures entails substantial risks, including risk of loss of a significant portion of their principal value, commodity exposure risk, correlation risk, derivatives risk, exposure risk, fixed income risk, focus risk, futures contract risk, leveraging risk, liquidity risk, interest rate risk, market risk, portfolio turnover risk, structured note risk, subsidiary risk, swap agreements risk, U.S. government securities risk, credit risk and tax risk. Gains and losses from speculative positions in derivatives may be much greater than the derivative's cost. At any time, the risk of loss of any individual security held by the Portfolio could be significantly higher than 50% of the security's value. For a detailed discussion of these and other risks, please refer to the Portfolio's Prospectus, which should be read carefully before investing.*

*In addition to historical information, this report contains forward-looking statements, which may concern, among other things, domestic and foreign market, industry and economic trends and developments and government regulation and their potential impact on the Portfolio's investments. These statements are subject to risks and uncertainties and actual trends, developments and regulations in the future, and their impact on the Portfolio could be materially different from those projected, anticipated or implied. The Portfolio has no obligation to update or revise forward-looking statements.*

*The views of the Portfolio's management are as of the date of this letter and the Portfolio holdings described in this document are as of December 31, 2019; these views and Portfolio holdings may have changed subsequent to these dates. Nothing in this document is a recommendation to purchase or sell securities.*

**Comparison of Change in Value of \$10,000 Investment in the Credit Suisse Trust — Commodity Return Strategy Portfolio<sup>1</sup> and the Bloomberg Commodity Index Total Return<sup>2</sup> For Ten Years**

<sup>1</sup> Fee waivers and/or expense reimbursements may reduce expenses for the Portfolio, without which performance would be lower. The Portfolio entered into a written contract to limit expenses to 1.05% of the Portfolio’s average daily net assets through at least May 1, 2021. This limit excludes certain expenses, as set forth in the Portfolio’s Prospectus.

<sup>2</sup> The Bloomberg Commodity Index Total Return is a broadly diversified futures index currently composed of futures contracts on 23 physical commodities. The index does not have transaction costs and investors may not invest directly in the index.

**Information About Your Portfolio’s Expenses**

As an investor of the Portfolio, you incur two types of costs: ongoing expenses and transaction costs. Ongoing expenses include management fees, distribution and service (12b-1) fees and other Portfolio expenses. Examples of transaction costs include sales charges (loads), redemption fees and account maintenance fees, which are not shown in this section and which would result in higher total expenses. The following table is intended to help you understand your ongoing expenses of investing in the Portfolio and to help you compare these expenses with the ongoing expenses of investing in other mutual funds. The table is based on an investment of \$1,000 made at the beginning of the six months ended December 31, 2019.

The table illustrates your Portfolio’s expenses in two ways:

- **Actual Portfolio Return.** This helps you estimate the actual dollar amount of ongoing expenses paid on a \$1,000 investment in the Portfolio using the Portfolio’s actual return during the period. To estimate the expenses you paid over the period, simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the “Expenses Paid per \$1,000” line.
- **Hypothetical 5% Portfolio Return.** This helps you to compare the Portfolio’s ongoing expenses with those of other mutual funds using the Portfolio’s actual expense ratio and a hypothetical rate of return of 5% per year before expenses. Examples using a 5% hypothetical portfolio return may be found in the shareholder reports of other mutual funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

Please note that the expenses shown in these tables are meant to highlight your ongoing expenses only and do not reflect any transaction costs, such as sales charges (loads) or redemption fees. If these transaction costs had been included, your costs would have been higher. The “Expenses Paid per \$1,000” line of the tables is useful in comparing ongoing expenses only and will not help you determine the relative total expenses of owning different funds.

**Credit Suisse Trust — Commodity Return Strategy Portfolio**  
**Annual Investment Adviser’s Report (continued)**  
December 31, 2019 (unaudited)

**Expenses and Value for a \$1,000 Investment**  
**for the six-month period ended December 31, 2019**

<b>Actual Portfolio Return</b>	
Beginning Account Value 07/01/19	\$1,000.00
Ending Account Value 12/31/19	\$1,020.60
Expenses Paid per \$1,000*	\$ 5.35
<b>Hypothetical 5% Portfolio Return</b>	
Beginning Account Value 07/01/19	\$1,000.00
Ending Account Value 12/31/19	\$1,019.91
Expenses Paid per \$1,000*	\$ 5.35
<b>Annualized Expense Ratio*</b>	1.05%

\* Expenses are equal to the Portfolio’s annualized expense ratio multiplied by the average account value over the period, multiplied by 184/365 to reflect the one-half year period.

*The “Expenses Paid per \$1,000” and the “Annualized Expense Ratio” in the tables are based on actual expenses paid by the Portfolio during the period, net of fee waivers and/or actual expense reimbursements, if applicable. If those fee waivers and/or expense reimbursements had not been in effect, the Portfolio’s actual expenses would have been higher. Expenses do not reflect additional charges and expenses that are, or may be, imposed under the variable contracts or plans. Such charges and expenses are described in the prospectus of the insurance company separate account or in the plan documents or other informational materials supplied by plan sponsors. The Portfolio’s expenses should be considered with these charges and expenses in evaluating the overall cost of investing in the separate account.*

For more information, please refer to the Portfolio’s Prospectus.

**Credit Suisse Trust — Commodity Return Strategy Portfolio**  
**Notes to Consolidated Financial Statements**  
December 31, 2019

---

**Note 1. Organization**

Credit Suisse Trust (the “Trust”) is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the “1940 Act”), which currently offers the Commodity Return Strategy Portfolio (the “Portfolio”). The Portfolio is a non-diversified, open-end management investment company that seeks total return that exceeds the return of its benchmark index, the Bloomberg Commodity Index Total Return (the “Benchmark”). Shares of the Portfolio are not available directly to individual investors but may be offered only through (a) variable annuity contracts and variable life insurance contracts offered by separate accounts of certain insurance companies and (b) tax qualified pension and retirement plans. The Portfolio may not be available in connection with a particular contract or plan. The Trust was organized under the laws of the Commonwealth of Massachusetts as a business trust on March 15, 1995.

Credit Suisse Asset Management, LLC (“Credit Suisse”), the investment adviser to the Portfolio, is registered as an investment adviser with the Securities and Exchange Commission and as a Commodity Pool Operator with the Commodity Futures Trading Commission. The Portfolio intends to gain exposure to commodity derivatives through investing in a wholly-owned subsidiary, Credit Suisse Cayman Commodity Fund II, Ltd. (the “Subsidiary”), organized under the laws of the Cayman Islands. The Subsidiary invests in commodity-linked derivative instruments, such as swaps and futures. The Subsidiary may also invest in debt securities, some of which are intended to serve as margin or collateral for the Subsidiary’s derivatives positions.

The Subsidiary is managed by the same portfolio managers that manage the Portfolio and the accompanying financial statements reflect the financial position of the Portfolio and the Subsidiary and the results of operations on a consolidated basis. The consolidated financial statements include portfolio holdings of the Portfolio and the Subsidiary and all intercompany transactions and balances have been eliminated. The Portfolio may invest up to 25% of its total assets in the Subsidiary. As of December 31, 2019, the Portfolio held \$86,612,834 in the Subsidiary, representing 19.1% of the Portfolio’s consolidated net assets. For the year ended December 31, 2019, the net realized gain on securities and other financial instruments held in the Subsidiary was \$3,546,859.

Subsequent references to the Portfolio within the Notes to Consolidated Financial Statements collectively refer to the Portfolio and the Subsidiary.

**Credit Suisse Trust — Commodity Return Strategy Portfolio**  
**Notes to Consolidated Financial Statements (continued)**  
December 31, 2019

---

**Note 2. Significant Accounting Policies**

The following is a summary of significant accounting policies followed by the Portfolio in the preparation of its consolidated financial statements. The policies are in accordance with generally accepted accounting principles in the United States of America (“GAAP”). The preparation of consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts and disclosures in the consolidated financial statements. Actual results could differ from those estimates. The Portfolio is considered an investment company for financial reporting purposes under GAAP and follows the accounting and reporting guidance in Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 946 — Financial Services — Investment Companies.

A) SECURITY VALUATION — The Board of Trustees (the “Board”) is responsible for the Portfolio’s valuation process. The Board has delegated the supervision of the daily valuation process to Credit Suisse Asset Management, LLC, the Portfolio’s investment adviser (“Credit Suisse” or the “Adviser”), who has established a Pricing Committee which, pursuant to the policies adopted by the Board, is responsible for making fair valuation determinations and overseeing the Portfolio’s pricing policies. The net asset value of the Portfolio is determined daily as of the close of regular trading on the New York Stock Exchange, Inc. (the “Exchange”) on each day the Exchange is open for business. The valuations for fixed income securities (which may include, but are not limited to, corporate, government, municipal, mortgage-backed, collateralized mortgage obligations and asset-backed securities) and certain derivative instruments are typically the prices supplied by independent third party pricing services, which may use market prices or broker/dealer quotations or a variety of valuation techniques and methodologies. The independent third party pricing services use inputs that are observable such as issuer details, interest rates, yield curves, prepayment speeds, credit risks/spreads, default rates and quoted prices for similar securities. These pricing services generally price fixed income securities assuming orderly transactions of an institutional “round lot” size, but some trades occur in smaller “odd lot” sizes which may be effected at lower prices than institutional round lot trades. Structured note agreements are valued in accordance with a dealer-supplied valuation based on changes in the value of the underlying index. Futures contracts are valued daily at the settlement price established by the board of trade or exchange on which they are traded. Forward contracts are valued at the London closing spot rates and the London closing forward point rates on a daily basis. The currency forward contract pricing model

**Credit Suisse Trust — Commodity Return Strategy Portfolio**

---

**Note 2. Significant Accounting Policies (continued)**

derives the differential in point rates to the expiration date of the forward and calculates its present value. Equity securities for which market quotations are available are valued at the last reported sales price or official closing price on the primary market or exchange on which they trade. The Portfolio may utilize a service provided by an independent third party which has been approved by the Board to fair value certain securities. When fair value pricing is employed, the prices of securities used by the Trust to calculate its net asset value may differ from quoted or published prices for the same securities. If independent third party pricing services are unable to supply prices for a portfolio investment, or if the prices supplied are deemed by the investment adviser to be unreliable, the market price may be determined by the investment adviser using quotations from one or more brokers/dealers or at the transaction price if the security has recently been purchased and no value has yet been obtained from a pricing service or pricing broker. When reliable prices are not readily available, such as when the value of a security has been significantly affected by events after the close of the exchange or market on which the security is principally traded, but before the Portfolio calculates its net asset value, these securities will be fair valued in good faith by the Pricing Committee, in accordance with procedures adopted by the Board.

The Portfolio uses valuation techniques to measure fair value that are consistent with the market approach and/or income approach, depending on the type of security and the particular circumstance. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable securities. The income approach uses valuation techniques to discount estimated future cash flows to present value.

GAAP established a disclosure hierarchy that categorizes the inputs to valuation techniques used to value assets and liabilities at each measurement date. These inputs are summarized in the three broad levels listed below:

- Level 1 – quoted prices in active markets for identical investments
- Level 2 – other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 – significant unobservable inputs (including the Portfolio's own assumptions in determining the fair value of investments)

The inputs or methodologies used to value securities are not necessarily an indication of the risk associated with investing in those securities.

**Credit Suisse Trust — Commodity Return Strategy Portfolio**  
**Notes to Consolidated Financial Statements (continued)**  
December 31, 2019

**Note 2. Significant Accounting Policies (continued)**

The following is a summary of the inputs used as of December 31, 2019 in valuing the Portfolio's assets and liabilities carried at fair value:

<b>Assets</b>	<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>	<b>Total</b>
Investments in Securities				
United States Agency Obligations	\$ —	\$297,525,979	\$ —	\$297,525,979
United States Treasury Obligations	—	136,768,109	—	136,768,109
	<u>\$ —</u>	<u>\$434,294,088</u>	<u>\$ —</u>	<u>\$434,294,088</u>
Other Financial Instruments*				
Futures Contracts	\$222,633	\$ —	\$ —	\$ 222,633
Swap Contracts**	—	3,133,445	—	3,133,445
<b>Liabilities</b>	<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>	<b>Total</b>
Other Financial Instruments*				
Futures Contracts	\$160,138	\$ —	\$ —	\$ 160,138

\* Other financial instruments include unrealized appreciation/(depreciation) on futures and swap contracts.

\*\* Value includes any premium paid or received with respect to swap contracts, if applicable.

For the year ended December 31, 2019, there were no transfers between Level 2 and Level 3. All transfers, if any, are assumed to occur at the end of the reporting period.

B) DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES — The Portfolio adopted amendments to authoritative guidance on disclosures about derivative instruments and hedging activities which require that a portfolio disclose (a) how and why an entity uses derivative instruments, (b) how derivative instruments and hedging activities are accounted for and (c) how derivative instruments and related hedging activities affect a portfolio's financial position, financial performance and cash flows. For the year ended December 31, 2019, the Portfolio's derivatives did not qualify for hedge accounting as they are held at fair value.

The following table presents the fair value and the location of derivatives within the Consolidated Statement of Assets and Liabilities at December 31, 2019 and the effect of these derivatives on the Consolidated Statement of Operations for the year ended December 31, 2019.

<b>Primary Underlying Risk</b>	<b>Derivative Assets<sup>(1)</sup></b>	<b>Derivative Liabilities<sup>(1)</sup></b>	<b>Realized Gain (Loss)</b>	<b>Change in Unrealized Appreciation (Depreciation)</b>
Commodity price				
Futures contracts <sup>(2)</sup>	\$ 222,633	\$160,138	\$ 671,028	\$ (504,462)
Total return swap contracts <sup>(3)</sup>	3,133,445	—	2,884,117	18,780,805
	<u>\$3,356,078</u>	<u>\$160,138</u>	<u>\$3,555,145</u>	<u>\$18,276,343</u>

<sup>(1)</sup> Generally, the balance sheet location for asset derivatives is receivables/net unrealized appreciation (depreciation) and for liability derivatives is payables/net unrealized appreciation (depreciation).

**Credit Suisse Trust — Commodity Return Strategy Portfolio**  
**Notes to Consolidated Financial Statements (continued)**  
December 31, 2019

**Note 2. Significant Accounting Policies (continued)**

- <sup>(2)</sup> Includes cumulative appreciation (depreciation) of futures contracts as reported in the Consolidated Schedule of Investments. Only variation margin is reported within the receivables and/or payables on the Consolidated Statement of Assets and Liabilities.
- <sup>(3)</sup> Includes cumulative appreciation (depreciation) of total return swap contracts as reported in the Consolidated Schedule of Investments. Only variation margin is reported within the receivables and/or payables on the Consolidated Statement of Assets and Liabilities.

The notional amount of futures contracts and swap contracts open at December 31, 2019 is reflected in the Consolidated Schedule of Investments. For the year ended December 31, 2019, the Portfolio held average monthly notional values on a net basis of \$1,980,629, \$1,698,441 and \$427,139,535 in long futures contracts, short futures contracts and swap contracts, respectively.

The Portfolio is a party to International Swap and Derivatives Association, Inc. (“ISDA”) Master Agreements (“Master Agreements”) with certain counterparties that govern over-the-counter derivative (including Total Return, Credit Default and Interest Rate Swaps) and foreign exchange contracts entered into by the Portfolio. The Master Agreements may contain provisions regarding, among other things, the parties’ general obligations, representations, agreements, collateral requirements, events of default and early termination. Termination events applicable to the Portfolio may occur upon a decline in the Portfolio’s net assets below a specified threshold over a certain period of time.

The following table presents by counterparty the Portfolio’s derivative assets, net of related collateral held by the Portfolio, at December 31, 2019:

<b>Counterparty</b>	<b>Gross Amount of Derivative Assets Presented in the Consolidated Statement of Assets and Liabilities<sup>(a)</sup></b>	<b>Financial Instruments and Derivatives Available for Offset</b>	<b>Non-Cash Collateral Received<sup>(b)</sup></b>	<b>Cash Collateral Received<sup>(b)</sup></b>	<b>Net Amount of Derivative Assets</b>
Bank of America	\$ 462,942	\$ —	\$ —	\$ —	\$ 462,942
CIBC	224,162	—	—	—	224,162
Citigroup	424,788	—	—	—	424,788
JPMorgan Chase	206,498	—	—	—	206,498
Macquarie	437,817	—	—	—	437,817
Morgan Stanley	372,700	—	—	—	372,700
RBC Capital	162,640	—	—	—	162,640
Societe Generale	577,222	—	—	—	577,222
UBS	264,676	—	—	—	264,676
	<u>\$3,133,445</u>	<u>\$ —</u>	<u>\$ —</u>	<u>\$ —</u>	<u>\$3,133,445</u>

<sup>(a)</sup> Swap contracts are included.

<sup>(b)</sup> The actual collateral pledged may be more than the amounts shown.

**Credit Suisse Trust — Commodity Return Strategy Portfolio**  
**Notes to Consolidated Financial Statements (continued)**  
December 31, 2019

---

**Note 2. Significant Accounting Policies (continued)**

C) SECURITY TRANSACTIONS AND INVESTMENT INCOME/EXPENSE — Security transactions are accounted for on a trade date basis. Interest income/expense is recorded on the accrual basis. The Portfolio amortizes premiums and accretes discounts using the effective interest method. Dividend income/expense is recorded on the ex-dividend date. The cost of investments sold is determined by use of the specific identification method for both financial reporting and income tax purposes. To the extent any issuer defaults or a credit event occurs that impacts the issuer, the Portfolio may halt any additional interest income accruals and consider the realizability of interest accrued up to the date of default or credit event.

D) DIVIDENDS AND DISTRIBUTIONS TO SHAREHOLDERS — Dividends from net investment income, if any, are declared and paid quarterly. Distributions of net realized capital gains, if any, are declared and paid at least annually. However, to the extent that a net realized capital gain can be reduced by a capital loss carryforward, such gain will not be distributed. Dividends and distributions to shareholders of the Portfolio are recorded on the ex-dividend date and are determined in accordance with federal income tax regulations, which may differ from GAAP.

E) FEDERAL AND OTHER TAXES — No provision is made for federal taxes as it is the Portfolio's intention to continue to qualify as a regulated investment company ("RIC") under the Internal Revenue Code of 1986, as amended (the "Code"), and to make the requisite distributions to its shareholders, which will be sufficient to relieve it from federal income taxes.

In order to qualify as a RIC under the Code, the Portfolio must meet certain requirements regarding the source of its income, the diversification of its assets and the distribution of its income. One of these requirements is that the Portfolio derive at least 90% of its gross income for each taxable year from dividends, interest, payments with respect to certain securities loans, gains from the sale or other disposition of stock, securities or foreign currencies, other income derived with respect to its business of investing in such stock, securities or currencies or net income derived from interests in certain publicly-traded partnerships ("Qualifying Income"). The Portfolio may invest in structured notes designed to track the performance of the Benchmark. The Portfolio may, through its investment in the Subsidiary, invest in commodity-linked swaps and/or futures contracts.

If the Portfolio is unable to ensure continued qualification as a RIC, the Portfolio may be required to change its investment objective, policies or

**Credit Suisse Trust — Commodity Return Strategy Portfolio**  
**Notes to Consolidated Financial Statements (continued)**  
December 31, 2019

---

**Note 2. Significant Accounting Policies (continued)**

techniques, or may be liquidated. If the Portfolio fails to qualify as a RIC, the Portfolio will be subject to federal income tax on its net income and capital gains at regular corporate rates (without reduction for distributions to shareholders). If the Portfolio were to fail to qualify as a RIC and become subject to federal income tax, shareholders of the Portfolio would be subject to the risk of diminished returns.

The Portfolio adopted the authoritative guidance for uncertainty in income taxes and recognizes a tax benefit or liability from an uncertain position only if it is more likely than not that the position is sustainable based solely on its technical merits and consideration of the relevant taxing authority's widely understood administrative practices and procedures. The Portfolio has reviewed its current tax positions and has determined that no provision for income tax is required in the Portfolio's financial statements. The Portfolio's federal and state income tax returns for tax years for which the applicable statutes of limitations have not expired are subject to examination by the Internal Revenue Service and state departments of revenue.

F) CASH — The Portfolio's uninvested cash balance is held in an interest bearing variable rate demand deposit account at State Street Bank and Trust Company ("SSB"), the Portfolio's custodian.

G) FUTURES — The Portfolio may enter into futures contracts to the extent permitted by its investment policies and objectives. The Portfolio may use futures contracts to gain exposure to or hedge against changes in commodities. Upon entering into a futures contract, the Portfolio is required to deposit cash and/or pledge U.S. Government securities as initial margin with a Futures Commission Merchant ("FCM"). Subsequent payments, which are dependent on the daily fluctuations in the value of the underlying instrument, are made or received by the Portfolio each day (daily variation margin) and are recorded as unrealized gains or losses in the Consolidated Statement of Operations until the contracts are closed. When the contracts are closed, the Portfolio records a realized gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the Portfolio's basis in the contract. Risks of entering into futures contracts for hedging purposes include the possibility that a change in the value of the contract may not correlate with the changes in the value of the underlying instruments. Futures have minimal counterparty credit risk because futures are exchange traded and the exchange's clearinghouse, as counterparty to all exchange-traded futures, guarantees the futures against default. In addition, the purchase of a futures contract involves the risk that the Portfolio could lose more than the original margin deposit and

**Credit Suisse Trust — Commodity Return Strategy Portfolio**  
**Notes to Consolidated Financial Statements (continued)**  
December 31, 2019

---

**Note 2. Significant Accounting Policies (continued)**

subsequent payments may be required for a futures transaction. The Portfolio's open futures contracts are disclosed in the Consolidated Schedule of Investments. At December 31, 2019, the amount of restricted cash held at brokers related to open futures contracts was \$0.

The Commodity Exchange Act requires an FCM to segregate all customer transactions and assets from the FCM's proprietary activities. A customer's cash and other equity deposited with an FCM are considered commingled with all other customer funds subject to the FCM's segregation requirements. In the event of an FCM's insolvency, recovery may be limited to the Portfolio's pro-rata share of segregated customer funds available. It is possible that the recovery amount could be less than the total of cash and other equity deposited.

H) SWAPS — The Portfolio may enter into commodity index swaps either for hedging purposes or to seek to increase total return. A swap contract is an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified amount of an underlying asset or notional principal amount. The Portfolio will enter into swap contracts only on a net basis, which means that the two payment streams are netted out, with the Portfolio receiving or paying, as the case may be, only the net amount of the two payments. Risks may arise as a result of the failure of the counterparty to the swap contract to comply with the terms of the swap contract. The extent of the Portfolio's exposure to credit and counterparty risks is the discounted net value of the cash flows to be received from the counterparty over the contract's remaining life, to the extent that the amount is positive. These risks are mitigated by having a master netting arrangement between the Portfolio and the counterparty and by the posting of collateral by the counterparty to the Portfolio to cover the Portfolio's exposure to the counterparty. Therefore, the Portfolio considers the creditworthiness of each counterparty as well as the amounts posted by the counterparty pursuant to the master netting agreement to a swap contract in evaluating potential credit risk. Additionally, risks may arise from unanticipated movements in interest rates or in the value of the underlying reference asset or index.

The Portfolio may enter into total return swap contracts, involving commitments to pay interest in exchange for a market-linked return, both based on notional amounts. The Portfolio may invest in total return swap contracts for hedging purposes or to seek to increase total return. To the extent the total return of the security or index underlying the transaction exceeds or falls short of the offsetting interest rate obligation, the Portfolio will receive a payment from or make a payment to the counterparty.

**Credit Suisse Trust — Commodity Return Strategy Portfolio**  
**Notes to Consolidated Financial Statements (continued)**  
December 31, 2019

---

**Note 2. Significant Accounting Policies (continued)**

The Portfolio records unrealized gains or losses on a daily basis representing the value and the current net receivable or payable relating to open swap contracts. Net amounts received or paid on the swap contract are recorded as realized gains or losses. Fluctuations in the value of swap contracts are recorded for financial statement purposes as unrealized appreciation or depreciation from swap contracts. Realized gains and losses from terminated swaps are included in net realized gains/losses from swap contracts. The Portfolio's open swap contracts are disclosed in the Consolidated Schedule of Investments. At December 31, 2019, the amount of restricted cash held at brokers related to open swap contracts was \$9,761,000.

1) SECURITIES LENDING — The initial collateral received by the Portfolio is required to have a value of at least 102% of the market value of domestic securities on loan (including any accrued interest thereon) and 105% of the market value of foreign securities on loan (including any accrued interest thereon). The collateral is maintained thereafter at a value equal to at least 102% of the current market value of the securities on loan. The market value of loaned securities is determined at the close of each business day of the Portfolio and any additional required collateral is delivered to the Portfolio, or excess collateral returned by the Portfolio, on the next business day. Cash collateral received by the Portfolio in connection with securities lending activity may be pooled together with cash collateral for other funds/portfolios advised by Credit Suisse and may be invested in a variety of investments, including funds advised by SSB, the Portfolio's securities lending agent, or money market instruments. However, in the event of default or bankruptcy by the other party to the agreement, realization and/or retention of the collateral may be subject to legal proceedings.

SSB has been engaged by the Portfolio to act as the Portfolio's securities lending agent. The Portfolio's securities lending arrangement provides that the Portfolio and SSB will share the net income earned from securities lending activities. Securities lending income is accrued as earned. At December 31, 2019, there were no securities out on loan.

During the year ended December 31, 2019, total earnings from the Portfolio's investment in cash collateral received in connection with securities lending arrangements was \$13,548 of which \$12,158 was rebated to borrowers (brokers). The Portfolio retained \$1,042 in income from the cash collateral investment, and SSB, as lending agent, was paid \$348.

**Credit Suisse Trust — Commodity Return Strategy Portfolio**  
**Notes to Consolidated Financial Statements (continued)**  
December 31, 2019

---

**Note 2. Significant Accounting Policies (continued)**

J) OTHER — In the normal course of business the Portfolio trades financial instruments and enters into financial transactions for which risk of potential loss exists due to changes in the market (market risk) or failure of the other party to a transaction to perform (credit risk). Similar to credit risk, the Portfolio may be exposed to counterparty risk, including securities lending, or the risk that an institution or other entity with which the Portfolio has unsettled or open transactions will default. The potential loss could exceed the value of the financial assets recorded in the consolidated financial statements. Financial assets, which potentially expose the Portfolio to credit risk, consist principally of cash due from counterparties and investments. The extent of the Portfolio's exposure to credit and counterparty risks in respect to these financial assets approximates their carrying value as recorded in the Portfolio's Consolidated Statement of Assets and Liabilities.

K) RECENT ACCOUNTING PRONOUNCEMENTS — In August 2018, the FASB issued Accounting Standards Update 2018-13, Fair Value Measurement (Topic 820): Disclosure Framework — Changes to the Disclosure Requirements for Fair Value Measurement ("ASU 2018-13"). The update provides guidance that eliminates, adds and modifies certain disclosure requirements for fair value measurements. ASU 2018-13 will be effective for annual periods beginning after December 15, 2019. Management is currently assessing the potential impact of these changes to future financial statements.

L) SUBSEQUENT EVENTS — In preparing the financial statements as of December 31, 2019, management considered the impact of subsequent events for potential recognition or disclosure in these financial statements through the date of release of this report. No such events requiring recognition or disclosure were identified through the date of the release of this report.

**Note 3. Transactions with Affiliates and Related Parties**

Credit Suisse serves as investment adviser and co-administrator for the Portfolio. For its investment advisory and administration services, Credit Suisse is entitled to receive a fee from the Portfolio at an annual rate of 0.59% of the Portfolio's average daily net assets. For the year ended December 31, 2019, investment advisory and administration fees earned and voluntarily waived by Credit Suisse were \$2,511,023 and \$17,357, respectively. Credit Suisse has contractually agreed to limit expenses so that the Portfolio's annual operating expenses do not exceed 1.05% of the Portfolio's average daily net assets. The Portfolio is authorized to reimburse Credit Suisse for management fees previously limited and/or for expenses previously reimbursed by Credit

**Credit Suisse Trust — Commodity Return Strategy Portfolio**  
**Notes to Consolidated Financial Statements (continued)**  
December 31, 2019

---

**Note 3. Transactions with Affiliates and Related Parties (continued)**

Suisse, provided, however, that any reimbursements must be paid at a date not more than thirty-six months following the applicable month during which such fees were limited or expenses were reimbursed by Credit Suisse and the reimbursements do not cause the Portfolio to exceed the applicable expense limitation in the contract at the time the fees are recouped. This contract may not be terminated before May 1, 2021.

The amounts waived and reimbursed by Credit Suisse, which are available for potential future recoupment by Credit Suisse, and the expiration schedule at December 31, 2019 are as follows:

Fee waivers/expense reimbursements subject to recoupment	Expires December 31, 2020	Expires December 31, 2021	Expires December 31, 2022
\$227,733	\$210,376	\$—	\$17,357

For its co-administrative services, SSB receives a fee, exclusive of out-of-pocket expenses, calculated in total for all the Credit Suisse funds/portfolios co-administered by SSB and allocated based upon the relative average net assets of each fund/portfolio, subject to an annual minimum fee. For the year ended December 31, 2019, co-administrative services fees earned by SSB (including out-of-pocket expenses) with respect to the Portfolio were \$71,814.

Credit Suisse Securities (USA) LLC (“CSSU”), an affiliate of Credit Suisse, serves as the distributor of the Portfolio’s shares. Pursuant to a distribution plan adopted by the Portfolio pursuant to Rule 12b-1 under the 1940 Act, CSSU receives fees for its distribution services. These fees were calculated at an annual rate of 0.25% of the average daily net assets. For the year ended December 31, 2019, Rule 12b-1 distribution fees were 1,063,993.

Certain brokers, dealers and financial representatives provide transfer agent-related services to the Portfolio and receive compensation from the Portfolio. For the year ended December 31, 2019, the Portfolio paid \$346,312, which is included within transfer agent fees.

**Note 4. Line of Credit**

The Portfolio, together with other funds/portfolios advised by Credit Suisse (collectively, the “Participating Funds”), participates in a committed, unsecured line of credit facility (“Credit Facility”), with SSB in an aggregated amount of \$250 million for temporary or emergency purposes under a first-come, first-served basis. Under the terms of the Credit Facility, the Participating Funds pay an aggregate commitment fee on the average unused amount of the Credit

**Credit Suisse Trust — Commodity Return Strategy Portfolio**  
**Notes to Consolidated Financial Statements (continued)**  
December 31, 2019

---

**Note 4. Line of Credit (continued)**

Facility, which is allocated among the Participating Funds in such manner as is determined by the governing Boards of the Participating Funds. In addition, the Participating Funds pay interest on borrowings at either the Overnight Federal Funds rate or the Overnight LIBOR rate plus a spread. At December 31, 2019 and during the year ended December 31, 2019, the Portfolio had no borrowings outstanding under the Credit Facility.

**Note 5. Purchases and Sales of Securities**

For the year ended December 31, 2019, purchases and sales of investment securities (excluding short-term investments) and U.S. Government and Agency Obligations were as follows:

<u>Investment Securities</u>		<u>U.S. Government/ Agency Obligations</u>	
<u>Purchases</u>	<u>Sales</u>	<u>Purchases</u>	<u>Sales</u>
\$0	\$0	\$562,921,684	\$559,572,141

**Note 6. Capital Share Transactions**

The Portfolio is authorized to issue an unlimited number of full and fractional shares of beneficial interest, \$.001 par value per share. Transactions in capital shares of the Portfolio were as follows:

	<u>For the Year Ended December 31, 2019</u>	<u>For the Year Ended December 31, 2018</u>
Shares sold	13,693,556	12,385,004
Shares issue in reinvestment of dividends and distributions	1,038,921	2,732,726
Shares redeemed	<u>(3,575,689)</u>	<u>(4,010,535)</u>
Net increase	<u>11,156,788</u>	<u>11,107,195</u>

On December 31, 2019, the number of shareholders that held 5% or more of the outstanding shares of the Portfolio was as follows:

<u>Number of Shareholders</u>	<u>Approximate Percentage of Outstanding Shares</u>
1	88%

The Portfolio's performance may be negatively impacted in the event one or more of the Portfolio's greater than 5% shareholders were to redeem at a given time. Some of the shareholders may be omnibus accounts, which hold shares on behalf of individual shareholders.

**Credit Suisse Trust — Commodity Return Strategy Portfolio**  
**Notes to Consolidated Financial Statements (continued)**  
December 31, 2019

---

**Note 7. Income Tax Information and Distributions to Shareholders**

Income and capital gain distributions are determined in accordance with federal income tax regulations, which may differ from GAAP.

The tax character of distributions paid during the years ended December 31, 2019 and 2018, respectively, was as follows:

<b>Ordinary Income</b>	
<b>2019</b>	<b>2018</b>
\$3,749,493	\$10,610,261

The tax basis components of distributable earnings differ from the amounts reflected in the Consolidated Statement of Assets and Liabilities by temporary book/tax differences. At December 31, 2019, the components of distributable earnings on a tax basis were as follows:

Undistributed net investment income	\$ 23,311,127
Accumulated net realized loss	(15,459,005)
Unrealized appreciation	<u>3,083,042</u>
	<u>\$ 10,935,164</u>

At December 31, 2019, the Portfolio had \$10,905,204 of unlimited short-term capital loss carryforwards and \$4,553,801 of unlimited long-term capital loss carryforwards available to offset possible future capital gains.

At December 31, 2019, the cost and net unrealized appreciation (depreciation) of investments and derivatives for income tax purposes were as follows:

Cost of Investments	\$434,406,986
Unrealized appreciation	\$ 3,578,240
Unrealized depreciation	(495,198)
Net unrealized appreciation (depreciation)	<u>\$ 3,083,042</u>

To adjust for current period permanent book/tax differences which arose principally from differing book/tax treatment of Subsidiary cumulative income/loss and AICPA adjustments, paid-in capital was charged \$18,276,343 and distributable earnings/loss was credited \$18,276,343. Net assets were not affected by this reclassification.

**Credit Suisse Trust — Commodity Return Strategy Portfolio**  
**Notes to Consolidated Financial Statements (continued)**  
December 31, 2019

---

**Note 8. Contingencies**

In the normal course of business, the Portfolio may provide general indemnifications pursuant to certain contracts and organizational documents. The Portfolio's maximum exposure under these arrangements is dependent on future claims that may be made against the Portfolio and, therefore, cannot be estimated; however, based on experience, the risk of loss from such claims is considered remote.

**Credit Suisse Trust — Commodity Return Strategy Portfolio**  
**Report of Independent Registered Public Accounting Firm**

---

To the Shareholders and Board of Trustees  
Credit Suisse Trust — Commodity Return Strategy Portfolio:

*Opinion on the Financial Statements*

We have audited the accompanying consolidated statement of assets and liabilities of Credit Suisse Trust — Commodity Return Strategy Portfolio (the Portfolio), including the consolidated schedule of investments, as of December 31, 2019, and the related consolidated statement of operations for the year then ended, the consolidated statements of changes in net assets for each of the years in the two-year period then ended, and the related notes (collectively, the consolidated financial statements) and the consolidated financial highlights for each of the years in the five-year period then ended. In our opinion, the consolidated financial statements and consolidated financial highlights present fairly, in all material respects, the financial position of the Portfolio as of December 31, 2019, the results of its operations for the year then ended, the changes in its net assets for each of the years in the two-year period then ended, and the consolidated financial highlights for each of the years in the five-year period then ended, in conformity with U.S. generally accepted accounting principles.

*Basis for Opinion*

These consolidated financial statements and consolidated financial highlights are the responsibility of the Portfolio's management. Our responsibility is to express an opinion on these consolidated financial statements and consolidated financial highlights based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Portfolio in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements and consolidated financial highlights are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements and consolidated financial highlights, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements and consolidated financial highlights. Such procedures also included confirmation of securities owned as of December 31, 2019, by correspondence

**Credit Suisse Trust — Commodity Return Strategy Portfolio**  
**Report of Independent Registered Public Accounting Firm**

---

with custodians and brokers or by other appropriate auditing procedures. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements and consolidated financial highlights. We believe that our audits provide a reasonable basis for our opinion.

**KPMG LLP**

We have served as the auditor of one or more Credit Suisse Asset Management, LLC investment companies since 2015.

New York, New York

February 14, 2020

**Credit Suisse Trust — Commodity Return Strategy Portfolio**  
**Board Approval of Investment Management Agreement (unaudited)**

---

In approving the amended and restated investment management agreement (the “Investment Management Agreement”) for the Commodity Return Strategy Portfolio (the “Portfolio”), a series of Credit Suisse Trust (the “Trust”), the Board of Trustees of the Trust (the “Board”), including all of the trustees who are not “interested persons” of the Trust as defined in the Investment Company Act of 1940 (the “Independent Trustees”), at a Special Telephonic Meeting held on November 5, 2019 where the Board discussed information and materials previously provided to them in connection with the renewal of the Investment Management Agreement, and at an in-person meeting held on November 11 and 12, 2019, considered the following factors:

**Investment Management Fee Rates and Expenses**

The Board reviewed and considered the contractual management fee rate of 0.59% for the Portfolio (“Contractual Management Fee”) in light of the extent and quality of the management services provided by Credit Suisse Asset Management, LLC (“Credit Suisse”), the Portfolio’s investment manager. The Board also considered that Credit Suisse entered into a contractual expense limitation agreement (“Expense Limitation Agreement”) limiting the Portfolio’s total net expenses to 1.05% of the average daily net assets until May 1, 2021.

Additionally, the Board received and considered information comparing the Portfolio’s Contractual Management Fee, Contractual Management Fee less waivers and/or reimbursements (“Net Management Fee”) and the Portfolio’s overall expenses with those of funds in both the relevant expense group (“Expense Group”) and universe of funds (“Expense Universe”) provided by Broadridge, an independent provider of investment company data. The Board noted that the Portfolio’s Contractual Management Fee, Net Management Fee and overall expenses were within the range of its peers as presented in the Broadridge report. The Board was provided with a description of the methodology used to arrive at the funds included in the Expense Group and the Expense Universe.

**Nature, Extent and Quality of the Services under the Management Agreement**

The Board received and considered information regarding the nature, extent and quality of services provided to the Portfolio by Credit Suisse under the Investment Management Agreement. The Board also noted information received at regular meetings throughout the year related to the services rendered by Credit Suisse which, in addition to portfolio management and investment management services set forth in the Investment Management

**Credit Suisse Trust — Commodity Return Strategy Portfolio**  
**Board Approval of Investment Management Agreement** (unaudited) (continued)

---

Agreement, included credit analysis and research, supervising the day-to-day operations of the Portfolio's non-advisory functions which include accounting, administration, custody, transfer agent and other applicable third party service providers, overseeing and facilitating audits, overseeing the Portfolio's credit facility and supervising and/or preparing applicable Portfolio filings, disclosures and shareholder reports. The Board noted that the extensive investment management services provided by Credit Suisse included broad supervisory responsibility and oversight over other service providers to the Portfolio. The Board also considered Credit Suisse's compliance program with respect to the Portfolio. The Board noted that Credit Suisse reports to the Board about portfolio management and compliance matters on a periodic basis. The Board reviewed background information about Credit Suisse including its Form ADV Part 2 — Disclosure Brochure and Brochure Supplement. The Board considered the background and experience of Credit Suisse's senior management and the expertise of, and the amount of attention given to the Portfolio by, senior personnel of Credit Suisse. In addition, the Board reviewed the qualifications, backgrounds and responsibilities of the portfolio management team primarily responsible for the day-to-day portfolio management of the Portfolio and the extent of the resources devoted to research and analysis of actual and potential investments, as well as the resources provided to them. The Board evaluated the ability of Credit Suisse, based on its resources, reputation and other attributes, to attract and retain qualified investment professionals including research, advisory, and supervisory personnel. The Board also received and considered information about the nature, extent and quality of services and fee rates offered to other Credit Suisse clients for comparable services. The Board acknowledged Credit Suisse's representation that the services provided to the Portfolio are more extensive than the services provided in connection with other types of accounts, such as separate accounts, offered by Credit Suisse and the services also are more extensive from those offered and provided to a sub-advised fund. The Board also considered that the services provided by Credit Suisse have expanded over time as a result of regulatory and other developments.

**Portfolio Performance**

The Board received and considered performance results of the Portfolio over the previous year as well as over longer time periods, along with comparisons both to the relevant performance group ("Performance Group") and universe of funds ("Performance Universe") for the Portfolio provided in the Broadridge materials. The Board was provided with a description of the methodology used

**Credit Suisse Trust — Commodity Return Strategy Portfolio**  
**Board Approval of Investment Management Agreement** (unaudited) (continued)

---

to arrive at the funds included in the Performance Group and the Performance Universe. The Board noted that the Portfolio underperformed its Performance Universe for the one-year period reported, and had varying performance compared to its Performance Universe over various longer investment periods reported. The Board also considered the investment performance of the Portfolio relative to its stated objectives.

**Credit Suisse Profitability**

The Board received and considered a profitability analysis of Credit Suisse based on the fees payable under the Investment Management Agreement for the Portfolio, including any fee waivers, as well as other relationships between the Portfolio on the one hand and Credit Suisse affiliates on the other. The Board deliberations also reflected Credit Suisse's methodology for allocating costs to the Portfolio, recognizing that cost allocation methodologies are inherently subjective. The Board also received net profitability information for the other funds in the Credit Suisse family of funds, which include both open-end and closed-end funds. The Board also reviewed Credit Suisse's profit margin as reflected in the profitability analysis, as well as reviewing profitability in light of appropriate court cases and the services rendered to the Portfolio.

**Economies of Scale**

The Board considered information regarding whether there have been economies of scale with respect to the management of the Portfolio, whether the Portfolio has appropriately benefited from any economies of scale, and whether there is potential for realization of any further economies of scale. The Board noted that, if the Portfolio's asset levels grow, further economies of scale potentially could be realized and additionally noted the current expense limitations in place between the Portfolio and Credit Suisse. The Board received information regarding Credit Suisse's profitability in connection with providing investment management services to the Portfolio, including Credit Suisse's costs in providing the services.

**Other Benefits to Credit Suisse**

The Board considered other benefits received by Credit Suisse and its affiliates as a result of their relationship with the Portfolio. Such benefits include, among others, benefits potentially derived from an increase in Credit

**Credit Suisse Trust — Commodity Return Strategy Portfolio**  
**Board Approval of Investment Management Agreement (unaudited) (continued)**

---

Suisse's businesses and its reputation as a result of its relationship with the Portfolio (such as the ability to market its advisory services to other clients or investors including separate account or third party sub-advised mandates or other financial products offered by Credit Suisse and its affiliates) as well as the fees paid to an affiliate of Credit Suisse for distribution services.

The Board considered the standards applied in seeking best execution and their policies and practices regarding soft dollars and reviewed Credit Suisse's method for allocating portfolio investment opportunities among its advisory clients.

**Other Factors and Broader Review**

As discussed above, the Board reviewed detailed materials received from Credit Suisse as part of the annual approval process. The Board also reviews and assesses the quality of the services that the Portfolio receives throughout the year. In this regard, the Board reviews reports of Credit Suisse at least quarterly, which include, among other things, detailed portfolio and market reviews, detailed fund performance reports and Credit Suisse's compliance procedures.

**Conclusions**

In selecting Credit Suisse, and approving the renewal of the Investment Management Agreement and the investment management fee under such agreement, the Board concluded that:

- The Contractual Management Fee and Net Management Fee, reviewed along with information provided by Broadridge for the funds in the Portfolio's Expense Group and Expense Universe, were reasonable in relation to the services provided by Credit Suisse.
- The Board was satisfied with the nature, extent and quality of the investment management services provided to the Portfolio by Credit Suisse and that, based on dialogue with management and counsel, the services provided by Credit Suisse under the Investment Management Agreement are typical of, and consistent with, those provided to similar mutual funds by other investment managers.
- In light of the costs of providing investment management and other services to the Portfolio and Credit Suisse's ongoing commitment to the

**Credit Suisse Trust — Commodity Return Strategy Portfolio**  
**Board Approval of Investment Management Agreement** (unaudited) (continued)

---

Portfolio and willingness to waive fees, Credit Suisse's net profitability based on fees payable under the Investment Management Agreement, as well as other ancillary benefits that Credit Suisse and its affiliates received, were considered reasonable.

- In light of the information received and considered by the Board, the Portfolio's current fee structure was considered reasonable.

No single factor reviewed by the Board was identified by the Board as the principal factor in determining whether to approve the renewal of the Investment Management Agreement. The Independent Trustees were advised by separate independent legal counsel throughout the process.

RUSSELL INVESTMENT FUNDS  
Supplement dated September 11, 2019 to  
PROSPECTUS DATED MAY 1, 2019,  
As supplemented May 24, 2019 and  
June 10, 2019

**I. U.S. SMALL CAP EQUITY FUND RISK/RETURN SUMMARY:** The following replaces the list of money managers in the sub-section entitled “Management” in the Risk/Return Summary section for the U.S. Small Cap Equity Fund in the Prospectus listed above:

- Ancora Advisors, LLC
- Boston Partners Global Investors, Inc.
- Calamos Advisors LLC
- Copeland Capital Management, LLC
- DePrince, Race & Zollo, Inc.
- Jacobs Levy Equity Management, Inc.
- Penn Capital Management Company, Inc.
- Ranger Investment Management, L.P.

**II. GLOBAL REAL ESTATE SECURITIES FUND RISK/RETURN SUMMARY:** The following replaces the list of money managers in the sub-section entitled “Management” in the Risk/Return Summary section for the Global Real Estate Securities Fund in the Prospectus listed above:

- Cohen & Steers Capital Management, Inc., Cohen & Steers UK Limited and Cohen & Steers Asia Limited
- RREEF America L.L.C., Deutsche Investments Australia Limited and Deutsche Alternative Asset Management (Global) Limited, operating under the brand name Deutsche Asset Management

**III. STRATEGIC BOND FUND RISK/RETURN SUMMARY:** The following replaces the list of money managers in the sub-section entitled “Management” in the Risk/Return Summary section for the Strategic Bond Fund in the Prospectus listed above:

- Colchester Global Investors Limited
- Schroder Investment Management North America Inc.
- Western Asset Management Company and Western Asset Management Company Limited

**IV. GLOBAL REAL ESTATE SECURITIES FUND INVESTMENT OBJECTIVE AND INVESTMENT STRATEGIES:** The following replaces the third paragraph in the sub-section entitled “Principal Investment Strategies” for the Global Real Estate Securities Fund in the Prospectus listed above:

RIM provides or oversees the provision of all investment advisory and portfolio management services for the Fund. The Fund is advised by RIM and multiple money managers unaffiliated with RIM pursuant to a “multi-manager” approach. Subject to the approval of the Fund’s Board of Trustees, RIM selects, oversees and evaluates the Fund’s money managers and allocates Fund assets among itself and multiple money manager investment strategies. The Fund’s money managers have non-discretionary asset management assignments pursuant to which they provide a model portfolio to RIM representing their investment recommendations, based upon which RIM purchases and sells securities for the Fund. RIM also manages Fund assets not allocated to money manager strategies and the Fund’s cash balances and may manage portions of the Fund during transitions between money manager strategies.

With respect to the portion of the Fund that RIM manages based upon money manager model portfolios, RIM constructs a portfolio that represents the aggregation of the model portfolios based upon RIM’s allocation to each money manager’s strategy. RIM then implements the portfolio consistent with the

aggregation of the model portfolios, but may deviate from such aggregation primarily for the purposes of exposure and transaction cost management. For this portion of the Fund, RIM purchases and sells securities at the times and in the manner considered by RIM to be efficient for the Fund and it is expected that, generally, trades will be effected on a periodic basis, unless RIM determines that more frequent trading is appropriate due to changing market conditions or other significant factors.

**V. MONEY MANAGER CHANGES:** The following replaces the information in the “Money Manager Information” section for the U.S. Small Cap Equity, Global Real Estate Securities and Strategic Bond Funds in the Prospectus listed above:

#### **U.S. Small Cap Equity Fund**

Ancora Advisors, LLC, 6060 Parkland Boulevard, Suite 200, Cleveland, OH 44124.

Boston Partners Global Investors, Inc., One Grand Central Place, 60 East 42nd St., Suite 1550, New York, NY 10165.

Calamos Advisors LLC, 2020 Calamos Court, Naperville, IL 60563-2787.

Copeland Capital Management, LLC, Eight Tower Bridge, 161 Washington St., Suite 1650, Conshohocken, PA 19428.

DePrince, Race & Zollo, Inc., 250 Park Avenue South, Suite 250, Winter Park, FL 32789.

Jacobs Levy Equity Management, Inc., 100 Campus Drive, 2<sup>nd</sup> Floor West, Florham Park, NJ 07932-0650.

Penn Capital Management Company, Inc., The Navy Yard Corporate Center, 1200 Intrepid Avenue, Suite 400, Philadelphia, PA 19112.

Ranger Investment Management, L.P., 2828 N. Harwood Street, Suite 1900, Dallas, TX 75201.

#### **Global Real Estate Securities Fund**

Cohen & Steers Capital Management, Inc., 280 Park Avenue, 10th Floor, New York, NY 10017-1216, Cohen & Steers UK Limited, 50 Pall Mall, 7<sup>th</sup> Floor, London SW1Y 5JH, United Kingdom and Cohen & Steers Asia Limited, Suites 1201-02 Champion Tower, 3 Garden Road, Central Hong Kong.

RREEF America L.L.C. 222 S. Riverside Plaza, Chicago, IL 60606, Deutsche Investments Australia Limited, Deutsche Bank Place, Level 16, Corner of Hunter and Phillip Streets, Sydney NSW 2000 Australia and Deutsche Alternative Asset Management (Global) Limited, 70 Victoria Street, The Zig Zag Building - Westminster, London SW1E 6SQ, United Kingdom.

#### **Strategic Bond Fund**

Colchester Global Investors Limited, Heathcoat House, 4<sup>th</sup> Floor, 20 Savile Row, London, England W1S 3PR United Kingdom.

Schroder Investment Management North America Inc., 7 Bryant Park 19<sup>th</sup> Floor, New York, NY 10018.

Western Asset Management Company, 385 East Colorado Boulevard, Pasadena, CA 91101, and Western Asset Management Company Limited, 10 Exchange Square, Primrose Street, London, England EC2A 2EN United Kingdom.

RUSSELL INVESTMENT FUNDS  
 Supplement dated September 11, 2019 to  
 PROSPECTUS DATED May 1, 2019  
 As Supplemented June 10, 2019

**I. CHANGE IN TARGET ASSET ALLOCATIONS:** Effective on or about November 13, 2019, each Fund’s target allocation to the Underlying Funds in which it invests will be modified. As a result, the following changes are made to the Prospectus listed above:

- (i) **RISK/RETURN SUMMARY:** The following is added after the fourth sentence in the first paragraph of the relevant Fund’s “Principal Investment Strategies of the Fund” sub-section of the Risk/Return Summary section of the Prospectus listed above:

Moderate Strategy Fund: Effective on or about November 13, 2019, the Fund’s allocation to the Underlying Funds in which it invests will be modified and RIM expects that the Fund’s approximate target allocation on or about November 13, 2019 will be 34% to equity, 52% to fixed income, 12% to multi-asset and 2% to alternative asset classes.

Balanced Strategy Fund: Effective on or about November 13, 2019, the Fund’s allocation to the Underlying Funds in which it invests will be modified and RIM expects that the Fund’s approximate target allocation on or about November 13, 2019 will be 53% to equity, 33% to fixed income, 10% to multi-asset and 4% to alternative asset classes.

Growth Strategy Fund: Effective on or about November 13, 2019, the Fund’s allocation to the Underlying Funds in which it invests will be modified and RIM expects that the Fund’s approximate target allocation on or about November 13, 2019 will be 70% to equity, 16% to fixed income, 10% to multi-asset and 4% to alternative asset classes.

Equity Growth Strategy Fund: Effective on or about November 13, 2019, the Fund’s allocation to the Underlying Funds in which it invests will be modified and RIM expects that the Fund’s approximate target allocation on or about November 13, 2019 will be 80% to equity, 11% to fixed income, 4% to multi-asset and 5% to alternative asset classes.

- (ii) **INVESTMENT OBJECTIVE AND INVESTMENT STRATEGIES OF THE FUNDS:** On or about November 13, 2019, the following replaces the second paragraph and asset allocation table in the sub-section entitled “Principal Investment Strategies” in the “Investment Objective and Investment Strategies of the Funds” section in the Prospectus listed above:

The following table shows the Funds’ approximate expected target strategic asset allocations to equity, fixed income, multi-asset and alternative asset classes on or about November 13, 2019.

Asset Allocation*	Moderate Strategy Fund	Balanced Strategy Fund	Growth Strategy Fund	Equity Growth Strategy Fund
Equity . . . . .	34%	53%	70%	80%
Fixed Income . . . . .	52%	33%	16%	11%
Multi-Asset . . . . .	12%	10%	10%	4%
Alternative# . . . . .	2%	4%	4%	5%

\* As described below, actual asset allocation may vary.

# Alternative Underlying Funds pursue investment strategies that differ from those of traditional broad market equity or fixed income funds.

## **II. INVESTMENT OBJECTIVE AND INVESTMENT STRATEGIES OF THE UNDERLYING FUNDS:**

The following replaces the second paragraph in the sub-section entitled “Principal Investment Strategies” for the RIC Global Infrastructure Fund in the Prospectus listed above:

Russell Investment Management, LLC (“RIM”) provides or oversees the provision of all investment advisory and portfolio management services for the Fund. The Fund is advised by RIM and multiple money managers unaffiliated with RIM pursuant to a multi-manager approach. The Fund’s money managers have non-discretionary asset management assignments pursuant to which they provide a model portfolio to RIM representing their investment recommendations, based upon which RIM purchases and sells securities for the Fund. For Fund assets not allocated to money manager strategies, RIM utilizes quantitative and/or rules-based processes and qualitative analysis to assess Fund characteristics and invest in securities and instruments which provide the desired exposures. RIM may use strategies based on indexes. RIM also manages the Fund’s cash balances. The Fund usually, but not always, pursues a strategy to be fully invested by exposing all or a portion of its cash to the performance of appropriate markets by purchasing equity securities and/or derivatives, which typically include index futures contracts.

**Northwestern Mutual Series Fund, Inc.**  
Prospectus Supplement Dated October 17, 2019

The following information supplements the Statutory Prospectus for the Northwestern Mutual Series Fund, Inc. (the “Fund”) dated May 1, 2019, as supplemented June 28, 2019, September 6, 2019 and September 30, 2019 (the “Prospectus”). You should read this Supplement together with the Prospectus.

**Amended Fee Table for Large Cap Blend Portfolio**

Effective immediately, within the Portfolio Summary relating to the Large Cap Blend Portfolio (the “Portfolio”), the fee table for the Portfolio under “Fees and Expenses of the Portfolio” is amended to add a footnote indicating that the Total Annual Operating Expenses of the Portfolio were restated to reflect current expenses. No fee and expense numbers in the table have been changed in connection with this amendment. The amended fee table is set forth below:

<b>Shareholder Fees</b> (fees paid directly from your investment)	N/A
<b>Annual Portfolio Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fee	0.76%
Distribution and Service (12b-1) Fees	None
Other Expenses	0.05%
Acquired Fund Fees and Expenses	0.01%
Total Annual Portfolio Operating Expenses (1)(2)	0.82%
Fee Waiver (3)	(0.01)%
Total Annual Portfolio Operating Expenses After Fee Waiver (1), (3)	0.81%

(1) Includes fees and expenses incurred indirectly by the Portfolio as a result of investments in other investment companies (Acquired Fund Fees and Expenses). The operating expenses of the Portfolio reflected in the Portfolio’s most recent annual report and Financial Highlights do not include Acquired Fund Fees and Expenses.

(2) Restated to reflect current expenses.

(3) The Portfolio’s investment adviser has entered into a written agreement to waive a portion of its management fee. This fee waiver agreement may be terminated by the adviser at any time after April 30, 2020.

**Amended Fee Table for Equity Income Portfolio**

Effective immediately, within the Portfolio Summary relating to the Equity Income Portfolio (the “Portfolio”), the fee table for the Portfolio under “Fees and Expenses of the Portfolio” is amended to add a footnote indicating that the Total Annual Operating Expenses of the Portfolio were restated to reflect current expenses. No fee and expense numbers in the table have been changed in connection with this amendment. The amended fee table is set forth below:

<b>Shareholder Fees</b> (fees paid directly from your investment)	N/A
<b>Annual Portfolio Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fee	0.63%
Distribution and Service (12b-1) Fees	None
Other Expenses	0.02%
Total Annual Portfolio Operating Expenses (1)	0.65%
Fee Waiver (2)	(0.05)%
Total Annual Portfolio Operating Expenses After Fee Waiver (2)	0.60%

(1) Restated to reflect current expenses.

(2) The Portfolio’s investment adviser has entered into a written agreement to waive a portion of its management fee. This fee waiver agreement may be terminated by the adviser at any time after April 30, 2020.

**Amended Fee Table for Mid Cap Value Portfolio**

Effective immediately, within the Portfolio Summary relating to the Mid Cap Value Portfolio (the “Portfolio”), the fee table for the Portfolio under “Fees and Expenses of the Portfolio” is amended to add a footnote indicating that the Total Annual Operating Expenses of the Portfolio were restated to reflect current expenses. No fee and expense numbers in the table have been changed in connection with this amendment. The amended fee table is set forth below:

<b>Shareholder Fees</b> (fees paid directly from your investment)	N/A
<b>Annual Portfolio Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fee	0.85%
Distribution and Service (12b-1) Fees	None
Other Expenses	0.04%
Acquired Fund Fees and Expenses	0.01%

Total Annual Portfolio Operating Expenses <sup>(1), (2)</sup>	0.90%
Fee Waiver <sup>(3)</sup>	(0.14)%
Total Annual Portfolio Operating Expenses After Fee Waiver <sup>(1), (3)</sup>	0.76%

<sup>(1)</sup> Includes fees and expenses incurred indirectly by the Portfolio as a result of investments in other investment companies (Acquired Fund Fees and Expenses). The operating expenses of the Portfolio reflected in the Portfolio's most recent annual report and Financial Highlights do not include Acquired Fund Fees and Expenses.

<sup>(2)</sup> Restated to reflect current expenses.

<sup>(3)</sup> The Portfolio's investment adviser has entered into a written agreement to waive a portion of its management fee. This fee waiver agreement may be terminated by the adviser at any time after April 30, 2020.

### **Amended Fee Table for Emerging Markets Equity Portfolio**

Effective immediately, within the Portfolio Summary relating to the Emerging Markets Equity Portfolio (the "Portfolio"), the fee table for the Portfolio under "Fees and Expenses of the Portfolio" is amended to add a footnote indicating that the Total Annual Operating Expenses of the Portfolio were restated to reflect current expenses. No fee and expense numbers in the table have been changed in connection with this amendment. The amended fee table is set forth below:

<b>Shareholder Fees</b> (fees paid directly from your investment)	N/A
<b>Annual Portfolio Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fee	1.07%
Distribution and Service (12b-1) Fees	None
Other Expenses	0.05%
Total Annual Portfolio Operating Expenses <sup>(1)</sup>	1.12%
Fee Waiver <sup>(2)</sup>	(0.13)%
Total Annual Portfolio Operating Expenses After Fee Waiver <sup>(2)</sup>	0.99%

<sup>(1)</sup> Restated to reflect current expenses.

<sup>(2)</sup> The Portfolio's investment adviser has entered into a written agreement to waive a portion of its management fee. This fee waiver agreement may be terminated by the adviser at any time after April 30, 2020.

**Amended Fee Table for Multi-Sector Bond Portfolio**

Effective immediately, within the Portfolio Summary relating to the Multi-Sector Bond Portfolio (the “Portfolio”), the fee table for the Portfolio under “Fees and Expenses of the Portfolio” is amended to add a footnote indicating that the Total Annual Operating Expenses of the Portfolio were restated to reflect current expenses. No fee and expense numbers in the table have been changed in connection with this amendment. The amended fee table is set forth below:

<b>Shareholder Fees</b> (fees paid directly from your investment)	N/A
<b>Annual Portfolio Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fee	0.77%
Distribution and Service (12b-1) Fees	None
Other Expenses	0.05%
Total Annual Portfolio Operating Expenses <sup>(1)</sup>	0.82%
Fee Waiver <sup>(2)</sup>	(0.09)%
Total Annual Portfolio Operating Expenses After Fee Waiver <sup>(2)</sup>	0.73%

<sup>(1)</sup> Restated to reflect current expenses.

<sup>(2)</sup> The Portfolio's investment adviser has entered into a written agreement to waive a portion of its management fee. This fee waiver agreement may be terminated by the adviser at any time after April 30, 2020.

RUSSELL INVESTMENT FUNDS  
Supplement dated December 27, 2019 to  
PROSPECTUS DATED MAY 1, 2019,  
As supplemented May 24, 2019,  
June 10, 2019 and September 11, 2019

**I. INTERNATIONAL DEVELOPED MARKETS FUND RISK/RETURN SUMMARY:**

- (i) The following replaces the second paragraph in the sub-section entitled “Principal Investment Strategies of the Fund” in the Risk/Return Summary section for the for the International Developed Markets Fund in the Prospectus listed above:

Russell Investment Management, LLC (“RIM”) provides or oversees the provision of all investment advisory and portfolio management services for the Fund. The Fund is advised by RIM and multiple money managers unaffiliated with RIM pursuant to a multi-style (e.g., growth, value, market-oriented and defensive) and multi-manager approach. The Fund’s money managers have non-discretionary asset management assignments pursuant to which they provide a model portfolio to RIM representing their investment recommendations, based upon which RIM purchases and sells securities for the Fund. RIM manages Fund assets not allocated to money manager strategies and utilizes quantitative and/or rules-based processes and qualitative analysis to assess Fund characteristics and invest in securities and instruments which provide the desired exposures. RIM may use strategies based on indexes. RIM also manages the Fund’s cash balances. The Fund usually, but not always, pursues a strategy to be fully invested by exposing all or a portion of its cash to the performance of appropriate markets by purchasing equity securities and/or derivatives, which typically include index futures contracts and forward currency contracts. The Fund may use derivatives, including stock options, country index futures and swaps or currency forwards, to (1) manage country and currency exposure as a substitute for holding securities directly or (2) facilitate the implementation of its investment strategy. The Fund may use derivatives to take both long and short positions.

- (ii) The following replaces the list of money managers in the sub-section entitled “Management” in the Risk/Return Summary section for the International Developed Markets Fund in the Prospectus listed above:

- Intermede Investment Partners Limited
- Wellington Management Company LLP
- Pzena Investment Management LLC

**II. MANAGEMENT OF THE FUNDS:** The following replaces the tenth paragraph in the section entitled “Management of the Funds” in the Prospectus listed above:

Each Fund that lends its portfolio securities invests all or a portion of its collateral received in securities lending transactions in an unregistered cash management fund advised by RIM. RIM charges a management fee of 0.12% to this unregistered fund. Out of the management fee, RIM pays certain expenses of the unregistered fund, including an administrative fee of 0.0025% to RIFUS. RIM retains the balance of the management fee.

**III. INTERNATIONAL DEVELOPED MARKETS FUND INVESTMENT OBJECTIVE AND INVESTMENT STRATEGIES:** The following replaces the third paragraph in the sub-section entitled

“Principal Investment Strategies” for the International Developed Markets Fund in the Prospectus listed above:

RIM provides or oversees the provision of all investment advisory and portfolio management services for the Fund. The Fund is advised by RIM and multiple money managers unaffiliated with RIM pursuant to a “multi-style, multi-manager” approach. Subject to the approval of the Fund’s Board of Trustees, RIM selects, oversees and evaluates the Fund’s money managers and allocates Fund assets

among itself and multiple money manager investment strategies. The Fund's money managers have non-discretionary asset management assignments pursuant to which they provide a model portfolio to RIM representing their investment recommendations, based upon which RIM purchases and sells securities for the Fund. RIM manages Fund assets not allocated to money manager strategies. RIM also manages the Fund's cash balances. RIM may also manage portions of the Fund during transitions between money managers.

**IV. MONEY MANAGER INFORMATION:** The following replaces the information in the "Money Manager Information" section for the International Developed Markets Fund in the Prospectus listed above:

**International Developed Markets Fund**

Intermede Investment Partners Limited, 75 Wells Street, Third Floor London W1T 3QH, United Kingdom.

Pzena Investment Management LLC, 320 Park Avenue, 8th Floor, New York, NY 10022.

Wellington Management Company LLP, 280 Congress Street, Boston, MA 02210.

RUSSELL INVESTMENT FUNDS  
Supplement dated December 27, 2019 to  
PROSPECTUS DATED May 1, 2019  
As Supplemented June 10, 2019 and  
September 11, 2019

**I. MANAGEMENT OF THE FUNDS AND UNDERLYING FUNDS:** The following replaces the thirteenth paragraph in the section entitled “Management of the Funds and Underlying Funds” in the Prospectus listed above:

Each Underlying Fund that lends its portfolio securities invests all or a portion of its collateral received in securities lending transactions in an unregistered cash management fund advised by RIM. RIM charges a management fee of 0.12% to this unregistered fund. Out of the management fee, RIM pays certain expenses of the unregistered fund, including an administrative fee of 0.0025% to RIFUS. RIM retains the balance of the management fee.

**II. INVESTMENT OBJECTIVE AND INVESTMENT STRATEGIES OF THE UNDERLYING FUNDS:**

- (i) The following replaces the second paragraph in the sub-section entitled “Principal Investment Strategies” for the RIF International Developed Markets Fund in the Prospectus listed above:

Russell Investment Management, LLC (“RIM”) provides or oversees the provision of all investment advisory and portfolio management services for the Fund. The Fund is advised by RIM and multiple money managers unaffiliated with RIM pursuant to a multi-style (e.g., growth, value, market-oriented and defensive) and multi-manager approach. The Fund’s money managers have non-discretionary asset management assignments pursuant to which they provide a model portfolio to RIM representing their investment recommendations, based upon which RIM purchases and sells securities for the Fund. RIM manages Fund assets not allocated to money manager strategies and utilizes quantitative and/or rules-based processes and qualitative analysis to assess Fund characteristics and invest in securities and instruments which provide the desired exposures. RIM may use strategies based on indexes. RIM also manages the Fund’s cash balances. The Fund usually, but not always, pursues a strategy to be fully invested by exposing all or a portion of its cash to the performance of appropriate markets by purchasing equity securities and/or derivatives, which typically include index futures contracts and forward currency contracts. The Fund may use derivatives, including stock options, country index futures and swaps or currency forwards, to (1) manage country and currency exposure as a substitute for holding securities directly or (2) facilitate the implementation of its investment strategy. The Fund may use derivatives to take both long and short positions.

- (ii) The following replaces the second paragraph in the sub-section entitled “Principal Investment Strategies” for the RIC Global Equity Fund in the Prospectus listed above:

Russell Investment Management, LLC (“RIM”) provides or oversees the provision of all investment advisory and portfolio management services for the Fund. The Fund is advised by RIM and multiple money managers unaffiliated with RIM pursuant to a multi-style (e.g., growth, value, market-oriented and defensive) and multi-manager approach. The Fund’s money managers have non-discretionary asset management assignments pursuant to which they provide a model portfolio to RIM representing their investment recommendations, based upon which RIM purchases and sells securities for the Fund. RIM manages Fund assets not allocated to money manager strategies and utilizes quantitative and/or rules-based processes and qualitative analysis to assess Fund characteristics and invest in securities and instruments which provide the desired exposures. RIM may use strategies based on indexes. RIM also manages the Fund’s cash balances. The Fund usually, but not always, pursues a strategy to be fully invested by exposing all or a portion of its cash to the performance of appropriate markets by

(continued on reverse side)

purchasing equity securities and/or derivatives, which typically include index futures contracts and forward currency contracts. The Fund may use derivatives, including stock options, country index futures and swaps or currency forwards, to (1) manage country and currency exposure as a substitute for holding securities directly or (2) facilitate the implementation of its investment strategy. The Fund may use derivatives to take both long and short positions.

- (iii) The following sentence in the sub-section entitled “Principal Investment Strategies” for the RIC Unconstrained Total Return Fund in the Prospectus listed above is deleted:

The Fund is classified as a “non-diversified fund” under the Investment Company Act of 1940, as amended, which means that a relatively high percentage of the Fund’s assets may be invested in a limited number of issuers.

### **III. RISKS:**

The following paragraph is deleted in the Prospectus listed above:

#### **Non-Diversification Risk**

A non-diversified fund is subject to additional risk. To the extent an Underlying Fund invests a relatively high percentage of its assets in the securities of a single issuer or group of issuers, an Underlying Fund’s performance will be more vulnerable to changes in the market value of the single issuer or group of issuers, and more susceptible to risks associated with a single economic, political or regulatory occurrence, than it would be if the Underlying Fund were a diversified fund.

This Supplement and Notice describes changes to the investment options available under your variable annuity contract (the “Contract”) issued by the Northwestern Mutual Life Insurance Company (the “Company”).

Unless notice is provided to the contrary, the Company anticipates that on or around May 1, 2020 it will automatically transfer any amounts you have in Divisions investing in the following portfolios from the portfolio’s current Rule 12b-1 share class (current class) to a share class of the same portfolio that does not have a Rule 12b-1 fee (new class):

<b>Fund Family</b>	<b>Portfolio</b>	<b>Current Class</b>	<b>New Class</b>
Fidelity® Variable Insurance Products	Fidelity® VIP Mid Cap Portfolio	Service Class 2 Shares	Initial Class Shares
Fidelity® Variable Insurance Products	Fidelity® VIP Contrafund® Portfolio	Service Class 2 Shares	Initial Class Shares
Credit Suisse Trust	Commodity Return Strategy Portfolio	Class 1 Shares	Class 2 Shares

The portfolios will continue to be managed by the same investment advisor according to the same investment objectives and policies and for the same investment advisory and other fee structure as before the transaction. However, expenses related to investment in the new class of the portfolios will not reflect a 0.25% Rule 12b-1 fee. After the transaction the portfolios’ current class will no longer be available for investment under the Contract.

This change will not result in a change in your Contract Value nor will your rights or our obligations under the Contract be altered except that allocations as of the date of the transaction to the current Rule 12b-1 class will be replaced with allocations to the new, non-Rule 12b-1 class, including any systematic allocations currently in place such as dollar-cost average programs, rebalancing, asset allocation model or other scheduled transactions. You will not incur any fees or charges as a result of the transaction and we or our affiliates will bear all expenses incurred in connection with the transaction. You will receive a summary or statutory prospectus for the new class of shares with the May 1, 2020 prospectus for your Contract.

If you have any questions concerning the Substitution, please contact your Registered Representative or the Annuity Service Center, toll-free at 1-888-455-2232.

Please read this Supplement and Notice carefully and keep it with your Prospectus for future reference.

This Supplement is dated February 28, 2020.

This booklet contains information about the Northwestern Mutual variable insurance products and the variable investment options identified on the front cover. The variable investment options correspond with the investment divisions available under the variable insurance product ("Product"). **The information is prepared for Product owners and does not represent an offer of the Product, nor should it be used in connection with any offer, except when accompanied or preceded by the current Product prospectus or offering circular and the variable investment option prospectuses, which contain detailed information about variable investment option investment objectives and operations, and applicable fees, expenses and sales charges. Prospectuses or offering circulars may be obtained by calling the telephone number or visiting the website address listed on the inside of the front cover. You should read and carefully consider this information before you invest or send money.** The variable investment option reports are prepared from the books and records of the options. Discussions of investment performance in the reports represent the views of the options' portfolio managers as of the dates of the reports. They are not guarantees of investment results, nor should they be relied upon as investment advice or indications of current or future trading strategies of the portfolio managers. Portfolio manager views and security holdings are subject to change at any time.
